Mayhew, London Labour and London Poor, I. 267.

5. A contract by which the party signing or making the same agrees, in consideration usually of a certain sum of money, that he will accept and pay for specified securities or commodities which the party named therein, or the bearer of the contract, at or within a time named, shall, at the option of the latter, offer to sell the former at a specified price. It is used chiefly in the stock-market, for speculative purposes, and if the intent of the parties is to settle the difference of price in money, it is illegal.

Gran. And all this out of Change-Alley?
Wit. Every Shilling, Sir; all out of Stocks,
Putts, Bulls, Rams, Bears, and Bubbles.
Cibber, Refusal, i.

A *put* is an option to deliver, or not deliver, at a future day. *Bisbee and Simonds*, Law Prod. Ex., p. 50.

put[2] (put), *n.* [Also *putt;* perhaps < W. *pwt*, any short thing; cf. *pwtan*, *pwtog*, a squat woman.] A rustic; a clown; a silly fellow; a simpleton; an oddity. [Eng.]

As he gave the good-night to two or three young fellows a little before our landing, one of them, instead of returning the civility, asked us what queer old *put* we had in the boat. *Addison*, Sir Roger at Vauxhall.

What Letacre said to you upon that occasion you ought to have borne with more decency . . . than to have called him country *put*. *Steele*, Spectator, No. 263.

put[3]† (put), *n.* [< OF. *pute*, *puite* (= Pr. Sp. Pg. *puta* = It. *putta*), a prostitute, fem. of *put*, *puit*, *pout*, *pot* (= Sp. Pg. *puto* = It. *putto*), foul, bad, wicked.] A strumpet; a prostitute.

put[4]†, *n.* An obsolete form of *pit*[1].

putage (pū'tāj), *n.* [< OF. *putage* (ML. *putagium*), fornication, prostitution, < *pute*, a prostitute: see *put*[3].] In *law*, prostitution or fornication on the part of a woman.

If any heir female under guardianship were guilty of *putage*, she forfeited her part to her coheirs.
Jacob, Law Dict.

putailet†, *n.* A variant form of *pitaile*.

putamen (pū-tā'men), *n.*; pl. *putamina* (pū-tam'i-nȳ). [< L. *putamen*, a trimming or clipping, waste, husk, < *putare*, cleanse, trim, prune: see *putation*.] 1. In *bot.*, the endocarp of a fruit when hard and stony; the shell of a nut, or the stone of a stone-fruit or drupe; also, one of the pyrenæ or apparent seeds of some drupes. See *drupe* and *endocarp*, and cut under *drupe*. —2. In *ornith.*, the soft shell of an egg; a last layer of tough tenacious albumen deposited upon the soft white of the egg, forming a membrane in and upon which the hard shell is deposited.—3. In *anat.*, the outer zone of gray matter of the lenticular part of the corpus striatum of the brain. The claustrum separates the putamen from the cortex of the brain.

putaminous (pū-tam'i-nus), *a.* [< *putamen* (*-min-*) + *-ous.*] Of or pertaining to the putamen: as, a *putaminous* envelop or membrane.

putanism (pū'tā-nizm), *n.* [< F. *putanisme* (= Sp. *putanismo*, *putaismo* = It. *puttanismo*), prostitution, < *putain* (= It. *puttana*), a prostitute, < *pute*, a prostitute: see *put*[3].] Customary lewdness or prostitution in a female. *Bailey.*

putation (pū-tā'shon), *n.* [< ME. *putacion*, < OF. *putation*, < L. *putatio*(*n-*), a pruning, lopping, also (LL.) a reckoning, computing, considering, < *putare*, pp. *putatus*, cleanse, trim, prune, fig. adjust, settle (*rationem* or *rationes*) accounts; hence reckon, count, compute, value, estimate, esteem, consider, think, suppose, believe; < *putus*, clean, clear: see *pute*.] 1. A lopping or pruning, as of trees; pruning.

Eke thai be apte unto *putacion*
Of bowes drie or foule elacion.
Palladius, Husbondrie (E. E. T. S.), p. 91.

2. The act of considering, deeming, or supposing; supposition; estimation.

If we were not the actors and sufferers, it is not possible that we should be made the natural subjects of the accidents of another's body, by any *putation*, estimation, or misjudging whatsoever. *Baxter*, Life of Faith, iii. 8.

putative (pū'tā-tiv), *a.* [< F. *putatif* = Sp. Pg. *putativo*, < LL. *putativus*, supposed, < L. *putare*, pp. *putatus*, think, suppose: see *putation*.] Supposed; reputed; commonly thought or deemed: as, the *putative* father of a child.

Thus things indifferent, being esteem'd useful or pious, became customary, and then came for reverence into a *putative* and usurp'd authority.
Jer. Taylor, Dissuasive from Popery, II. i. § 3.

Her *putative* parents had impressed,
On their departure, their enjoinment.
Browning, Ring and Book, I. 175.

Putative marriage, in *canon law*, a marriage contracted in violation of an impediment, but in good faith on the part of at least one party.

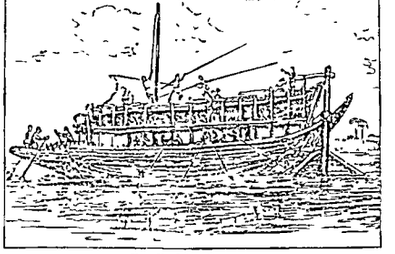
put-by† (půt'bī), *n.* An excuse for setting aside or ignoring. See quotation under *put-off*.

put-case† (půt'kās), *n.* [< *put*[1], *v.*, + obj. *case*[1], *n.*] A propounder of hypotheses, or hypothetical cases.

He used to say that no man could be a good lawyer that was not a *put-case*.
Roger North, Lord Guilford, I. 20. (*Davies.*)

putchuk, putchock (pu-chuk', pu-chok'), *n.* [E. Ind.] In India, the costus-root.—**Green or native green putchuk,** the Chinese *Aristolochia recurvilabra:* so called from some resemblance of its rootstock to the putchuk imported from India. It is used as a remedy for burns and indigestion, and, like many other species of *Aristolochia*, is regarded as an antidote to snake-poison. Physicians, however, now credit these plants with the virtues of diaphoretics, stimulant tonics, and emmenagogues only. The drug is obtained chiefly from cultivation, and is at Ningpo a large article of commerce.

pute† (pūt), *a.* [< L. *putus*, cleansed, clean, clear, pure, unmixed (usually joined with *purus*, pure: *purus putus*, or *purus ac putus*), orig. pp., < √ *pu*, in *purus*, pure, clean: see *pure*. From this adj. are also ult. E. *putamen*, *putation*, *putative*, *compute*, *count*[1], *account*, *dispute*, *repute*, etc.] Clear; pure; mere.



Arminius . . . acknowledges faith to be the pure *pute* gift of God. *Bp. Hall*, Via Media (trans.), v. (*Davies.*)

Generally pure *pute* Italians, preferred in England, transmitted the gain they got . . . into their own country. *Fuller*, Worthies, York, III. 464. (*Davies.*)

That cause . . . was pure and *pute* factions.
Roger North, Examen, p. 527. (*Davies.*)

puteal (pū'tē-al), *n.* [L., a stone curb surrounding the mouth of a well, < *puteus*, a well: see *pit*[1].] An inclosure surrounding a well to prevent persons from falling into it; a well-curb. Sculptured examples of both antiquity and the middle ages occur, among which are works of art of high excellence. See cut under *pozzo*.

puteli (půt'e-li), *n.* [E. Ind.] A broad flat-bottomed boat, used for transporting the products of India down the Ganges. It is from 40 to

Puteli of the Ganges.

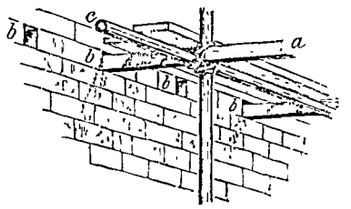
65 feet long, lightly made, and capable of conveying a heavy cargo. The puteli is surmounted by a large flat-topped shed, nearly as long as the boat, and carries a single large square sail.

puteriet†, *n.* [ME., < OF. *puterie* (= Sp. *puteria*; ML. reflex *puteria*), prostitution, < *pute*, a prostitute: see *put*[3].] Prostitution. *Chaucer.*

putid† (pū'tid), *a.* [< L. *putidus*, stinking, fetid, < *putere*, stink, be rotten, < √ *pu*, = Skt. √ *pūy*, stink. Cf. *putrid.*] 1. Stinking; rotten.

This Mother of divinest Love, as pure
As is that other *putid!*
J. Beaumont, Psyche, ii. 220.

2. Mean; low; worthless; foul; dirty; disgusting.



Putid fables and ridiculous fictions.
Jer. Taylor (?), Artif. Handsomeness, p. 126.

putidity† (pū-tid'i-ti), *n.* [< *putid* + *-ity.*] The quality of being putid; foulness; vileness; meanness.

putidness† (pū'tid-nes), *n.* [< *putid* + *-ness.*] The quality of being putid; rottenness; putidity.

High-tasted sawces made with garlick or onions, purposely applied to tainted meats, to make their *putidness* less perceptible.
Bp. Gauden, Tears of the Church, p. 199. (*Davies.*)

putlog (půt'log), *n.* [< *put*[1] (?) + *log*[1].] In *carp.*, one of a number of short pieces of tim-

a, putlog; *b*, *b*, putlog-holes; *c*, ledger.

ber used in building to carry the floor of a scaffold. They are placed at right angles to the wall, one end resting on the ledgers of the scaffold, and the other in holes left in the wall, called *putlog-holes*.

putlog-hole (půt'log-hōl), *n.* One of a series of small holes left in a wall, to admit the ends of putlogs.

put-off (půt'ôf), *n.* An excuse; a shift for evasion or delay.

There be so many *put-offs*, so many put-byes, so many respects and considerations of worldly wisdom.
Latimer, Sermon of the Plough.

"We want t' man who came here for hiding last night; t' man called John Whitehead." "He came not here last night." "That's a *put-off*. He came this morning — then."
A. E. Barr, Friend Olivia, iii.

putois (F. pron. pü-two'), *n.* [F. *putois* (ML. *putacius*), a polecat, its fur, a brush made of its fur, < L. *putere*, stink: see *putid*.] A brush supposed to be made of the hair of the polecat, used by painters of ceramic ware.

putoo (půt'ö), *n.* [Cingalese.] A dish made from flour or meal from the germinal shoots of the palmyra-nut, scraped cocoanut, and jackfruit, much esteemed by the Cingalese.

Putorius (pū-tō'ri-us), *n.* [NL., < L. *putor*, a stench, < *putere*, stink: see *putid*.] An extensive genus of *Mustelidæ*, belonging to the subfamily *Mustelinæ*, having 34 teeth, instead of 38 as in *Mustela*, and containing the animals known as *weasels*, *stoats*, *ermines*, *polecats*, *ferrets*, and *minks*. They are related to the martens and sables, but are smaller, with much slenderer body and tail, and very short limbs. They inhabit nearly all countries. They are often destructive to poultry, but are beneficial in destroying rats, mice, and other vermin. Species inhabiting cold countries turn white in winter, the tip of the tail remaining black. Such furnish a highly prized fur, known as *ermine*. The common weasel, *Putorius vulgaris*, is one of the smallest species, 6 or 8 inches long, with a short tail. *P. erminea* is the common stoat or ermine. *P. fœtidus* is the polecat, of which a variety, *P. furo*, commonly an albino with pink eyes, is the domesticated ferret. The spotted polecat is *P. sarmaticus*. (See *sarmatier*.) The black-footed ferret of the western prairies of the United States is *P. (Cynomyonax) nigripes*. The bridled weasel of South America is *P. frenatus*. A Siberian form, *P. sibiricus*, is the red sable, chorok, or kolinsky (which see). An aquatic species, somewhat otter-like, is *P. lutreola*, the European mink. The American mink is *P. vison*. See cuts under *Cynomyonax*, *ermine*, *ferret*, *mink*, *polecat*, and *weasel*.

putourt, *n.* [ME., < OF. *pute*, a prostitute: see *put*[3].] A pimp; a procurer; a keeper of a brothel. *Chaucer.*

put-pin (půt'pin), *n.* [< *put*[1], *v.*, + obj. *pin*[1].] Same as *push-pin*.

Playing at *put-pin*, doting on some glass
(Which, breath'd but on, his falsed gloss doth pass).
Marston, Scourge of Villanie, viii. 205.

Putranjiva (put-ran-jī'vä), *n.* [NL. (Wallich, 1824), from a native name in India, < Skt. *putra*, son, + *jīva*, living.] A genus of apetalous trees of the order *Euphorbiaceæ* and tribe *Phyllantheæ*. It is characterized by numerous staminate flowers in dense heads at the nodes, each with a slender unequally five-lobed calyx and two or three stamens; pistillate flowers with three short spreading styles expanded into broad fleshy papillose branches; and an ovary of three carpels each with two ovules, becoming in fruit an ovoid drupe with one cell and one seed. The two species are natives of the mountains of central and southern India, and are large timber-trees with close-grained and very hard wood, bearing rigid and entire veiny alternate leaves, and axillary flowers, the staminate numerous and short-stalked and the pistillate one or few and long-stalked. *P. Roxburghii* is known in India as *wild olive*.

putredinous (pū-tred'i-nus), *a.* [< OF. *putredineux* = Pg. It. *putredinoso*, < LL. *putredo* (*-din-*), rottenness, < L. *putrere*, be putrid: see *putrid*.] Proceeding from putrefaction, or partaking of the putrefactive process; having an offensive smell.

A *putredinous* ferment coagulates all humours, as milk with rennet is turned. *Floyer*, Animal Humours.

putrefacient (pū-trē-fā'shient), *a.* and *n.* [= Pg. *putrefaciente*, < L. *putrefacien(t-)s*, ppr. of *putrefacere*, putrefy: see *putrefy*.] I. *a.* Same as *putrefactive*.

Putrefacient action on the blood and tissues after the lapse of some hours. *Alien. and Neurol.*, IX. 363.

II. *n.* An agent or a substance that produces putrefaction.

putrefacted† (pū'trē-fak-ted), *a.* [Also *putrifacted*; < L. *putrefactus*, pp. of *putrefacere*, putrefy, + *-ed*[2].] Putrid; putrefied.

Vermine bred of *putrifacted* slime.
Marston, Antonio and Mellida, II., iv. 4.

putrefaction (pū-trē-fak'shon), *n.* [Also *putrifaction*; < ME. *putrifaccioun*, < OF. *putrefaction*, F. *putréfaction* = Pr. *putrefaccio* = Sp. *putrefaccion* = Pg. *putrefacção* = It. *putrefazione*, < LL. *putrefactio(n-)*, < L. *putrefacere*, pp. *putrefactus*, putrefy: see *putrefy*.] 1. The act or process of putrefying; the decomposition of animal and vegetable substances, attended by the evolution of fetid gases. Putrefaction is at present believed to be a result of the activity of organisms of the simplest form — the *Schizomycetes*. It can therefore take place only when the conditions are favorable for the life and growth of these organisms. A temperature of from 60° to 80° F., a moderate degree of humidity, and limited access of air are the conditions most favorable to putrefaction. Extremes of heat and cold, salt, sugar, vinegar, carbolic acid, corrosive sublimate, and other antiseptics prevent putrefaction by destroying or rendering inactive the organisms which induce it. The chemical changes in a putrefying body are most complex. From proteid bodies are formed leucin, tyrosin, a considerable number of alkaloids, the ptomaines, compound ammonias, hydrogen sulphid, and many other solid and gaseous products. See *fermentation*, and *germ theory* (under *germ*).

Alle philosophoris seyn that the feuere contynuele is gendrid of *putrifaccioun* of blood and of corrupcioun of humouris. *Book of Quinte Essence* (ed. Furnivall), p. 21.

All creatures that have breath in their nostrils must suddenly return to *putrefaction*.
I. Walton, Complete Angler, p. 31.

Pasteur proved that in the special fermentation which bears the name of *putrefaction* the primum movens of the *putrefaction* resides in microscopic vibrios of absolutely the same order as those which compose the butyric ferment. *Life of Pasteur* (trans.), p. 57.

2. Putrefied matter.

putrefactious† (pū-trē-fak'shus), *a.* [< *putrefact(ion)* + *-ous*.] Putrefying; putrid.

Drunkennesse, whose *putrefactious* slime
Darkens the splendour of our common wealth.
Times' Whistle (E. E. T. S.), p. 70.

putrefactive (pū-trē-fak'tiv), *a.* [Also *putrifactive*; = F. *putréfactif* = Sp. Pg. *putrefactivo* = It. *putrefattivo*, < L. *putrefactus*, pp. of *putrefacere*, putrefy: see *putrefy*.] 1. Pertaining to putrefaction: as, the *putrefactive* smell or process, or the *putrefactive* fermentation.

If the bone be corrupted, the *putrefactive* smell will discover it. *Wiseman*, Surgery.

There were small signs yet of the acetous and *putrefactive* stages which were to follow in the victory and decline of Puritanism. *Lowell*, Among my Books, 1st ser., p. 154.

2. Causing putrefaction.

The vessels of the living body, whether of man or animals, are sealed up beyond the reach of *putrefactive* germs so long as they are in a sound and healthy state.
S. B. Herrick, Wonders of Plant Life, p. 77.

putrefactiveness (pū-trē-fak'tiv-nes), *n.* Putrefactive character, quality, or condition. Also *putrifactiveness*.

putrefiable (pū'trē-fī-a-bl), *a.* [Also *putrifiable*; < *putrefy* + *-able*.] Liable to putrefy; subject to or causing putrefaction.

For absorption of *putrefiable* materials Esmarch has used with great satisfaction tuf enclosed in gauze bags.
W. T. Belfield, Rel. of Micro-Org. to Disease, p. 60.

putrefier (pū'trē-fī-ėr), *n.* A putrefacient. Also *putrifier*.

An account of a series of experiments upon *putrefiers* and antiseptics. *Workshop Receipts*, 2d ser., p. 196.

putrefy (pū'trē-fī), *v.*; pret. and pp. *putrefied*, ppr. *putrefying*. [Also *putrify*; < ME. *putrefien*, < OF. *putrefier*, F. *putréfier* = Sp. Pg. *putrificar* (< ML. **putrificare*) = It. *putrefare*, < L. *putrefacere*, cause to rot, putrefy, *putrefieri*, rot, putrefy, < *putrere*, be rotten (see *putrid*), + *fieri*, pass. of *facere*, make, do.] I. *trans.* 1. To render putrid; cause to decay with an offensive odor; cause to become fetid by rotting. See *putrefaction*.—2. To make carious or gangrenous.

A wound was so *putrefied* as to endanger the bone
Sir W. Temple.

3. To corrupt; make foul or offensive. [Rare.]

They would but stink and *putrefy* the air.
Shak., 1 Hen. VI., iv. 7. 90.

II. *intrans.* To become putrid; decay with a fetid smell. See *putrefaction*.

Wounds and bruises, and *putrifying* sores. Isa. i. 6.

Whenne they shewe uppe thaire fertilitee,
So turne hem with the plough to *putrifie*;
And after that thi lande shal multiplie.
Palladius, Husbondrie (E. E. T. S.), p. 182.

Many substances in nature which are solid do *putrify* and corrupt into worms.
Bacon, Advancement of Learning, i. 43.

=Syn. *Decay*, *Corrupt*, etc. See *rot*.

putrescence (pū-tres'ens), *n.* [< F. *putrescence* = It. *putrescenza*; as *putrescen(t)* + *-ce*.] Putrescent character or condition; tendency to putridity or decay; a putrid state.

We must confess in the common *putrescence* it may promote elevation, which the breaking of the bladder of gall, so small a part in man, cannot considerably advantage.
Sir T. Browne, Vulg. Err., iv. 6.

In attempting to sterilize a putrescible solution by means of cold, it was found that, though in some cases *putrescence* was delayed, in no case were the organisms completely destroyed. *Science*, VI. 393.

putrescent (pū-tres'ent), *a.* [< OF. *putrescent* = It. *putrescente*, < L. *putrescen(t-)s*, ppr. of *putrescere*, grow rotten, decay, freq. from *putrere*, be rotten or putrid: see *putrid*.] 1. Becoming or growing putrid, or fetidly rotten; in course of putrefying; tainted with putrefaction or decay: as, *putrescent* flesh.

Stately, externally powerful, although undermined and *putrescent* at the core, the death-stricken empire still dashed back the assaults of its barbarous enemies.
Motley, Dutch Republic, I. 18.

If from the hospitals . . .
All the diseases in one moat were gathered,
Such was it here, and such a stench came from it
As from *putrescent* limbs is wont to issue.
Longfellow, tr. of Dante's Inferno, xxix. 51.

2. Of or pertaining to the process of putrefaction: as, a *putrescent* smell.

putrescible (pū-tres'i-bl), *a.* [< OF. (and F.) *putrescible* = It. *putrescibile*, < L. *putrescere*, grow rotten, + *-ible*.] Subject to putrefaction; liable to become putrid: as, *putrescible* substances.

It does not appear to be *putrescible*.
Philosophical Transactions (1793), i. § 2.

Finely divided charcoal is usually stated to have strong antiseptic powers. It certainly has a remarkable action upon *putrescible* substances.
W. A. Miller, Elem. of Chem., § 355.

putrid (pū'trid), *a.* [< F. *putride* = Sp. *pútrido* = Pg. It. *putrido*, < L. *putridus*, rotten, corrupt, < *putrere*, be rotten, *putris*, rotten; cf. *putere*, be rotten, Ir. *putar*, stinking, L. *pus*, matter, etc.: see *putid* and *pus*.] 1. In a state of decay or putrefaction; exhibiting putrefaction; corrupt; fetid from rottenness; stinking: said of animal and vegetable bodies: as, *putrid* flesh.

The wine to *putrid* blood converted flows.
Waller, Æneid, iv.

A wide and melancholy waste
Of *putrid* marshes. *Shelley*, Alastor.

2. Indicating a state of putrefaction; proceeding from or pertaining to putrefaction: as, a *putrid* scent.—**Putrid fever.** See *fever*[1].—**Putrid sore throat**, gangrenous pharyngitis.

putridity (pū-trid'i-ti), *n.* [= F. *putridité* = It. *putridità*; as *putrid* + *-ity*.] 1. The state of being putrid; corruption; fetid rottenness.—2. Putrid matter.

A hundred and thirty corpses of men, nay of women and even children, . . . lie heaped in that glacière; putrid under *putridities*. *Carlyle*, French Rev., II. v. 3.

putridness (pū'trid-nes), *n.* Putrid character or condition.

putrifacted†, **putrifaction**, etc. See *putrefacted*, etc.

putrification (pū'tri-fi-kā'shon), *n.* [< *putrefy* + *-ation* (see *-fy*).] Putrefaction.

Putrification must nedes be in a bodye.
Confutation of N. Shaxton (1546).

putrify, *v.* See *putrefy*.

putry[1]† (pū'tri), *a.* [< L. *putris*, *putridus*, rotten: see *putrid*.] Putrid.

Howl not, thou *putry* mould! groan not, ye graves!
Marston, Antonio and Mellida, II. (*Richardson.*)

putry[2]†, *n.* Same as *puteric*.

putt[1] (put), *v. i.* [A spelling of *put*[1]; obsolete in the general sense.] In *golf-playing*, to play with a putter; play when the ball lies at a short distance from the hole.

putt[1] (put), *n.* [< *putt*[1], *v.*] In *golf-playing*, a stroke made with a putter, or made in attempting to hole a ball.

putt[2], *n.* See *put*[2].

puttah, *n.* Same as *patah*.

putter[1] (půt'ėr), *n.* [< *put*[1] + *-er*[1].] 1. One who puts or places: as, a *putter* of obstacles in one's way.—2. One who puts or hauls coal from the place where it is mined to the point

from which it is raised to the surface; one who transports coal on any underground road. Also called *haulier*, *drawer*, and *trammer*. [Little, if at all, used in the United States.]—3. One who puts or throws, especially a stone: as, he is but a poor *putter*. [In this sense pronounced put'ėr in Scotland.]

> Fame saying that Troy trains vp approvèd sons
> In deeds of arms, braue *putters*-off of shafts,
> For winging lances, masters of their crafts.
> *Chapman*, Odyssey, xviii. 379.

4 (put'ėr). In *golf-playing*, a club with a stiff and comparatively short shaft, generally used when the ball is on the putting-green.—**Putter on.** (*a*) One who urges, instigates, or incites; an instigator or inciter.

> They vent reproaches
> Most bitterly on you, as *putter on*
> Of these exactions. *Shak.*, Hen. VIII., i. 2. 24.

(*b*) One who puts or places something on something else.—**Putter out**, formerly, one who deposited money on going abroad, on condition of receiving a very much larger sum on his return, the money being forfeited in case of his non-return. This mode of gambling was practised in the reigns of Elizabeth and James I. On dangerous expeditions the money received was sometimes as much as five pounds for every pound deposited.

> Or that there were such men
> Whose heads stood in their breasts? which now we find
> Each *putter-out* of five for one will bring us
> Good warrant of. *Shak.*, Tempest, iii. 3. 48.

putter[2] (put'ėr), *v. i.* A variant of *potter*[2].

> Lies abed Sunday morning, and gets up late to *putter* with the furnace. *The Century*, XXVI. 635.

putti (pùt'ti), *n. pl.* [It., pl. of *putto*, a little child, < L. *putus*, a boy, child: see *pupil*[1].] Representations of Cupid-like nude children common in the art of the fifteenth and following centuries, especially in Italy.

puttier (put'i-ėr), *n.* [< *putty*, *v.*, + *-er*[1].] One who putties; one who fills up or cements with putty, as a glazier.

> Cracked old houses where the painters and plumbers and *puttyers* are always at work.
> *Thackeray*, Lovel the Widower, ii.

putting-green (put'ing-grēn), *n.* That part of a golfing-ground which surrounds a hole: it is usually carefully prepared and preserved.

> Some of the *putting-greens* [at St. Andrews] are not what they should be, . . . but others, again, are things of beauty. The green of the "hole o' cross" is probably the best in all the world of golf.
> *Golf* (Badminton Library), p. 313.

putting-stone (put'ing-stōn), *n.* In Scotland, a heavy stone to be thrown with the hand, raised and thrust forward from the shoulder: chiefly used in gymnastic exercises or athletic sports.

> She lifted the heavy *putting-stane*,
> And gave a sad "Ohon!"
> *Rose the Red and White Lilly* (Child's Ballads, V. 177).

putto, *n.* See *puttoo*.

puttock (put'ok), *n.* [< ME. *puttok*, *potok*; origin uncertain.] A kind of hawk. (*a*) The kite or glede, *Milvus regalis*. (*b*) The common buzzard, *Buteo vulgaris*.

> The Hen which when the *Puttocke* hath caught hir Chekin beginneth to cackle.
> *Lyly*, Euphues, Anat. of Wit, p. 92.

> Who finds the partridge in the *puttock's* nest
> But may imagine how the bird was dead,
> Although the kite soar with unbloodied beak?

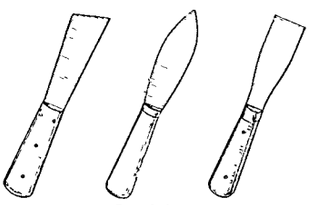
puttoo (put'ö), *n.* [Also *putto*; < Hind. *pattū*.] A fabric made in Cashmere and neighboring countries of the longer and coarser wool of the goat, after the fine and soft undergrowth has been separated from it. See *cashmere shawl*, under *cashmere*. Also called *Cashgar cloth*.

putty (put'i), *n.* [< OF. *potee*, brass, copper, tin, etc., calcined, also a potful, F. *potée*, powdered tin, oxid, putty, also a potful, < *pot*, a pot: see *pot*[1]. Cf. *potin*, *pottain*, *pot-metal*.] 1. A kind of paste or cement compounded of whiting, or soft carbonate of lime, and linseed-oil, mixed to the consistence of dough. In this state it is used by glaziers for fixing the panes of glass in window-sashes etc., and also by house-painters to stop up holes and cavities in woodwork before painting. It is often tinted with various pigments to make it agree in color with the surface on which it is used.

2. A powder of oxid of tin, used in polishing glass and steel: sometimes called *jewelers' putty*.—3. A very fine cement, used by plasterers and stone-masons, made of lime only. See the quotation.

> Fine stuff [mortar made of fine white lime] very carefully prepared, and so completely macerated as to be held in solution in water, which is allowed to evaporate till it is of sufficient consistence for working, is called *putty*, plasterers' *putty*. *Workshop Receipts*, 1st ser., p. 121.



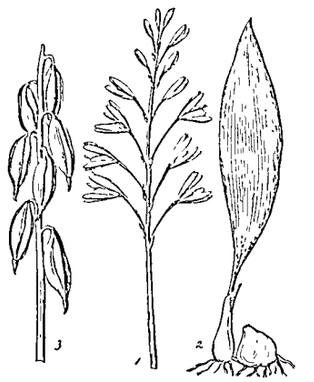
4. A mixture of ground materials in which in potteries earthenware is dipped for glazing.—5. A mixture of clay and horse-dung used in making molds in foundries.—**Glycerin putty**, a kind of putty, more properly a cement, made of glycerin and litharge.

putty (put'i), *v. t.*; pret. and pp. *puttied*, ppr. *puttying*. [< *putty*, *n.*] To cement with putty; fill up with putty.

putty-eye (put'i-ī), *n.* A name given by pigeon-fanciers to the eyes of pigeons which have a thick orbit of a fleshy character.

putty-faced (put'i-fāst), *a.* Having a face resembling putty in pastiness or color.

putty-knife (put'i-nīf), *n.* A knife with a blunt,



Putty-knives.

flexible blade, used by glaziers for laying on putty; a stopping-knife.

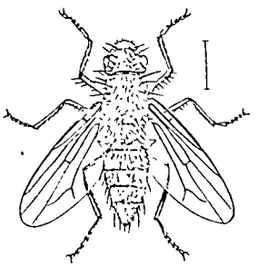
putty-powder (put'i-pou″dėr), *n.* An artificially prepared oxid of tin (SnO_2), sometimes mixed with oxid of lead (PbO), used for polishing glass and other substances.

puttyroot (put'i-röt), *n.* An American orchid, *Aplectrum hiemale*, producing every year on a slender rootstock a corm an inch in diameter, filled with an extremely glutinous matter, which has been used as a cement, whence the name.

Puttyroot (*Aplectrum hiemale*).
1, upper part of flowering scape; 2, a leaf from a bulb of the season, showing attachment to bulb of preceding season; 3, fruiting scape.

Each corm persists till there are three or four horizontally connected. The newest sends up, late in summer, a single much-veined and plaited leaf, which lasts through the winter, and in spring a scape a foot or more high, with a loose raceme of brownish flowers. Also called *Adam and Eve*.

putty-work (put'i-wėrk), *n.* Decoration by means of a composition in which ornaments are modeled while it is soft, and which grows very hard. Coffers, picture-frames, shrines, etc., were elaborately decorated in this material in Italy in the sixteenth and seventeenth centuries, color being often added to the ornaments in relief.



put-up (pùt'up), *a.* Concocted or planned by intimates or insiders, but so as to appear to emanate from or be the work of others; speciously conceived, planned, or carried out: as, a *put-up* job. [Colloq.]

> "Well, master," said Blathers, . . . "this warn't a *put-up* thing." "And what the devil's a *put-up* thing?" demanded the doctor impatiently. "We call it a *put-up* robbery, ladies," said Blathers, turning to them as if he pitied their ignorance, but had a contempt for the doctor's, "when the servants is in it."
> *Dickens*, Oliver Twist, xxxi. (*Davies.*)

puture, pulture (pū'tūr, pul'tūr), *n.* [< OF. *peuture*, *puture*, *pouture*, *poture*, *pulture*, food, nourishment, < ML. **pultura*, *putura*, food, pottage, < L. *puls* (*pult-*), a thick broth or pottage: see *pulse*[2].] A custom claimed by keepers in forests, and sometimes by bailiffs of hundreds, to take food for man, horse, and dog from the tenants and inhabitants within the perambulation of the forest, hundred, etc.

> In 6 Henry VIII. (1514) *puture* was paid for the forest which was reclaimed towards the close of that reign.
> *Baines*, Hist. Lancashire, II. 23.

puxi (puk'si), *n.* [Mex. Ind.] The larvæ of the various dipterous insects of the genus *Ephydra*, which inhabit the alkali lakes of western North America, and are made into edible cakes: so called by Mexican Indians and Spanish Americans. See *Ephydra*, *ahuatle*, and *koochahhee*.

Puxi Fly (*Ephydra californica*).
(Line shows natural size.)

puy[1], *n.* Same as *poy*.

puy[2] (pwē), *n.* [F. *puy*: see *poy*, *pew*[2].] One of the small volcanic cones which are common in Auvergne, central France.

> It is a most striking sight to see the small cones or *Puys* of the later date, of which there are not fewer than 230, still looking as fresh and perfect as though they had been in eruption within the present century.
> *Prestwich*, Geol., I. 363.

Puya[1] (pū'yȧ), *n.* [NL. (Molina, 1782), from a native name in Chili.] A genus of monocotyledonous plants of the order *Bromeliaceæ*, unlike the rest of its tribe *Pitcairnieæ* in its loculicidal, not septicidal, dehiscence, and otherwise characterized by a filiform style, three-valved capsule, and numerous seeds surrounded by a wing. There are 3 or 4 species, natives of Peru and Chili. They bear narrow spiny leaves crowded at the base or apex of the unbranched and sometimes arborescent stem, and a terminal simple or pyramidally compound raceme, with a single showy flower under each bract. Several species are in cultivation under glass, sometimes under the former name *Pourretia*, including white and yellow, and less often blue, pink, and green flowering varieties. See *chagual gum*, under *gum*[2].

puya[2] (pū'yȧ), *n.* 1. See *pooa*.—2. A textile fiber yielded by the pooa.

puyssancet, puyssant†. Middle English forms of *puissance*, *puissant*.

puzzel†, *n.* [Appar. < OF. *pucelle*, a girl, maid: see *pucelle*. Some compare It. *puzzolente*, filthy.] A dirty drab.

> Pucelle or *puzzel*, dolphin or dogfish.
> *Shak.*, 1 Hen. VI., i. 4. 107.

> No, nor yet any droyle or *puzzel* in the country but will carry a nosegay in her hand.
> *Stubbes*, Anat. of Abuses. (*Nares.*)

puzzle (puz'l), *n.* [By apheresis, as if **pozel*, **posal*, from early mod. E. *opposal*, *opposelle*, *apposelle*, < ME. *opposayle*, a question put, < *oppose*n, *appose*n, E. *oppose*, by apheresis *pose*, question: see *oppose* and *pose*[3].] 1. A difficult question or problem; specifically, a riddle, or a toy or contrivance which is designed to try one's ingenuity.

> Keep it like a *puzzle*, chest in chest,
> With each chest lock'd and padlock'd thirty-fold, . . .
> I yet should strike upon a sudden means
> To dig, pick, open, find, and read the charm.
> *Tennyson*, Merlin and Vivien.

2. Embarrassment; perplexity: as, to be in a *puzzle*, or in a state of *puzzle*.

puzzle (puz'l), *v.*; pret. and pp. *puzzled*, ppr. *puzzling*. [< *puzzle*, *n.*] **I.** *trans.* 1. To perplex or pose with or as with difficult points, problems, or questions; put to a stand; gravel.

> My Thoughts are now *puzzled* about my Voyage to the Baltic Sea upon the King's Service, otherwise I would have ventured upon an Epithalamium.
> *Howell*, Letters, ii. 72.

> A very shrewd disputant in those points is dexterous in *puzzling* others. *Dr. H. More*, Divine Dialogues.

> You meet him under that name incognito; then, if an accident should happen, both you and she may be safe, and *puzzle* the truth. *Steele*, Lying Lover, ii. 1.

2. To entangle; make intricate.

> The ways of heaven are dark and intricate,
> *Puzzled* in mazes and perplex'd with error.
> *Addison*, Cato, i. 1.

> They disentangle from the *puzzled* skein . . .
> The threads of politic and shrewd design
> That ran through all his purposes.
> *Cowper*, Task, iii. 145.

3. To resolve or discover by long cogitation or careful investigation; make out by mental labor; cogitate: with *out*.

> He endeavoured to *puzzle* its principle *out* for himself.
> *Gladstone.*

The bloodhound has a much more delicate nose than any other known breed of hound, and can *puzzle out* a cold scent under the most adverse conditions.
The Century, XXXVIII. 190.

=Syn. 1. *Perplex*, etc. (see *embarrass*), pose, nonplus, bewilder, stagger.

II. *intrans.* To be bewildered; be perplexed or posed.

"And now," he cried, "I shall be pleased to get
Beyond the Bible—there I *puzzle* yet." *Crabbe.*

puzzle-cup (puz'l-kup), *n.* Same as *surprise-cup*.

A two-handled *puzzle-cup* painted with flowers.
Hamilton Sale Catalogue, 1882, No. 806.

puzzledom (puz'l-dum), *n.* [< *puzzle* + *-dom*.] A puzzled or perplexed condition; bewilderment. [Colloq.]

I was resolved to travel with him into the land of *puzzledom*. *Richardson*, Clarissa Harlowe, VI. 367. (*Davies.*)

The wonderful interior of the double basilica opens upon us. The first feeling is simply *puzzledom*.
E. A. Freeman, Venice, p. 70.

puzzlehead (puz'l-hed), *n.* One who puzzles over matters that are plain and intelligible; a person of confused notions.

"All this theistic philosophy of yours only means so much grist to their mill in the end." "They don't see it in that light themselves," said Robert, smiling. "No," returned the Squire, "because most men are *puzzleheads*."
Mrs. Humphry Ward, Robert Elsmere, xii.

puzzle-headed (puz'l-hed'ed), *a.* Given to puzzling over matters that are plain and intelligible; also, characteristic of puzzleheads.

He [Maittaire] seems to have been a *puzzle-headed* man, with a large share of scholarship, but with little geometry or logick in his head, without method, and possessed of little genius. *Johnson*, in Boswell, an. 1780.

puzzle-headedness (puz'l-hed'ed-nes), *n.* The state of being puzzle-headed or a puzzlehead.
The Academy, April 26, 1890, p. 291.

puzzle-jug (puz'l-jug), *n.* A surprise-cup.

puzzle-lock (puz'l-lok), *n.* See *lock*[1].

At one time it used to be supposed that locks which could only be opened by setting a number of rings or disks to a particular combination of letters could not possibly be opened by anybody who was not in possession of the secret; and hence they were also called *puzzle-locks*.
Encyc. Brit., XIV. 746.

puzzlement (puz'l-ment), *n.* [< *puzzle* + *-ment*.] The state of being puzzled; bewilderment.

"I have heard of a wedding very often," said Fanny, with a pretty look of *puzzlement* and doubt, "but I don't know exactly what it means."
Bulwer, Night and Morning, v. 6.

A delightful air of *puzzlement* came over her face.
W. C. Russell, Jack's Courtship, xxvii.

puzzle-monkey (puz'l-mung'ki), *n.* [< *puzzle*, *v.*, + obj. *monkey*.] Same as *monkey-puzzle*. See *Araucaria*.

puzzle-peg (puz'l-peg), *n.* A short piece of board fastened under the lower jaw of a dog, and projecting a few inches beyond it, to prevent him from putting his nose close to the ground.

puzzler (puz'lėr), *n.* [< *puzzle* + *-er*[1].] One who or that which puzzles or perplexes.

Hebrew, the general *puzzler* of old heads.
A. Brome, Elegy on his Schoolmaster.

puzzle-ring (puz'l-ring), *n.* A number of small rings intertwined with one another so that they cannot be separated, the puzzle being to bring them together in the form of a single ring or in some other combination, as a sort of knot.

puzzling (puz'ling), *p. a.* [Ppr. of *puzzle*, *v.*] 1. Perplexing; embarrassing; bewildering.—2. Evidencing bewilderment or perplexity; easily bewildered or perplexed.

The servant is a *puzzling* fool, that heeds nothing.
Sir R. L'Estrange.

puzzlingly (puz'ling-li), *adv.* In a puzzling manner; perplexingly.

puzzolana, puzzolano (put-sō-lii'nȧ, put-sō-lii'nō), *n.* Same as *pozzuolana*.

puzzolite (puz'ō-lit), *n.* [< *puzzol*(*ana*) + *-ite*[2].] Same as *pozzuolana*.

pwys, *n.* [W., a state of rest, weight, a weight.] A Welsh weight of wool, about two pounds.

pxt. A contraction of the Latin *pinxit*, '(He) painted (it).'

pyæmia, pyæmic. See *pyemia, pyemic*.

Pyanepsia (pī-ȧ-nep'si-ȧ), *n. pl.* [< Gr. Πυανέψια (sc. ἱερά), an Athenian festival (see def.), said to be so called from a dish of beans which was then cooked and eaten, < πύανος, a bean, + ἑψειν, boil.] In ancient Athens, an annual festival of Apollo, celebrated on the 7th of the month Pyanepsion (October–November). It had the character of a harvest-feast.

pyarthrosis (pī-ȧr-thrō'sis), *n.* [NL., < Gr. πύον, pus (see *pus*), + ἄρθρωσις, a jointing: see *arthrosis*.] The presence of pus in a joint.

pyat, *n.* See *piet*.

Pycnanthemum (pik-nan'thē-mum), *n.* [NL. (F. A. Michaux, 1803), so called in allusion to the dense inflorescence; < Gr. πυκνός, thick, dense, + ἄνθεμον, blossom.] A genus of gamopetalous plants of the order *Labiatæ*, tribe *Satureineæ*, and subtribe *Menthoideæ*. It is characterized by its four nearly equal straight and divergent stamens, a calyx sometimes two-lipped, with five teeth and about thirteen nerves, and a somewhat two-lipped corolla, with five ovate lobes, the flowers in dense verticillasters, involucrate with crowded bracts, and commonly corymbosely paniculed. The 13 species, known as *mountain-mint*, and sometimes as *American basil* (see *basil*[1]), are North American, and all but one are natives of the eastern or southern United States. They are erect and rigid perennial herbs, warmly aromatic and odorous, often hoary with minute down, and with flat-topped inflorescence, frequently conspicuous by reason of large whitened floral leaves. The flowers are whitish or purple and purple-dotted. They are commonly dimorphous in having in different flowers their stamens either exserted or included. The *P. lanceolatum* is sometimes known as *Virginian thyme* or *prairie-hyssop*. See cut under *linear*.

Pycnaspideæ (pik-nas-pid'ē-ē), *n. pl.* [NL., < Gr. πυκνός, thick, dense, + ἀσπίς (ἀσπιδ-), a round shield.] In Sundevall's system of classification, the fourth cohort of scutelliplantar *Passeres*, including a heterogeneous group of chiefly Neotropical birds, such as those of the genera *Rupicola*, *Chasmorhynchus*, *Cephalopterus*, *Tityra*, and *Lipaugus*, to which are added the East Indian genera *Calyptomena*, *Eurylæmus*, and others.

pycnaspidean (pik-nas-pid'ē-ȧn), *a.* [< *Pycnaspideæ* + *-an*.] In *ornith.*, having the planta, or back of the tarsus, studded with many small irregular scales or plates, as a modification of the scutelliplantar tarsus.

pycnaster (pik-nas'tėr), *n.* [< Gr. πυκνός, thick, dense, + ἀστήρ, a star.] A kind of sponge-spicule. *Sollas.*

pycnid, pycnide (pik'nid), *n.* Same as *pycnidium*, 1.

pycnides, *n.* Plural of *pycnis*.

pycnidia, *n.* Plural of *pycnidium*.

pycnidial (pik-nid'i-ȧl), *a.* [< *pycnidi-um* + *-al*.] Relating to a pycnidium, or having its character.

pycnidiophore (pik-nid'i-ō-fōr), *n.* [< NL. *pycnidium*, q. v., + Gr. φέρειν = E. *bear*[1].] In *bot.*, a compound sporophore bearing pycnidia.

pycnidiospore (pik-nid'i-ō-spōr), *n.* [< NL. *pycnidium* + Gr. σπόρος, seed.] In *bot.*, same as *stylospore*.

pycnidium (pik-nid'i-um), *n.*; pl. *pycnidia* (-ȧ). [NL., < Gr. πυκνός, thick, dense, + dim. *-ιδιον*.] 1. In *bot.*, a receptacle in ascomycetous fungi, resembling a perithecium, in which stylospores or pycnospores are produced: same as *clinosporangium*. See *stylospore*. Also *pycnid, pycnide*.—2. [*cap.*] [NL.] In *entom.*, a genus of coleopterous insects of the family *Tenebrionidæ*. Also called *Oochrotus*. *Erichson*, 1846.

pycnis (pik'nis), *n.*; pl. *pycnides* (pik'ni-dēz). [NL., < Gr. πυκνός, thick, dense, compact.] In *bot.*, the same or nearly the same as *clinosporangium*.

pycnite (pik'nīt), *n.* [< Gr. πυκνός, thick, dense, compact, + *-ite*[2].] A compact columnar variety of topaz, from the tin-mines of Saxony and Bohemia.

Pycnocoma (pik-nok'ō-mȧ), *n.* [NL. (Bentham, 1849), < Gr. πυκνός, thick, + κόμη, hair (alluding to the stamens).] A genus of apetalous shrubs of the order *Euphorbiaceæ*, tribe *Crotoneæ*, and subtribe *Plukenetieæ*. It is characterized by numerous stamens which are often flexuous in the bud, small terminal anthers, and a long columnar style. The 8 species are equally divided in nativity between tropical Africa and the Mascarene Islands. They are shrubs, sometimes becoming small trees, bearing large entire leaves crowded at the end of the branches, and monœcious flowers in racemes in the upper axils, remarkable for the large number of the elongated stamens, often over fifty, borne on an elevated receptacle and intermixed with glands. See *bomah-nut*.

pycnoconidium (pik-nō-kō-nid'i-um), *n.*; pl. *pycnoconidia* (-ȧ). [NL., < Gr. πυκνός, thick, + NL. *conidium*, q. v.] In *mycol.*, an asexually produced spore or conidium the character of which has recently (1888) been demonstrated. It is what has been called a *spermatium* in certain lichens, and was thought to be a fertilizing organ, but on being sown on a proper medium it immediately germinated and produced a thallus.

pycnodont (pik'nō-dont), *a.* and *n.* I. *a.* Pertaining to the *Pycnodontidæ*, or having their characters

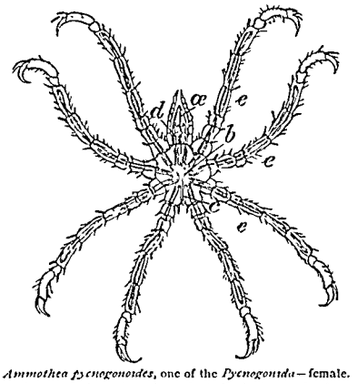
II. *n.* A fossil fish of the family *Pycnodontidæ*.

Pycnodontes (pik-nō-don'tēz), *n. pl.* [NL., pl. of *Pycnodus* (*-odont-*).] Same as *Pycnodontidæ*.

Pycnodontidæ (pik-nō-don'ti-dē), *n. pl.* [NL., < *Pycnodus* (*-odont-*) + *-idæ*.] A family or suborder of ganoid fishes, typified by the genus *Pycnodus*. The tail is homocercal; the neural arches and ribs are ossified; the roots of the ribs are but little expanded in the older genera, but enlarged in the later ones, so as to simulate vertebræ; the paired fins are not lobate; the teeth on the palate and on the sides of the mandible are obtuse; the intermaxillary teeth are incisiform; and none of the fins are fulcrate. These fishes are characteristic of the Mesozoic and Tertiary; all are extinct.

Pycnodontini (pik''nō-don-tī'ni), *n. pl.* [NL., < *Pycnodus* (*-odont-*) + *-ini*.] Same as *Pycnodontoidei*.

pycnodontoid (pik-nō-don'toid), *a.* and *n.* I. *a.* Resembling or related to a pycnodont; belonging to the *Pycnodontoidei*.



II. *n.* A member of the *Pycnodontoidei*.

Pycnodontoidei (pik''nō-don-toi'dē-ī), *n. pl.* [NL., < *Pycnodus* (*-odont-*) + *-oidei*.] A suborder of ganoid fishes, characterized by a persistent notochord, rhombic scales in pleurolepidal rows, paired fins without axial skeleton, and effulcrate and branchiostegal rays. The principal family is that of the *Pycnodontidæ*.

Pycnodus (pik'nō-dus), *n.* [NL. (Agassiz, 1833), < Gr. πυκνός, thick, + ὀδούς (ὀδοντ-) = E. *tooth*.] The typical genus of *Pycnodontidæ*.

Pycnogonata (pik-nō-gon'ȧ-tȧ), *n. pl.* [NL., < Gr. πυκνός, thick, + γόνυ (*γονατ-*), knee, joint.] Same as *Pycnogonida*.

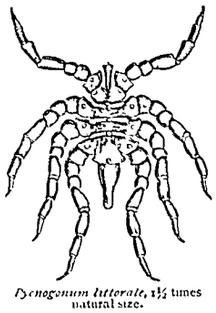
Pycnogonida (pik-nō-gon'i-dȧ), *n. pl.* [NL., < *Pycnogonum* + *-ida*.] A group of marine arthropod articulate animals, combining some characters of both *Crustacea* and *Arachnida* with others of neither of these classes; the sea-spiders. They have a four-segmented cephalothorax bearing four pairs of many-jointed legs ending in claws, and in the female a pair of additional appendages

Ammothea pycnogonoides, one of the *Pycnogonida*—female.
a, esophagus; *b*, stomach, prolonged into the limbs *e* and antennæ *d*; *c*, rectum.

between the anterior legs; a rudimentary unsegmented abdomen; a tubular or proboscis-like mouth, simple or appendaged; four ocelli; no respiratory organs; and the sexes distinct. The palpi when present have from five to nine joints and end in a claw. The group has been variously rated as a family, suborder, order, subclass, and class, and has been called or placed in *Arachnopoda*, *Araneiformia*, *Aporobranchia*, *Lævigrada*, *Nymphonacea*, *Pantopoda*, *Podosomata*, *Polygonopoda*, *Pseudarachna*, *Pycnogonata*, *Pycnogonidæ*, *Pycnogonidea*, and *Pycnogonides*. Some are parasitic, others are found moving sluggishly among seaweeds. Leading genera are *Pycnogonum*, *Phoxichilus*, *Nymphon*, and *Ammothea*. See also cut under *Nymphon*.

Pycnogonidæ (pik-nō-gon'i-dē), *n. pl.* [NL., < *Pycnogonum* + *-idæ*.] 1. A family of *Pycnogonida*, typified by the genus *Pycnogonum*, containing parasites of comparatively stout form, with relatively short and knotty legs, and tubular mouth without either mandibles or palpi.—2†. Same as the group *Pycnogonida*.

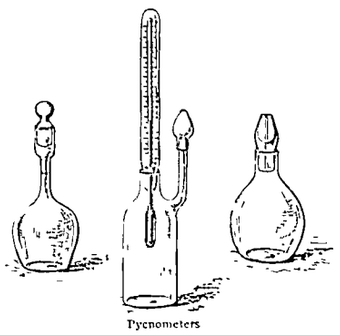
Pycnogonidea (pik''nō-gō-nid'ē-ȧ), *n. pl.* [NL.] Same as *Pycnogonida*.



Pycnogonides (pik-nō-gon'i-dēz), *n. pl.* [NL.] Same as *Pycnogonida*.

pycnogonidium (pik''nō-gō-nid'i-um), *n.*; pl. *pycnogonidia* (-ȧ). [NL., < Gr. πυκνός, thick, + NL. *gonidium*.] In *bot.*, same as *stylospore*.

pycnogonoid (pik-nog'ō-noid), *a.* and *n.* I. *a.* Resembling a sea-spider; of or pertaining to the *Pycnogonida*.



II. *n.* Any member of the *Pycnogonida*.

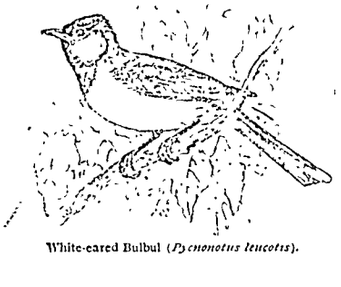
Pycnogonum (pik-nog′ō-num), *n.* [NL., < Gr. πυκνός, thick, + γόνυ, knee, joint.] The typical genus of *Pycnogonidæ*. *P. littorale* is a parasite of cetaceans, and is half an inch long.

Pycnogonum littorale, x½ times natural size.

pycnometer (pik-nom′e-tėr), *n.* [< Gr. πυκνός, thick, dense, + μέτρον, measure.] An instrument for determining the relative density or specific gravity of solid bodies; a specific-gravity flask. It consists of a glass flask with a long tubular stopper. The flask, when filled with distilled water, and when the stopper is pressed in till the water overflows through the tubule of the stopper, will at any given temperature hold a specific volume and therefore a specific weight of the liquid. The combined weight of the flask and its stopper, and the weight of water it contains when the stopper is pressed in, having been ascertained, and

Pycnometers

also the total weight of the flask and its contents after the solid body has been placed in it, the then unfilled space refilled with distilled water, and the stopper again pressed in, the weight of the solid body in air and the weight of the water displaced by it when it is put in the pycnometer can be easily determined. These are the data necessary to compute the relative density or specific gravity of the body — a unit of mass of distilled water at 4° C. divided by its apparent volume at the same temperature being the usual unit of density. This unit is written "1.000" in specific-gravity tables in which the specific gravity of bodies lighter than water is expressed in three places of decimals. See *density, densimeter, specific gravity* (under *gravity*), *volume*, and *mass*[2].



pycnometochia (pik nō-me-tō′ki-ą), *n.* [NL., < Gr. πυκνος, thick, close, crowded, + μετοχή, a participle.] Use of participles or participial clauses at short intervals; close succession of participles. Compare *oligometochia*.

pycnometochic (pik nō-me-tō′kik), *a.* [< *pycnometochia* + *-ic*.] Characterized by using or containing participles in close succession.

pycnon (pik′non), *n.* [Also *pyknon*; < Gr. πυκνον, neut. of πυκνός, thick, dense, close, compact.] 1. In *anc. Gr. music*, one of the short intervals in the chromatic or enharmonic scales, usually about equivalent to a quarter-step.— 2. In *medieval music*, a half-step or semitone.

Pycnonotidæ (pik-nō-not′i-dē), *n. pl.* [NL., < *Pycnonotus* + *-idæ*.] The bulbuls, rock-thrushes, or *Pycnonotinæ* rated as a family of *Passeres*.

Pycnonotinæ (pik″nō-nō-tī′nē), *n. pl.* [NL., < *Pycnonotus* + *-inæ*.] A subfamily of turdiform or thrush-like oscine passerine birds, placed in the family *Turdidæ*, or merged in the subfamily *Brachypodinæ*; the bulbuls or rock-thrushes, typified by the genus *Pycnonotus*.

White-eared Bulbul (*Pycnonotus leucotis*).

pycnonotine (pik-nō-nō′tin), *a.* Resembling or related to *Pycnonotus*; belonging to the *Pycnonotinæ*.

Pycnonotus (pik-nō-nō′tus), *n.* [NL. (Kuhl, 1826), < Gr. πυκνός, thick, + νῶτος, the back.] An extensive genus of Old World thrush-like passerine birds, typical of the subfamily *Pycnonotinæ* or family *Pycnonotidæ*. It contains about fifty kinds of bulbuls, ranging from Persia and Palestine to South Africa. Also spelled *Picnonotus*. See cut in preceding column.

pycnospore (pik′nō-spōr), *n.* [< Gr. πυκνός, close, + σπόρος, seed.] Same as *stylospore*. *De Bary*.

pycnostyle (pik′nō-stīl), *a.* [< Gr. πυκνός, thick, close, compact, + στῦλος, column.] In *classical columnar arch.*, according to the Vitruvian system, noting a conventional intercolumniation, less than that usually employed. It is commonly reckoned at one diameter and a half.

pyet†, *n.* See *piet*[1], *piet*[2], etc.

pyebald†, *a.* An obsolete form of *piebald*.

pyedema (pī-ē-dē′mą), *n.* [NL., < Gr. πίον, pus (see *pus*), + οἴδημα, a swelling, tumor.] Infiltration with pus.

pyelitic (pī-e-lit′ik), *a.* [< *pyelitis* + *-ic*.] Of or pertaining to pyelitis; affected with pyelitis.

pyelitis (pī-e-lī′tis), *n.* [NL., < Gr. πύελος, a trough or pan, hence the pelvis, + *-itis*.] Inflammation of the pelvis of the kidney. Also called *endonephritis*.

pyelocystitis (pī″e-lō-sis-tī′tis), *n.* [NL., < Gr. πύελος, pelvis, + κύστις, bladder, + *-itis*.] Inflammation of the renal pelvis and of the urinary bladder.

pyelonephritic (pī″e-lō-nef-rit′ik), *a.* [< *pyelonephritis* + *-ic*.] Of, pertaining to, or affected with pyelonephritis.

pyelonephritis (pī″e-lō-nef-rī′tis), *n.* [NL., < Gr. πύελος, pelvis, + νεφρός, kidney, + *-itis*.] Inflammation of the kidney and the renal pelvis.

pyemia, pyæmia (pī-ē′mi-ą), *n.* [NL. *pyæmia*, < Gr. πύον, pus (see *pus*), + αἷμα, blood.] In *pathol.*, a febrile disease caused by the absorption of pus, or certain of its constituents, or of its bacteria, with the formation of metastatic abscesses.

pyemic, pyæmic (pī-ē′mik), *a.* [< *pyemia, pyæmia* + *-ic*.] Of, pertaining to, or characterized by pyemia; of the nature of pyemia; affected with pyemia.

pyengadu (pī-eng′gą-dö), *n.* [E. Ind.] An acacia-like tree, *Xylia dolabriformis*, one of the ironwoods, found in considerable quantities in India, Burma, etc. It rises 70 or 80 feet without branches, and furnishes a reddish-brown timber in large sizes and of remarkable quality. It is heavier than water, and so hard that the Burmese work it only before seasoning. It resists decay even better than teak, and its heartwood is proof against white ants and teredo. From its power of resisting shocks, it is valued for gun-carriages, but it is also used for numerous other purposes requiring strength, hardness, and durability. Also *pynkado*.

pye-powdert, *n.* An old spelling of *piepowder*.

pyet, *n.* A variant of *piet*.

Pygæra (pī-jē′rą), *n.* [NL. (Ochsenheimer, 1810), < Gr. πυγή, rump, + αἴρειν, raise, lift up.] A genus of lepidopterous insects of the bombycid family *Notodontidæ*, occurring in Europe and Asia; the buff-tips. *P. bucephala* is an example.

pygal (pī′gal), *a.* and *n.* [< Gr. πυγή, rump, + *-al*.] I. *a.* In *zoöl.*, of or pertaining to the rump or posterior part of an animal.—**Pygal plate or shield**, in *herpet.*, one of the posterior median pieces of the carapace of a turtle. See *pygidium*, *uropygium*, and cuts under *carapace* and *Chelonia*.

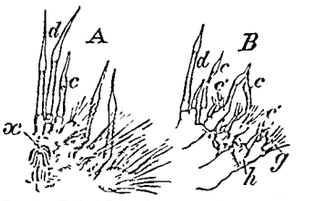
II. *n.* The posterior median or supracaudal plate of the carapace of a tortoise; a pygal shield.

pygarg (pī′gärg), *n.* [< L. *pygargus*, a kind of antelope, also a kind of eagle, < Gr. πύγαργος, a kind of antelope, also the white-tailed eagle, *Falco albicilla*, also a kind of sandpiper, *Totanus ochropus*, lit. 'white-rumped,' < πυγή, rump, + ἀργός, shining, white.] 1†. A kind of antelope, perhaps the addax.

> The hart, and the roebuck, and the fallow deer, and the wild goat, and the *pygarg* [marg. or, bison; Heb. *dishon*], and the wild ox, and the chamois. Deut. xiv. 5.

2. The osprey, sea-eagle, or fish-hawk.

pygargue, *n.* Same as *pygarg*, 2.



pygargus (pī-gär′gus), *n.*; pl. *pygargi* (-ī). [NL.: see *pygarg*.] 1. Same as *pygarg*, 2.— 2. [*cap.*] [NL.] A genus of hawks: same as *Circus*. *Koch*, 1816.

pyght†. Same as *pight*, an obsolete past participle of *pitch*[1].

pygidial (pī-jid′i-ąl), *a.* [< *pygidium* + *-al*.] Of or pertaining to the pygidium; caudal; anal; cereal.

Pygidiidæ (pī-ji-dī′i-dē), *n. pl.* [NL., < *Pygidium* + *-idæ*.] A family of nematognathous fishes, typified by the genus *Pygidium*. They have a naked body, air-bladder confined in a capsule formed by the lateral processes of the anterior vertebræ only, the dorsal generally posterior, and no adipose fin. The species, about 40, are confined to the fresh waters of South America. Also called *Trichomycteridæ*.

pygidium (pī-jid′i-um), *n.*; pl. *pygidia* (-ą). [NL., < Gr. πυγή, rump, + dim. *-ιδιον*.] 1. A posterior part of the body, in any way distinguished; an

Posterior End of *Polynoë*, a polychætous annelid.

A, from above; *B*, from below, showing pygidium, etc.; *c*, *c′*, notopodial and neuropodial cirri of last true somite of the body; *d*, cirri of pygidium; *g*, setæ; *h*, inferior tubercle; *x*, anus.

anal, caudal, or pygal part or organ: said chiefly of insects, crustaceans, and worms. (*a*) In *entom.*, the last dorsabdominal segment, when modified or specialized, as into an ovipositor, sting, anal forceps or cerci, etc. The term is much used in the classification of coleopters, hymenopters, and some of the homopters. In *Coleoptera*, the term generally applies to any part of the dorsabdominal segments which may be visible beyond the ends of the closed elytra. This is usually harder than the part covered by the elytra. When more than one segment is thus exposed, *pygidium* may be restricted to the last one, the next preceding being distinguished as *propygidium*. (*b*) The terminal division of the body of a trilobite. See cut under *Trilobita*. (*c*) The terminal segment of a worm. 2. [*cap.*] A genus of nematognaths, typical of the family *Pygidiidæ*. Later called *Trichomycterus*.—**Divided pygidium.** See *divided*.

pygmean, pigmean (pig-mē′an), *a.* [< L. *pygmæus*, < Gr. πυγμαῖος, dwarfish: see *pygmy, pigmy*.] Pertaining to a pygmy or dwarf; very small; dwarfish.

> Throng numberless, like that *pygmean* race
> Beyond the Indian mount. *Milton*, P. L., i. 780.

pygmy, pigmy (pig′mi), *n.* and *a.* [Early mod. E. also *pigmie, pigmey, pigmee*; < ME. *pigmey, pygmey, pygme* = OF. *pigme, pygme*, F. *pygmée* = Sp. *pigmeo* = Pg. *pigmeo, pygmeo* = It. *pigmeo* = G. *pygmäe* = Sw. *pygmé* = Dan. *pygmæ* = Russ. *pigmeĭ*, < L. *Pygmæus*, a Pygmy, dwarf, as adj. dwarfish, < Gr. Πυγμαῖος, in pl. Πυγμαῖοι, a Pygmy, a dwarf, adj. dwarfish, lit. long or tall as a πυγμή, < πυγμή, a measure of length, the distance from the elbow to the knuckles, equal to 18 δάκτυλοι ('fingers') or about 13¾ inches, a particular use of πυγμή, a fist, akin to L. *pugnus*, the fist: see *pugil, pugnacious*.] I. *n.*; pl. *pygmies* (-miz). 1. [*cap.*] One of a fabulous race of dwarfs, mentioned by various ancient authors. The Pygmies (Pygmæi, with an eponymic ancestor Pygmæus) of Greek fable were represented by Homer as dwelling on the southern shores of Ocean, and as being warred upon by the cranes in their annual migrations. Later writers placed them in India and elsewhere. The African Pygmies described by Herodotus, and hitherto supposed to be equally fabulous, were apparently the same as the remarkable race or races of dwarfs found by recent explorers in various parts of equatorial Africa, especially those discovered by Stanley (1888) in the forests of the upper Congo region.

> In another Yle ther ben lityll folk, as Dwerghes; and thei ben to so meche as the *Pygmeyes*, and thei han no Mouthe, but in stede of hire Mouthe thei han a lytylle round hole. *Mandeville*, Travels, p. 205.
>
> Thy God reigns in his Ark, and I on Earth:
> I Chalenge Him, Him (if he dare come forth),
> Not Thee, base *Pigmee*.
> *Sylvester*, tr. of Du Bartas's Weeks, ii., The Trophies.
>
> *Pygmies* are *pygmies* still though perch'd on Alps,
> And pyramids are pyramids in vales.
> *Young*, Night Thoughts, vi.

3. The chimpanzee: perhaps as the supposed original of the fabled Pygmies.

II. *a.* 1. Belonging to or resembling a pygmy; pygmean; dwarfish; very small of its kind; little.

> Behold the Child among his new-born blisses,
> A six years' Darling of a *pigmy* size.
> *Wordsworth*, Ode to Immortality.

2. In *zoöl.*, very small of its kind; dwarfish or dwarf: applied to many animals.

pygmy, pigmy (pig'mi), *v. t.*; pret. and pp. *pygmied, pigmied*, ppr. *pygmying, pigmying*. [< *pygmy, n.*] To make like a pygmy; dwarf. [Rare.]

> Stand off, thou poetaster, from thy press,
> Who *pygmiest* martyrs with thy dwarf-like verse.
> *Wood*, Fasti Oxon. (1st ed.), II. 799. (*Latham.*)

pygmy-weed (pig'mi-wēd), *n.* A plant, *Tillæa simplex*, a tufted annual an inch or two high, found on muddy banks from Nantucket to Maryland.

Pygobranchia (pī-gō-brang'ki-ą), *n. pl.* [NL., < Gr. πυγή, rump, + βράγχια, gills.] In J. E. Gray's classification (1821), one of two orders (the other being *Polybranchia*) of gymnobranchiate gastropods, having plumose or branching gills surrounding the anus on the middle of the hinder part of the back, and the skin more or less spiculous. It was framed to receive the families *Onchidoridæ, Doridiadæ, Goniodoridæ, Polyceridæ, Tritoniadæ*, and *Ceratosomidæ*. *Anthobranchia* is a synonym.

Pygobranchiata (pī-gō-brang-ki-ā'tą), *n. pl.* [NL., neut. pl. of *pygobranchiatus*: see *pygobranchiate*.] Same as *Pygobranchia*.

pygobranchiate (pī-gō-brang'ki-āt), *a.* [< NL. *pygobranchiatus*, < Gr. πυγή, rump, + βράγχια, gills: see *branchiate*.] Having gills around the anus; of or pertaining to the *Pygobranchiata*.

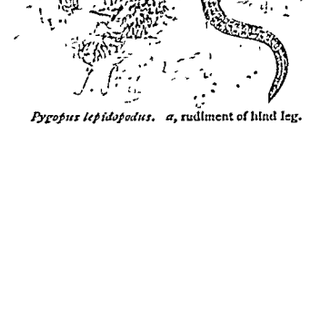
pygodidymus (pī-gō-did'i-mus), *n.*; pl. *pygodidymi* (-mī). [NL., < Gr. πυγή, rump, + δίδυμος, double, twofold, twin.] Same as *dipygus*.

pygopagus (pī-gop'ą-gus), *n.*; pl. *pygopagi* (-jī). [NL., < Gr. πυγή, rump, + πάγος, that which is fixed or firmly set, < πηγνύναι, make fast, make solid.] In *teratol.*, a double monster with union at the buttocks.

pygoparasiticus (pī-gō-par-ą-sit'i-kus), *n.*; pl. *pygoparasitici* (-sī). [NL., < Gr. πυγή, rump, + παρασιτικός, parasitic.] In *teratol.*, a pygopagus where one fetus is a parasite.

pygope (pī'gōp), *n.* A lizard of the family *Pygopodidæ*; a pygopod.

Pygopidæ (pī-gop'i-dē), *n. pl.* [NL.] Same as *Pygopodidæ*.



pygopod (pī'gō-pod), *a.* and *n.* [< Gr. πυγή, rump, + πούς (ποδ-) = E. *foot*.] I, *a.* 1. In *ornith.*, rump-footed, as an auk, loon, or grebe; having the legs inserted far back, appearing close by the rump; of or pertaining to the *Pygopodes*.—2. In *herpet.*, of or pertaining to the *Pygopodidæ*.

II, *n.* In *herpet.*, a lizard of the family *Pygopodidæ*.

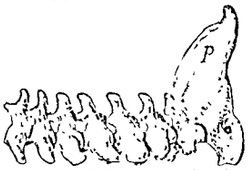
Pygopodes (pī-gop'ō-dēz), *n. pl.* [NL.: see *pygopod*.] An order of swimming and diving birds, the rump-footed birds, having the legs inserted very far back, and buried in the common integument of the body nearly to the heel. Its limits have varied with different writers, but it is now generally considered to include the loons, grebes, and auks, and to exclude the penguins, which, though pygopodous, are otherwise very different in important respects. It then consists of the families *Colymbidæ, Podicipedidæ*, and *Alcidæ*. In consequence of the position of the legs, these birds can hardly walk, and when on land they assume a more or less nearly upright attitude. See cuts under *Alca, grebe*, and *loon*.

Pygopodidæ (pī-gō-pod'i-dē), *n. pl.* [NL., < *Pygopodes* + *-idæ*.] An Australian family of eriglossate lacertilians, typified by the genus *Pygopus*, alone representing the superfamily *Pygopodoidea*, having the frontal bone excluded from the orbit, the prefrontal and postfrontal bones being extended and contiguous. Also *Pygopida*.

Pygopodoidea (pī'gō-pō-doi'dē-ą), *n. pl.* [NL., < *Pygopodes* + *-oidea*.] A superfamily of eriglossate lacertilians, represented by the family *Pygopodidæ* alone, having concavo-convex vertebræ, the clavicle not dilated and loop-shaped proximally, and no postorbital or postfrontal squamosal arches. *T. Gill*, Smithsonian Report, 1885.

Pygopus lepidopodus. *a*, rudiment of hind leg.

pygopodous (pī-gop'ō-dus), *a.* [< *pygopod* + *-ous*.] In *ornith.*, rump-footed; specifically, of or pertaining to the *Pygopodes*, or having the characters of that group of birds: also applied to some birds, as cormorants and penguins, which do not belong to the *Pygopodes*.



Pygopus (pī'gō-pus), *n.* [NL. (Merrem, 1820), < Gr. πυγή, rump, + ποῦς = E. *foot*.] A genus of lizards, typical of the family *Pygopodidæ*, having a pair of rudimentary hind limbs. *P. lepidopodus*, the only species, inhabits Australia; it is about 2 feet long. See cut in preceding column.

Pygoscelis (pī-gos'e-lis), *n.* [NL. (Wagler, 1832), < Gr. πυγή, rump, + σκέλος, leg.] A genus of penguins, of which the gentoo or so-called Papuan penguin, *P. papua* or *P. tæniata*, is the type. It is one of those commonly called *johnny* by sailors. See *gentoo*[2].

Gentoo (*Pygoscelis tæniata*).

pygostyle (pī'gō-stīl), *n.* [< Gr. πυγή, rump, + στῦλος, column.] In *ornith.*, the vomer or plowshare bone of a bird's tail, consisting of a number of caudal vertebræ ankylosed together for the support of the tail-feathers, and possessed by nearly all birds. Since the oldest known birds (of Jurassic age) had no pygostyle, but a long tapering tail like a lizard's with a pair of large feathers to each vertebra (see cut under *Archæopteryx*), and since all modern birds have a pygostyle, upon which feathers are bunched in several pairs, it follows that, theoretically, a pygostyle includes or represents as many coalesced caudal vertebræ as there are pairs of feathers in the tail—namely, five or six in most birds, up to twelve or more in some. But this view does not rest upon observation. Whatever its morphological character, the pygostyle is always the last bone of the tail, and always conspicuous in size; in shape it is very variable in different birds.

Pygostyle.—Eight caudal vertebræ of an eagle (*Haliaëtus leucocephalus*), of which the last, *p*, is the pygostyle. (Two thirds natural size.)

pygostyled (pī'gō-stīld), *a.* [< *pygostyle* + *-ed*[2].] Furnished with a pygostyle; forming or converted into a pygostyle.

> Tail short as to its vertebræ, which are *pygostyled*.
> *Coues*, Key to N. A. Birds, p. 238.

pyic (pī'ik), *a.* [< Gr. πίον, pus, + *-ic*.] Of or belonging to pus; purulent.

pyjamas, *n. pl.* Same as *pajamas*.

pykt, pyket, *n.* and *v.* Obsolete spellings of *pike*[1].

pyked, *a.* A Middle English form of *piked*.

pykeyst, *n.* A Middle English form of *piekax*. *Prompt. Parv.*

pyknometer, *n.* Same as *pycnometer*.

pyknon, *n.* See *pycnon*.

pyla (pī'lą), *n.*; pl. *pylæ* (-lē). [NL., < Gr. πύλη, a gate.] The orifice by which each paraqueduct or optic ventricle of the brain communicates with the aqueduct of Sylvius.

pylagoras (pī-lag'ō-ras), *n.*; pl. *pylagorai* (-rī). [< Gr. Πυλαγόρας (see def.), < Πύλαι, the Pass of Thermopylæ (pl. of πύλη, gate, pass), + ἀγείρειν, collect, gather: see *agora*.] In ancient Greece, an elected delegate or representative of a constituent state in the Amphictyonic Council. The pylagorai were secondary to the delegates entitled *hieromnemones* (see *hieromnemon*), and had their name from the older place of assembly of the Pythian Amphictyony, at Pylæ (Thermopylæ).

pylagore (pī'lą-gōr), *n.* [< Gr. Πυλαγόρας: see *pylagoras*.] Same as *pylagoras*.

pylangial (pī-lan'ji-ąl), *a.* [< *pylangi-um* + *-al*.] Pertaining to the pylangium.

pylangium (pī-lan-jī'um), *n.*; pl. *pylangia* (-ią). [NL., < Gr. πύλη, a gate, + ἀγγεῖον, a vessel.] The first section of the arterial trunk (truncus arteriosus) of the lower vertebrates. See *truncus*.

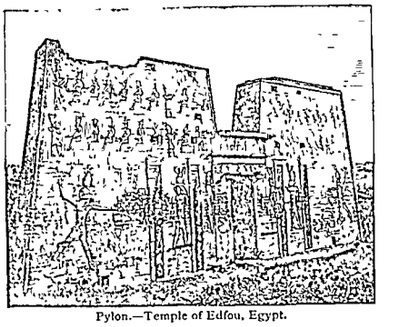
pylar (pī'lär), *a.* [< *pyle*[3] + *-ar*[3].] Of or pertaining to a pyle; specifically, pertaining to the pylæ of the brain.

pylche, *n.* A Middle English form of *pilch*[1].

pyle[1], *n.* A Middle English form of *pile*[1], etc.

pyle[2] (pīl), *n.* [Perhaps a use of *pyle*[1] = *pile*[1].] A single grain of chaff. *Burns*, To the Unco Guid. [Scotch.]

pyle[3] (pīl), *n.* [< Gr. πύλη, a gate.] A pore or other orifice or opening of small size, as a micropyle. *Coues*.



pylemphraxis (pī-lem-frak'sis), *n.* [NL., < Gr. πύλη, a gate, + ἔμφραξις, a stopping: see *emphractic*.] Obstruction of the portal vein.

pylephlebitis (pī-lef-lē-bī'tis), *n.* [NL., < Gr. πύλη, a gate, + φλέψ (φλεβ-), a vein, + *-itis*. Cf. *phlebitis*.] Inflammation of the portal vein and its branches.

pylethrombosis (pī-leth-rom-bō'sis), *n.* [NL., < Gr. πύλη, a gate, + NL. *thrombosis*, q. v.] Thrombosis of the portal vein.

pylgrim, *n.* A Middle English form of *pilgrim*.

pylon (pī'lon), *n.* [< Gr. πυλών, a gateway, < πύλη, a gate, a gateway.] In *arch.*, a monumental gateway to an Egyptian temple, or other important building. The pylon was sometimes a single structure, in outline resembling a truncated pyramid, through which the passage for the gate was pierced, but was more typically a combination of two such truncated pyramidal structures, connected by a lower architectural member, in which was the gate proper. They were usually covered with elaborate decoration in sculpture, together with hieroglyphic inscriptions. Often used synonymously with *propylon*. (Compare *propylon*.) Various forms of the pylon are used as hieroglyphic symbols. That shown in the cut stands for *On*, the Greek Heliopolis.

Pylon.—Temple of Edfou, Egypt.

Hieroglyphic Pylon.

pylorectomy (pī-lō-rek'tō-mi), *n.* [< NL. *pylorus* + Gr. ἐκτομή, a cutting out.] Excision of the pylorus, as for cancer.

pyloric (pī-lor'ik), *a.* and *n.* [< NL. *pylorus* + *-ic*.] I, *a.* In *anat.*, of or pertaining to the pylorus: opposed to *cardiac*: as, *pyloric* valve; *pyloric* orifice; *pyloric* compartment of the stomach. See cuts under *Dibranchiata, ink-bag*, and *intestine*.

> In the darter, which has a *pyloric* division or compartment of the gizzard, this is nearly filled with a mass of matted hairs, a peculiar modification of the epithelial lining, serving to guard the *pyloric* orifice.
> *Coues*, Key to N. A. Birds, p. 213.

Pyloric artery, a branch of the hepatic artery, distributed to the pyloric extremity and lesser curvature of the stomach. The name is sometimes restricted to the small branch given off to the pylorus only.—**Pyloric cæca.** (*a*) In *ichth.*, more or less numerous cæcal diverticula which are generally found about the beginning of the small intestine of fishes. (*b*) In *entom.*, the cæcal diverticula with which the chylific ventricle of an insect may be provided. See cut under *Blattidæ*.—**Pyloric glands.** See *gland*.—**Pyloric orifice.** Same as *pylorus*, 1 (*a*).—**Pyloric ossicle**, a transverse, partly calcified plate situated in the roof of the pyloric part of the stomach of some crustaceans, as crawfish, and connected with the pterocardiac by the zygocardiac ossicle.—**Pyloric plexus.** See *plexus*.—**Pyloric sacs**, in echinoderms, dilatations of the alimentary canal, as of a starfish, on the aboral side of the cardiac sacs, separated by a constriction from the latter, and provided with tubular processes along the aboral aspect of a ray or arm.—**Pyloric tube**, a narrowed or tubular part of the stomach of a fish.—**Pyloric vein**, a small vein accompanying the pyloric artery and emptying into the portal vein.

II, *n. pl.* The pyloric cæca of a fish.

> When ascending into fresh water with their ova nearly ready for extrusion, their *pylorics* are loaded with fat.
> *The Field* (London), Dec. 26, 1885.

Pyloridea† (pī-lō-rid'ē-ą), *n. pl.* [NL., < Gr. πυλωρός, also πυλουρός, a gate-keeper (see *pylorus*), + *-idea*.] In De Blainville's classification, the tenth family of bivalve mollusks, characterized by gaping shells with deep pallial emargination. It contains a number of genera now dissociated in several different families, especially *Myidæ, Solenidæ, Saxicavidæ*, and *Gastrochænidæ*.

pyloridean (pī-lō-rid'ē-an), *a.* and *n.* [< NL. *Pyloridea* + *-an.*] **I.** *a.* Gaping, as a bivalve mollusk; of or pertaining to the *Pyloridea*.

II. *n.* A member of the *Pyloridea*.

pyloristenosis (pī-lō-ris-te-nō'sis), *n.* [NL., < Gr. πυλωρός, pylorus, + στένωσις, a narrowing, straitening, < στενοῦν, narrow, straiten, στενός, narrow, strait.] Morbid contraction of the pylorus.

pylorochesis (pī-lō-rō-kē'sis), *n.* [NL., < Gr. πυλωρός, pylorus, + ὀχησις, a carrying, driving (taken in sense of 'holding'), < ὀχεῖν, bear, carry, drive, < ἔχειν, hold, have.] Obstruction of the pylorus.

pylorus (pī-lō'rus), *n.*; pl. *pylori* (-rī). [NL., < LL. *pylorus*, < Gr. πυλωρός, also πυλουρός, a gatekeeper, also the lower orifice of the stomach, < πύλη, a gate, a pass, + ὦρα, Ionic ὥρη, care, heed, or οὖρος, a watcher or warder, < ὁρᾶν, see.] 1. In the *early church*, a doorkeeper; an ostiary (which see).—2. In *anat.*: (*a*) The orifice of communication between the stomach and the intestine, by which the contents of the stomach pass into the intestine. It is usually situated on the right-hand side, opposite the cardiac or esophageal orifice, but may closely approximate or be adjoined to the latter. See cut under *stomach*. (*b*) The fold of mucous membrane, containing muscular fibers, which guards the pyloric orifice, or other contrivance for retarding or opposing the passage of food from the stomach into the intestine. (*c*) The pyloric end or division of the stomach.—3. In *Hydrozoa*, a valvular structure which separates the gastric from the somatic cavity in the siphonophorous hydrozoans.—**Antrum pylori**. See *antrum*.—**Sphincter pylori**, a bundle of unstriped muscular fibers encircling the pyloric end of the stomach.

pymma (pim'a), *n.* Same as *bloodrood*, 4.

pympert, *v. t.* An obsolete variant (or misprint) of *pamper*.

> Good mistress Statham, . . . seeing what case I was in, hath fetched me home to her own house, and doth *pymper* me up with all diligence, for I fear a consumption.
> *Latimer*, Sermons and Remains (Parker Soc.), p. 386. ((*Davies*)

pynaclet, *n.* A Middle English form of *pinnacle*.

pynch†, *r.* An obsolete spelling of *pinch*.

pynd†, **pynder**†. Middle English forms of *pind*, *pinder*.

pynet, *n.* and *v.* A Middle English spelling of *pine*.

pynnet, *n.* and *v.* A Middle English form of *pin*1.

pyoblennorrhœa (pī-ō-blen-ō-rē'ä), *n.* [NL., < Gr. πίον, pus, + βλέννα, mucus, + ῥοία, a flow, < ῥεῖν, flow. Cf. *blennorrhœa*.] Muco-purulent discharge.

pyochezia (pī-ō-kē'zi-ä), *n.* [NL., < Gr. πίον, pus, + χέζειν, ease oneself.] The condition in which pus is discharged by the intestine.

pyocœlia (pī-ō-sē'li-ä), *n.* [NL., < Gr. πίον, pus, + κοιλία, a cavity: see *cœlia*.] The presence of pus in the abdominal cavity.

pyocolpos (pī-ō-kol'pos), *n.* [NL., < Gr. πίον, pus, + κόλπος, womb.] The presence of pus in the vagina.

pyocystis (pī-ō-sis'tis), *n.* [NL., < Gr. πίον, pus, + κύστις, bladder: see *cystis*.] An encysted collection of pus.

pyogenesis (pī-ō-jen'e-sis), *n.* [NL., < Gr. πίον, pus, + γένεσις, origin, source: see *genesis*.] The generation of pus; the theory or process of the formation of pus. Also *pyogenia*.

pyogenetic (pī″ō-jē-net'ik), *a.* [< *pyogenesis*, after *genetic*.] Pertaining to pyogenesis; pyogenic.

pyogenia (pī-ō-jē'ni-ä), *n.* [NL., < Gr. πίον, pus, + -γένεια, < -γενής, producing.] Same as *pyogenesis*.

pyogenic (pī-ō-jen'ik), *a.* [< Gr. πίον, pus, + -γενής, producing, + -ic.] Having relation to the formation of pus; producing or generating pus.—**Pyogenic fever**, pyemia.

pyohemothorax (pī-ō-hē-mō-thō'raks), *n.* [NL., irreg. < Gr. πίον, pus, + αἷμα, blood, + θώραξ, thorax.] The presence of pus and blood in the pleural cavity.

pyoid (pī'oid), *a.* [< Gr. πυοειδής, like pus, < πίον, pus, + εἶδος, form.] Having the nature of or resembling pus; purulent.

pyolymph (pī'ō-limf), *n.* [< Gr. πίον, pus, + NL. *lympha*, lymph: see *lymph*.] Lymph somewhat turbid with pus-corpuscles.

pyometra (pī-ō-mē'trä), *n.* [NL., < Gr. πίον, pus, + μήτρα, uterus.] The presence of pus in the uterus.

pyonephritis (pī″ō-nef-rī'tis), *n.* [NL., < Gr. πίον, pus, + NL. *nephritis*, q. v.] Suppurative inflammation of the kidney.

pyonephrosis (pī″ō-nef-rō'sis), *n.* [NL., < Gr. πίον, pus, + νεφρός, kidney, + *-osis*.] The presence of pus in the kidney and its pelvis.

pyonephrotic (pī″ō-nef-rot'ik), *a.* [< *pyonephrosis* (*-ot-*) + *-ic*.] Pertaining to pyonephrosis.

pyoning†, *n.* See *pioning*.

pyony†, *n.* An obsolete form of *piony*, *peony*.

pyopericardium (pī-ō-per-i-kär'di-um), *n.* [NL., < Gr. πίον, pus, + NL. *pericardium*: see *pericardium*.] The presence of pus in the pericardial sac.

pyoperitonitis (pī-ō-per″i-tō-nī'tis), *n.* [NL., < Gr. πίον, pus, + NL. *peritonitis*, q. v.] Suppurative peritonitis.

pyophthalmia (pī-of-thal'mi-ä), *n.* [NL., < Gr. πίον, pus, + ὀφθαλμία, a disease of the eyes: see *ophthalmia*.] Production of pus in the eye.

pyopneumothorax (pī-ō-nū-mō-thō'raks), *n.* [NL., < Gr. πίον, pus, + πνεῦμων, lung, + θώραξ, thorax.] Same as *pneumopyothorax*.

pyopoëesis (pī″ō-pō-ē'sis), *n.* Same as *pyopoiesis*.

pyopoiesis (pī″ō-poi-ē'sis), *n.* [NL., < Gr. πίον, pus, + ποίησις, production, < ποιεῖν, make.] Suppuration; production of pus; pyosis. Also *pyopoëesis*.

pyoptysis (pī-op'ti-sis), *n.* [NL., < Gr. πίον, pus, + πτύσις, a spitting, < πτύειν, spit.] Expectoration of pus.

pyorrhea, pyorrhœa (pī-ō-rē'ä), *n.* [NL. *pyorrhœa*, < Gr. πίον, pus, + ῥοία, a flow, < ῥεῖν, flow.] Purulent discharge.—**Pyorrhœa alveolaris**, an alveolar abscess.

pyosalpingitis (pī-ō-sal-pin-jī'tis), *n.* [NL., < Gr. πίον, pus, + σάλπιγξ (σαλπιγγ-), a tube, + *-itis*.] Purulent inflammation of a Fallopian tube.

pyosalpinx (pī-ō-sal'pingks), *n.* [NL., < Gr. πίον, pus, + σάλπιγξ, a tube.] The presence of pus in a Fallopian tube.

> The difficulty of accurate diagnosis between a *pyosalpinx* and a hydrosalpinx . . . must here be taken into account. *Lancet*, No. 3477, p. 837.

pyosapremia (pī″ō-sap-rē'mi-ä), *n.* [NL., < Gr. πίον, pus, + σαπρός, rotten, + αἷμα, blood.] The infection of the blood with a purulent exudate, as pus.

pyoscope (pī'ō-skōp), *n.* [< Gr. πίον, pus, + σκοπεῖν, view.] An instrument for the determination of the amount of fat in milk.

pyosis (pī-ō'sis), *n.* [< Gr. πίωσις, suppuration, < πιοῦν, cause to suppurate, < πίον, pus: see *pus*.] The progress or formation of pus.

pyot†, *n.* See *piet*.

pyothorax (pī-ō-thō'raks), *n.* [NL., < Gr. πίον, pus, + θώραξ, thorax.] The presence of pus in a pleural cavity; empyema.

> He had seen the rapid formation of an abscess follow an exploratory puncture in a case of tuberculous *pyothorax*. *Lancet*, No. 3479, p. 989.

pyracanth (pir'a-kanth), *n.* [< Gr. πυράκανθα, a variety of thorn, < πῦρ, fire, + ἄκανθος, a prickly tree, a thorn.] A thorn, *Cratægus Pyracantha*, found in the south of Europe.

pyracid (pī-ras'id), *n.* Same as *pyro-acid*.

pyral (pī'ral), *a.* [< *pyre* + *-al*.] Of or pertaining to a pyre.

> Whether unto eight or ten bodies of men to adde one of a woman, as being more inflammable, and unctuously constituted for the better *pyrall* combustion, were any rational practise. *Sir T. Browne*, Urn-burial, iv.

> In connection with each house supposed by Mr. Cushing to be the house of a clan or one of the sociological divisions, such as are found among the Pueblo Indians, was what the explorer calls a *pyral* mound. On this the bodies and effects of the dead were consigned to fire. *Science*, XII. 40.

pyralid (pir'a-lid), *a.* and *n.* **I.** *a.* Resembling a moth of the family *Pyralidæ*; belonging to this family; pyralideous.

II. *n.* A pyralid moth; any member of the *Pyralidæ* or *Pyralidina*.

Also *pyralidine*.

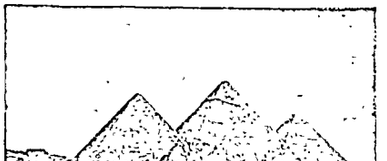
Pyralidæ (pī-ral'i-dē), *n. pl.* [NL. (Leach, 1819), < *Pyralis* + *-idæ*.] A heterogeneous family of moths, of uncertain limits and characters. They are generally of medium size or small, with slender bodies and long legs, and with both maxillary and labial palpi. The family has in fact for many years been a resting place for genera which do not find place in the other, better defined, families. Also *Pyralidina*, and preferably *Pyralididæ*. See cut under *bee-moth*.

pyralideous (pir-a-lid'ē-us), *a.* [< *pyralid* + *-eous*.] Pyralid; of or pertaining to the *Pyralidina*: as, "the *pyralideous* group," *Stainton*.

Pyralididæ (pir-a-lid'i-dē), *n. pl.* [NL.] Same as *Pyralidæ*.

pyralidiform (pir-a-lid'i-fôrm), *a.* [< NL. *Pyralis* (*-id-*) + L. *forma*, form.] Having the form or structure of a pyralid moth; pyralidine or pyralideous; belonging to the *Pyralidiformia*.

Pyralidiformia (pir-a-lid-i-fôr'mi-ä), *n. pl.* [NL.: see *pyralidiform*.] A group of pyralidiform or pyralideous moths. *Schrank*, 1802.



Pyralidina (pir″a-li-dī'nä), *n. pl.* [NL., < *Pyralis* (*-id-*) + *-ina*2.] Same as *Pyralidæ*.

pyralidine (pī-ral'i-din), *a.* and *n.* Same as *pyralid*.

Pyralis (pir'a-lis), *n.* [NL. (Schrank, 1801), < L. *pyralis*, < Gr. πυραλίς, πυρραλίς, a winged insect supposed to live on fire, < πῦρ, fire: see *pyre*.] A genus of moths, typical of the family *Pyralidæ*, having a conspicuous proboscis and ascending palpi. About a dozen species are known, mainly European. *P. farinalis* is a cosmopolitan flour-pest.

pyrallolite (pī-ral'ō-līt), *n.* [So called as taking another color; < Gr. πῦρ, fire, + ἄλλος, other, + λίθος, stone.] A white or greenish altered variety of pyroxene, found in Finland.

pyramid (pir'a-mid), *n.* [Formerly also, as L., *pyramis*, pl. *pyramides*; = F. *pyramide*, formerly *piramide* = Sp. *pirámide* = Pg. *pyramide*, *pyramide* = It. *piramide* = D. *piramiede* = G. *pyramide* = Sw. *pyramid* = Dan. *pyramide*, < L. *pyramis* (*-mid-*), < Gr. πυραμίς (*-μιδ-*), a pyramid, perhaps < Egypt. *pir-em-us*, the slanting edge of a pyramid. Some have imagined a connection with Gr. πῦρ, fire, as if named from the resemblance to a tapering flame.] 1. A massive structure of polygonal, usually square plan, the sides of which slope, each usually in one plane, to a common apex. Pyramids have been erected in different parts of the world, especially in Egypt, where there are numerous groups in different styles of execution and states of preservation. By far the most interesting of these groups is that of Ghizeh, near Cairo, where there are three pyramids of large size, and several smaller ones. All the Egyptian pyramids were built for tombs, and certainly in most cases, if not in all, for royal personages. They are remarkable not only for the great size of many of them, but for the manner in which they were hermetically sealed, there being no external opening of any kind, nor any indication of the place in which the mummy had been deposited; on the contrary, some of them exhibit very ingenious arrangements intended to lead astray those search-

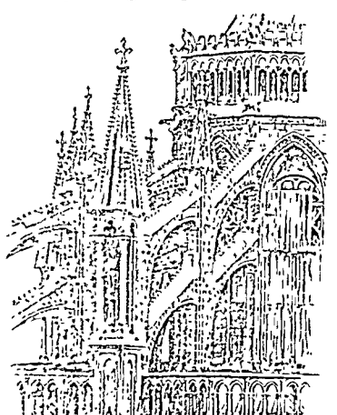
ing for the sepulchral chamber. Everything was planned in their construction to insure permanence, concealment, and security from violation. Of the three great pyramids at Ghizeh, the largest and by far the most important and interesting is the so-called Great Pyramid, in regard to which a very extensive literature exists, and which has frequently been measured and elaborately described. It is the largest work of man's hands in the world, having been originally 481 feet in height, and each of the sides of its very nearly square base measuring on the average nearly 756 feet (9068.8 in., Petrie). It is the only one remaining of the "seven wonders of the world." Its interior structure is more elaborate than that of any of the other pyramids, and some of the features which it displays are peculiar, and remarkable as showing the desire of the builders that at least one geometrical fact of fundamental importance should be incorporated into the structure. Thus the height of the Great Pyramid bears, with remarkable precision, the same relation to the total length of the four sides of its base that the radius of a circle has to its circumference, and other indications of the π ratio exist in its interior. This and other interesting peculiarities of this pyramid have led various persons, some of whom have been eminent in science, to adopt the view that it was a divinely inspired building, and that the so-called "coffer" contained within the principal sepulchral chamber was intended to serve as a standard of weights and measures and a record of various fundamental facts in geophysics, and not for a sarcophagus. Of the manner in which the huge stones of which this pyramid is built were raised to their present position but little is definitely known, but it is inferred that the work was done without the aid of complicated machinery; that they were shaped—to a very considerable extent at least—by the use of saws of bronze, the teeth of which were gems or hard stones, has been clearly shown by the most recent investigations. The date of the Great Pyramid, which is believed to have been built by or for King Shufu (Cheops) of the fourth dynasty, is variously fixed by Egyptologists at from 2450 to 4235 B. C. The latter is the date assigned by Mariette.



2. In *geom.*, a solid contained by a plane polygon as base and other planes meeting in a point. This point is called the vertex of the pyramid; and the planes which meet in the vertex are called the

sides, which are necessarily all triangles, having for their bases the sides of the base of the pyramid. Any pyramid is in volume one third of a prism that has the same base and altitude. Pyramids are denominated from the figures of their bases, being triangular, square, pentagonal, etc., according as the base is a triangle, a square, a pentagon, etc.

Knowledges are as *pyramids*, whereof history is the basis. *Bacon*, Advancement of Learning, ii. 165.

3. In *crystal.*, a form, in any system but the isometric, bounded by eight, twelve, sixteen, or twenty-four planes, and consisting of two four-, six-, eight-, or twelve-sided pyramids placed base to base. The name is also extended to embrace any form the planes of which intersect all three of the axes; in the monoclinic system it includes only four, and in the triclinic only two planes, being in each case an open form. If the planes intersect the lateral axes at the assumed unit distances, the pyramid is called a *unit pyramid*; other forms are designated *macropyramids*, *clinopyramids*, etc. (see these terms), according to their position. In the tetragonal system a unit pyramid is also called a *protopyramid*, or pyramid of the first order or series, and a square octahedron formed by pyramidal planes parallel to one of the lateral axes is in distinction called a *deuteropyramid* or *diametral pyramid*, or one of the second order or series. These terms are also used in an analogous manner in the hexagonal system.

4. In *zoöl.* and *anat.*, a pyramidal or conical part, structure, or organ; specifically, a mass of longitudinal fibers on each side of the anterior median fissure of the oblongata. See cut under *Elasmobranchii*.—5. The pile of five or six triangular valves covering an opening on the oral surface of the body of a cystic crinoid. The structure is variously interpreted as ovarian or oro-anal.—6. In *medieval arch.*, a pinnacle of quadrangular plan, most commonly

acutely pyramidal in form; hence, any similar feature. Compare *pyramidion*.

Accordingly at Amiens this weight is set . . . in the form of an upright square mass of masonry crowned by a steep *pyramid*, and the Gothic pinnacle stands forth in essential completeness. *C. H. Moore*, Gothic Architecture, p. 84.

7. The American columbo, or Indian lettuce, *Frasera Carolinensis*.—**Decussation of the pyramids**, the crossing over of the crossed pyramidal tract of one side to join the direct pyramidal tract of the other, revealed externally by bundles crossing the anterior median fissure of the oblongata a little below the olivary bodies.—**Double pyramid group.** See *group*¹.—**Malpighian pyramids.** See *Malpighian*.—**Posterior pyramid**, a funiculus gracilis. [Rare.]—**Pyramid of the cerebellum**, a lobe of the vermis inferior of the cerebellum, behind the uvula. It is connected laterally with the digastric lobes.—**Pyramid of the thyroid gland** an occasional conical third lobe of the thyroid gland.—**Pyramid of the tympanum**, a small conical bony prominence on the posterior wall of the tympanic cavity, behind the fenestra ovalis, containing the stapedius muscle in its interior, and transmitting the tendon of that muscle through a foramen at its apex.—**Pyramid of the vestibule**, a prominence on the inner wall of the vestibular cavity, behind the fovea hemispherica.—**Pyramid of Wistar**, the sphenoturbinal bone.—**Pyramid pool.** See *pool*², *n.*, 2 (*a*).—**Pyramids of Ferrein**, a name given to the bundles of straight renal tubules which constitute the medullary rays. These bundles as they approach the cortical margin become smaller and more conical from the diminution of the number of tubules, whence the name.—**Pyramids of the medulla oblongata**, *anterior* and *posterior*. See def. 4, and *posterior pyramid*, above.—**Pyramids of the spine**, a name given to the anteriorly projecting parts of the spinal column. The *upper pyramid* is formed by all the vertebræ from the second cervical to the last lumbar, and this is again subdivided into three lesser pyramids; the *lower pyramid* is composed of the sacrum and coccyx.

pyramidal (pi-ram'i-dal), *a.* [= F. *pyramidal* = Sp. *piramidal* = Pg. *pyramidal* = It. *piramidale* = D. *piramiedaal*, < ML. *pyramidalis*, pertaining to a pyramid, < L. *pyramis* (*-mid-*), a pyramid: see *pyramid*.] 1. Pertaining to a pyramid, or having its form. Also *pyramidical*.

He [Plato] would compound the earth of cubical and fire of *pyramidal* atoms, and the like. *Cudworth*, Intellectual System, p. 53.

These meadows are planted with mulberry trees, and adorned by the *pyramidal* tomb of Caius Cestius. *Eustace*, Italy, I. xi.

2. In *bot.*, *anat.*, and *zoöl.*, shaped more or less like a pyramid; conical; pyriform.—**Pyramidal bell-flower**, an ornamental plant, *Campanula pyramidalis*. Also called *chimney-plant*.—**Pyramidal bone**, the cuneiform bone of the carpus; the pyramidale.—**Pyramidal column.** Same as *fasciculus gracilis*.—**Pyramidal hemithedrism.** See *hemihedrism*.—**Pyramidal muscle**, the pyramidalis.—**Pyramidal numbers**, the third order of figurate numbers. See *figurate*.—**Pyramidal plane**, in *crystal.*, one of the faces of a pyramidal crystal. See *pyramid*, 3.—**Pyramidal tract**, a system of nerve-fibers which originate in the cortex, in the region of the central fissure, pass down in the posterior limb of the internal capsule and the central section of the crusta, form the pyramids in the oblongata, and divide into the direct and crossed pyramidal tracts, to terminate in the immediate vicinity of and in close physiological connection with the origins of motor nerves in the anterior columns of the spinal cord. Some few fibers may pass to the lateral pyramidal tract without crossing, and a few may cross and recross in the cord to the original side. (Also called *peduncular tract.*) *The pyramidal tract crossed* is that part of the pyramidal fibers which crosses in the oblongata to pass downward in the posterior part of the lateral column of the opposite side of the cord. *The pyramidal tract direct* is that part of the pyramidal fibers which descends the cord without crossing over to the contralateral side. It lies close to the anterior median fissure, and is sometimes called the *column of Turck*.

pyramidale (pi-ram-i-dā'lē), *n.*; pl. *pyramidalia* (pir*ᵉ*a-mi-dā'li-ą). [NL., neut. of *pyramidalis*, q. v.] The cuneiform bone of the carpus, more fully called *os pyramidale*.

pyramidalis (pi-ram-i-dā'lis), *n.*; pl. *pyramidales* (-lēz). [NL., se. *musculus*, muscle: see *pyramidal*.] One of several different pyramidal or pyriform muscles. (*a*) In *human anat.*: (1) The external rectus muscle of the abdomen, a small triangular muscle, two or three inches long, arising from the os pubis in front of the rectus, and inserted into the linea alba below the navel More fully called *pyramidalis abdominis*, and also *rectus externus*. It is comparatively small and vestigial, and often absent, in man, representing a large muscle which in some animals reaches from the pubes to the clavicles. (2) A slip from the occipitofrontalis, lying upon the nose, more fully called *pyramidalis nasi*. Also called *dorsalis narium*, *procerus nasi*, and *procerus*. (*b*) In *ornith.*, one of the two muscles of the nictitating membrane, situated upon the back of the eyeball, of a pyramidal or pyriform shape, cooperating with the quadratus in movements of the third eyelid. See third cut under *eye*¹.—**Pyramidalis abdominis.** See def. (*a*) (1).—**Pyramidalis femoris.** Same as *pyriformis*.—**Pyramidalis narium.** Same as *levator labii superioris alæque nasi* (which see, under *levator*). See also *sneering-muscle*, under *muscle*¹.—**Pyramidalis nasi.** See def. (*a*) (2).

pyramidalism (pi-ram'i-dal-izm), *n.* [< *pyramidal* + *-ism*.] The body of facts or beliefs respecting the pyramids of Ghizeh. *C. Piazzi Smyth*.

pyramidalist (pi-ram'i-dal-ist), *n.* [< *pyramidal* + *-ist*.] A pyramidist.

pyramidally (pi-ram'i-dal-i), *adv.* In the form of a pyramid: as, a part *pyramidally* produced; in a loose sense, so as to form a high, angular elevation; hence, extremely.

If, according unto his [Aristotle's] own ethicks, sense is not essential unto felicity, but a man may be happy without the apprehension thereof, surely in that sense he is *pyramidally* happy. *Sir T. Browne*, Vulg. Err., vii. 13.

pyramidate (pi-ram'i-dāt), *a.* [< *pyramid* + *-ate*¹.] In *entom.*, pyramidal; jutting out into a prominent angle: as, a *pyramidate* fascia.

Pyramidella (Obeliscus) dolabrata.

Pyramidella (pir*ᵉ*a-mi-del'ą), *n.* [NL. (Lamarck, 1796), dim. of L. *pyramis* (*-mid-*), a pyramid: see *pyramid*.] The typical genus of *Pyramidellidæ*.

Pyramidellacea (pir-ą-mid-e-lā'sē-ą), *n. pl.* [NL., < *Pyramidella* + *-acea*.] Same as *Pyramidellidæ*.

Pyramidellidæ (pir*ᵉ*a-mi-del'i-dē), *n. pl.* [NL., < *Pyramidella* + *-idæ*.] A family of gymnoglossate holostomatous pectinibranchiate gastropods, typified by the genus *Pyramidella*. The animal has flattened auriform tentacles, eyes sessile on the tentacles behind, a long retractile proboscis, and a mentum below the mouth. The shell is turreted or conic, with the nucleus sinistral and the rest of the shell dextral, aperture entire, and columellar lip plicated or simple. Species are distributed in all temperate and warm seas.

pyramides, *n.* Plural of *pyramis*.

pyramidia, *n.* Plural of *pyramidion*.

pyramidic (pir-ą-mid'ik), *a.* [< *pyramid* + *-ic*.] Having the form of a pyramid; pyramidal.

Their gold in *pyramidic* plenty piled. *Shenstone*, Elegies, xix.

pyramidical (pir-ą-mid'i-kal), *a.* [< *pyramidic* + *-al*.] Same as *pyramidic*.

The contrivance of nature is singular in the opening and shutting of bindeweeds, performed by five inflexures, distinguishable by *pyramidical* figures, and also different colours. *Sir T. Browne*, Garden of Cyrus, iii.

This bounding line [of a building] from top to bottom may either be inclined inwards, and the mass therefore *pyramidical*; or vertical, and the mass form one grand cliff; or inclined outwards, as in the advancing fronts of old houses. *Ruskin*, Seven Lamps of Architecture, iii. § 6.

pyramidically (pir-ą-mid'i-kal-i), *adv.* In a pyramidical manner; in the form of a pyramid.

Pelion, being the least, is placed above Ossa, and thus they rise *pyramidically*. *Pope*, Odyssey, xi., note.

pyramidicalness (pir-ą-mid'i-kal-nes), *n.* The character of being pyramidic. *Bailey*, 1727.

pyramidion (pir-ą-mid'i-on), *n.*; pl. *pyramidia* (-ą). [NL., < Gr. **πυραμίδιον*, dim. of *πυραμίς*, a pyramid: see *pyramid*.] In *arch.*, the apex in the shape of a small pyramid which often terminates the top of an obelisk, and was very commonly sheathed with a cap of metal: often applied to any comparatively small structure or member of pyramidal shape.

pyramidist (pir'ą-mid-ist), *n.* [< *pyramid* + *-ist*.] One who makes a special study of the pyramids of Egypt, or is versed in their structure and history.

pyramidoid (pi-ram'i-doid), *n.* [< Gr. *πυραμίς* (*-μιδ-*), pyramid, + *εἶδος*, form. Cf. *pyramoid*.] A parabolic spindle. Also *pyramoid*. *Bailey*, 1727.

pyramidoidal (pir-ą-mi-doid'ąl), *a.* [< *pyramidoid* + *-al*.] Having the shape of a pyramidoid.

pyramidon (pi-ram'i-don), *n.* [< *pyramid* + *-on*, as in *harmonicon*, *accordion*, etc.] In *organ-building*, a stop having wooden pipes in the form of an inverted pyramid, about four times as large at the top as below, and giving very deep tones somewhat like those of a stopped diapason.

pyramid-shell (pir'ą-mid-shel), *n.* Any member of the *Pyramidellidæ*.

pyramis (pir'ą-mis), *n.*; pl. *pyramides* (pi-ram'i-dēz). [L., a pyramid: see *pyramid*.] A pyramid. Formerly also *piramis*.

Make
My country's high *pyramides* my gibbet,
And hang me up in chains!
Shak., A. and C., v. 2. 61.

Place me, some god, upon a *pyramis*
Higher than hills of earth, and lend a voice
Loud as your thunder to me.
Beau. and Fl., Philaster, iv. 4.

At the end of this Labyrinth there stood a square *Pyramis* of a marvellous breadth and answerable altitude. *Sandys*, Travailes, p. 88.

Pyramis vestibuli, the pyramidal eminence of the vestibule.

pyramoid (pir'ą-moid), *n.* [< Gr. *πυραμοειδής*, like a pyramid, < *πυραμίς* (*-μιδ-*), a pyramid, + *εἶδος*, form.] Same as *pyramidoid*.

pyramoidal (pir-ą-moi'dąl), *a.* [< *pyramoid* + *-al*.] Same as *pyramidoidal*.

Pyranga, *n.* See *Piranga*. *Vieillot*, 1816.

pyrargyrite (pī-rär'ji-rīt), *n.* [< Gr. *πῦρ*, fire, + *ἄργυρος*, silver, + *-ite*².] An important ore of silver, consisting of the sulphid of silver and antimony. It occurs in crystals belonging to the rhombohedral system, often highly complex, and also in massive forms. When transparent it has a deep ruby-red color by transmitted light, though on the surface it is nearly black with a metallic adamantine luster; the streak has a cochineal-red color. Also called *ruby silver*, or, in distinction from proustite, *dark-red silver ore*. The common Spanish name in Mexico and South America is *rosicler oscuro*, or sometimes *petlanque*. See *proustite*.

pyratet, *n.* and *v.* An obsolete spelling of *pirate*.

pyre (pīr), *n.* [= Sp. *pira* = Pg. *pyra* = It. *pira* (cf. F. *pyrée*), < L. *pyra*, < Gr. *πυρά*, Ionic *πυρή*, a hearth, the place of a funeral fire, a funeral pile, a mound raised on the place of a pyre, < *πῦρ* = E. *fire*: see *fire*.] A pile or heap of wood or other combustible materials for burning a dead body; a funeral pile.

For nine long nights, through all the dusky air,
The *pyres* thick flaming shot a dismal glare.
Pope, Iliad, i. 72. (*Richardson.*)

Apollo's upward fire
Made every eastern cloud a silvery *pyre*
Of brightness. *Keats*, Endymion, i.

pyrena (pī-rē'nä), *n.*; pl. *pyrenæ* (-nē). [NL.: see *pyrene*¹.] Same as *pyrene*¹.

Pyrenæmata (pir-ē-nē′mą-tą), *n. pl.* [NL., neut. pl. of *pyrenæmatus:* see *pyrenematous.*] Those animals which are pyrenematous, as a lower series of vertebrates. See *Apyrenæmata.*

pyrenarium (pī-rē-nā′ri-um), *n.*; pl. *pyrenaria* (-ą). [NL., < *pyrena*, stone of a fruit, + *-arium.*] A pome; properly, a drupaceous pome—that is, one containing pyrenes, as that of the medlar and of *Cratægus.* [Rare.]

pyrene[1] (pī′rēn), *n.* [< NL. *pyrena*, < Gr. πυρήν, the stone of a fruit, as of a date or olive.] A stone or putamen, properly when there are several in a single fruit, as in the huckleberry and other berry-like drupes, and in some pomes with a stony endocarp, as those of the hawthorn and medlar; a nutlet. Also *ossiculus.*

pyrene[2] (pī′rēn), *n.* [< Gr. πῦρ, fire, + *-ene.*] A hydrocarbon ($C_{15}H_{12}$) obtained from coal-tar.—**Pyrene-oil.** See *olive-oil.*

Pyrenean (pir-ē-nē′an), *a.* [= F. *Pyrénéen*, < L. *Pyrenæi*, sc. *montes*, the Pyrenees, < *Pyrene*, < Gr. Πυρήνη, the Pyrenees.] Of or pertaining to the Pyrenees, a range of mountains between France and Spain.

> Till o'er the hills her eagles flew
> Beyond the *Pyrenean* pines.
> *Tennyson*, Death of Wellington, vi.

pyreneite (pir-ē-nē′it), *n.* [< *Pyrenees* (see def.) + *-ite*[2].] A variety of garnet of a grayish-black color, found in the Pyrenees.

pyrenematous (pir-ē-nem′ą-tus), *a.* [< NL. *pyrenæmatus*, < Gr. πυρήν, the stone of a fruit, + αἷμα (αἱματ-), blood.] Having nucleated blood-corpuscles: distinguished from *apyrenematous.* *Gulliver.*

Pyrenestes (pir-ē-nes′tēz), *n.* [NL. (Swainson, 1837), also erron. *Pirenestes;* irreg. < Gr. πυρήν, the stone of a fruit, + ἐσθίειν, eat (cf. *Chondestes*).] A leading genus of *Spermestinæ*, including a number of African spermestine birds, as *P. ostrina* (or *sanguinea*) and *P. coccinea.*

pyrenin (pī-rē′nin), *n.* [< *pyrene*[2] + *-in*[2].] In *biol.*, according to F. Schwartz, the chemical substance composing the nucleoli of a cell—the nuclear membrane being accordingly termed *amphipyrenin.*

pyrenium (pī-rē′ni-um), *n.*; pl. *pyrenia* (-ą). [NL., < Gr. πύρηνον, dim. of πυρήν, the stone of a fruit: see *pyrene*[1].] In *bot.*, the hypothecium of a nucleiform or angiocarpous apothecium. *Encyc. Brit.*

pyrenocarp (pī-rē′nō-kärp), *n.* [< Gr. πυρήν, the stone of a fruit, + καρπός, fruit.] In *bot.*: (*a*) Any drupaceous fruit. (*b*) In *mycol.*, same as *perithecium.*

pyrenocarpous (pī-rē-nō-kär′pus), *a.* [< *pyrenocarp* + *-ous.*] In *bot.*, resembling, belonging to, or possessing a pyrenocarp.

pyrenodean (pī-rē-nō′dē-an), *a.* [< *pyrenodeous* + *-an.*] In *bot.*, pyrenodeous; specifically, having the character of a pyrenium.

pyrenodeine (pī-rē-nō′dē-in), *a.* [< *pyrenode-ous* + *-ine*[1].] In *bot.*, same as *pyrenoid.*

pyrenodeous (pī-rē-nō′dē-us), *a.* [< Gr. πυρήν, the stone of a fruit, + εἶδος, form, + *-eous.*] In *bot.*, same as *pyrenoid.*

pyrenoid (pī-rē′noid), *a.* and *n.* [< Gr. πυρήν, the stone of a fruit, + εἶδος, form.] I. *a.* Resembling in form the stone of a fruit; globular; nucleiform; of excrescent bodies, wart-like.

II. *n.* A small colorless mass of proteid substance of a crystalline form, usually appearing hexagonal in optical section. *Huxley and Martin*, Elementary Biology, p. 398.

Pyrenolichenes (pī-rē′nō-lī-kē′nēz), *n. pl.* [NL., < *Pyreno(mycetes)* + *Lichenes.*] A division of lichens in which the fungus which enters into the composition of the lichen belongs to the *Pyrenomycetes.*

pyrenomycete (pī-rē-nō-mī′sēt), *n.* [< *Pyrenomycetes.*] In *bot.*, a member of the *Pyrenomycetes.*

Pyrenomycetes (pī-rē′nō-mī-sē′tēz), *n. pl.* [NL., < Gr. πυρήν, the stone of a fruit, + μύκης, pl. μύκητες, mushroom.] An order of ascomycetous fungi of parasitic or saprophytic habit, with the tissues usually hard and somewhat coriaceous. The asci are long and club shaped, usually containing eight spores, and are produced in deep flask-shaped cavities or perithecia. This order includes a large number of exceedingly injurious fungi which attack and destroy plants and also insects. The ergot, *Claviceps purpurea*, and the black-knot, *Sphæria morbosa* of cherry- and plum-trees, are familiar examples. The most destructive diseases of the grape are also due to members of this order, such as the black-rot, *Physalospora Bidwellii*, and the powdery grape-mildew, *Uncinula spiralis* or *Oidium Tuckeri.* See *ergot*[1], for cut and description; also *black-knot*, *Sphæria* and *Valsa*, *grape-mildew*, *Phoma*, *Uncinula*, *Oidium*, *Phyllosticta.*

pyrenomycetous (pī-rē″nō-mī-sē′tus), *a.* [< *Pyrenomycetes* + *-ous.*] In *bot.*, belonging to, similar to, or characteristic of the *Pyrenomycetes.*

> Certain *pyrenomycetous* fungi. *Encyc. Brit.*, XIV. 550.

pyrenous (pī-rē′nus), *a.* [< *pyrene*[1] + *-ous.*] In *bot.*, containing pyrenes: used only in composition with a numeral: as, 2-*pyrenous*, 5-*pyrenous*, etc.

pyrethrum (pir′e-thrum), *n.* [NL. (Gärtner, 1791), < L. *pyrethrum*, < Gr. πύρεθρον, a plant, *Anacyclus Pyrethrum*, so called from the hot spicy taste of the root, < πῦρ, fire.] 1. A plant of the genus *Pyrethrum*; feverfew.—2. [*cap.*] A former genus of composite plants of the tribe *Anthemideæ*, now included as part of the section *Pyrethra* in the genus *Chrysanthemum*, from which it was distinguished by achenes nearly equally from five- to ten-ribbed and crowned with a pappus, characters now known to vary in the same species. The most common species is now called *Chrysanthemum Parthenium* (for which see *feverfew*, 1, *pellitory*, 2, and *bertram*). Its variety *aureum* is the golden-feather of the gardens, used for edging.

3. A powdered preparation of pyrethrum, used as an insectifuge. Also called *pyrethrum-powder.* See *insect-powder* and *buhach.*—4. In *pharm.*, the *Anacyclus Pyrethrum*, or pellitory-of-Spain.

pyretic (pī-ret′ik), *a.* and *n.* [Irreg. < Gr. πυρετικός, feverish, < πυρέσσειν, be feverish, < πυρετός, burning heat, fever, < πῦρ, fire: see *fire.*] I. *a.* Characterized by or affected with pyrexia or fever; feverish.

> Antipyrin, however, was continued night and morning in doses of gr. xv. throughout the *pyretic* period.
> *Medical News*, XLIX. 40.

II. *n.* A remedy for fever.

pyretogenesia (pīr′e-tō-je-nē′si-ą), *n.* [NL.: see *pyretogenesis.*] Same as *pyretogenesis.*

pyretogenesis (pīr′e-tō-jen′e-sis), *n.* [NL., < Gr. πυρετός, fever, + γένεσις, origin: see *genesis.*] The genesis of pyrexia.

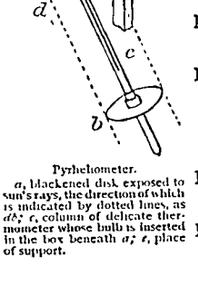
pyretology (pīr-e-tol′ō-ji), *n.* [< Gr. πυρετός, fever, + *-λογία*, < λέγειν, speak: see *-ology.*] The branch of medical science which treats of fevers.

pyrexia (pī-rek′si-ą), *n.* [NL., < Gr. πύρεξις, feverishness, < πυρέσσειν, be feverish, < πυρετός, fever: see *pyretic.*] A higher bodily temperature than is normal; fever.

pyrexial (pī-rek′si-ąl), *a.* [< *pyrexia* + *-al.*] Of or pertaining to pyrexia.

pyrexic (pī-rek′sik), *a.* [Irreg. < *pyrexy* + *-ic.*] Same as *pyrexial.*

pyrexical (pī-rek′si-kąl), *a.* [< *pyrexic* + *-al.*] Same as *pyrexial.*



pyrexy (pir′ek-si), *n.* [< NL. *pyrexia*, q. v.] Same as *pyrexia.*

Pyrgita (pėr-jī′tą), *n.* [NL., < Gr. πυργίτης, of a tower (cf. στρουθὸς πυργίτης, a house-sparrow), < πύργος, a tower.] A genus of fringilline birds, the sparrows, now usually placed in the genus *Passer:* so called because the common house-sparrow often builds its nest in towers.

pyrgoidal (pėr-goi′dąl), *a.* [< **pyrgoid* (< Gr. πυργοειδής, like a tower, < πύργος, a tower, + εἶδος, form) + *-al.*] Tower-shaped; of the form of a prism having at one end a pyramid on the same base.—**Pyrgoidal number**, a number of the form

$$\tfrac{1}{3}(n-2)\,r^3 - \tfrac{1}{2}(2n-7)\,r^2 + \tfrac{1}{6}(2n-7)\,r.$$

pyrheliometer (pėr-hē-li-om′e-tėr), *n.* [< Gr. πῦρ, fire, + ἥλιος, sun, + μέτρον, measure.] An instrument devised by M. Pouillet for measuring the intensity of the heat of the sun. It consists of a shallow cylindrical vessel of thin silver or copper, containing water or mercury in which a thermometer is plunged. The upper surface of the vessel is covered with lampblack, so as to make it absorb as much heat as possible, and the vessel is attached to a support in such a way that the upper surface can always be made to receive the rays of the sun perpendicularly. The actual amount of heat absorbed by the instrument is calculated by ordinary calorimetrical means: the area of the exposed blackened surface is known, and the amount of water or mercury which has been raised through a certain number of thermometric degrees is known, and thus the absolute heating effect of the sun, acting upon a given area under the conditions of the experiment, can be readily found. Also *pyroheliometer.*

Pyrheliometer.
a, blackened disk exposed to sun's rays, the direction of which is indicated by dotted lines, as *ab*; *r*, column of delicate thermometer whose bulb is inserted in the box beneath *a*; *s*, place of support.

The *pyrheliometer* and actinometer measure for us the outflow of solar heat, and show us that the blaze is at least seven or eight times as intense as that of any furnace known to art. *C. A. Young*, The Sun, p. 18.

pyrheliometric (pėr-hē″li-ō-met′rik), *a.* [< *pyrheliometer* + *-ic.*] Of or pertaining to, or recorded or indicated by, the pyrheliometer: as, *pyrheliometric* observations.

pyridia, *n.* Plural of *pyridium.*

pyridine (pir′i-din), *n.* [< Gr. πῦρ, fire, + *-id* + *-ine*[2].] A colorless liquid (C_5H_5N) of pungent odor, derived from coal-tar, and useful in allaying asthmatic paroxysms.

pyridium (pī-rid′i-um), *n.*; pl. *pyridia* (-ą). [NL., < L. *pyrum*, prop. *pirum*, a pear, + Gr. dim. *-ιδιον.*] In *bot.*, same as *pome.*

pyriform (pir′i-fôrm), *a.* and *n.* [Prop. *piriform;* < L. *pyrum*, prop. *pirum*, a pear (see *pear*[1]), + *forma*, form.] I. *a.* Pear-shaped; having the general shape of a pear; obconic; differing from egg-shaped or oviform in having a slight constriction running around it, or, in section, a reverse or concave curve between the convex curves of the two ends: as, a *pyriform* vase. See cut of egg under *plover.*

II. *n.* In *anat.*, the pyriformis.

pyriformis (pir-i-fôr′mis), *n.*; pl. *pyriformes* (-mēz). [NL., sc. *musculus*, muscle: see *pyriform.*] A flat triangular muscle situated partly within and partly without the pelvis. It arises chiefly from the anterior surface of the sacrum, and, after passing through the sacrosciatic foramen, is inserted into the upper fore part of the great trochanter of the femur. It is one of a group of six muscles collectively known as *rotatores femoris.* The character of the muscle varies much in different animals. Also called *pyramidalis femoris* and *iliacus externus.*—**Fascia of the pyriformis.** See *fascia.*

pyritaceous (pir-i-tā′shius), *a.* [< *pyrites* + *-aceous.*] Of or pertaining to pyrites. See *pyritic.*

pyrite (pī′rīt), *n.* [Formerly also *pyrit;* < L. *pyrites*, < Gr. πυρίτης, a flint, millstone, pyrite, prop. adj., pertaining to fire (πυρίτης λίθος, a mineral which strikes fire), < πῦρ, fire: see *pyre.* Cf. *pyrites.*] Native iron disulphid (FeS_2), a very common mineral, occurring in isometric crystals, cubes, octahedrons, pyritohedrons, etc., and also, and more often, massive. It has a pale brass-yellow color and brilliant metallic luster, and is very hard. It is used in large quantities in the manufacture of sulphuric acid and of sulphur. It is commonly called *iron pyrites*, which term, however, also includes the related orthorhombic species marcasite, as well as the magnetic pyrites, or pyrrhotine. Compare *marcasite*, 1.

> Like the *pyrit* stone, that is fier without and frost within. *Greene*, Never too Late (Works, ed. Dyce, Int., p. xii.).
>
> Hence sable coal his massy couch extends,
> And stars of gold the sparkling *pyrite* blends.
> *Dr. E. Darwin*, Botanic Garden, I. ii. 350.

pyritegium (pir-i-tē′ji-um), *n.*; pl. *pyritegia* (-ą). [ML., < Gr. πῦρ, = E. *fire*, + L. *tegere*, cover. Cf. equiv. ML. *ignitegium.*] The curfew-bell: so called in medieval Latin. See *curfew.*

pyrites (pi-rī′tēz), *n.* [NL., < L. *pyrites*, < Gr. πυρίτης, a flint, millstone, pyrite.] Either of the common sulphids of iron, pyrite and marcasite, but also the yellow sulphid of copper and iron, chalcopyrite: the former are called distinctively *iron pyrites*, while the latter is known as *copper pyrites.* The name is also extended to other related sulphids and arsenides of iron, cobalt, nickel, etc.: as, pyrrhotine or *magnetic pyrites*, arsenopyrite or *arsenical pyrites*, linnæite or *cobalt pyrites*, millerite or *capillary pyrites*, etc.—**Cockscomb pyrites**, spear pyrites, white iron pyrites. See *marcasite*, 2.—**Hepatic pyrites.** See *hepatic.*

pyritic (pi-rit′ik), *a.* [< NL. *pyrites* + *-ic.*] Pertaining to pyrites; consisting of or resembling pyrites.

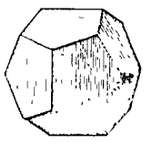
pyritical (pi-rit′i-kąl), *a.* [< *pyritic* + *-al.*] Same as *pyritic.*

pyritiferous (pir-i-tif′e-rus), *a.* [< NL. *pyrites* + L. *ferre* = E. *bear*[1].] Containing or producing pyrites.

pyritization (pir′i-ti-zā′shọn), *n.* [< *pyritize* + *-ation.*] Conversion into pyrites.

> Prof. T. Rupert Jones commented on the rarity of fossil Radiolaria. Some few have been found in the Chalk. Their *pyritization* would tend to their ready destruction. *Quart. Jour. Geol. Soc.*, XLV. 124.

pyritize (pir′i-tīz), *v. t.*; pret. and pp. *pyritized*, ppr. *pyritizing.* [< NL. *pyrites* + *-ize.*] To convert into pyrites.



pyritohedral (pi-rī-tō-hē′drąl), *a.* [< *pyritohedron* + *-al.*] Pertaining to the pyritohedron,

or belonging to the class of hemihedral forms of which it is the type.

It is very curious that in the treatment with aqua regia the cube and octahedron faces remain unattacked, while the acids exert a decided action upon the *pyritohedral* (pentagonal dodecahedral) faces, entirely destroying their power of reflecting light. *Sci. Amer.*, N. S., LX. 165.

Pyritohedral hemihedrism, in *crystal.* See *hemihedrism.*

pyritohedron (pi-rī-tō-hē'drọn), *n.* [NL., < Gr. πυρίτης, pyrites, + ἑδρα, a seat, base.] In *crystal.*, a pentagonal dodecahedron (see *dodecahedron*); a solid contained by twelve pentagons: a common form with pyrite, whence the name. It is the hemihedral form of the tetrahexahedron.

Pyritohedron.

pyritology (pir-i-tol'ọ-ji), *n.* [< Gr. πυρίτης, pyrites, + -λογία, < λέγειν, speak: see *-ology.*] 1. Facts or information relating to pyrites.—2. A system of or treatise on blowpipe analysis.

pyritous (pir'i-tus), *a.* [< NL. *pyrites* + *-ous.*] Consisting of pyrites.

pyro- (pī'rō- or pir'ọ-). [L., etc., < Gr. πυρο-, combining form of πῦρ, fire, = E. *fire:* see *fire.*] An element in many words of Greek origin or formation, meaning 'fire.'

pyro-acetic (pī-rō-a-set'ik), *a.* [< Gr. πῦρ, fire, + E. *acetic.*] Pertaining to or obtained from acetic acid when subjected to the action of heat.—**Pyro-acetic spirit.** Same as *acetone.*

pyro-acid (pī-rō-as'id), *n.* [< Gr. πῦρ, fire, + E. *acid.*] A product obtained by subjecting certain organic acids to heat. Also *pyracid.*

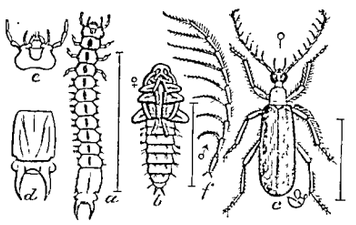
pyroballogy (pī-rō-bal'ọ-ji), *n.* [< Gr. πῦρ, fire, + βάλλειν, throw, hurl (see *ballista*), + -λογία, < λέγειν, speak: see *-ology.*] The art of throwing fire; the science of artillery, or a work on artillery. [Rare.]

He was enabled, by the help of some marginal documents, . . . together with Gobesius's military architecture and *pyroballogy*, translated from the Flemish, to form his discourse with passable perspicuity.
Sterne, Tristram Shandy, ii. 3.

Pyrocephalus (pī-rō-sef'ạ-lus), *n.* [NL. (J. Gould, 1838), < Gr. πῦρ, fire, + κεφαλή, head.] A genus of *Tyrannidæ;* the vermilion flycatchers, which have in the male sex a full globular

Vermilion Flycatcher (*Pyrocephalus rubineus*), male.

crest and the whole under parts flaming-red, the back, wings, and tail dusky-brown. *P. rubineus* is about six inches long. A variety of this is found in Mexico and the southwestern parts of the United States. There are several others.



pyrochlore (pī'rō-klōr), *n.* [< Gr. πῦρ, fire, + χλωρός, yellowish-green: see *chlorin.*] A niobotitanate of calcium, cerium, and other bases, occurring in isometric crystals, commonly octahedrons, of a brownish color and resinous luster. It turns yellowish-green under the blowpipe, whence the name.

Pyrochroa (pī-rok'rō-ạ), *n.* [NL. (Geoffroy, 1762), < Gr. πῦρ, fire, + χρόα, color.] A genus of heteromerous beetles, typical of the family *Pyrochroidæ*, and comprising about a dozen species, of which 2 are found in North America, 1 in Japan, and the rest in Europe. *P. coccinea* and *P. rubens* are known as *cardinal beetles*, from their red color.

pyrochroid (pī-rok'rō-id), *a.* and *n.* **I.** *a.* Of or pertaining to the *Pyrochroidæ.*

II. *n.* A beetle of the family *Pyrochroidæ.*

Pyrochroidæ (pī-rō-krō'i-dē), *n. pl.* [NL. (Leach, 1817), < *Pyrochroa* + *-idæ.*] A small family of heteromerous beetles of moderate size, with broad depressed bodies and elytra

Dendroides canadensis, a member of the family *Pyrochroidæ.*
a, larva; *b*, pupa; *c*, beetle (female); *d*, enlarged anal horns; *e*, enlarged head of larva; *f*, antenna of male beetle, magnified. (Lines show natural sizes of *a*, *c*, *c*.)

broadening behind, and remarkable for their relative size. They live in all stages under the half-decayed bark of many trees. Five genera and about 20 species are known, represented in Europe, Asia, North America, and Australia. *Dendroides canadensis* is a common North American member of this family.

pyrochroite (pī-rok'rō-it), *n.* [< Gr. πῦρ, fire, + χρόα, color, + *-ite*2.] Manganese hydrate, a mineral occurring in foliated forms with pearly luster, resembling brucite. It is white when fresh, but changes to bronze and black upon exposure.

pyrocitric (pī-rō-sit'rik), *a.* [< Gr. πῦρ, fire, + E. *citric.*] Obtained by subjecting citric acid to the action of heat.—**Pyrocitric acid.** Same as *citraconic acid* (which see, under *citraconic*).

pyroclastic (pī-rō-klas'tik), *a.* [< Gr. πῦρ, fire, + κλαστός, broken: see *clastic.*] Formed by volcanic agencies, or in the process of being erupted: applied to volcanic breccia or to any angular or comminuted material of igneous origin.

It is asserted that there is an absence of masses of *pyroclastic* materials (tuffs and dust) such as we should expect to find around great volcanic centres.
Quart. Jour. Geol Soc., XLV. 204.

Pyroderinæ † (pī-rod-ẹ-rī'nē), *n. pl.* [NL., < *Pyroderus* + *-inæ.*] A subfamily named from the genus *Pyroderus.* See *Gymnoderinæ.*

Pyroderus (pī-rod'ẹ-rus), *n.* [NL. (G. R. Gray, 1840), < Gr. πῦρ, fire, + δέρη, neck.] A genus of South American fruit-crows belonging to the subfamily *Gymnoderinæ*, giving name to the *Pyroderinæ.* There are 3 species, *P. scutatus*, *P. orinocensis*, and *P. granadensis*, inhabiting tropical parts of South America.

pyrodin (pī'rō-din), *n.* [< Gr. πυρώδης, like fire (< πῦρ, fire, + εἶδος, form), + *-in*2.] An antipyretic, acetyl-phenyl hydrazine, $C_6H_5.C_2H_3O.N_2H_2$. Also called *phenacethydrazine.*

pyro-electric (pī″rō-ẹ-lek'trik), *a.* and *n.* [< Gr. πῦρ, fire, + E. *electric.*] **I.** *a.* Relating to pyro-electricity; having the property of becoming electropolar when heated, as certain crystals; thermo-electric.

There are certain crystals which, while being heated or cooled, exhibit electrical charges at certain regions or poles. Crystals thus electrified by heating or cooling are said to be *pyro-electric.* *S. P. Thompson*, Elect. and Mag., p. 64.

II. *n.* A substance which becomes electrified when heated.

pyro-electricity (pī″rō-ẹ-lek-tris'i-ti), *n.* [< Gr. πῦρ, fire, + E. *electricity.*] That branch of electricity which considers the production of a state of electrification in certain crystallized bodies by change of temperature alone. Thus, when a prismatic crystal of tourmalin is slightly heated, positive electricity is found to be developed at one extremity (called the *analogous pole*) and negative at the other (the *antilogous pole*) If the crystal is cooled, similar properties are developed, but the poles are reversed. Many other crystals show the same property, especially those whose molecular structure differs at the opposite extremities of the same crystallographic axis (like tourmalin)—that is, which are hemimorphic or hemihedral. The unlike parts of a compound (twin) crystal of quartz become dissimilarly electrified by change of temperature. This can be well shown by shaking over a heated section of such a crystal a mixture of red lead and sulphur; the former collects on the parts which are negatively, the latter on those which are positively electrified. The phenomenon is closely related to the variations in stress which occur in the crystal when its temperature is altered. By some writers *pyroelectricity* is used to include also the phenomena of thermo-electricity, which, however, are totally different in character.

pyrogallate (pī-rō-gal'āt), *n.* [< Gr. πῦρ, fire, + E. *gallate.*] A salt of pyrogallic acid.

pyrogallic (pī-rō-gal'ik), *a.* [< Gr. πῦρ, fire, + E. *gallic*2.] Obtained from gallic acid by the action of heat: noting an acid, or more properly a phenol ($C_6H_3(OH)_3$), which forms colorless crystalline plates or needles, soluble in water and poisonous. In the presence of alkalis it rapidly absorbs oxygen, and it is used in chemical processes for that purpose. Pyrogallic acid rapidly reduces salts of mercury, silver, and gold, precipitating the metals, and from its property of reducing silver salts is one of the most efficient and most extensively used of photographic developing agents.

pyrogen (pī'rō-jen), *n.* [< Gr. πῦρ, fire, + -γενής, producing: see *-gen.*] 1. Any substance which, introduced into the blood, causes pyrexia or fever.—2. The electric fluid.

pyrogenesia (pī″rọ-je-nē'si-ạ), *n.* [NL.] Same as *pyrogenesis.*

pyrogenesis (pī-rō-jen'e-sis), *n.* [< Gr. πῦρ, fire, + γένεσις, generation: see *genesis.*] Production of fire or heat.

pyrogenetic (pī″rō-jẹ-net'ik), *a.* [< *pyrogenesis*, after *genetic.*] Heat-producing.

The actual rise of temperature that follows upon stripping in a cold atmosphere or upon first entering into a cold bath is not one of the least curious phenomena of the regulative function of the *pyrogenetic* mechanism.
Arc. Cruise of the Corwin, 1881, p. 12.

pyrogenic (pī-rō-jen'ik), *a.* [< Gr. πῦρ, fire, + -γενής, producing: see *-gen*, *-genous.*] Producing fever.

pyrogenous (pī-roj'e-nus), *a.* [< Gr. πῦρ, fire, + -γενής, producing: see *-genous.*] 1. Producing or concerned in the production of fire or heat: as, *pyrogenous* action in the blood.—2. Produced by fire; igneous.

pyrognomic (pī-rog-nom'ik), *a.* [< Gr. πῦρ, fire, + γνώμων, index, mark: see *gnomon.*] Exhibiting an incandescent glow when heated to a certain degree: specifically noting certain minerals.

pyrognostic (pī-rog-nos'tik), *a.* [< Gr. πῦρ, fire, + γνωστικός, knowing: see *gnostic.*] Pertaining to fire or heat: specifically noting those characters of a mineral which are observed by means of the blowpipe.

pyrognostics (pī-rog-nos'tiks), *n.* [Pl. of *pyrognostic* (see *-ics*).] Those properties of a mineral which it exhibits when heated, alone or with fluxes, in the blowpipe-flame or in the flame of a Bunsen burner, as the fusibility, intumescence, or other phenomena of fusion, flame-coloration, etc.

pyrography (pī-rog'rạ-fi), *n.* [< Gr. πῦρ, fire, + γράφειν, write.] A method of reproducing a design or an inscription on wood by the application under pressure of heated metallic plates or cylinders, the surfaces or peripheries of which bear dies or matrices in relief.

pyrogravure (pī″rọ-grạ-vūr'), *n.* [< Gr. πῦρ, fire, + F. *gravure*, engraving, < *graver*, grave: see *grave*1.] A method of engraving on wood by the use of a red-hot metallic point; also, a picture produced by this method.

Pyrogravure is a new method of engraving in black, reddish brown, bister, etc., by the use of a red hot metallic point. *Sci. Amer.*, N. S., LVIII. 353.

pyroheliometer (pī-rọ-hē-li-om'e-tėr), *n.* Same as *pyrheliometer.*

Pyrola (pir'ọ-lạ), *n.* [NL. (Tournefort, 1700), so called from the resemblance of the shining leaves to those of the pear-tree; prop. *Pirola;* dim. of L. *pirus*, improp. *pyrus*, a pear-tree: see *Pyrus.*] 1. A genus of dicotyledonous plants of the order *Ericaceæ*, the heath family, type of the tribe *Pyroleæ*, characterized by racemed flowers with five converging petals, ten stamens with peculiar four-celled inverted anthers opening by pores, and a capsule opening from the base upward, with cobwebby margins. The 16 species are natives of the northern hemisphere, including 8 in the United States. They are smooth perennial herbs, sending out subterranean runners, and bearing radical or alternate long stalked evergreen leaves, commonly entire and rounded, and an erect scape of bracted nodding flowers, which are white, yellowish, rose-colored, or purple. Several species are known in England and among American writers as *wintergreen* or *false wintergreen.* *P. rotundifolia*, the larger wintergreen, is the most conspicuous species, a plant of both hemispheres, with thickish veiny round leaves, and commonly pure-white flowers, the stalk 6 to 12 inches high. It has been called *Indian lettuce* and *canker-lettuce.* *P. elliptica*, a smaller American plant with thin elliptical leaves, is called *shinleaf*, a name also extended to the genus.

2. [*l. c.*] Any plant of the above genus.—**One-flowered pyrola**, *Moneses grandiflora*, a plant once included in the genus *Pyrola.*

Pyrolaceæ (pir-ọ-lā'sẹ̄-ē), *n. pl.* [NL. (Lindley, 1836), < *Pyrola* + *-aceæ.*] Same as *Pyroleæ.*

pyrolater (pī-rol'ạ-tėr), *n.* [< *pyrolatry* (cf. *idolater*).] A fire-worshiper. [Rare.]

The fires [were rejected] . . . as having too near an analogy to the religion of the *pyrolators.*
Southey, Thalaba, viii., note.

pyrolatry (pī-rol'ạ-tri), *n.* [< Gr. πῦρ, fire, + λατρεία, worship.] The worship of fire; fire-worship.

Pyroleæ (pī-rō'lē-ē), *n. pl.* [NL. (Lindley, 1821), < *Pyrola* + *-eæ*.] A tribe of plants of the gamopetalous order *Ericaceæ*, the heath family, unlike the rest of the order in its polypetalous corolla and herbaceous habit, and also characterized by a loculicidal capsule, five imbricated deciduous petals, and a perennial creeping rhizome. It includes about 21 species in the three genera *Pyrola*, *Moneses*, and *Chimaphila*, all small, smooth, shining evergreen herbs of northern temperate regions, and well represented in the United States. See the above genera, and compare *Ericaceæ*. Also *Pyrolaceæ*.

pyroleter (pī-rol'e-tėr), *n.* [< Gr. πῦρ, fire, + ὀλετήρ, destroyer, < ὀλλύναι, destroy.] An apparatus for the extinction of fire, especially on board ships, by which hydrochloric acid and sodium bicarbonate, partly dissolved and partly suspended in water, are pumped into a cylinder, and the carbonic acid there generated is projected on the fire.

The *pyroleter* is a small double pump worked by hand, which sucks up from tubes on either side muriatic acid and a solution of carbonate of soda. These mingle in a generator forming part of the pump. The carbonic acid gas formed and the solution of salt and acid pass at once down a metal pipe to the hold; along the keelson of the ship runs a perforated wooden box, which admits the dry carbonic acid gas amongst the burning materials.
Ure, Dict., IV. 712.

pyroligneous (pī-rō-lig'nē-us), *a.* [< Gr. πῦρ, fire, + L. *ligneus*, of wood: see *ligneous*.] Generated or procured by the distillation of wood. Also *pyroligenous*.—**Pyroligneous acid**, impure acetic acid obtained by the distillation of wood.—**Pyroligneous alcohol**, methylic alcohol.—**Pyroligneous vinegar**, wood-vinegar.

pyrolignic (pī-rō-lig'nik), *a.* [< Gr. πῦρ, fire, + L. *lignum*, wood, + *-ic*.] Same as *pyroligneous*.

pyrolignite (pī-rō-lig'nīt), *n.* [< *pyrolign*(*ic*) + *-ite*2.] A salt of pyroligneous acid.

pyrolignous (pī-rō-lig'nus), *a.* [< Gr. πῦρ, fire, + L. *lignosus*, like wood: see *lignous*.] Same as *pyroligneous*.

pyrolithic (pī-rō-lith'ik), *a.* [< Gr. πῦρ, fire, + λίθος, stone.] In *chem.*, same as *cyanuric*.

pyrologist (pī-rol'ō-jist), *n.* [< *pyrology* + *-ist*.] One who is versed in the doctrines of heat; an investigator of the laws of heat.

pyrology (pī-rol'ō-ji), *n.* [< Gr. πῦρ, fire, + *-λογία*, < λέγειν, speak: see *-ology*.] The science of heat, latent and sensible.

pyrolusite (pī-rō-lū'sīt), *n.* [< Gr. πῦρ, fire, + λοῦσις, a washing (< λούειν, wash), + *-ite*2.] Native manganese dioxid (MnO_2), a common ore of manganese, occurring crystallized and massive, of a gray color and metallic luster. It parts with a portion of its oxygen at a red heat, and is on this account used to discharge the brown or green tints of glass, whence its name. When crystallized it has often the form of manganite, from which it has been, at least in many cases, derived by alteration. It is very soft, and is readily distinguished by this property from the other form of manganese dioxid, called polianite.

pyromagnetic (pī rō-mag-net'ik), *a.* [< Gr. πῦρ, fire, + E. *magnetic*.] Relating to magnetism as modified by heat: noting a dynamo and motor of novel construction, devised by Edison, the operation of which depends on the fact that the intensity of magnetization of iron diminishes as the temperature increases.

pyromancy (pī'rō-man-si), *n.* [< ME. **piromancie*, *peromancie*, < OF. **piromancie*, *piromance*, *pyromance*, < ML. *pyromantia*, *pyromancia*, < Gr. πυρομαντία, divination by fire, < πῦρ, fire, + μαντεία, divination.] Divination by fire, or by the forms appearing in fire.

Nigromancye and *perimancie* the pouke to rise maketh; 3if thou thence Dowel dele with hem neuere.
Piers Plowman (A), xi. 158.

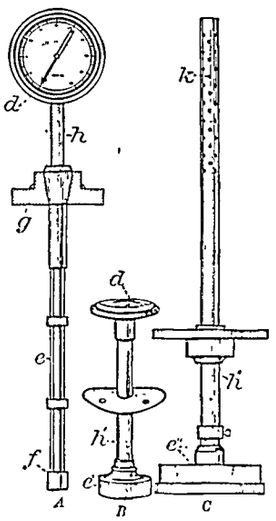
Amphiaraus was the first that had knowledge of *Pyromancie*, and gathered signs by speculations of fire
Holland, tr. of Pliny, vii. 56.

pyromania (pī-rō-mā'ni-ạ), *n.* [< Gr. πῦρ, fire, + μανία, madness.] A mania for destroying things by fire; a form of insanity marked by a mania for setting things on fire.

pyromaniac (pī-rō-mā'ni-ak), *a.* and *n.* [< *pyromania* + *-ac*.] I. *a.* Of, pertaining to, characterized by, or affected with pyromania.

II. *n.* A person possessed of a mania or irresistible impulse to burn things.

As *pyromaniacs* rarely incriminate themselves, it becomes the more important to study the many indications by which the diagnosis can be made by indirect examinations.
Amer. Jour. Psychol., I. 191.



pyromaniacal (pī''rō-mā-nī'ạ-kal), *a.* [< *pyromaniac* + *-al*.] 1. Affected with or having a tendency to pyromania: as, *pyromaniacal* persons.—2. Caused by pyromaniacs: as, *pyromaniacal* fires.

pyromantic (pī-rō-man'tik), *a.* and *n.* [< *pyromancy* (*-mant-*) + *-ic*.] I. *a.* Pertaining to pyromancy.

II. *n.* One who pretends to divine by means of fire.

pyrometamorphism (pī-rō-met-ạ-môr'fizm), *n.* [< Gr. πῦρ, fire, + E. *metamorphism*.] Metamorphism resulting from the action of heat, as distinguished from hydrometamorphism, that produced by water. See *metamorphism*.

pyrometer (pī-rom'e-tėr), *n.* [< Gr. πῦρ, fire, + μέτρον, measure.] An instrument, in the form of a simple metallic bar, employed by Muschenbrook, about 1730, for measuring the changes produced in the dimensions of solid bodies by the application of heat. The name is now applied, however, to any instrument the object of which is to measure all gradations of temperature above those that can be indicated by the mercurial thermometer. Wedgwood's pyrometer, the first which came into extensive use, was employed by him for testing the heat of his pottery- and porcelain-kilns, and depended on the property of clay to contract on exposure to heat. Many different modes have been proposed or actually employed for measuring high temperatures: as (*a*) by contraction, as in Wedgwood's; (*b*) by the expansion of bars of different metals; (*c*) by change of pressure in confined gases, as in Lamy's instrument, or by the expansion of gases, as in the air-thermometer; (*d*) by the amount of heat imparted to a cold mass, as in Siemens's instrument; (*e*) by the fusing-point of solids; (*f*) by conduction and radiation of heat (see *pyroscope*); (*g*) by color, as red and white heat; (*h*) by change in the velocity of sound; (*i*) by the resolution of chemical compounds; (*j*) by generation of electricity, as in Becquerel's thermo-electric pyrometer; and (*k*) by change in resistance to electricity, as in the instrument invented by Siemens, which may be adapted to measuring either high or low temperatures.

Pyrometers.

A, pyrometer (Gauntlett's) in which the pointer of dial *d* is turned by the unequal expansion of rods *r*, which are made fast at *f*; *r* consists of three brass or copper rods surrounding one of iron which connects with dial through tube *h* supported at *g*. *B*, pyrometer in which the motive power is a coil of wire inside *e'*, the connecting rods passing through tube *h'* to dial at *d'*. *C*, pyrometer with screw-shaped metallic coil within the tube *kh''*, which, when heated, moves the pointer of dial at *e''*.

pyrometric (pī-rō-met'rik), *a.* [As *pyrometer* + *-ic*.] Pertaining to the pyrometer, or to its use; ascertained or shown by means of the pyrometer.

pyrometrical (pī-rō-met'ri-kạl), *a.* [< *pyrometric* + *-al*.] Same as *pyrometric*.

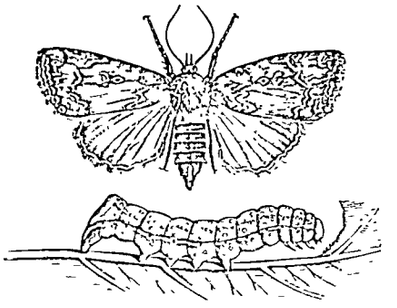
pyrometrically (pī-rō-met'ri-kạl-i), *adv.* In a pyrometric manner; with or by means of the use of the pyrometer.

pyrometry (pī-rom'e-tri), *n.* [< Gr. πῦρ, fire, + *-μετρία*, < μέτρον, a measure.] That branch of science which treats of the measurement of heat; the act or art of measuring amounts or degrees of heat.

pyromorphite (pī-rō-môr'fīt), *n.* [So called in allusion to the peculiar crystalline form which a fused globule assumes on cooling; < Gr. πῦρ, fire, + μορφή, form, + *-ite*2.] Native phosphate of lead with lead chlorid. It is a mineral of a green, yellow, or brown color, crystallizing in hexagonal prisms, and isomorphous with apatite, mimetite, and vanadinite. It also occurs massive in globular, reniform, fibrous, moss-like, granular, or earthy forms. Often called *green lead ore*.

pyromorphous (pī-rō-môr'fus), *a.* [< Gr. πῦρ, fire, + μορφή, form, + *-ous*.] In *mineral.*, having the property of being crystallizable upon fusion.

pyronaphtha (pī-rō-naf'thạ), *n.* [< Gr. πῦρ, fire, + νάφθα, naphtha: see *naphtha*.] An illuminating agent which has been prepared in Russia from the waste products of the distillation of Baku petroleum. It burns with a bright light.



pyronomics (pī-rō-nom'iks), *n.* [< Gr. πῦρ, fire, + νόμος, law.] The science of the properties and action of heat. [Rare.]

pyrope (pī'rōp), *n.* [< Gr. πυρωπός, a kind of red bronze, prop. adj., fire-eyed, fiery, < πῦρ, fire, + ὤψ, eye.] Fire-garnet, or Bohemian garnet, a dark-red variety of garnet, sometimes used as a gem, found embedded in serpentine at Budweis in Bohemia and elsewhere. It belongs to the magnesia-alumina variety of the species, and often contains also some chromium. See *garnet*1.

pyrophane (pī'rō-fān), *n.* [< Gr. πῦρ, fire, + φαίνειν, show.] A kind of opal (hydrophane) which by the absorption of melted wax is rendered translucent so long as it is hot, but becomes opaque again on cooling.

pyrophanous (pī-rof'ạ-nus), *a.* [< Gr. πῦρ, fire, + φαίνειν, show.] Rendered transparent or translucent by heat.

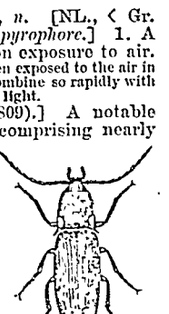
Pyrophila (pī-rof'i-lạ), *n.* [NL. (Stephens, 1829), < Gr. πῦρ, fire, + φιλεῖν, love.] A genus of noctuid moths, containing a number of species which are destructive in their larval states. *P. pyramidoides* is the pyramidal grape-vine worm of the United States, which damages grape-vines, and also raspberry, poplar, and red-bud (*Cercis*).

Pyramidal Grape-vine Moth and Worm (*Pyrophila pyramidoides*).

pyrophobia (pī-rō-fō'bi-ạ), *n.* [< Gr. πῦρ, fire, + *-φοβία*, < φόβος, fear.] A morbid dread of fire.

pyrophone (pī'rō-fōn), *n.* [< Gr. πῦρ, fire, + φωνή, sound, tone.] A musical instrument in which the tones are produced by means of burning jets of hydrogen inclosed in graduated glass tubes. It was invented about 1875 by Frederic Kastner. Sometimes called *chemical harmonicon*.

pyrophor (pī'rō-fôr), *n.* [< Gr. πυροφόρος, fire-bearing: see *pyrophore*.] A name sometimes given to the stirrup-lantern.



pyrophore (pī'rō-fōr), *n.* [< Gr. πυροφόρος, fire-bearing, < πῦρ, fire, + φέρειν = E. *bear*1.] 1. A body which will become ignited if exposed to air or water, such as self-lighting logs intended for use at sea in facilitating the rescue of a person who is overboard.—2. A composition or an apparatus for kindling fire.

pyrophoric (pī-rō-for'ik), *a.* [< NL. *pyrophor*(*us*) + *-ic*.] Same as *pyrophorous*.

pyrophorous (pī-rof'ō-rus), *a.* [< NL. *pyrophor*(*us*) + *-ous*.] Pertaining to or resembling pyrophorus.

pyrophorus (pī-rof'ō-rus), *n.* [NL., < Gr. πυροφόρος, fire-bearing: see *pyrophore*.] 1. A substance which takes fire on exposure to air. Many metals (iron, lead, etc.), when exposed to the air in a very finely divided condition, combine so rapidly with oxygen as to cause an evolution of light.

2. [*cap.*] [NL. (Illiger, 1809).] A notable genus of elaterid beetles, comprising nearly a hundred species, confined to tropical and subtropical America, and containing the most brilliant forms of luminous insects. The light is given out from two oval spots in the pronotum near each basal angle, and from a point beneath, between the thorax and the abdomen. These beetles fly in a nearly direct line, and the light is more intense and sustained than that of the *Lampyridæ*. In many countries of tropical America they are used as toilet ornaments and form an article of trade. *P. noctilucus* is a large West Indian species, often brought alive to the United States. See also cut under *antenna*.

Pyrophorus noctilucus.

3. [*cap.*] A genus of arachnidans. *Koch*, 1837.

pyrophosphate (pī-rō-fos'fāt), *n.* [< *pyrophosph*(*oric*) + *-ate*1.] A salt of pyrophosphoric acid. See *pyrophosphoric*.

pyrophosphoric (pī″rō-fos-for′ik), *a.* [< Gr. πῦρ, fire, + E. *phosphoric.*] Formed by heating phosphoric acid: noting an acid ($H_4P_2O_7$) produced by exposing concentrated phosphoric acid to a temperature of 415° F. Pyrophosphoric acid is tetrabasic—that is, capable of forming four distinct classes of salts according as one, two, or three atoms or the whole of the hydrogen is replaced by a metal. The pyrophosphates, especially that of iron, are used in medicine.

pyrophotography (pī″rō-fō-tog′ra-fi), *n.* [< Gr. πῦρ, fire, + E. *photography.*] Certain photographic processes in which heat is used to fix the picture.

pyrophyllite (pī-rō-fil′īt), *n.* [So called in allusion to its exfoliation before the blowpipe; < Gr. πῦρ, fire, + φύλλον, leaf, + *-ite*2.] A hydrated aluminium silicate, occurring in foliated talc-like subtransparent masses having a white, green, or yellow color and pearly luster.

pyrophysalite (pī-rō-fis′a-līt), *n.* [< Gr. πῦρ, fire, + E. *physalite.*] See *physalite.*

pyropuncture (pī-rō-pungk′tūr), *n.* [< Gr. πῦρ, fire, + E. *puncture.*] Puncturing with hot needles; also, a puncture so made.

pyroracemate (pī-rō-ras′e-māt), *n.* [< *pyroracem(ic)* + *-ate*1.] A salt formed by the union of pyroracemic acid with a base.

pyroracemic (pī″rō-ra-sem′ik), *a.* [< Gr. πῦρ, fire, + E. *racemic.*] Produced by the distillation of tartaric and racemic acids: as, *pyroracemic* acid ($C_3H_4O_3$).

pyroschist (pī′rō-shist), *n.* [< Gr. πῦρ, fire, + E. *schist.*] Schist or shale containing sufficient bituminous matter (hydrocarbons) to burn with a bright flame, or yielding volatile hydrocarbon or inflammable gas when heated.

pyrosclerite (pī-rō-sklē′rīt), *n.* [< Gr. πῦρ, fire, + σκλῆρός, hard, + *-ite*2.] An emerald-green mineral allied to the chlorites, occurring in serpentine in the island of Elba, Italy.

pyroscope (pī′rō-skōp), *n.* [< Gr. πῦρ, fire, + σκοπεῖν, view.] An instrument for measuring the intensity of radiating heat or cold. It resembles a differential thermometer, having one bulb covered with quicksilver-leaf, while the other is bare.

pyrosilver (pī-rō-sil′vėr), *n.* [< Gr. πῦρ, fire, + E. *silver.*] A trade-name for electroplated wares which, after they are taken from the bath, are subjected to heat. This treatment seems to cause the metal to sink into the pores of the plated base metal and adhere to it much more firmly and durably. The process is technically called *burnuo-in.*

pyrosis (pī-rō′sis), *n.* [< Gr. πύρωσις, a burning, a kindling, < πυροῦν, set on fire, burn, < πῦρ, fire: see *fire.*] In *pathol.*, the eructation of watery fluid, usually insipid, but sometimes acrid, attended with more or less burning pain in the epigastrium. It is commonly called *water-brash.*

pyrosmalite (pī-ros′ma-līt), *n.* [< Gr. πῦρ, fire, + ὀσμή, a smell, an object of smell, + λίθος, stone.] A mineral of a liver-brown color, or pistachio-green, occurring in six-sided prisms, with perfect basal cleavage, found in Sweden. It is a silicate of iron and manganese, containing chlorin, the odor of which it exhales when heated.

Pyrosoma (pī-rō-sō′mä), *n.* [NL. (Péron), < Gr. πῦρ, fire, + σῶμα, body.] The typical genus of *Pyrosomatidæ:* so called from their phosphorescence. They inhabit the Mediterranean and Atlantic. They unite in great numbers, forming a large hollow cylinder, open at one end and closed at the other, swimming in the ocean by the alternate contraction and dilatation of its component individual animals. See cut under *cyathozooid.*

Pyrosomatidæ (pī″rō-sō-mat′i-dē), *n. pl.* [NL., < *Pyrosoma* (*-somat-*) + *-idæ.*] A family of compound or aggregate ascidians of the class *Tunicata,* typified by the genus *Pyrosoma,* sometimes representing an order or suborder *Dactylobranchia;* the firebodies. They are free-swimming pelagic organisms, highly luminous, united together in hollow chains or rods several inches long, one end of each individual fitting into the cavity of the next, somewhat like a set of thimbles. Also *Pyrosomidæ, Pyrosomidæ.*

pyrosome (pī′rō-sōm), *n.* [< NL. *Pyrosoma.*] A member or individual of the genus *Pyrosoma;* a firebody.

Pyrosomidæ (pī-rō-som′i-dē), *n. pl.* [NL., < *Pyrosoma* + *-idæ.*] Same as *Pyrosomatidæ.*

Pyrosomiidea (pī-rō-sō-mi-id′ē-ä), *n. pl.* [NL.] A false form of *Pyrosomatidæ* or *Pyrosomidæ,* taken as the name of an order of ascidians which that family is supposed to represent. *E. R. Lankester.*

pyrostat (pī′rō-stat), *n.* [< Gr. πῦρ, fire, + στατός, < ἱστάναι, set up, stand: see *static.*] An automatic draft-regulator for chimneys, smoke-pipes, and smoke-stacks. See *draft-regulator,* under *regulator.*

pyrostereotype (pī-rō-ster′ē-ō-tīp), *n.* [< Gr. πῦρ, fire, + E. *stereotype.*] A process by which a mold for casting a printing relief-plate is obtained by burning an intaglio to a definite depth in the face of a wood block by means of heated steel dies and a special apparatus. It is used for printing music, etc.

pyrostilpnite (pī-rō-stilp′nīt), *n.* [< Gr. πῦρ, fire, + στιλπνός, glistening, + *-ite*2.] A rare mineral, occurring in minute tabular monoclinic crystals. It is a sulphid of arsenic and silver, near proustite in composition. Also called *fireblende.*

pyrosulphuric (pī″rō-sul-fū′rik), *a.* [< Gr. πῦρ, fire, + E. *sulphuric.*] Obtained from sulphuric acid by the action of heat.—**Pyrosulphuric acid.** Same as *disulphuric acid* (which see, under *disulphuric*).

pyrotartaric (pī″rō-tär-tar′ik), *a.* [< Gr. πῦρ, fire, + E. *tartaric.*] Obtained by heating tartaric acid in a close vessel: as, *pyrotartaric* acid ($C_5H_8O_4$).

pyrotartrate (pī-rō-tär′trāt), *n.* [< Gr. πῦρ, fire, + E. *tartrate.*] A salt of pyrotartaric acid.

pyrotechnian (pī-rō-tek′ni-an), *n.* [< *pyrotechny* + *-an.*] A pyrotechnist.

pyrotechnic (pī-rō-tek′nik), *a.* [< *pyrotechn-y* + *-ic.*] Of or pertaining to fireworks or the art of making them.

pyrotechnical (pī-rō-tek′ni-kal), *a.* [< *pyrotechnic* + *-al.*] Same as *pyrotechnic.*—**Pyrotechnical sponge.** Same as *amadou.*

pyrotechnician (pī″rō-tek-nish′an), *n.* [< *pyrotechnic* + *-ian.*] A pyrotechnist.

pyrotechnics (pī-rō-tek′niks), *n.* [Pl. of *pyrotechnic* (see *-ics*).] The art of making fireworks; the composition, structure, and use of fireworks. See *firework,* 2.

pyrotechnist (pī-rō-tek′nist), *n.* [< *pyrotechn-y* + *-ist.*] One who is skilled in pyrotechny; a manufacturer of fireworks.

pyrotechny (pī′rō-tek-ni), *n.* [< Gr. πῦρ, fire, + τέχνη, art.] 1. The management and mechanical application of fire.

> Does man go thus far by his skill in *pyrotechny,* and shall not God go more, who is the Cosmotect?
> *Evelyn,* True Religion, I. 199.

2. The fabrication of fireworks for military and ornamental purposes (see *firework,* 2); the composition and scientific use of combustible substances employed as signals, as destructive agents, or for purposes of display.

pyrothonide (pī-roth′ō-nid), *n.* [< Gr. πῦρ, fire, + ὀθόνη, fine linen, + *-ide*1.] A kind of empyreumatic oil produced by the combustion of textures of hemp, linen, or cotton in a copper vessel, formerly used in medicine. *Dunglison.*

pyrotic (pī-rot′ik), *a.* and *n.* [< Gr. πυρωτικός, burning, heating, < πυροῦν, set on fire, < πῦρ, fire: see *pyrosis.*] I. *a.* Caustic.

II. *n.* A caustic medicine.

pyro-uric (pī-rō-ū′rik), *a.* [< Gr. πῦρ, fire, + οὖρον, urine, + *-ic.*] In *chem.*, same as *cyanuric.*

pyroxanthine, pyroxanthin (pī-rok-san′thin), *n.* [< Gr. πῦρ, fire, + ξανθός, yellow, + *-ine*2, *-in*2.] A yellow crystalline substance found in crude wood-spirit. Also called *chlanin.*

pyroxene (pī′rok-sēn), *n.* [< Gr. πῦρ, fire, + ξένος, a guest.] An important mineral species, embracing many varieties differing in appearance and chemical composition. It occurs in monoclinic crystals, often short prismatic in habit, and with an angle in front of nearly 90°, so that these crystals resemble square prisms. Granular forms are common, and also massive varieties, the latter being usually coarsely laminated in structure, rarely fibrous or columnar. The color varies from white to gray, green, brown, and black, and the composition from the simple metasilicate of calcium and magnesium to kinds containing, with calcium or magnesium, or both, iron, manganese, and aluminium. The different varieties are usually divided into two groups, the non-aluminous and the aluminous. Of the former the prominent kinds are—diopside or malacolite, which contains only calcium and magnesium, and is white to gray or light-green in color, with the subvarieties called alalite or mussite (the diopside proper, from the Mussa Alp in the Ala valley in Piedmont, occurring in beautiful slender crystals), trevorsite, canaanite, and white granular coccolite, and those containing iron, namely the grayish-green to deep-green or black sahlite, occurring in laminated masses, the crystallized hedenbergite, the granular green coccolite, and the deep-green diallage, which is characterized by a distinct parting parallel to the orthopinacoid plane and often by a pearly to metalloidal luster on this surface; also the lime-iron variety, hedenbergite, and the manganesian schefferite. The aluminous kinds include fassaite, which is light- to dark-green in color, and the common augite, which is dark-green to black and contains considerable iron. Augite is characteristic of many eruptive rocks, especially those of a basic character, as diabase, basalt, etc. Diallage is an essential constituent of the gabbros, of norite, etc. Besides the above varieties or subspecies belonging to pyroxene proper, the pyroxene group includes the related species enstatite or bronzite and hypersthene, which are orthorhombic in crystallization (hence called *rhombic pyroxenes*); also the monoclinic species wollastonite, ægirite and acmite, spodumene, and the triclinic rhodonite and babingtonite. Jadeite probably also belongs here. All these are characterized by the same prismatic angle of 87°. This group is closely related to the analogous amphibole (or hornblende) group, the species of which are characterized by a prismatic angle of 124½°; and several of the kinds under the two groups correspond exactly in composition—for example, diopside to tremolite, etc. A change of pyroxene to hornblende by a process of paramorphism is often observed, especially in certain igneous rocks. See *uralite* and *uralitization.*

pyroxenic (pī-rok-sen′ik), *a.* [< *pyroxene* + *-ic.*] Pertaining to pyroxene, or partaking of its qualities; composed of or containing pyroxene.

pyroxyle (pī-rok′sil), *n.* [< Gr. πῦρ, fire, + ξύλον, wood.] Same as *pyroxylin.*

pyroxylic (pī-rok-sil′ik), *a.* [< Gr. πῦρ, fire, + ξύλον, wood (cf. *pyroxyle*), + *-ic.*] Obtained by distilling wood.—**Pyroxylic spirit,** methylic alcohol; a product of the distillation of wood. It constitutes about one tenth of the watery products after separation of the tar, and is obtained from these products by re-distillation. Rectification is partially effected by first heating it with slaked lime, which frees a large quantity of ammonia, next neutralizing the remainder of the ammonia and precipitating the remaining traces of tar by sulphuric acid, then again distilling and passing it several times over quicklime. The product is the crude wood-spirit of commerce, which still contains many impurities; these are removed by chemically combining it with calcium chlorid and heating the compound over a water-bath to 100° C., which drives off volatile impurities. It is then distilled with water, which breaks up the combination and sets free the pyroxylic spirit diluted with water. The latter is then removed to get the desired strength by treatment with quicklime. Also called *wood-spirit* and *wood-alcohol.*

pyroxylin, pyroxyline (pī-rok′si-lin), *n.* [< *pyroxyle* + *-in*2, *-ine*2.] Guncotton or a similar substance obtained by immersing vegetable fiber in nitric or nitrosulphuric acid, and then suffering it to dry. Such substances are nitro-derivatives of cellulose. Also *pyroxyle.*—**Soluble pyroxylin.** Same as *dinitrocellulose.*

pyrrhic[1] (pir′ik), *n.* and *a.* [< L. *pyrrhicha, pyrrhiche,* < Gr. πυρρίχη, a kind of war-dance, said to be named from Pyrrhichus, the inventor, < Πύρριχος, Pyrrhichus.] I. *n.* An ancient Grecian warlike dance, in quick and light measure, accompanied by the flute. It consisted chiefly in adroit and nimble steps and motions of the body, intended to represent the attempt to avoid strokes of an enemy in battle and to inflict injury upon him. It was performed under arms, and the movements and practice necessary were looked upon as training for service in the field.

II. *a.* Of or pertaining to the Greek martial dance called a pyrrhic.

> You have the *Pyrrhic* dance as yet;
> Where is the Pyrrhic phalanx gone?
> *Byron,* Don Juan, iii. 86 (song).

pyrrhic[2] (pir′ik), *a.* and *n.* [< L. *pyrrhichius,* < Gr. πυρρίχιος, of or belonging to the pyrrhic (dance) (πούς πυρρίχιος, a pyrrhic foot), < πυρρίχη, a pyrrhic: see *pyrrhic*[1].] I. *a.* In *pros.*, consisting of two short times or syllables: as, a *pyrrhic* foot; composed of or pertaining to feet so constituted: as, *pyrrhic* verse; *pyrrhic* rhythm.

II. *n.* In *anc. pros.*, a foot consisting of two short times or syllables. A pyrrhic is apparently a disemic isorrhythmic foot (◡ ◡ or ⏑ ⏑). The earlier and better ancient authorities (the rhythmicians), however, did not acknowledge the existence of a disemic foot, and it seems to have been first introduced into metrical analysis by the grammarians and later meticians. An apparent pyrrhic (◡ ◡) can occur—(*a*) at the end of an iambic line (– ◡ or ◡ –); (*b*) as part of procelusmatics (◡ ◡ ◡ ◡), Ionics (◡ ◡ – – or – – ◡ ◡), or pæons (– ◡ ◡ ◡, ◡ – ◡ ◡, ◡ ◡ – ◡, ◡ ◡ ◡ –), regarded by later writers as compound feet; and (*c*) in the so-called basis or polyschematist foot of a logaædic series. Wherever it occurs as a separate foot, it is accordingly a representative of a trisemic foot (– ◡ or ◡ –). Pyrrhics in continuous composition would constitute procelusmatic verse, and, although there is little trace of the actual existence of such a meter, it may have been used in single lines or short systems to accompany or suggest the more rapid movements of the war-dance (*pyrrhic*[1]) from which it probably takes its name. Also called *dibrach* (Latin *dibrachys* or *bibrevis*), *pariambus,* and (*single* or *disemic*) *proceleusmatic.* The name ἡγεμών or *hegemon* (leader), often given to the pyrrhic in ancient writers, was apparently suggested by its being placed first in the accepted list of feet. Also *pyrrhichius.*

> A verse made up of *pyrrhics* in immediate succession.
> *J. Hadley,* Essays, p. 99.

Pyrrhic[3] (pir′ik), *a.* [< L. *Pyrrhus,* < Gr. Πύρρος, Pyrrhus (see def.), < πυρρός, red-haired, reddish: see *burrel.*] Pertaining to Pyrrhus, especially to Pyrrhus, King of Epirus (see phrase below).—**Pyrrhic victory,** a success obtained at too great a cost: in allusion to the reputed exclamation of Pyrrhus, King of Epirus, after the battle of Asculum against the Romans (279 B. C.), "Another such victory and we are lost!"

pyrrhicist (pir′i-sist), *n.* [< Gr. πυρριχιστής, one who danced the pyrrhic, < πυρριχίζειν, dance the pyrrhic, < πυρρίχη, the pyrrhic: see *pyrrhic*[1].] One who danced in the pyrrhic. *Imp. Dict.*

pyrrhichius (pi-rik′i-us), *n.*; pl. *pyrrhichii* (-i). [L.: see *pyrrhic*[2].] Same as *pyrrhic*[2].

This word [rĕnĕt] having both syllables sliding and slipper make the foote *Pirrichius*, because if he be truly vttered, he beares in maner no sharper accent vpō the one then the other sillable, but be in effect egall in time and tune, as is also the Spondeus.
Puttenham, Arte of Eng. Poesie, p. 102.

pyrrhite (pir'īt), *n.* [< Gr. *πυρρός*, reddish (see *burrel*), + *-ite*[2].] A rare mineral, occurring in minute regular reddish-yellow octahedrons. Its composition is not certainly known, but it is supposed to be related to the niobate pyrochlore.

pyrrhoarsenite (pir-ō-är'se-nīt), *n.* [< Gr. *πυρρός*, reddish, + E. *arsenite*.] An arseniate of calcium, magnesium, and manganese, in which the arsenic is in part replaced by antimony. It occurs in embedded grains of a deep yellowish-red color in Sweden.

Pyrrhocoracinæ (pir-ō-kor-a-sī'nē), *n. pl.* [NL., < *Pyrrhocorax* (*-corac-*) + *-inæ*.] A subfamily of *Corvidæ*, named in 1846 by G. R. Gray from the genus *Pyrrhocorax;* the choughs. Also called *Fregilinæ*.

pyrrhocoracine (pir-ō-kor'a-sin), *a.* Of or pertaining to the *Pyrrhocoracinæ*.

Pyrrhocorax (pi-rok'ō-raks), *n.* [NL. (Vieillot, 1816), < Gr. *πυρρός*, reddish, + *κόραξ*, a raven.] A genus of *Corvidæ*, typical of the *Pyrrhocoracinæ:* the choughs. *P.* or *Fregilus graculus* is the common chough, with red bill and feet (see cut under *chough*); *P. alpinus* is the alpine chough. The genus is sometimes restricted to the latter, and then distinguished from *Fregilus*.

Pyrrhocoridæ (pir-ō-kor'i-dē), *n. pl.* [NL., < *Pyrrhocoris* + *-idæ*.] A family of heteropterous insects, consisting of large, stout bugs, usually marked with red and black, and containing many tropical and subtropical species. The cotton-stainer of the West Indies and southern United States, *Dysdercus suturellus*, is an example.

Pyrrhocoris (pi-rok'ō-ris), *n.* [NL. (Fallen, 1841), < Gr. *πυρρός*, reddish, + *κόρις*, a bug.] A genus of true bugs, typical of the family *Pyrrhocoridæ*.

Pyrrhonean (pi-rō'nē-an), *a.* [< L. *Pyrrhoneus* (< Gr. Πύρρων, Pyrrho: see *Pyrrhonic*) + *-an*.] Pyrrhonic.

Pyrrhonian (pi-rō'ni-an), *n.* [< Gr. Πύρρων, Pyrrho, + *-i-an*.] Same as *Pyrrhonist*.

Pyrrhonic (pi-ron'ik), *a.* [< Gr. Πύρρων, Pyrrho, + *-ic*.] Of or pertaining to Pyrrho (about 360–270 B. C.), a philosopher of Elis, and disciple of Anaxarchus; of or pertaining to Pyrrhonism or skepticism: as, the *Pyrrhonic* form of doubt. The doctrine of Pyrrho was that there is just as much to be said for as against any opinion whatever; that neither the senses nor the reason are to be trusted in the least; and that when we are once convinced we can know nothing, we cease to care, and in this way alone can attain happiness. It is said that Pyrrho would take no ordinary practical precautions, such as getting out of the way of vehicles.

Pyrrhonism (pir'ō-nizm), *n.* [< Gr. Πύρρων, Pyrrho, + *-ism*.] The doctrines of Pyrrho and his followers; absolute skepticism; universal doubt.

And thus, O circular philosopher, . . . you have arrived at a fine *Pyrrhonism*, at an equivalence and indifferency of all actions. *Emerson.*

Pyrrhonist (pir'ō-nist), *n.* [< Gr. Πύρρων, Pyrrho, + *-ist*.] A follower of Pyrrho; an adherent of Pyrrhonism; one who doubts everything.

Pyrrhopappus (pir-ō-pap'us), *n.* [NL. (A. P. de Candolle, 1838), < Gr. *πυρρός*, reddish, + *πάππος*, taken in mod. sense 'pappus': see *pappus*.] A genus of composite plants of the tribe *Cichoriaceæ* and subtribe *Lactuceæ*. It is characterized by its smooth habit, and its nearly cylindrical beaked achenes, covered with many rough and muricate ridges and bearing a reddish pappus which is either persistent or in falling carries with it a disk from which it grows. There are 3 or, according to some authors, 4 species, all natives of the United States or Mexico. They are annual or perennial herbs, with radical leaves or with alternate stem-leaves, and both entire and deeply cut on the same stem. The yellow flower-heads terminate long erect stalks, and resemble those of the common dandelion, which, however, are readily distinguished by their white pappus. See *false dandelion*, under *dandelion*.

pyrrhotine (pir'ō-tin), *n.* [< Gr. *πυρρός*, reddish, + *-t-* + *-ine*[2].] Native iron sulphid, a mineral crystallizing in hexagonal prisms and occurring also massive, of a bronze color and metallic luster. It is generally slightly magnetic, and is hence called *magnetic pyrites*. In composition it conforms to the general formula Fe_nS_{n+1}, but varying from Fe_7S_8 to $Fe_{11}S_{12}$. The mineral troilite, common in nodules in meteoric iron, may be the same mineral, although to this the formula FeS is generally ascribed.

pyrrhotite (pir'ō-tīt), *n.* [As *pyrrhot-ine* + *-ite*[2].] Same as *pyrrhotine*.

pyrrhous (pir'us), *a.* [< Gr. *πυρρός*, flame-colored, yellowish-red, reddish, red-haired, < *πῦρ*, fire. Cf. *burrel*.] Reddish.

Pyrrhula (pir'ō-lä), *n.* [NL. (Brisson, 1760), dim. < Gr. *πυρρός*, reddish: see *pyrrhous*.] A genus of *Fringillidæ*, giving name to the *Pyrrhulinæ*, characterized by the very short stout turgid bill; the bullfinches. See cut under *bullfinch*[1].

Pyrrhulinæ (pir-ō-lī'nē), *n. pl.* [NL., < *Pyrrhula* + *-inæ*.] An undefinable subfamily of *Fringillidæ*, named by Swainson in 1837 from the genus *Pyrrhula;* the bullfinches.

pyrrhuline (pir'ō-lin), *a.* [< *Pyrrhula* + *-ine*[1].] Resembling a bullfinch, especially in the form of the bill: said of various birds.

Pyrrhuloxia (pir-ō-lok'si-ä), *n.* [NL. (Bonaparte, 1850), < *Pyrrhula* + *Loxia:* see *Pyrrhula*, and *Loxia*, 2.] A genus of *Fringillidæ*, closely related to *Cardinalis*, but having a very short stout turgid bill, like a bullfinch's; the Texas cardinals. The species is *P. sinuata*, having the size and form of the common cardinal, but the plumage gray, beautifully varied with carmine red.

Pyrrhura (pi-rō'rä), *n.* [NL. (Bonaparte, 1856), < Gr. *πύρρος*, reddish, + *οὐρά*, tail.] A genus of parrots, giving name to the *Pyrrhurinæ*. *P. cruentatus* of South America is an example.

Pyrrhurinæ (pir-ō-rī'nē), *n. pl.* [NL., < *Pyrrhura* + *-inæ*.] A subfamily of *Psittacidæ*, named by Garrod from the genus *Pyrrhura*, resembling *Arinæ*, but having no ambiens.

pyrryt, *n.* An obsolete form of *pirry*.

Pyrula (pir'ō-lä), *n.* [NL. (Lamarck, 1799), < L. *pirum*, improp. *pyrum*, a pear: see *pear*. Cf. *Pyrola*.] A genus of gastropods having a pyriform shell, whence the name; the fig-shells or pear-shells. (See cut under *fig-shell*.) Very different limits have been assigned to it. (*a*) Originally it was named in connection with *P. ficus* only. (*b*) Subsequently it was used for many species agreeing with *P. ficus* in general form, but radically differing in other characters, and consequently afterward generically differentiated. (*c*) Later it was restricted to the genus now generally called *Fulgur* and related forms, *P. ficus* then being called *Ficula* or *Sycotypus*. (*d*) By recent authors it is restricted to *P. ficus* and closely related species. Also spelled *Pirula*.

Pyrularia (pir-ō-lā'ri-ä), *n.* [NL. (F. A. Michaux, 1803), so called with ref. to the small pear-shaped fruit; < L. *pirum*, improp. *pyrum*, a pear: see *Pyrula*.] A genus of apetalous shrubs of the order *Santalaceæ*, the sandalwood family, and of the tribe *Osyrideæ*. It is characterized by partly dioecious flowers, with parallel anther-cells, and a disk with scale-shaped lobes alternating with the five stamens, the small clusters of staminate flowers racemed toward the ends of the branches, and the pistillate flowers terminal, and few or single. The two species are shrubs or small trees, with thin and veiny alternate short-stalked and minutely pellucid-dotted leaves, small greenish flowers with a short columnar style and capitate stigma, and an inferior one-celled ovary, with two or three ovules hanging from the apex of a free central placenta. The rather large obovoid fruit is a fleshy drupe, with a hard thin-shelled spherical stone, containing a globose seed with fleshy and very oily albumen. One of the species is North American, for which see *oil-nut* (*b*); the other, *P. edulis*, is found in India, a large tree, yielding an edible fruit.

Pyrulidæ (pī-rō'li-dē), *n. pl.* [NL., < *Pyrula* + *-idæ*.] A family of tænioglossate gastropods, typified by the genus *Pyrula* (*d*) or *Ficula*. The animal has a narrow long head with subulate tentacles and eyes at their external bases, mantle with large lobes reflected over the shell, and a large foot. The shell is pyriform, thin, and generally sculptured with transverse and longitudinal lines. The species are inhabitants of tropical or warm seas. Also *Pirulidæ*, *Ficulidæ*, and *Sycotypidæ*.

Pyrulinæ (pir-ō-lī'nē), *n. pl.* [< *Pyrula* + *-inæ*.] 1. The *Pyrulidæ* as a subfamily of *Doliidæ*.—2. A subfamily restricted to *Pyrula* as represented by species of *Fulgur* and related forms. They are known as *fig-shells* and *pear-shells*.

pyruline (pir'ō-lin), *a.* Pertaining to the *Pyrulinæ*, or having their characters.

pyruric (pī-rō'rik), *a.* [< Gr. *πῦρ*, fire, + *οὖρον*, urine. Cf. *pyro-uric*.] In *chem.*, same as *cyanuric*.

Pyrus (pī'rus), *n.* [NL. (Tournefort, 1700), prop. *Pirus*, < L. *pirus*, improp. *pyrus*, a pear-tree: see *pear*[1].] A genus of rosaceous trees and shrubs, including the apple and pear, the type of the tribe *Pomeæ*, which takes its name from the pome, the characteristic fruit of this genus. It is characterized by an urn-shaped superior calyx, of which the limb is deciduous or persistent, and by an ovary of from two to five mostly two-ovuled cells, which in fruit are two- or one-seeded, separated, cartilaginous-walled, and immediately invested by a fleshy expansion of the disk, the whole being surrounded by the thickened calyx. There are about 50 species, natives of northern temperate regions and extending into the mountains of India. They bear alternate petioled and usually toothed leaves, deciduous stipules, and numerous cymes of snowy-white or pink flowers, each with five roundish petals and numerous stamens, terminating short spur-like branches. The numerous sections are strikingly different in habit, and several were long received as distinct genera. The typical section *Pyrophorum* (De Candolle, 1825) includes the pear and the wild pear or choke-pear and allied species. (See *pear*[1].) The section *Malus* (Tournefort, 1700), the apple, distinguished by a fruit hollowed in at the base, includes *P. Malus*, for which see *apple*, *apple-tree*, and *crab*[2]. To the section *Aria* (De Candolle, 1825), having only two or three styles and ovate leaves whitened beneath, belongs *P. Aria*, the beam-tree, with several varieties, including *P. intermedia*, the Swedish beam-tree. To the section *Torminaria* (De Candolle, 1825), with pinnately lobed leaves and somewhat obconical fruit, belongs *P. torminalis*, the wild service-tree (see *service-tree*). In the section *Sorbus* (Tournefort, 1700), with compound cymes and pinnate leaves, are included *P. domestica* (formerly *Sorbus domestica*), for which see *service-tree;* *P. Americana* and *P. aucuparia*, for which see *mountain-ash*. Another section, *Adenorhachis* (De Candolle, 1825), with berry-like fruit, but undivided leaves and glandular petioles, includes *P. arbutifolia*, for which see *chokeberry*, and cut under *inflorescence*. To the section *Cydonia* (Tournefort, 1700) belong the quinces. (See *Cydonia* and *quince*[1].) The genus *Mespilus* was also made by Bentham and Hooker a section of *Pyrus*. See *Mespilus* and *medlar*. Also *Pirus*.

pyryt, *n.* An obsolete form of *pirry*.

pysa (pī'sä), *n.* Same as *pice*.

pysanet[1], *n.* Same as *pisan*[2].

pyt, pytte, *n.* Obsolete forms of *pit*[1].

Pythagorean (pi-thag-ō-rē'an), *a.* and *n.* [< L. *Pythagoreus*, < Gr. Πυθαγόρειος, pertaining to Pythagoras, < Πυθαγόρας, Pythagoras.] I, *a.* Of or pertaining to Pythagoras, a Greek philosopher (perhaps 532 B. C.), or the school founded at Crotona (modern Cotrone), in Italy. All testimony concerning this school is of a late date, and the substance of it is rejected by many critics either as improbable, or as probable, and "on that account all the more indemonstrable" (*Zeller*). The stories are, however, very consistent. The higher grade of the school is represented as a strict monastic community, the doctrine being kept secret, and all betrayals terribly punished, for the purpose of maintaining political ascendancy. Pythagoras is said to have traveled to Egypt and Babylon; and many circumstances are accounted for by supposing that he did so. From those countries he might have brought, as it is said he did, a superior knowledge of mathematics. This knowledge, if kept secret, might have supplied revenues to the school, by calculations and surveys made for citizens. It is difficult to doubt that mathematical science was much advanced within the school. All writers upon ancient mathematics attribute to Pythagoras the Pythagorean proposition and a rule for finding Pythagorean triangles. The importance attached to the pentagram in the school shows that the Pythagoreans were acquainted with its geometrical construction, which is very difficult. They knew the regular or cosmical bodies. They were in possession of many propositions in the theory of numbers, including the doctrine of the arithmetical, geometrical, and harmonical proportions. It is not impossible that they may have had an abacus, little inferior to the Arabic system of arithmetical notation. It is not known how long the society lasted, perhaps for many centuries; as long as it retained any valuable secret it would continue to exist. The Pythagorean philosophy has never been comprehended. The substances of things were held to be abstract numbers; they were in some sense the elements of the universe. Each number, therefore, had its virtue. One was the number of the origin, of reason. Two was the number of matter, of brute force, of evil. Three was the number of mediation, four of justice, five of reproduction, etc. Ten governed the world. In the Pythagorean oath. Pythagoras is called the revealer of the quaternary number—that is, ten—as if something decimal were what he chiefly taught. Something fundamental was also found in odd and even, in square numbers, and the like. Harmony, or music, consists in number. The soul is the harmony, or number, of the body. The universe has also a soul. The remainder of the prominent Pythagorean teachings with which we are acquainted are apparently religious. Pythagoras taught the transmigration of souls. Spirits, both ghosts and demigods, were an object of Pythagorean belief. The brotherhood celebrated certain mysterious rites connected with a view of life as a process of purification. About the time of Augustus, perhaps earlier, Pythagoreanism became mixed with Platonism.—**Pythagorean bean.** See *bean*[1].—**Pythagorean comma.** See *comma*, 5(*a*).—**Pythagorean dyad.** See *dyad*.—**Pythagorean letter**, the letter Y, so called because its Greek original represented the sacred triad, formed by the dual proceeding from the monad.—**Pythagorean lyre**, a lyre of eight strings, said to have been invented by Pythagoras.—**Pythagorean proposition**, the 47th proposition of the first book of Euclid's "Elements," that the sum of the squares on the legs of a right-angled triangle is equal to the square on the hypotenuse: said to have been discovered by Pythagoras.—**Pythagorean semitone.** Same as *limma*, 1.—**Pythagorean system**, in *astron.*, the astronomical system of Copernicus, erroneously attributed to the Pythagoreans.—**Pythagorean table**, the multiplication-table. But this appellation is due to a corruption in the text of Boethius. The table originally referred to was an abacus.—**Pythagorean triangle**, a triad of whole numbers proportional to the sides of a right-angled triangle—the square of one being equal to the sum of the squares of the other two: as, 3, 4, 5; 12, 35, 37.—**Pythagorean tuning**, in *music*, a system of tuning in which the tones of the scale are fixed by tuning upward in perfect fifths, and back in octaves. The major third thus obtained was long considered the true one, and its recognition as a consonance correspondingly delayed.

II, *n.* A follower of Pythagoras, the founder of the Italic sect of philosophers.

Not that I wanted beans to eat, for I am by nature a *Pythagorean*, so far as beans are concerned.
Thoreau, Walden, p. 175.

Pythagoreanism (pi-thag-ō-rē'an-izm), *n.* [< *Pythagorean* + *-ism*.] Same as *Pythagorism*.

Pythagoreanize (pi-thag-ō-rē'an-īz), *v. i.* [< *Pythagorean* + *-ize*.] Same as *Pythagorize*.

Pythagoric (pith-ą-gor'ik), *a.* [< L. *Pythagoricus*, < Gr. Πυθαγορικός, pertaining to Pythagoras, < Πυθαγόρας, Pythagoras: see *Pythagorean*.] Pythagorean. *Imp. Dict.*

Pythagorical (pith-ą-gor'i-kạl), *a.* [< *Pythagoric* + *-al*.] Same as *Pythagoric*.

That *Pythagorical* rascal! in a gentleman's suit to-day, in a knight's to-morrow.
Middleton, Your Five Gallants, v. 1.

Breeches *Pythagorical*, by reason of their transmigration into several shapes. *B. Jonson*, Cynthia's Revels, iv. 1.

Pythagorism (pi-thag'ō-rizm), *n.* [< Gr. Πυθαγορισμός, adherence to the principles laid down by Pythagoras, < Πυθαγόρας, Pythagoras: see *Pythagorean*.] The doctrines or philosophy of Pythagoras or of the Pythagoreans. Also *Pythagoreanism*.

Pythagorize (pi-thag'ō-rīz), *v. i.*; pret. and pp. *Pythagorized*, ppr. *Pythagorizing*. [< Gr. Πυθαγορίζειν, be a disciple of Pythagoras, < Πυθαγόρας, Pythagoras: see *Pythagorean*.] To speculate after the manner of Pythagoras or his followers; tend toward or become imbued with Pythagorism.

Pythia (pith'i-ạ), *n.* [< Gr. Πυθία (sc. ἱέρεια, a priestess), the Pythia, priestess of Apollo at Delphi: see *Pythian*.]

The Pythia Seated on the Oracular Tripod. (From a Greek red-figured vase.)

1. In *Gr. antiq.*, the priestess who held communion with Apollo and received his oracles in the inner sanctuary of the great temple at Delphi, throughout historic antiquity. See *oracle*.—2. [NL.] In *conch.*: (*a*) A genus of gastropods of the family *Auriculidæ*, generally called *Scarabus*. *Bolton*, 1798. (*b*) A genus of bulimiform shells, comprising species of *Achatina*, *Bulimus*, *Glandina*, etc. *Oken*, 1815.

pythiad (pith'i-ad), *n.* [< Gr. πυθιάς (*-ad-*), a period of four years between two consecutive celebrations of the Pythian games, < Πύθια (sc. ἱερά), the Pythian games: see *Pythian*.] The period of four years intervening between one celebration of the Pythian games and the succeeding.

Pythiambic (pith-ī-am'bik), *a.* [As *Pythian* + *iambic*.] In *anc. pros.*, constituting an episynthetic meter consisting of a dactylic hexameter (*Pythian verse*) followed by an iambic colon. The *first Pythiambic system* (*stanza* or *strophe*) subjoins an iambic dimeter and the *second Pythiambic system* (*stanza* or *strophe*) an iambic trimeter to the hexameter.

Pythian (pith'i-ạn), *a.* [< L. *Pythius*, < Gr. Πύθιος, pertaining to Delphi, or to the Delphic Apollo, < Πυθώ, also Πυθών, the older name of Delphi and the surrounding region.] Pertaining to Delphi, or to the priestess of Apollo at Delphi, who there delivered oracles.—**Pythian Apollo**. See *Apollo*.—**Pythian games**, one of the four great national festivals of Greece, celebrated once in four years in honor of Apollo at Delphi.—**Pythian meter**. **Pythian verse**, the dactylic hexameter: probably so called from its use in the oracles delivered by the Pythia, or, according to ancient writers, from the first song of triumph to Apollo for his victory over the Python, a triple *ex pede* (– – | – – | – – | – – | – – | – –).

Pythidæ (pith'i-dē), *n. pl.* [NL., < *Pytho* + *-idæ*.] A small family of heteromerous coleopterous insects, typified by the genus *Pytho*. They have the anterior coxal cavities open behind, the antennæ free, the thorax not margined at the sides, and its disk not impressed at the base. Ten genera are known, distributed in Europe and North America, a single species only occurring elsewhere. They are found under bark and stones.

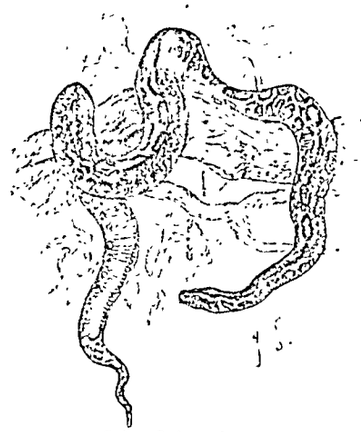
Pytho (pī'thō), *n.* [NL. (Latreille, 1796): see *Pythian*.] A genus of coleopterous insects, typical of the family *Pythidæ*, comprising forms with very depressed body, striate elytra, and one-toothed mandibles. A half-dozen species are known, 3 from North America, and the others from Europe. They live under the bark of trees.

pythogenesis (pī-thō-jen'e-sis), *n.* [< Gr. πίθειν, rot, become putrid, + γένεσις, origin: see *genesis*.] Production by means of filth. See *pythogenic*.

pythogenic (pī-thō-jen'ik), *a.* [< Gr. πίθειν, rot, + *-γενής*, producing: see *-genous*.] Produced by filth: specifically applied to a class of diseases, as typhoid, the occurrence of which is favored by filth, especially by a vitiated atmosphere.

Cause and effect were for the first time connected in the public mind, which was thus enlightened for the first time as to the nature of what we now call *pythogenic* or filth-born maladies. *Pall Mall Gazette*.

Pythogenic fever. See *fever*[1].



pythometric (pī-thō-met'rik), *a.* [Improp. for **pithometric*, < Gr. πίθος, a wine-jar, + μέτρον, measure: see *metric*.] Pertaining to the gaging of casks.

Python (pī'thon), *n.* [< L. *Python*, < Gr. Πύθων, Python (see def. 1). Cf. Πυθώ, Πυθών, the earlier name of Delphi, and see *Pythian*.] 1. In classical antiquities and in the New Testament, a soothsaying spirit or demon; hence, also, a person possessed by such a spirit; especially, a ventriloquist. Some ancient writers speak of the serpent Python as having delivered oracles at Delphi before the coming of Apollo, and during the Roman imperial period we find the name often given to soothsayers. The spirit was supposed to speak from the belly of the soothsayer, who was accordingly called ἐγγαστρίμυθος, a ventriloquist, a word used in the Septuagint to represent the Hebrew *'ôbh* (see *ob*[1]), often rendered *python* in the Vulgate. In Acts xvi. 16 the usual reading is 'a spirit of Python,' while some manuscripts read 'a spirit, a Python.'

A certain maid having a spirit of divination [margin: Gr. a spirit, a *Python*] met us.
Acts xvi. 16 (revised version).

Like thee [the Sun], the Hero does his Arms employ
The raging *Python* to destroy.
Prior, Hymn to the Sun, st. 3.

2. [*l. c.*] Any very large serpent, as a rock-snake: loosely used, like *boa* and *anaconda*, but properly applicable only to the large Old World non-venomous serpents of the family *Pythonidæ*.—3. [NL.] The typical genus of *Pythonidæ*: formerly conterminous with the family, now restricted to species having premaxillary

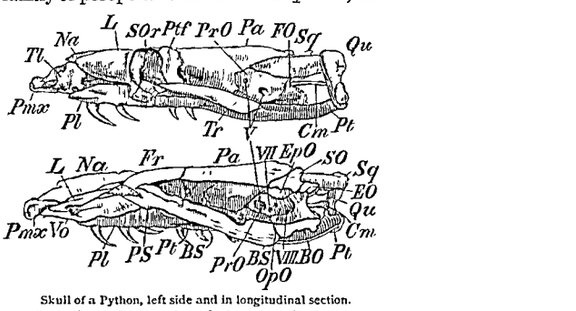
Python (*Python molurus*).

teeth, labial plates of both jaws fossate, and scuta extending to between the orbits. These are the rock-snakes proper, as *P. molurus* and *P. reticulatus*. See cut under *Pythonidæ*, also cuts under *Ophidia*, *zygantrum*, and *zygosphene*.

pythoness (pith'ō-nes), *n.* [Also, as ML., *Pythonissa*; < ME. *Phitonesse*, *Phitonisse*, etc., < OF. *Pythonesse*, etc., < ML. *Pythonissa*, < MGr. πυθώνισσα, fem. of Gr. πίθων, a ventriloquist, also prob. a diviner (cf. πνεῦμα πίθωνος, a spirit of divination), < Πυθώ, Πυθών, the older name of Delphi: see *Pythian*.] The Pythia or especial priestess of Apollo at his temple at Delphi, who was supposed to be inspired to give his oracular answers; hence, any woman supposed to have a spirit of divination; a witch.

Magicians and tregetours,
And *philitisses*, charmeresses,
Olde wyches, sorceresses.
Chaucer, House of Fame, l. 1261.

Saith the *Pythonissa* to Saul, "To morrow thou and thy sons shall be with me." *Bacon*, Prophecies (ed. 1887).



She stood a moment as a *Pythoness*
Stands on her tripod.
Byron, Don Juan, vi. 107.

pythonic[1] (pi-thon'ik), *a.* [< Gr. Πυθωνικός, pertaining to Pytho, < Πυθώ, Πυθών, the older name of Delphi: see *Pythian*.] Oracular; pertaining to the prediction of future events; prophetic.

pythonic[2] (pī-thon'ik), *a.* [< *python* + *-ic*.] Of or pertaining to a python or the pythons; resembling a python.

I got from the cretaceous deposit of my neighborhood enough fossil material to diagnose a new species of reptile, which, although with powerful paddles, was almost *pythonic* in structure. *Science*, VII. 242.

Pythonidæ (pī-thon'i-dē), *n. pl.* [NL., < *Python* (see *Python*, 3) + *-idæ*.] An Old World family of peropodous colubriform *Ophidia*, having

Skull of a Python, left side and in longitudinal section.

BO, basioccipital; *BS*, basisphenoid; *Cm*, columella of ear, or stapes (not the columella of the skull); *EO*, exoccipital; *EpO*, epiotic; *Fr*, frontal; *FO*, fenestra ovalis; *L*, lacrymal; *Na*, nasal; *OpO*, opisthotic; *Pa*, parietal; *Pl*, palatine; *Pmx*, premaxilla; *PrO*, prootic; *PS*, presphenoid; *Pt*, pterygoid; *Ptf*, postfrontal; *Qu*, quadrate; *SO*, supraoccipital; *SOr*, supraorbital; *Sq*, squamosal; *Tl*, turbinal; *Tr*, transverse bone; *V*, *VII*, *VIII*, exits of fifth, seventh, and eighth nerves; *Vo*, vomer. The teeth show the aglyphodont dentition.

ing rudiments of posterior extremities, a coronoid bone, supraorbital and postorbital bones, and premaxillary teeth, with or without maxillary teeth; the rock-snakes. There are several genera, as *Python*, *Morelia*, *Liasis*, *Nardoa*, *Aspidiotes*, *Loxocemus*, *Chondropython*, and *Aspidopython*.

pythoniform (pī'thon-i-fôrm), *a.* [< NL. *Python*, q. v., + L. *forma*, form.] Resembling or related to a python, boa, or rock-snake; pythonoid; peropodous, as a serpent.

Pythoninæ (pī-thō-nī'nē), *n. pl.* [NL., < *Python* + *-inæ*.] A subfamily of pythonoid serpents, typified by the genus *Python*, having premaxillary teeth. They chiefly inhabit the tropics of Africa and Asia, and some of them are among the largest of snakes.

pythonine (pī'thō-nin), *a.* and *n.* I. *a.* Of or pertaining to the *Pythoninæ* or *Pythonidæ*; pythoniform.

II. *n.* A python or member of the *Pythonidæ*.

pythonism (pith'ō-nizm), *n.* [< Gr. Πυθώ, Pytho, the older name of Delphi (see *Pythian*, *Python*), + *-ism*.] The art of foretelling future events after the manner of the Delphic oracle.

pythonist† (pith'ō-nist), *n.* [Also *pithonist*; < Gr. Πυθώ, Πυθών, Pytho, the older name of Delphi (see *Pythian*, *Python*), + *-ist*. Cf. *pythoness*.] A conjurer.

See the conjuring, proud, remorceless Priest
Rend in full rage (too like a furious fiend)
The pompous vestures of this *Pithonist*,
When Christ doth (vrg'd) aright His cause defend.
Davies, Holy Roode, p. 7. (*Davies*.)

pythonoid (pī'thō-noid), *a.* and *n.* [< L. *Python*, q. v., + Gr. *εἶδος*, form.] I. *a.* Resembling or related to a python; belonging to the *Pythonoidea*; pythoniform.

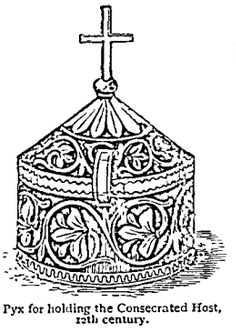
II. *n.* A member of the *Pythonoidea*.

Pythonoidea (pī-thō-noi'dē-ạ), *n. pl.* [NL.: see *pythonoid*.] A suborder of *Ophidia*; the peropodous ophidians, having no trace of a pelvis, but almost invariably rudiments of hind limbs in the form of anal spurs. They are not poisonous, but are for the most part of great size, and often have great powers of constriction. They are the rock-snakes, pythons, boas, and anacondas, of the families *Pythonidæ*, *Boidæ*, and *Charinidæ*.

pythonomorph (pī'thō-nō-môrf), *n.* Any member of the *Pythonomorpha*.

Pythonomorpha (pī*thō-nō-môr'fạ), *n. pl.* [NL., < *Python*, q. v., + Gr. μορφή, form.] In Cope's classification (1871), an order of fossil streptostylic reptiles: same as *Mosasauria*.

pythonomorphic (pī*thō-nō-môr'fik), *a.* [< *pythonomorph* + *-ic*.] Same as *pythonomorphous*.



pythonomorphous (pī*thō-nō-môr'fus), *a.* [< *Python* + Gr. μορφή, form.] Pertaining to the *Pythonomorpha*, or having their characters; mosasaurian.

The two orders of Ophidians and Lacertilians are nearly allied; the former is probably merely a specialized descendant of the latter or of the *pythonomorphous* reptiles, or perhaps of both. *Gunther*, Encyc. Brit., XXII. 189.

pyuria (pī-ū'ri-ạ), *n.* [NL., < Gr. πύον, pus, + οὖρον, urine.] The presence of pus in the urine.

pyx (piks), *n.* [Formerly also *pix*; < L. *pyxis*, *puxis*, < Gr. πυξίς (*-ίδ-*), a box, orig. one of boxwood, < πύξος, the box-tree, boxwood: see

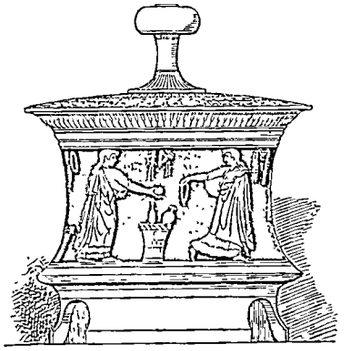
box[1].] 1. In the *Rom. Cath. Ch.*, the vase or vessel in which the reserved eucharist is kept. The name *pyx* (*pyxis*) for this vessel seems to have come into use in the ninth century. In earlier times the reserved sacrament was kept in an arca, columba, or turris (see *reservation*). In the Greek Church the vessel in which the sacrament is reserved is called the *artophorion*, *pyrion*, or *pyxis*. The pyx has also been used for unconsecrated altar-breads. It has generally been made cylindrical in shape, with a foot like that of a chalice, and has sometimes had a conical cover. In modern usage it is much smaller than formerly, and is often made round and flat like a watch-case, for convenience, especially in carrying the sacrament to the sick. For public exposition of the sacrament a monstrance or ostensory is used instead.

Pyx for holding the Consecrated Host, 12th century.

The King marched towards Calais, so strictly observing his Proclamation against Church-robbing that, when one was complained of for having taken a Silver *Pixe* out of a Church, he not only caused the same to be restored, but the Soldier also to be hanged. *Baker*, Chronicles, p. 170.

2. A box or chest in which specimen coins are deposited.—3. *Naut.*, the metallic box in which the nautical compass-card is suspended.—4. In *anat.*, the acetabulum of the hip-bone; the cotyloid cavity; the pyxis.—**Trial of the pyx**, the final trial by weight and assay of gold and silver coins. At the British mint one coin is deposited in the pyx from every fifteen pounds of gold and one from every sixty pounds of silver coined. The trial is conducted periodically by a jury of goldsmiths under the direction of the queen's remembrancer, and constitutes a public attestation of the standard purity of the coin. In the United States it is conducted annually at Philadelphia. The phrase is also applied to the assaying of gold and silver plate which takes place at assay-offices.

pyx (piks), *v. t.* [< *pyx*, *n.*] To test by weight and assay, as the coins deposited in the pyx at the British mint. See *trial of the pyx*, above.

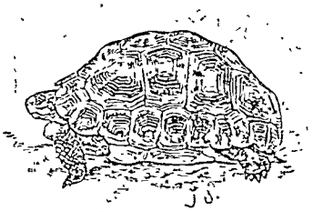


pyx-cloth (piks'klôth), *n.* A cloth of silk or other material in which it was formerly customary to wrap or veil the pyx. Also *Corpus Christi cloth*, *pyx-kerchief*, *pyx-veil*.

Pyxicola (pik-sik'ō-lią), *n.* [NL., < Gr. πυξίς, a box (see *pyx*), + L. *colere*, inhabit.] A genus of vaginicolous *Vorticellinidæ*, in which the animalcules are attached behind to a lorica which can be closed by a discoidal operculum like the lid of a box, whence the name.

Pyxidanthera (pik″si-dan-thē'rą), *n.* [NL. (F. A. Michaux, 1803), so called in allusion to the lid-like opening of the anthers; < Gr. πυξίς, a box, + NL. *anthera*, anther.] A genus of gamopetalous plants of the order *Diapensiaceæ*. It is characterized by a persistent sessile corolla with short bell-shaped tube and five flat roundish lobes, five stamens fixed in the notches between the lobes, no staminodes, a three-celled ovary with many ovules, and globose anther-cells which are transversely two-valved and awl-pointed at the base. The only species, *P. barbulata*, is a dwarf and trailing shrubby evergreen, found in sands under pines from New Jersey southward to North Carolina; it is eagerly sought as a highly ornamental early spring-flowering plant, being covered with a profusion of small starry blossoms. It is known as the *pine-barren beauty*, and *flowering moss* (which see, under *moss*[1]), and also, locally, by contraction of its generic name, as *pyxie*. It bears crowded awl-shaped dark-green leaves covering the short erect branches, or alternate on the longer creeping ones, and somewhat hairy or bearded near the base, whence the specific name.

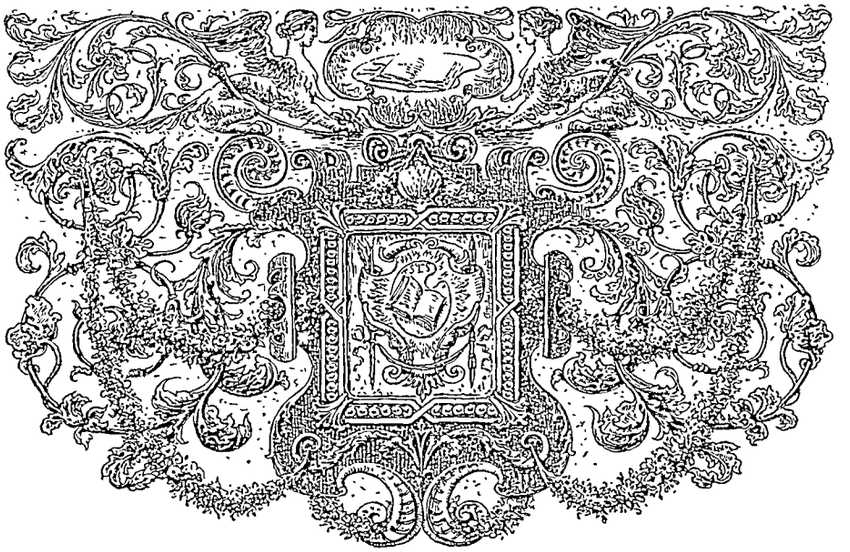
pyxidate (pik'si-dāt), *a.* [< *pyxis*(*-id-*) + *-ate*[1].] In *bot.*, having the character of a pyxis.



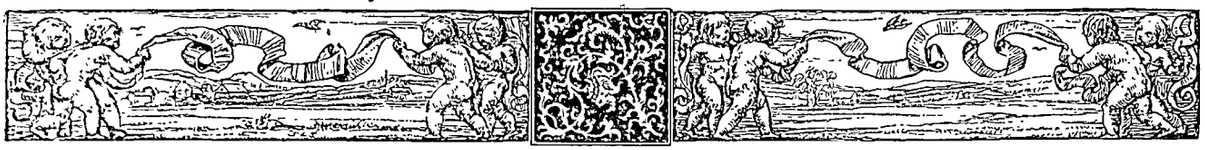
pyxidium (pik-sid'i-um), *n.*; pl. *pyxidia* (-ią). [< Gr. πυξίδιον, a writing-tablet, dim. of πυξίς, a box: see *pyx*.] 1. In *bot.*, same as *pyxis*, 9. —2. [*cap.*] [NL.] In *zoöl.*, a genus of *Vorticellinidæ*.

Greek Pyxis of red figured pottery, 4th century B. C.

Pyxinei, Pyxineæ (pik-sin'ē-ī, -ē), *n. pl.* [NL., < L. *pyxis*, < Gr. πυξίς, a box, + *-in-* + *-ei*, *-eæ*.] A natural order of lichens, comprising those known in the arctic regions as *tripe de roche*. The order is characterized by a horizontal foliaceous thallus, mostly fixed by the center, and an orbicular disk, with the exciple distinct from the thallus, and at first closed.

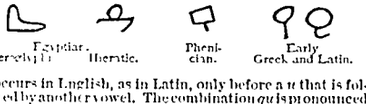


pyxis (pik'sis), *n.*; pl. *pyxides* (-si-dēz). [L., also *puxis*, < Gr. πυξίς, a box: see *pyx*.] 1. In *Gr. antiq.* and *archæol.*, a type of cylindrical vase or box with a cover, used especially by women, as for the toilet. See cut in preceding column.—2. A box; a jewel-case.—3. In *anat.*, the cotyloid cavity, or acetabulum of the hip-joint.—4. [*cap.*] [NL.] A genus of brachiopods. *Chemnitz*, 1784.—5. [*cap.*] [NL.] In *conch.*, a genus of gastropods. *Humphreys*, 1797.—6. [*cap.*] [NL.] A genus of land-tortoises of the family *Testudinidæ*, having the anterior part of the plastron so movable that it can be shut like the lid of a pyxis. *T. Bell*, 1827.—7. A tortoise of this genus, the only known species, *Pyxis arachnoidea*, of Madagascar and Mauritius. Its shell is yellow, with broad black bands radiating from the center of the dorsal shields.—8. [*cap.*] [NL.] In *entom.*, a genus of coleopterous insects. *Dejean*, 1834.—9. In *bot.*: (*a*) A seed-vessel, commonly a capsule, with a circumscissile dehiscence, the top falling away like a lid, as in the common purslane and plantain, and in the fruit known as monkey-pots. See *Lecythis*, and cut under *circumscissile*. (*b*) The theca of mosses. Also *pyxidium*.—Pyxis Nautica, a southern constellation introduced by Lacaille, representing a ship's compass or binnacle. It seems no longer to be in use.



Pyxis arachnoidea.

pyx-kerchief (piks'kėr″chif), *n.* Same as *pyx-cloth*.



pyx-veil (piks'vāl), *n.* Same as *pyx-cloth*.

Q, 1. The seventeenth letter and thirteenth consonant in the English alphabet. It had a corresponding position in the early Greek and in the Latin alphabet, as also in the Phenician, where it was the nineteenth character. Its value in Phenician was that of a deeper or more guttural *k*; and a like distinction of two *k*'s, less and more guttural (*kaf* and *qof*), is still made in the Semitic languages generally. But in Greek and Latin there was no such distinction to be maintained; hence the sign was abandoned in Greek (being retained only as an episemon, or sign of number, in its old place between π and ρ, and called *koppa*); while in Latin, on the other hand, it was kept, though without a value different from that of *k*, in the combination *qu*, equivalent to our *kw*; and so we have it also in English as a superfluous letter, simply because it existed in Phenician with a real office. The comparative table of early forms (as given for the other letters: see especially *A*) is as follows:

Egyptian Hieroglyphic. Hieratic. Phenician. Early Greek and Latin.

Q occurs in English, as in Latin, only before a *u* that is followed by another vowel. The combination *qu* is pronounced either as *kw* (for example, *quinquennial*), or, the *u* being silent, as *k* simply (for example, *pique*). The words containing it are nearly all of Latin or French origin; but there are a few common words (as *queen, queer, quench, quick, quoth*) in which *qu* has been substituted for the equivalent Anglo-Saxon *cw* or Teutonic *kw*, and a number of other words (Asiatic, African, American, etc.) in which *qu* represents a like combination. In the transliteration of some Oriental alphabets (Arabic, Persian, Turkish, etc.), *q* represents the more guttural form of *k*. See *qu*.

2. As a medieval Roman numeral, 500.—3. An abbreviation: (*a*) [*l. c.*] of *quadrans* (a farthing); (*b*) [*l. c.*] of *query*; (*c*) [*l. c.*] of *question*; (*d*) of *queen*; (*e*) [*l. c.*] in a ship's log-book, of *squalls*; (*f*) in *Rom. lit.* and *inscriptions*, of *Quintus*.—4†. A half-farthing: same as *cue*², 2 (*a*).

Rather pray there be no fall of money, for thou wilt then go for a *q*. *Lyly*, Mother Bombie, iv. 2. (*Nares.*)

To mind one's p's and q's. See *mind*¹.

qabbalah, *n.* See *cabala*.

Q. B. An abbreviation of *Queen's Bench*.

Q. C. An abbreviation: (*a*) of *Queen's Council* or *Queen's Counsel*; (*b*) of *Queen's College*.

Q. d., or **q. d.** An abbreviation of the Latin phrase *quasi dicat*, as if he should say.

qd. An old contraction for *quod* or *quoth*. *Halliwell.*

Q. e., or **q. e.** An abbreviation of the Latin phrase *quod est*, which is.

Q. E. D. An abbreviation of the Latin phrase *quod erat demonstrandum*, which was to be demonstrated.

Q. E. F. An abbreviation of the Latin phrase *quod erat faciendum*, which was to be done.

Q. E. I. An abbreviation of the Latin phrase *quod erat inveniendum*, which was to be found out.

Q. M. An abbreviation of *quartermaster*.

Qm., or **qm.** An abbreviation of the Latin word *quomodo*, by what means.

Q. M. G. An abbreviation of *quartermaster-general*.

Qr., or **qr.** An abbreviation: (*a*) of *quarter* (28 pounds); (*b*) of *quadrans* (farthing); (*c*) of *quire*.

Q. S. An abbreviation of *quarter-sessions*.

Q. s., or **q. s.** An abbreviation: (*a*) of *quarter-section*; (*b*) of the Latin phrase *quantum sufficit*.

Qt., or **qt.** An abbreviation: (*a*) of *quart*; (*b*) of *quantity*.

qut, *n.* An obsolete spelling of *queue* or *cue*¹.

In 1724 the peruke-makers advertised "full-bottom tyes, . . . *qu* perukes, and bagg wiggs" among the variety of artificial head-gear which they supplied.
Encyc. Brit., XXIV. 569.

qu. [(1) < ME. *qu-, qw-*, < OF. *qu-*, F. *qu-* = Sp. *cu-* = Pg. *cu-, qu-* = It. *qu-*, < L. *qu-* = Gr. κ- (κF), sometimes π = Skt. *kv-, k-*, etc. (2) < ME. *qu-, qw-, kw-, ku-, cu-, cw-*, < AS. *cw-* = OS. *kw-* = OFries. *kw-* = D. *kw-* = OHG. *kw-, cw-*, MHG. *kw-, qu-*, G. *qu-* = Icel. *kv-* = Sw. *kv-, qu-* = Dan. *kv-* = Goth. *kw-* (by Germans often written *kv-*, also rendered by *q-* or *qu-*; the Goth. character being single, namely, ϥ—the resemblance to the Roman u being accidental). To utter a harsh, flat, croaking sound or cry, as a goose or duck; croak; now, usually, to cry as a duck.

He toke a gose fast by the nek,
And the goose thoo begann to *quek*.
Rel. Antiq., i 4. (*Halliwell.*)

There were thirteen ducks, and . . . they all *quacked* very movingly. *R. D. Blackmore*, Lorna Doone, x.

2. To make an outcry: said of persons. [Prov. Eng.]

He slew the captain where he stood,
The rest they did *quack* an' roar.
Willie Wallace (Child's Ballads, VI. 235).

quack¹ (kwak), *n.* [< ME. *quakke, quecke* = G. *quack, quak* = Dan. *kvak*; from the verb.] 1. A harsh, croaking sound.

He speketh thurgh the nose
As he were on the *quakke* or on the pose.
Chaucer, Reeve's Tale, l. 232.

2. The cry of a duck; a quacking.

He gave me a look from his one little eye, . . . and then a loud *quack* to second it.
R. D. Blackmore, Lorna Doone, x.

quack² (kwak), *v.* [A particular use of *quack*¹, now associated with *quack*², *n.*, which is in part an abbr. of *quacksalver*.] **I.** *intrans.* 1. To talk noisily and ostentatiously; make vain and loud pretensions.

Seek out for plants with signatures,
To *quack* of universal cures.
S. Butler, Hudibras, III. i. 328.

2. To play the quack; practise arts of quackery, as a pretender to medical skill.

Hitherto I had only *quack'd* with myself, and the highest I consulted was our apothecary.
B. Mandeville, Hypochondrical Disorders (1730), p. 7. (*Latham.*)

II. *trans.* 1. To treat in the manner of a quack; play the quack with.

If he [Monro] has any skill in *quacking* madmen, his art may perhaps be of service now in the Pretender's court.
Walpole, Letters, II. 6.

Quackery, and the love of being *quacked*, are in human nature as weeds are in our fields
Dr. J. Brown, Spare Hours, 3d ser., Int., p. 32.

2. To tamper with dishonestly; use fraudulently.

Mallet. My third Son . . . has an admirable knack at *quacking* Titles. . . . They tell me, when he gets an old good-for-nothing Book, he claps a new Title to it, and sells off the whole Impression in a Week.
Mrs. Centlivre, Gotham Election, i. 1.

quack² (kwak), *n.* and *a.* [Partly < *quack*², *v.*, partly an abbr. of *quacksalver*, q. v.] **I.** *n.* 1. An impudent and fraudulent pretender to medical skill; a mountebank; a knavish practitioner of medicine.

Quacks in their Bills, and Poets in the Titles of their Plays, do not more disappoint us than Gallants with their Promises. *Wycherley*, Love in a Wood, iii.

A potent *quack*, long versed in human ills,
Who first insults the victim whom he kills.
Crabbe, Works, I. 14.

These, like *quacks* in medicine, excite the malady to profit by the cure, and retard the cure to augment the fees. *Irving*, Knickerbocker, p. 229.

Hence — 2. One who pretends to skill or knowledge of any kind which he does not possess; an ignorant and impudent pretender; a charlatan.

Men that go mincing, grimacing, with plausible speech and brushed raiment; hollow within! *quacks* political; *quacks* scientific, academical.

Carlyle, French Rev., II. iii. 2.

=Syn. *Quack, Empiric, Mountebank, Charlatan.* A *quack* is, by derivation, one who talks much without wisdom, and, specifically, talks of his own power to heal; hence, any ignorant pretender to medical knowledge or skill. *Empiric* is a more elevated term for one who goes by mere experience in the trial of remedies, and is without knowledge of the medical sciences or of the clinical observations and opinions of others; hence, an incompetent, self-confident practitioner. A *mountebank* is generally a *quack*, but may be a pretender in any line. *Charlatan* (literally 'chatterer') is primarily applied, not to a person belonging to any particular profession or occupation, but to a pretentious cheat of any sort.

II. *a.* Pertaining to or characterized by quackery of any kind; specifically, falsely pretending to cure disease, or ignorantly or fraudulently set forth as remedies: as, a *quack* doctor; *quack* medicines.

If all understood medicine, there would be none to take his *quack* medicine. *Whately.*

The attractive head
Of some *quack*-doctor, famous in his day.

Burke, To a Member of the Nat. Assembly, note.

quackism (kwak'izm), *n.* [< *quack*[2] + *-ism*.] The practice of quackery. *Carlyle*, Cagliostro.

quackle[1] (kwak'l), *v. i.*; pret. and pp. *quackled*, ppr. *quackling*. [Freq. of *quack*[1].] To quack; croak. [Prov. Eng.]

Simple ducks in those royal waters *quackle* for crumbs from young royal fingers.

Carlyle, French Rev., XI. i. 1. (*Davies.*)

quackle[2] (kwak'l), *v. t.*; pret. and pp. *quackled*, ppr. *quackling*. [Freq. of **quack*, imitative; like *choke*[1], of the sound of choking. Cf. *quackened*.] To suffocate; strangle; choke. [Prov. Eng.]

As he was drinking, the drink, or something in the cup, *quackled* him, stuck so in his throat that he could not get it up nor down, but strangled him presently.

Rev. S. Ward, Sermons, p. 153.

quacksalve† (kwak'sȧv), *n.* [< **quacksalve* (D. *kwakzalven*), a verb assumed from *quacksalver*.] A quacksalver.

A *quacksalve*,
A fellow that does deal with drugs.
Massinger, Parliament of Love, iv. 5.

quacksalver (kwak'sal-vėr), *n.* [< D. *kwakzalver* (= LG. *quaksalver*, > G. *quacksalber* = Sw. *qvacksalvare* = Dan. *kvaksalver*), a quacksalver, < *kwaken*, quack, + *zalver*, salver: see *salver*[1].] One who boasts of his skill in medicines and salves, or of the efficacy of his nostrums; a charlatan; a quack.

And of a Physitian, That he is a *Quack-salver*, which signifieth a Quick Healer, yet for the common acception adjudged actionable. *Jos. Keble* (1685), Reports, I. 62.

They are *quacksalvers*,
Fellows that live by venting oils and drugs.
B. Jonson, Volpone, ii. 1.

These are not physicians indeed, but Italian *quack-salvers*, that, having drunk poison themselves, minister it to the people. *Rev. T. Adams*, Works, I. 390.

quacksalving (kwak'sal-ving), *a.* [Ppr. of **quacksalve*, v., implied in *quacksalve*, *n.*, and *quacksalver*.] Quackish; humbugging.

Tut, man, any *quacksalving* terms will serve for this purpose. *Middleton*, Mad World, ii. 6.

quad[1]†, *a.* and *n.* See *quod*.

quad[2] (kwod), *n.* [Abbr. of *quadrangle*.] 1. A quadrangle or court, as of a college. [Colloq.]

The *quad*, as it was familiarly called, was a small quadrangle. *Trollope*, Warden, v.

2. The quadrangle of a prison where prisoners take exercise; hence, a prison; a jail. More commonly spelled *quod*. [Slang.]

Fancy a nob like you being sent to *quod*! Fiddlededee! You see, sir, you weren't used to it.

Disraeli, Henrietta Temple, vi. 21.

My dear Arminius, . . . do you really mean to maintain that a man can't put old Diggs in *quod* for snaring a hare without all this elaborate apparatus of Roman law?

M. Arnold, Friendship's Garland, vii.

quad[4] (kwod), *n.* An abbreviation of *quadruplex* in telegraphy.

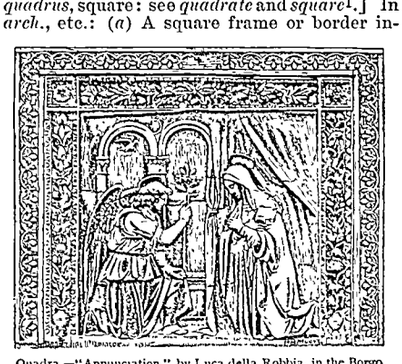
quad[5] (kwod), *n.* A bicycle for four riders. [Colloq.]

quaddy (kwod'i), *a.* [Prob. for **quatty*, < *quat*[1] + *-y*[1].] Short and thick. *Halliwell.* [Prov. Eng.]

quade†, *v. t.* [< ME. *quaden*, < *quad*, bad: see *qued*.] To spoil or destroy. *Halliwell.*

Thine errores will thy worke confounde,
And all thine honoure *quade*.
Halle's Historiall Expostulation (1565). (*Nares.*)

quader[1]† (kwā'dėr), *v. i.* [< OF. *quadrer*, F. *cadrer* = Sp. *cuadrar* = Pg. *quadrar* = It. *quadrare*, < L. *quadrare*, make square or four-cornered: see *quadrate*.] To quadrate; match.



The x doth not *quader* well with him, because it sounds harshly. *Hist. Don Quixote* (1675), p. 88.

quader[2] (kwā'dėr), *n.* [G., square, < MHG. *quāder*, < L. *quadrus* (sc. *lapis*), square: see *quadra*[1].] The German name of a division of the Cretaceous: an abbreviation of *quadersandstein*, paving-sandstone. It is divided into Unter-, Mittel-, and Oberquader. The last is the equivalent of the Upper Chalk of England and France, and is familiar as being the rock which, by its peculiar erosion, has given rise to the picturesque scenery of Saxon Switzerland.

quader[3] (kwā'dėr), *n.* [< L. *quadratus*, pp. of *quadrare*, make square: see *quadrate*.] In *anat.*, the quadrate lobule, or præcuneus.

quadnesst, *n.* See *quedness*.

quadra[1] (kwod'rą), *n.*; pl. *quadræ* (-rē). [< L. *quadra*, a square, a plinth, a fillet; fem. of (LL.) *quadrus*, square: see *quadrate* and *square*[1].] In *arch.*, etc.: (*a*) A square frame or border in-

Quadra.—"Annunciation," by Luca della Robbia, in the Borgo San Jacopo, Florence.

closing a bas-relief; also, any frame or border. (*b*) The plinth of a podium. (*c*) Any small molding of plain or square section, as one of the fillets above and below the scotia of the Ionic base.

quadra[2], *n.* See *cuadra*.

quadrable (kwod'rą-bl), *a.* [< L. as if **quadrabilis*, < *quadrare*, square: see *quadrate*, *v.*] In *geom.*, capable of being squared; having an area exactly equal to that of an assignable square; also, capable of being integrated in finite terms; capable of having its definite integral expressed in exact numerical terms.

quadrad (kwod'rad), *n.* [< L. *quattuor* (*quadr-*), = E. *four*, + *-ad*[1].] Same as *tetrad*.

quadragenarious (kwod'rą-jē-nā'ri-us), *a.* [= F. *quadragénaire* = Sp. *cuadragenario* = Pg. It. *quadragenario*, < L. *quadragenarius*, pertaining to the number forty, consisting of forty, < *quadrageni*, forty each: see *quadragene*.] Consisting of forty; forty years old. *Imp. Dict.*

quadragene (kwod'rą-jēn), *n.* [< L. *quadrageni*, forty each, distributive of *quadraginta*, forty, = E. *forty*.] A papal indulgence for forty days; a remission of the temporal punishment due to sin corresponding to the forty days of the ancient canonical penance. *Imp. Dict.*

You have with much labour and some charge purchased to yourself so many *quadragenes*, or lents of pardon: that is, you have bought out the penances of so many times forty days! *Jer. Taylor*, Dissuasive from Popery, I. ii. § 4.

Quadragesima (kwod-rą-jes'i-mą), *n.* [= F. *quadragésime* = Sp. *cuadragesima* = Pg. It. *quadragesima*, < ML. *quadragesima*, Lent, < L. *quadragesima*, fem. of *quadragesimus*, *quadragensumus*, fortieth, < *quadraginta*, forty, = E. *forty*.] Lent: so called because it continues forty days. See *Lent*[1].—**Quadragesima Sunday**, the first Sunday in Lent.

quadragesimal (kwod-rą-jes'i-mąl), *a.* and *n.* [= F. *quadragésimal* = Sp. *cuadragesimal* = Pg. *quadragesimal* = It. *quadragesimale*, < ML. *quadragesimalis*, pertaining to Lent, < L. *quadragesima*, Lent: see *Quadragesima*.] **I.** *a.* Pertaining to the forty days of Lent; belonging to Lent; used in Lent; Lenten.

Quadragesimal wits, and fancies lean
As ember weeks. *W. Cartwright*, Ordinary, iii. 5.

This *quadragesimal* solemnity, in which, for the space of some weeks, the church has, in some select days, enjoined a total abstinence from flesh. *South*, Sermons, IX. 134.

II. *n.* An offering formerly made to a mother church by a daughter church on Mid-Lent Sunday.

quadragesmst, *n.* [< L. *quadragesimus*, fortieth: see *Quadragesima*.] A name for a section of the fourth volume of the English Law Reports of the time of Edward III., covering the last twelve years of his reign.

quadrangle (kwod'rang-gl), *n.* [< F. *quadrangle* = Sp. *cuadrángulo* = Pg. *quadrangulo* = It. *quadrangolo*, < LL. *quadrangulum*, a four-cornered figure, a quadrangle, neut. of L. *quadrangulus*, *quadriangulus*, four-cornered, < *quattuor* (combining form *quadr-*, *quadri-*, *quadru-*, the adj. *quadrus*, square, being later), + *angulus*, an angle, a corner: see *angle*[3].] 1. A plane figure having four angles; a foursquare figure; a quadrilateral; in *mod. geom.*, a plane figure formed by six lines intersecting at four points. —2. A square or oblong court nearly or quite surrounded by buildings: an arrangement common with public buildings, as palaces, city halls, colleges, etc.

My choler being over-blown
With walking once about the *quadrangle*.
Shak., 2 Hen. VI., i. 3. 156.

At the Palais Royale Henry IV. built a faire *quadrangle* of stately palaces, arched underneath.

Evelyn, Diary, Feb. 4, 1644.

Julian hardly stopped to admire the smooth green *quadrangle* and lofty turrets of King Henry's College.

Farrar, Julian Home, v.

3. In *palmistry*, the space between the line of the heart and that of the head.—**Axis of a quadrangle**, one of the three lines passing each through two centers of the quadrangle.—**Center of a quadrangle**, one of the three points in which opposite sides of a quadrangle meet.—**In quadrangle**, in *her.*, arranged, as charges or groups of charges, so that four will occupy the four quarters of the escutcheon, with no lines of division between the quarters: as, or, four lions *in quadrangle* gules.

quadrangular (kwod-rang'gū-lėr), *a.* [= F. *quadrangulaire* = Sp. *cuadrangular* = Pg. *quadrangular* = It. *quadrangolare*, < L. *quadrangulus*, four-cornered: see *quadrangle*.] Four-cornered; four-angled; having four angles.

That the college consist of three fair *quadrangular* courts and three large grounds, enclosed with good walls behind them. *Cowley*, The College.

As I returned, I diverted to see one of the Prince's Palaces, . . . a very magnificent cloyster'd and *quadrangular* building. *Evelyn*, Diary, Sept. 1, 1641.

Quadrangular lobe, the quadrate lobe of the cerebellum.

quadrangularly (kwod-rang'gū-lėr-li), *adv.* In the form of a quadrangle.

quadrans (kwod'ranz), *n.*; pl. *quadrantes* (kwod-ran'tēz). [L., a fourth part, a quarter, a coin, weight, and measure so called: see *quadrant*.] In *Rom. antiq.*, a copper (or, strictly, bronze) coin, the fourth part of the as. It bore on the obverse the head of Hercules, and on the reverse (like the other coins of the libral series) a prow. It also bore three

pellets, to indicate that it was (nominally) of the weight of three unciæ (ounces).—**Quadrans Muralis**, 'the Mural Quadrant,' an obsolete constellation, introduced by Lalande (1795).

quadrant (kwod'rant), *n.* and *a.* [< ME. *quadrant*, < AF. *quadrant*, a farthing, OF. *quadrant*, a Roman coin (*quadrans*), also *quadran*, *cadran*, a sun-dial, F. *cadran*, a sun-dial, dial, = Sp. *cuadrante* = Pg. It. *quadrante* = D. *kwadrant* = G. *quadrant* = Sw. *quadrant* = Dan. *kvadrant*, a quadrant, < L. *quadran(t-)s*, a fourth part, a quarter, applied to a coin (see *quadrans*), a weight (a fourth of a pound), a measure (a fourth of a foot, of an acre, of a sextarius), < *quattuor* (*quadr-*) = E. *four:* see *four*.] **I.** *n.* 1†. The fourth part; the quarter.

> The sunne, who in his annuall circle takes
> A daye's full *quadrant* from the ensuing yeere,
> Repayes it in foure yeeres, and equall makes
> The number of the dayes within his spheare.
> *Sir J. Beaumont*, End of his Majesty's First Year.

In sixty-three years there may be lost almost eighteen days, omitting the intercalation of one day every fourth year allowed for this *quadrant*, or six hours supernumerary. *Sir T. Browne*, Vulg. Err., iv. 12.

2. The quarter of a circle; the arc of a circle containing 90°; also, the figure included between this arc and two radii drawn from the center to each extremity; the division of angular magnitude from zero to a right angle, or 90°.—3. An astronomical instrument for measuring altitudes, of ancient origin, and consisting of a graduated arc of 90°, with a movable radius carrying sights, or the quadrant, carrying sights, might turn about a fixed radius. Picard in 1669 substituted a telescope for the sights, and Flamsteed (1689) introduced spider-lines in the focal plane of the object-glass. The quadrant was superseded by the mural circle, and this by the meridian circle.

> Howe it commeth to passe that, at the beginnynge of the euenyng twilight, it [the pole-star] is eleuate in that Region only fyue degrees in the moneth of Iune, and in the morninge twylight to bee eleuate xv. degrees by the same *quaadrante*, I doo not vnderstande.
> *R. Eden*, tr. of Peter Martyr (First Books on America, (ed. Arber, p. 90).

> Those curious *Quadrants*, Chimes, and Dials, those kind of Waggons which are used up and down Christendom, were first used by them. *Howell*, Letters, I. ii. 15.

> The astrolabe and *quadrant* are almost the only astronomical instruments used in Egypt.
> *E. W. Lane*, Modern Egyptians, I. 277.

4. An instrument of navigation, for measuring the altitude of the sun, distinctively called the *reflecting quadrant*. It was invented by Thomas Godfrey of Philadelphia in 1730, whence called *Godfrey's bow*, and perhaps independently by Hadley, an instrument-maker of London, about the same time. Among Hadley's papers after his death was found a description of a similar instrument by Newton, of earlier date. The quadrant is now nearly superseded by the sextant.

5. An instrument used in giving a cannon or mortar the angle of elevation necessary to the desired range. In the older forms it has a graduated arc, and a plumb-line which indicates the angle of elevation upon the arc. In a more finished and accurate form a spirit-level is substituted for the plumb, and one of the branches of the instrument is pivoted and slides over the face of the arc so as to show the elevation. Also called *gunners' quadrant* and *gunners' square*.

6. In *elect.*, a name suggested for the practical unit of self-induction. Its value is 10^9 centimeters.—**Adams's quadrant, Coles's quadrant,** varieties of the back-staff, or Davis's quadrant.—**Collins's quadrant,** an instrument for finding the time of day at a fixed latitude, from the date and the altitude or azimuth of the sun, by means of a stereographic projection of a quarter of the celestial zone between the tropics.—**Davis's quadrant,** the back-staff, originally described by John Davis, the discoverer of Davis's Straits, in 1594, and still called by his name, though modified by Hooke, Bouguer, and others. The observer stood with his back to the sun, and, looking through sights, brought the shadow of a pin into coincidence with the horizon.—**Godfrey's quadrant, Hadley's quadrant.** See def. 4.—**Gunter's quadrant,** a quadrant made of wood, brass, or other material—a kind of stereographic projection on the plane of the equator, the eye being supposed to be in one of the poles. It is used to find the hour of the day, the sun's azimuth, etc., as also to take the altitude of an object in degrees.—**Horodictical quadrant,** a sort of movable sun-dial. Upon the plane of the dial are described, first, seven concentric quadrantal arcs marked with the signs of the zodiac, or days of the year, and, secondly, a number of curves the intersections of each of which with the circles are at the same angular distances from one radius that the sun is above the horizon at a given hour of the day in each of the declinations represented by the circles. The radius 90° from that first mentioned carries sights, and from the center hangs a plumb-line whose intersection with the proper circle marks the time of day.—**Mural quadrant.** See *mural*.—**Quadrant electrometer.** See *electrometer*.—**Quadrant electroscope.** See *electroscope*.—**Quadrant of altitude,** an appendage of the artificial globe, consisting of a slip of brass of the length of a quadrant of one of the great circles of the globe, and graduated. It is fitted to the meridian, and can be moved round to all points of the horizon. It serves as a scale in measuring altitudes and other great circles.—**Sinical quadrant,** a diagram, with or without a movable arm, for solving plane triangles. An octant is sufficient.—**Spirit-level quadrant,** an instrument for determining altitudes by the use of a spirit-level.—**Sutton's quadrant.** Same as *Collins's quadrant*.

II.† *a.* Four-sided; square. [Rare.]

> The bishop with Gilbert Bourne his chaplaine, Robert Warnington his commissarie, and Robert Johnson his register, were tarying in a *quadrant* void place before the doore of the same chamber.
> *Foxe*, Martyrs, p. 1206, an. 1550.

Cross nowy quadrant. See *cross*[1].

quadrantal (kwod'ran-tal), *a.* [= Sp. *cuadrantal* = Pg. *quadrantal*, < L. *quadrantalis*, containing the fourth part of, < *quadran(t-)s*, a fourth part, a quarter: see *quadrant*.] 1. Pertaining to a quadrant; included in the fourth part of a circle: as, a *quadrantal* space.

> Problems in Dialling, both Universal and Particular, and performed by the Lines inscribed on the *Quadrantal* Part of the Instrument.
> Quoted in *N. and Q.*, 7th ser., VIII. 244.

2. Pertaining to the quadrans; of the value of a quadrans.—**Quadrantal dial.** See *dial*.—**Quadrantal triangle,** in *trigon.*, a spherical triangle which has one side equal to a quadrant, or 90°.

quadrantal (kwod'ran-tal), *n.* [< L. *quadrantal*, a liquid measure containing eight congii, also a cube, die, < *quadrantalis*, containing a fourth: see *quadrantal*, *a.*] 1. A liquid measure used by the Romans, equivalent to the amphora.—2. A cube. [Rare.]

quadrant-compass (kwod'rant-kum#pas), *n.* A carpenters' compass with a curved arm or arc, and a binding-screw to hold the limbs in any position.

quadrantes, *n.* Plural of *quadrans*.

quadrantid (kwod'ran-tid), *n.* [< NL. *Quadran(t-)s*, sc. *Muralis* (see *quadrans*), + *-id*[2].] One of a shower of shooting-stars appearing January 2d and 3d, and radiating from the old constellation Quadrans Muralis.

quadrat (kwod'rat), *a.* and *n.* [Another form of *quadrate;* as a noun, in def. 1, < F. *quadrat*, *cadrat*, a quadrat, lit. a square: see *quadrate*.] **I.**† *a.* See *quadrate*.

II. *n.* 1. In *printing*, a blank type for the larger blank spaces in or at the end of printed lines, cast lower in height, so that it shall not be inked or impressed: made in four forms for all text type—en, em, two-em, three-em. Usually abbreviated to *quad*.

en quad em quad. 2-em quad. 3-em quad.

The *low* quadrat, for letterpress work, is about three fourths of an inch high; the *high* quadrat, for stereotype work, is about ten twelfths of an inch high.

> In the lower case, having fifty-four boxes, are disposed the small letters, together with the points, spaces, *quadrats*, etc.
> *Ure*, Dict., III. 643.

2. An instrument furnished with sights, a plummet, and an index, and used for measuring altitudes, but superseded by more perfect instruments in modern use. Also called *geometrical square*, and *line of shadows*.—3. A series or set of four.

quadrata, *n.* Plural of *quadratum*.

quadrate (kwod'rāt), *a.* and *n.* [Formerly also *quadrat;* < OF. *quadrat* (F. *quadrat*, *cadrat*, as a noun: see *quadrat*); OF. vernacularly *quarre* (> E. *quarry*[1]), F. *carré* = Sp. *cuadrado* = Pg. *quadrado* = It. *quadrato* = D. *kwadraat* = G. Sw. *quadrat* = Dan. *kvadrat*, a square; < L. *quadratus*, square (neut. *quadratum*, a square, quadrate), pp. of *quadrare*, make four-cornered, square, put in order, intr. be square, < *quadra*, a square, later *quadrus*, square, < *quattuor* = E. *four:* see *four*. Cf. *quarry*[1], a doublet of *quadrate;* cf. also *square*[1].] **I.** *a.* 1. Having four equal and parallel sides; square; arranged in a square; four-sided.

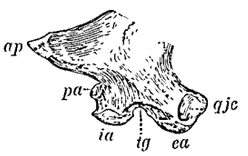
> And they followed in a *quadrat* array to the entent to destroy kyng Henry.
> *Hall's Union* (1548), Hen. IV., f. 13. (*Halliwell.*)

> And searching his books, [he] found a book of astronomy . . . with figures, some round, some triangle, some *quadrate*.
> *Foxe*, Martyrs, an. 1558.

2. Square by being the product of a number multiplied into itself.

> *Quadrate* and cubical numbers.
> *Sir T. Browne*, Vulg. Err., iv. 12.

3†. Square, as typifying justice according to the Pythagoreans; well-balanced.



> The Moralist tells us that a *quadrat* solid wise Man should involve and tackle himself within his own Virtue.
> *Howell*, Letters, I. vi. 58.

4†. Fitted; suited; applicable.

> The word consumption, being applicable . . . to a true and bastard consumption, requires a generical description *quadrate* to both. *Harvey*, Consumptions.

5. In *her.*, of square form, or having square corners: thus, a cross *quadrate* in the center has four rectangular projections in its reëntrant angles. Also *quarter-angled*.

zoöl., the special bone by the lower jaw of birds, reptiles, etc., articulates with the skull, thus distinguishing them from mammals, in which the lower jaw articulates directly with the squamosal. See II., 3.—**Quadrate cartilages,** small quadrangular cartilages often found in the nasal alæ.—**Quadrate gyrus** or **lobule.** See *gyrus*, and cut under *cerebral*.—**Quadrate line, lobe, pronator,** etc. See the nouns.—**Quadrate muscle,** in *anat.*: (*a*) The quadratus femoris, or square muscle of the femur, of man, one of the six muscles collectively known in human anatomy as the rotatores femoris, arising from the ischium and passing to the intertrochanteric part of the femur, which bone it rotates outward. (*b*) The quadratus lumborum, or square muscle of the loins, lying on each side of the lumbar region, between the lower ribs and the pelvis. (*c*) The square muscle of the chin, which draws down the lower lip: commonly called *depressor labii inferioris*. (*d*) The quadratus nictitantis, one of the two muscles (the other being the pyramidal) on the back of the eyeball of birds, etc., subserving the movements of the nictitating membrane, or third eyelid. See third cut under *eye*[1].

Left Quadrate Bone of an Eagle, outer side, a little enlarged.

s, shaft or body of the bone; *ap*, pterygoid apophysis for muscular attachment; *pa*, articular facet for pterygoid bone; *ia*, *ea*, internal and external condyles for articulation with the lower jaw, separated by *ig*, trochlear groove; *qjc*, quadratojugal cup for articulation of quadratojugal bone; *ht*, *he*, internal and external capitulum for articulation with squamosal bone, separated by *cg*, capitular groove.

II. *n.* 1. A plane figure with four equal sides and four equal angles; a square.

> The one imperfect, mortall, feminine,
> Th' other immortall, perfect, masculine;
> And twixt them both a *quadrate* was the base,
> Proportiond equally by seven and nine.
> *Spenser*, F. Q., II. ix. 22.

> The powers militant
> . . . in mighty *quadrate* join'd.
> *Milton*, P. L., vi. 62.

2. In *astrol.*, an aspect of two heavenly bodies in which they are distant from each other ninety degrees, or the quarter of a circle; quartile.—3. In *zoöl.* and *anat.*: (*a*) The os quadratum, or quadrate bone (see I.); the os pedicellatum, or pedicellate bone; the suspensorium, or suspender bone of the mandible, or that one which is in connection with the lower jaw, in vertebrates below mammals. Also called by Owen and others the *tympanic bone*, and considered to represent that bone of a mammal; by most zoologists now identified with the malleus or greater part of the malleus of *Mammalia*, formed about the proximal extremity of the Meckelian cartilage. In birds and reptiles the quadrate is a remarkably distinct bone, generally shaped something like an anvil or a molar tooth, with normally four separate movable articulations—with the squamosal above, the mandible below, the pterygoid internally, and the quadratojugal externally. Such vertebrates are hence called *Quadratifera*. (See cuts under *Gallinæ*, and *quadrate*, *a.*) Below reptiles the quadrate or its equivalent assumes other characters, and its homologies are then disputed; so the bone which has at any rate the same function, that of suspending the lower jaw to the skull, is usually called by another name. See *epitympanic* and *hyomandibular*, and cuts under *hyoid* and *palatoquadrate*. See also cuts under *Python*, *poison-fang*, *Crotalus*, *Petromyzon*, *teleost*, *palatoquadrate*, and *acrodont*. (*b*) Any quadrate muscle.—4. In *musical notation:* (*a*) Same as *natural*, ♮: so called because derived from *B quadratum* (which see, under *B*). (*b*) Same as *breve*, 1.

quadrate (kwod'rāt), *v.*; pret. and pp. *quadrated*, ppr. *quadrating*. [< L. *quadratus*, pp. of *quadrare* (> It. *quadrare* = Pg. *quadrar* = Sp. *cuadrar* = F. *cadrer*, OF. *quadrer*, > E. *quader*[1], q. v.), make four-cornered, square: see *quadrate*, *a.* and *n.*] **I.**† *trans.* 1. To square; adjust; trim, as a gun on its carriage.—2. To divide into four equal parts; quarter. *Moor*, Hindu Pantheon (1810), p. 249.

II. *intrans.* To square; fit; suit; agree: followed by *with*.

> One that . . . has a few general rules, which, like mechanical instruments, he applies to the works of every writer, and as they *quadrate with* them pronounces the author perfect or defective. *Addison*, Sir Timothy Tittle.

> But we should have to make our language over from the beginning, if we would have it *quadrate with* other languages. *F. Hall*, False Philol., p. 85.

quadrated (kwod'rāt-ed), *p. a.* [< *quadrate*, *v.*] In quadrature.

> What time the moon is *quadrated* in Heaven.
> *Poe*, Al Aaraaf, ii.

quadrati, *n.* Plural of *quadratus*.

quadratic (kwod-rat'ik), *a.* and *n.* [< *quadrate* + *-ic.*] **I.** *a.* 1. In *alg.*, involving the square and no higher power of the unknown quantity or variable of the second degree; of two di-

Tnsions.—2. In *crystal.*, tetragonal or dimetric: applied to the system that includes the square prism and related forms. See *crystallography.*—**Quadratic equation, group, logarithm, mean, modulus,** etc. See the nouns.—**Quadratic figure,** a figure of two dimensions; a superficial figure. See *cubical.*—**Quadratic reciprocity,** the relation between any two prime numbers expressed by the law of reciprocity (which see, under *law*[1]).—**Quadratic residue,** a number left as remainder after dividing some square number by a given modulus to which the quadratic residue is said to belong. Thus, 1, 3, 4, 5, and 9 are quadratic residues of 11, for $1 = 1^2 - 0.11$, $3 = 5^2 - 2.11$, $4 = 9^2 - 7.11$, etc.; but 2, 6, 7, 8, and 10 are quadratic non-residues of 11.

II. *n.* 1. In *alg.*, an equation in which the highest power of the unknown quantity is the second, the general form being

$$ax^2 + 2bx + c = 0.$$

Such an equation has two solutions, real, equal, or imaginary, expressed by the formula

$$x = \frac{-b \pm \sqrt{b^2 - ac}}{a}.$$

2. *pl.* That branch of algebra which treats of quadratic equations.—**Affected quadratic,** a quadratic equation having a term containing the unknown to the first degree, and another not containing the unknown.—**Simple quadratic.** See *simple.*

quadratically (kwod-rat′i-kal-i), *adv.* To the second degree.—**To multiply quadratically,** to raise to the second power.

Quadratifera (kwod-rā-tif′e-rä), *n. pl.* [NL., neut. pl. of *quadratifer:* see *quadratiferous.*] Those vertebrates which have a distinct quadrate bone, as birds and reptiles; a series of *Vertebrata* intermediate between the higher *Malleifera* (mammals) and the lower *Lyrifera* (fishes proper and selachians).

quadratiferous (kwod-rā-tif′e-rus), *a.* [< NL. *quadratifer,* < L. *quadratus,* the quadrate muscle, + L. *ferre* = E. *bear*[1].] Having a distinct quadrate bone, as an animal or its skull; of or pertaining to the *Quadratifera.*

quadratiformis (kwod-rā-ti-fôr′mis), *n.*; pl. *quadratiformes* (-mēz). [NL., < L. *quadratus,* the quadrate muscle, + *forma,* form.] The square muscle of the coxal group; the quadratus femoris. *Cones.*

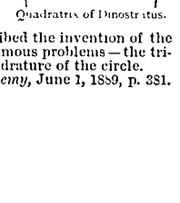
quadratipronator (kwod-rā″ti-prō-nā′tor), *n.* [< L. *quadratus,* square, + NL. *pronator,* q. v.] A square pronator of the forearm: same as *pronator quadratus.* See *pronator.* *Cones.*

quadratocubic (kwod-rā-tō-kū′bik), *a.* Of the fifth degree.—**Quadratocubic root,** the fifth root.

quadratojugal (kwod-rā-tō-jö′gal), *a.* and *n.* **I.** *a.* Connected with or representing elements of the quadrate and of the jugal or malar bone; common to these two bones: as, the *quadratojugal* arch; the *quadratojugal* articulation.

II. *n.* A bone of the zygomatic arch of birds, etc., interposed between the quadrate bone behind and the jugal or malar bone before: generally a slender rod forming the hinder piece of the zygoma. By some it is identified with the squamosal of mammals—a determination to which few now assent. See cuts under *Gallinæ, girdle-bone, temporomastoid,* and *Trematosaurus.*

quadratomandibular (kwod-rā-tō-man-dib′ū-lär), *a.* Of or pertaining to the quadrate bone and the lower jaw: as, the *quadratomandibular* articulation. See cut under *Lepidosiren.*



quadratopterygoid (kwod-rā-tō-ter′i-goid), *a.* Of or pertaining to the quadrate and pterygoid bones: as, the *quadratopterygoid* articulation.

quadratoquadratic (kwod-rā″tō-kwod-rat′ik), *a.* Of the fourth degree.—**Quadratoquadratic root,** the fourth root.

quadrator (kwod-rā′tor), *n.* [< LL. *quadrator,* a squarer (used only in sense of 'stone-cutter, quarrier'. see *quarrier*[1]), < L. *quadrare,* square: see *quadrate.*] A circle-squarer.

quadratosquamosal (kwod-rā′tō-skwā-mō′sal), *a.* In *anat.*, of or pertaining to the quadrate and the squamosal: as, the *quadratosquamosal* articulation.

quadratrix (kwod-rā′triks), *n.* [NL. (tr. Gr. τετραγωνίζουσα), fem. of LL. *quadrator,* squarer: see *quadrator.*] In *geom.*, a curve by means of which can be found straight lines equal to the circumference of circles or other curves and their several parts; a curve employed for finding the quadrature of other curves.

Quadratrix of Dinostratus.

Deinostratus, to whom is ascribed the invention of the *quadratrix* for solving the two famous problems—the trisection of the angle and the quadrature of the circle.
The Academy, June 1, 1889, p. 381.

Quadratrix of Dinostratus, a curve probably invented by Hippias of Elis about 430 B. C., and named by Dinostratus a century later. Its equation is $r \sin\theta = a\theta$.—**Quadratrix of Tschirnhausen** (named from its inventor, Count E. W. von *Tschirnhausen,* 1651–1708), a curve of sines, having the distance between two successive intersections with the line of abscissas equal to the greatest difference of the ordinates.

quadratum (kwod-rā′tum), *n.*; pl. *quadrata* (-tä). [L., neut. of *quadratus,* square: see *quadrate, a.*] 1. In *zoöl.*, the quadrate bone: more fully called *os quadratum.*—2. In *medieval music,* a breve.

quadrature (kwod′rā-tūr), *n.* [= F. *quadrature* = Sp. *cuadratura* = Pg. It. *quadratura,* < LL. *quadratura,* a making square, a squaring, < L. *quadrare,* pp. *quadratus,* square: see *quadrate.*] 1. In *geom.*, the act of squaring an area; the finding of a square or several squares equal in area to a given surface.—2. A quadrate; a square space. [Rare.]

> There let him [God] still victor sway, . . .
> And henceforth monarchy with thee divide
> Of all things, parted by the empyreal bounds,
> His *quadrature,* from thy orbicular world.
> *Milton,* P. L., x. 381.

3. The relative position of two planets, or of a planet and the sun, when the difference of their longitudes is 90°.

> But when armillæ were employed to observe the moon in other situations . . . a second inequality was discovered, which was connected, not with the anomalistical, but with the synodical revolution of the moon, disappearing in conjunctions and oppositions, and coming to its greatest amount in *quadratures.* What was most perplexing about this second inequality was that it did not return in every *quadrature,* but, though in some it amounted to 2′ 39″, in other *quadratures* it totally disappeared. *Small,* Account of the Astronomical Discoveries [of Kepler (London, 1804), § 11.

> Neptune . . . is in *quadrature* with the sun on the 23d.
> *Sci. Amer.,* N. S., LVII. 64.

4. A side of a square. [Rare.]

> This citie [Cambalu] is foure square, so that euery *quadrature* or syde of the wall hath in it thre principal portes or gates. *R. Eden,* tr. of Sebastian Munster (First Books [on America, ed. Arber, p. 25).

Indefinite quadrature, a rule for the quadrature of the circle, applicable to any sector of it.—**Mechanical quadrature,** an approximate quadrature of a plane surface, effected by the division of it by parallel lines into parts so small that they may be regarded as rectilinear or other quadrable figures, also, the integration of any expression by an analogous method.—**Method of quadratures,** the approximate integration of an expression between given numerical limits by the summation of parts in each of which the difference between the limits is so small that the integral is practically equal to that of some integrable expression.—**The problem of the quadrature, or the quadrature of the circle,** the problem of squaring the circle, of which there are two varieties: first, the *arithmetical quadrature,* exactly to express in square measure the area of a circle whose radius is some exact number in long measure; second, the *geometrical quadrature,* to describe or draw with the rule and compasses alone a square equal in area to a given circle. Both problems have been proved to be insoluble.

quadratus (kwod-rā′tus), *n.*; pl. *quadrati* (-tī). [NL., sc. *musculus,* the square muscle: see *quadrate.*] In *zoöl.* and *anat.*, the musculus quadratus or quadrate muscle of (*a*) the femur; (*b*) the loins; (*c*) the chin; (*d*) the nictitating membrane. See *quadrate muscle,* under *quadrate.*—**Quadratus femoris,** a muscle situated at the back of the hip-joint, arising from the tuberosity of the ischium and inserted into a line running from the posterior intertrochanteric ridge.—**Quadratus labii inferioris.** Same as *depressor labii inferioris* (which see, under *depressor*).—**Quadratus labii superioris,** the combined levator labii superioris alæque nasi, levator labii superioris proprius, and zygomaticus minor muscles, the three different parts being called *caput angulare, caput infraorbitale,* and *caput zygomaticum* respectively.—**Quadratus lumborum.** See *lumbus.*—**Quadratus menti.** See *mentum.*

quadrauricular (kwod-rā-rik′ū-lär), *a.* [< L. *quattuor* (*quadr-*), four, + *auricula,* auricle: see *auricle.*] Having four auricles, as the heart of a nautilus.

quadrel (kwod′rel), *n.* [< ML. *quadrellus,* dim. of L. *quadrum,* a square: see *quarrel*[2].] 1. In *arch.*, a square stone, brick, or tile. The term is sometimes restricted in its application to a kind of artificial stone formed of a chalky earth molded to a square form and slowly and thoroughly dried in the shade.
2. A piece of turf or peat cut in a square form. [Prov. Eng.]

quadrelle (kwod-rel′), *n.* [< OF. *quadrelle,* an arrow, shaft, var. of *quarele,* f., *quarel,* m., an arrow, crossbow-bolt, etc.: see *quarrel*[2].] A square-headed or four-edged missile.

quadrennial (kwod-ren′i-al), *a.* and *n.* [For *quadriennial,* q. v.] **I.** *a.* 1. Comprising four years: as, a *quadrennial* period.—2. Occurring once in four years: as, *quadrennial* elections.

Both States [Montana and Washington] provide for a *quadrennial* election of a governor, lieutenant-governor, secretary of state, state treasurer, state auditor, attorney-general, and superintendent of public instruction.
The Century, XXXIX. 506.

II. *n.* A fourth anniversary, or its celebration.

quadrennially (kwod-ren′i-al-i), *adv.* Once in four years.

quadrenniate (kwod-ren′i-āt), *n.* [< *quadrennium* + *-ate*[3].] A period of four years; a quadrennium.

quadrennium (kwod-ren′i-um), *n.* [For *quadriennium,* q. v.] A period of four years.

> Burdening girls, after they leave school, with a *quadrennium* of masculine college regimen.
> *E. H. Clarke,* Sex in Education, p. 125.

quadrequivalent (kwod-rē-kwiv′a-lent), *a.* [< L. *quattuor* (*quadr-*), = E. *four,* + E. *equivalent.*] Same as *quadrivalent.*

quadri-. [L., also *quadru-,* sometimes *quatri-,* combining form of *quattuor,* = E. *four* (the independent adj. *quadrus* or *quadruus,* four-cornered, square, fourfold, < *quattuor,* four, being of later use): see *four.*] An element in many compounds of Latin origin or formation, meaning 'four.' In *quadrangle, quadrangular* (as in Latin), and in *quadrennial, quadrennium,* it is reduced to *quadr-.*

quadriarticulate (kwod″ri-är-tik′ū-lāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + *articulatus,* pp. of *articulare,* divide into single joints: see *articulate.*] Having four articulations or joints.

quadribasic (kwod-ri-bā′sik), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + E. *basic.*] In *chem.*, noting an acid which has four hydrogen atoms replaceable by basic atoms or radicals.

quadrible† (kwod′ri-bl), *a.* [Irreg. for the later *quadrable,* q. v.] Capable of being squared. [Rare.]

> Sir Isaac Newton had discovered a way of attaining the quantity of all *quadrible* curves analytically, by his method of fluxions, some time before the year 1688.
> *Derham,* Physico-Theol., v. 1, note *y.*

quadric (kwod′rik), *n.* and *a.* [< LL. *quadrus,* square (< L. *quattuor* = E. *four*), + *-ic.*] **I.** *n.* In *alg.*, a homogeneous expression of the second degree in the variables. *Ternary* and *quaternary quadrics,* equated to zero, represent respectively curves and surfaces which have the property of cutting every line in the plane or in space in two points, real or imaginary, and to such surfaces the name *quadric* is also applied.—**Modular method of generation of quadrics.** See *modular.*

II. *a.* In *alg.* and *geom.*, of the second degree; quadratic. Where there is only one variable, the word *quadratic* is usually employed; in plane geometry, *conic;* and in solid geometry and where the number of non-homogeneous variables exceeds two, *quadric.* Thus, we say *quadric* cone, not *quadratic* or *conic* cone.—**Quadric inversion.** See *inversion.*—**Quadric surface,** a surface of the second order.

quadricapsular (kwod-ri-kap′sū-lär), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + *capsula,* capsule: see *capsule, capsular.*] In *bot.*, having four capsules.

quadricarinate (kwod-ri-kar′i-nāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + *carina,* keel: see *carina, carinate.*] In *entom.*, having four carinæ, or longitudinal raised lines: specifically said of the face of an orthopterous insect when the median carina is deeply suleate, so that it forms two parallel raised lines, which, with the two lateral carinæ, form four raised lines.

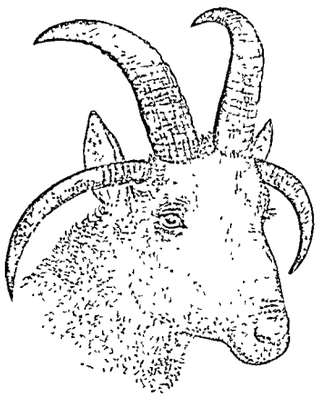
quadricellular (kwod-ri-sel′ū-lär), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + NL. *cellula,* cellule: see *cellular.*] Having or consisting of four cells.

quadricentennial (kwod″ri-sen-ten′i-al), *a.* and *n.* [< L. *quattuor* (*quadri-*), = E. *four,* + ML. *centennis,* a hundred years old: see *centennial.*] **I.** *a.* Pertaining to or consisting of a period of four hundred years.

II. *n.* The commemoration or celebration of an event which occurred four hundred years before: as, the Luther *quadricentennial.*

quadriceps (kwod′ri-seps), *n.* [NL., < L. *quattuor* (*quadri-*), = E. *four,* + *caput,* head: see *biceps.*] In *anat.*, the quadriceps extensor cruris of the thigh; the great muscle which extends the leg upon the thigh, considered as consisting of the rectus, crureus, and vastus internus and externus. Called *triceps extensor cruris* when the crureus is regarded as a part of the vastus internus, or when the rectus is separately enumerated. This great muscle forms nearly all the flesh upon the front of the thigh. See cuts under *muscle*[1].—**Quadriceps suræ,** the combined gastrocnemius externus and internus, soleus, and plantaris, forming the bulk of the muscle of the calf.

quadriciliate (kwod-ri-sil′i-āt), *a.* [< L. *quattuor* (*quadri-*), = E. *four,* + NL. *cilium* + *-ate*[1].] Having four cilia, or flagelliform appendages.



> M. Thuret informs us that he has seen the biciliate spores germinate as well as the *quadriciliate.*
> *M. J. Berkeley,* Introd. to Cryptog. Bot., p. 137.

quadricinium (kwod-ri-sin'i-um), *n.*; pl. *quadricinia* (-ä). [NL., < L. *quattuor* (*quadri-*), = E. *four*, + *canere*, sing.] In *music*, a composition for four voices. Also *quatricinium*.

quadricipital (kwod-ri-sip'i-tal), *a.* [< *quadriceps* (*-cipit-*) + *-al*.] Having four heads or origins, as a muscle; of or pertaining to the quadriceps.

quadricone (kwod'ri-kōn), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *conus*, cone: see *cone*.] A quadric cone, or surface generated by the motion of a line through a fixed point, one point of which describes a conic section.

quadricorn (kwod'ri-kôrn), *a.* and *n.* [< NL. *quadricornis*, < L. *quattuor* (*quadri-*), = E. *four*, + *cornu* = E. *horn*.] I. *a.* Having four horns or horn-like parts, as antennæ; quadricornous.

Quadricorn Sheep (*Ovis aries*, var. *quadricornis*).

II. *n.* A quadricorn animal.

quadricornous (kwod-ri-kôr'nus), *a.* [< *quadricorn* + *-ous*.] Having four horns; quadricorn.

quadricostate (kwod-ri-kos'tāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *costa*, rib: see *costa*, *costate*.] Having four ribs or costæ, in any sense.

quadricrescentic (kwod''ri-kre-sen'tik), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + E. *crescent* + *-ic*.] Having four crescents; quadricrescentoid.

quadricrescentoid (kwod-ri-kres'en-toid), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + E. *crescent* + *-oid*.] In *odontog.*, having four crescentic folds: noting a pattern of selenodont dentition.

quadricuspidal (kwod-ri-kus'pi-dal), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *cuspis* (*cuspid-*), a point: see *cuspidal*.] A ruled surface of the eighth order.—**Limited quadricuspidal**, a ruled surface of the fourth order, generated by the motion of a straight line cutting two given straight lines and touching a given quadric surface.

quadricuspidate (kwod-ri-kus'pi-dāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *cuspis* (*cuspid-*), a point: see *cusp*, *cuspidate*.] Having four cusps, as a tooth. *W. H. Flower*, Encyc. Brit., XV. 402.

quadricycle (kwod'ri-sī-kl), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + LL. *cyclus*, cycle: see *cycle*[1].] A four-wheeled vehicle intended to be propelled by the feet of the rider.

A *Quadricycle* for pedal propulsion on railways.
The Engineer, LXV. 109.

quadridentate (kwod-ri-den'tāt), *a.* [< L. *quadriden(t-)s*, having four teeth, < *quattuor* (*quadri-*), = E. *four*, + *den(t-)s* = E. *tooth*: see *dentate*.] Having four teeth or tooth-like parts, as serrations.

quadriderivative (kwod''ri-dē-riv'a-tiv), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + E. *derivative*.] A derivative invariant of the second order.

quadridigitate (kwod-ri-dij'i-tāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + L. *digitus*, finger or toe: see *digit*, *digitate*.] Having four digits, whether fingers, toes, or other digitate parts; tetradactyl; quadrisulcate, as a hoofed quadruped.

quadriennial† (kwod-ri-en'i-al), *a.* [= F. *quadriennal*, *quatriennal* = Sp. *cuadrienal* = Pg. *quadrienal*, < LL. *quadriennis*, of four years, < L. *quattuor* (*quadri-*), = E. *four*, + *annus*, a year.] Quadrennial.

quadriennially† (kwod-ri-en'i-al-i), *adv.* Quadrennially.

quadriennium (kwod-ri-en'i-um), *n.* [L. *quadriennium*, a space of four years, < LL. *quadriennis*, of four years: see *quadriennial*.] A quadrennium.—**Quadriennium utile**, in *Scots law*, the four years allowed after majority within which may be instituted an action of reduction of any deed done to the prejudice of a minor.

quadrifarious (kwod-ri-fā'ri-us), *a.* [< LL. *quadrifarius*, fourfold, < L. *quattuor* (*quadri-*), = E. *four*, + *-farius*, as in *bifarius*, etc. (see *bifarious*).] Set, arranged, or disposed in four rows or series: correlated with *unifarious*, *bifarious*, *trifarious*, and *multifarious*.

quadrifariously (kwod-ri-fā'ri-us-li), *adv.* In a quadrifarious manner.

quadrifid (kwod'ri-fid), *a.* [< L. *quadrifidus*, split into four parts, four-cleft, < *quattuor* (*quadri-*), = E. *four*, + *findere* (√*fid*), cleave, split.] Four-cleft; deeply cut, but not entirely divided, into four parts: correlated with *bifid*, *trifid*, and *multifid*.

The mouth of the animal, situated at one of the poles, leads first to a *quadrifid* cavity.
W. B. Carpenter, Micros., § 530.

Quadrifidæ (kwod-rif'i-dē), *n. pl.* [NL., fem. pl. of L. *quadrifidus*, four-cleft: see *quadrifid*.] In *entom.*, a section of noctuid moths; one of the two prime divisions of noctuid moths in Guenée's classification. It includes all those families in which the median vein of the hind wings has four branches. It contains the largest of the noctuids, and the forms are mainly American and East Indian. The character which gives the name is not a stable one, and the term has nearly fallen into disuse.

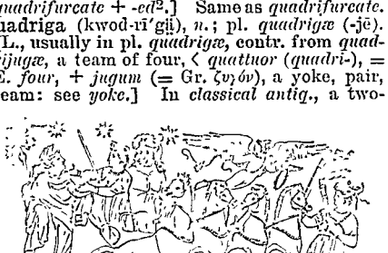
quadrifocal (kwod-ri-fō'kal), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *focus*, focus: see *focus*, *focal*.] Having four foci.

quadrifoliate (kwod-ri-fō'li-āt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *folium*, leaf: see *foliate*.] In *bot.*, four-leaved. (*a*) Having the leaves whorled in fours. (*b*) Same as *quadrifoliolate*: an incorrect use.

Quadrifoliate Stem of *Asclepias quadrifolia*.

quadrifoliolate (kwod-ri-fō''li-ō-lāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *foliolus*, leaflet.] In *bot.*, having four leaflets: said of a compound leaf.

quadriform (kwod'ri-fôrm), *a.* [< LL. *quadriformis*, four-formed, < L. *quattuor* (*quadri-*), = E. *four*, + *forma*, form.] Having a fourfold aspect, as in shape, arrangement, etc.



We can also apply the principle of group-flashing as easily to a fourfold light as to a single light. According to the number of tiers employed, the arrangement was to be named Biform, Triform, *Quadriform*.
Fortnightly Rev., N. S., XLIII. 815.

quadrifrons (kwod'ri-fronz), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *frons* (*front-*), front: see *front*.] Having four faces. See *bifrons*.

quadrifurcate (kwod-ri-fėr'kāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *furca*, fork: see *furca*, *furcate*.] Having four forks, tines, or branches; twice-forked; doubly dichotomous: correlated with *bifurcate* and *trifurcate*.

quadrifurcated (kwod-ri-fėr'kā-ted), *a.* [< *quadrifurcate* + *-ed*[2].] Same as *quadrifurcate*.

quadriga (kwod-rī'gä), *n.*; pl. *quadrigæ* (-jē). [L., usually in pl. *quadrigæ*, contr. from *quadrijugæ*, a team of four, < *quattuor* (*quadri-*), = E. *four*, + *jugum* (= Gr. ζυγόν), a yoke, pair, team: see *yoke*.] In *classical antiq.*, a two-wheeled chariot drawn by four horses, which were harnessed all abreast. It was used in racing in the Greek Olympian games, and in the circensian games of the Romans. The quadriga is often met with as the reverse type of Greek coins, especially those of Sicily, and is of frequent occurrence in sculpture and vase-painting.

Quadriga.—"The Rape of Proserpine by Pluto," from a Greek red figured vase.

The *quadriga* for which Praxiteles was said to have made the driver. *A. S. Murray*, Greek Sculpture, I. 182.

quadrigemina (kwod-ri-jem'i-nä), *n. pl.* [NL., neut. pl. of L. *quadrigeminus*, fourfold: see *quadrigeminous*.] The quadrigeminous bodies of the brain, more fully called *corpora quadrigemina*. Below mammals they are represented by the corpora bigemina, or twin bodies. See *corpus*.

quadrigeminal (kwod-ri-jem'i-nal), *a.* [< *quadrigemin-ous* + *-al*.] Fourfold; especially, pertaining to the corpora quadrigemina.

Other fibres, arising in the optic thalamus and *quadrigeminal* body, descend, which preside over the reflex motions. *Frey*, Histol. and Histochem. (trans.), p. 594.

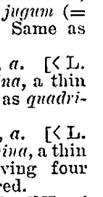
quadrigeminate (kwod-ri-jem'i-nāt), *a.* [< *quadrigemin-ous* + *-ate*[1].] 1. In *bot.*, growing in fours, as the cells of certain algæ.—2. In *anat.*, same as *quadrigeminous*.

quadrigeminous (kwod-ri-jem'i-nus), *a.* [< L. *quadrigeminus*, fourfold, < *quattuor* (*quadri-*), = E. *four*, + *geminus*, twin-born, twin: see *Gemini*, *geminate*.] 1. Consisting of four similar parts; having four parts, as one and the same thing; fourfold; quadrigeminal.—2. In *anat.* and *zoöl.*, specifically, pertaining to the optic lobes or corpora quadrigemina of any mammal, known in human anatomy as the *nates* and *testes*, which appear as two pairs of lobes or tubercles on the morphologically superior surface of the midbrain or mesencephalon, close to the pineal gland, behind the third ventricle, over the aqueduct of Sylvius. See *corpus* and *quadrigemina*.

quadrigenarious (kwod''ri-jē-nā'ri-us), *a.* [< L. *quadrageni*, *quadringeni*, four hundred each, distributive of *quadringenti*, four hundred, < *quattuor* (*quadri-*), = E. *four*, + *centum* = E. *hund-red*.] Consisting of four hundred.

quadriglandular (kwod-ri-glan'dū-lėr), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *glan(d-)s*, gland: see *gland*.] Having four glands or glandular parts.

quadrijugate (kwod-ri-jō'gāt or -rij'ö-gāt), *a.* [< *quadrijug-ous* + *-ate*[1].] In *bot.*, pinnate with four pairs of leaflets: as, a *quadrijugate* leaf.



quadrijugous (kwod-ri-jō'gus or -rij'ö-gus), *a.* [< L. *quadrijugus*, belonging to a team of four, < *quattuor* (*quadri-*), = E. *four*, + *jugum* (= Gr. ζυγόν), a yoke. Cf. *quadriga*.] Same as *quadrijugate*.

quadrilaminar (kwod-ri-lam'i-nėr), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *lamina*, a thin plate: see *lamina*, *laminar*.] Same as *quadrilaminate*.

quadrilaminate (kwod-ri-lam'i-nāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *lamina*, a thin plate: see *lamina*, *laminate*.] Having four laminæ, layers, or plates; four-layered.

Quadrilatera (kwod-ri-lat'e-rä), *n. pl.* [NL., < L. *quadrilaterus*, four-sided: see *quadrilateral*.] In *Crustacea*, a group of crabs having a quadrate or cordate carapace. *Latreille*.

quadrilateral (kwod-ri-lat'e-ral), *a.* and *n.* [< L. *quadrilaterus*, four-sided, < *quattuor* (*quadri-*), = E. *four*, + *latus* (*later-*), side, flank: see *lateral*.] I. *a.* Having four sides; composed of four lines.—**Quadrilateral map-projection.** See *projection*.

Complete Quadrilateral.

II. *n.* 1. A figure formed of four straight lines. In the old geometry the lines are supposed to terminate at four intersections; in modern geometry the lines are regarded as infinite, and a plane quadrilateral as having six angles. Such a figure has three *diagonals* or *axes*, being straight lines through opposite vertices, and three *centers*, which are the intersections of the axes.

2. *Milit.*, the space inclosed between, and defended by, four fortresses: as, the Bulgarian *quadrilateral*. The most famous quadrilateral was that in northern Italy, inclosed by the fortresses of Peschiera, Mantua, Verona, and Legnago.

Field Marshal Radetsky . . . had collected under his own command all the Austrian forces scattered over the Lombardo-Venetian provinces, and had concentrated them within the well-nigh impregnable stronghold formed in the very heart of these provinces by the fortresses of the *Quadrilateral*. *E. Dicey*, Victor Emmanuel, p. 85.

Inscriptible quadrilateral. See *inscriptible*.—**Plane quadrilateral**, a quadrilateral lying in a plane.—**Skew quadrilateral**, a quadrilateral that does not lie in a plane.

quadrilateralness (kwod-ri-lat'e-ral-nes), *n.* The property of being quadrilateral.

quadriliteral (kwod-ri-lit'e-ral), *a.* and *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *littera*, *litera*, letter: see *literal*.] I. *a.* Consisting of four letters, or of only four constant letters or consonants.

II. *n.* A word or a root consisting of four letters or containing four consonants.

Arabick roots are as universally [*i. e.*, almost universally] triliteral. . . . If we suppose ten thousand of them (without reckoning *quadriliterals*) to exist, and each of them to admit only five variations, . . . even then a perfect Arabick dictionary ought to contain fifty thousand words.
Sir W. Jones, Asiatic Dissertations, I. 125.

quadrille (kwod-ril′ or ka-dril′), *n.* and *a.* [< F. *quadrille*, m., a game at cards, a square dance, music for such a dance, < Sp. *cuadrillo*, m., a small square (cf. F. *quadrille*, f., a troop of horsemen, < Sp. *cuadrilla*, a troop of horsemen, a meeting of four persons, < It. *quadriglia* = Pg. *quadrilha*, a troop of horsemen); dim. of *cuadro*, m., *cuadra*, f., < L. *quadrum*, n., *quadra*, f., a square: see *quadrum*, *quadra*[1]. Cf. *quarrel*[2].] **I.** *n.* 1. A game played by four persons with forty cards, which are the remainder of the pack after the tens, nines, and eights are discarded.

> They taught him with address and skill
> To shine at ombre and *quadrille*.
> *Cawthorn*, Birth and Education of Genius.

Quadrille, a modern game, bears great analogy to ombre, with the addition of a fourth player, which is certainly a great improvement. *Strutt*, Sports and Pastimes, p. 436.

2. A square dance for four couples, consisting regularly of five parts or movements, each complete in itself — namely, *le pantalon*, *Vété*, *la poule*, *la trénise* (or *la pastourelle*), and *la finale*. These parts are adaptations of popular society dances. They were combined in their present order about 1800, and were soon adopted in France, England, and Germany, giving rise to a quadrille mania similar to the later polka mania.

3. Any single set of dancers or maskers arranged in four sets or groups. [Rare.]

> At length the four *quadrilles* of maskers, ranging their torch-bearers behind them, drew up in their several ranks on the two opposite sides of the hall.
> *Scott*, Kenilworth, xxxvii.

4. Any square dance resembling the quadrille.— 5. Music for such square dances. For the movements of the quadrille proper the rhythm is either sextuple or duple, and each section is usually 32 measures long. Quadrille music is usually adapted or arranged, not specially written for the purpose.

II. *a.* Same as *quadrillé*.

quadrille (kwod-ril′ or ka-dril′), *v. i.*; pret. and pp. *quadrilled*, ppr. *quadrilling*. [< *quadrille*, *n.*] 1. To play at quadrille. *Imp. Dict.*—2. To dance quadrilles.

> While thus, like motes that dance away
> Existence in a summer ray,
> These gay things, born but to *quadrille*,
> The circle of their doom fulfil.
> *Moore*, Summer Fête.

quadrillé (ka-drē-lyā′), *a.* [F., < **quadrille*, a small square, < Sp. *cuadrillo*, a small square: see *quadrille*.] Divided or marked off into squares; having a pattern composed of small squares: said of textile fabrics, writing-papers ruled with lines crossing at right angles, and the like.

quadrillion (kwod-ril′yon), *n.* [< F. *quadrillion*, < L. *quattuor* (*quadri-*), = E. *four*, + F. (*m*)*illion*, > E. *million*[1].] The fourth power of a million according to the system of numeration called English; but the fifth power of a thousand according to the French system, commonly used in the United States.

quadrilobate (kwod-ri-lō′bāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + NL. *lobus*, lobe.] In *bot.* and *zoöl.*, having four lobes or lobules.

quadrilobed (kwod′ri-lōbd), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + NL. *lobus*, lobe, + *-ed*[2].] Same as *quadrilobate*.

quadrilocular (kwod-ri-lok′ū-lăr), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *loculus*, a cell.] 1. In *bot.*, having four cells or compartments; four-celled: as, a *quadrilocular* pericarp.— 2. In *anat.* and *zoöl.*, having four cavities or compartments: chiefly an epithet of the heart of mammals and birds.

quadriloculate (kwod-ri-lok′ū-lāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *loculus*, cell: see *loculus*, *loculate*.] Same as *quadrilocular*.

quadriloge (kwod′ri-lōj), *n.* [= OF. *quadrilogue*, < L. *quattuor* (*quadri-*), = E. *four*, + Gr. λόγος, a saying, speaking, discourse: see *Logos*.] 1. A book written in four parts, as "Childe Harold's Pilgrimage."—2. Any narrative depending on the testimony of four witnesses, as the four Gospels.—3. Any work compiled from four authors, as the "Life of Thomas a Becket." *Brewer*. [Rare in all senses.]

> The very authours of the *quadriloge* itselfe . . . doe all, with one pen and mouth, acknowledge the same.
> *Lambarde*, Perambulation (1590), p. 515. (*Halliwell.*)

Quadrimani (kwod-rim′ą-nī), *n. pl.* [NL., pl. of *quadrimanus*: see *quadrimanous*.] In Latreille's system of classification, a group of caraboid beetles, typified by the genus *Harpalus*, having the four anterior tarsi dilated in the males: distinguished from *Simplicimani* and *Patellimani*. See *Harpalinæ*.

quadrimanous (kwod-rim′ą-nus), *a.* [< NL. *quadrimanus*, four-handed, < L. *quattuor* (*quadri-*), = E. *four*, + *manus*, hand. Cf. *quadrumanous*.] Same as *quadrumanous*.

> At this malicious game they display the whole of their *quadrimanous* activity.
> *Burke*, Rev. in France, Works, III. 199.

quadrimembral (kwod-ri-mem′brąl), *a.* [< LL. *quadrimembris*, four-limbed, four-footed, < L. *quattuor* (*quadri-*), = E. *four*, + *membrum*, a limb, a member.] Having four members (or parts) as limbs: as, most vertebrates are *quadrimembral*.

quadrint, **quadrinet** (kwod′rin), *n.* [< ML. *quadrinus* (?); cf. L. *quadran(t-)s*, the fourth part of an as: see *quadrans*, *quadrant*.] A mite; a small piece of money, in value about a farthing.

> One of her paramours sent her a purse full of *quadrines* (which are little pieces of copper money) instead of silver.
> *North*, tr. of Plutarch, p. 722.

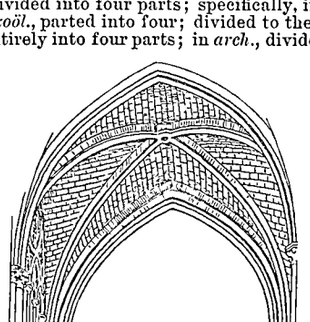
quadrinomial (kwod-ri-nō′mi-ąl), *a.* and *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *nom(en)*, name (see *nome*[3]), + *-al*. Cf. *binomial*, etc.] **I.** *a.* In *alg.*, consisting of four terms.

II. *n.* In *alg.*, an expression consisting of four terms.

quadrinomical (kwod-ri-nom′i-kąl), *a.* [As *quadrinom*(*ial*) + *-ic-al*.] Quadrinomial.

quadrinominal (kwod-ri-nom′i-nąl), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *nomen* (*nomin-*), name: see *nomen*, *nominal*.] Having four terms; quadrinomial.

quadrinucleate (kwod-ri-nū′klē-āt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *nucleus*, a nucleus: see *nucleate*.] In *bot.*, having four nuclei, as the spores of some fungi.



quadrinvariant (kwod-rin-vā′ri-ąnt), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + E. *invariant*.] An invariant of the second order in the coefficients.

quadripara (kwod-rip′ą-rą), *n.* [NL., < L. *quattuor* (*quadri-*), = E. *four*, + *parere*, bring forth, bear.] A woman who is bearing a child for the fourth time.

Quadriparæ (kwod-rip′ą-rē), *n. pl.* [NL., fem. pl. of *quadriparus*: see *quadriparous*.] A group of birds proposed by E. Newman in 1875, being those which lay four eggs, and only four, and place them with the small ends together in the middle of the nest: it includes snipes, sandpipers, plovers, etc., and is practically equivalent to *Limicolæ*, 1.

quadriparous (kwod-rip′ą-rus), *a.* [< NL. *quadriparus*, < L. *quattuor* (*quadri-*), = E. *four*, + *parere*, bring forth, bear.] In *ornith.*, laying four eggs, and only four; being of the *Quadriparæ*: as, *quadriparous* birds. *Newman*.

quadripartite (kwod-ri-pär′tīt), *a.* and *n.* [= OF. *quadripartit*, *quadriparty*, < L. *quadripartitus*, *quadripertitus*, divided into four parts, fourfold (LL. also as a finite verb, *quadripartire*, divide into four), < *quattuor* (*quadri-*), = E. *four*, + *partitus*, pp. of *partire*, divide, separate, distribute: see *part*, *v.*, *partite*, etc.] **I.** *a.* Divided into four parts; specifically, in *bot.* and *zoöl.*, parted into four; divided to the base or entirely into four parts; in *arch.*, divided, as

Quadripartite Vault.—Nave of Amiens Cathedral, France.

a vault, by the system of construction employed, into four compartments. Such a vault is the cardinal type of medieval Pointed vaulting.

> Squire Headlong . . . was *quadripartite* in his locality: that is to say, he was superintending the operations in four scenes of action — namely, the cellar, the library, the picture-gallery, and the dining-room.
> *Peacock*, Headlong Hall, ii.

II. *n.* A book or treatise divided into four parts or treatises; a tetrąbiblion: as, the last two books of Ptolemy's *Quadripartite;* the *quadripartite* (four Gospels) of the New Testament.

quadripartitely (kwod-ri-pär′tīt-li), *adv.* In four divisions; in a quadripartite distribution.

quadripartition (kwod′ri-pär-tish′on), *n.* [< L. *quadripartitio*(*n-*), a division into four, < *quadripartitus*, divided into four: see *quadripartite*.] A division by four or into four parts.

> Nor would it, perhaps, be possible to entirely deny the position of one who should argue that this convenient *quadri-partition* of the month was first in order of time.
> *Contemporary Rev.*, L. 528.

quadripennate (kwod-ri-pen′āt), *a.* and *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *penna*, wing: see *penna*, *pennate*.] **I.** *a.* In *entom.*, having four wings — that is, four functional wings, an anterior pair being not converted into elytra or wing-cases.

II. *n.* A four-winged or quadripennate insect.

quadriphyllous (kwod-ri-fil′us), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + Gr. φύλλον = L. *folium*, leaf.] In *bot.*, having four leaves; quadrifoliate.

quadriplanar (kwod-ri-plā′năr), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + NL. *planum*, a plane: see *plane*[1], *planar*.] Formed by four planes.— **Quadriplanar coördinates.** See *coördinate*.

quadriplicate (kwod-rip′li-kāt), *a.* and *n.* Same as *quadruplicate*.

quadriplicated (kwod-rip′li-kā-ted), *a.* Same as *quadruplicate*.

quadripulmonary (kwod-ri-pul′mō-nā-ri), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + L. *pulmo*(*n-*), lung: see *pulmonary*.] In *Arachnida*, having two pairs of pulmonary sacs; tetrapneumonous: opposed to *bipulmonary*.

quadriquadric (kwod-ri-kwod′rik), *a.* and *n.* [< *quadri*(*c*) + *quadric*.] **I.** *a.* Of the second degree in each of two variables or sets of variables.

II. *n.* A skew quartic curve, the intersection of two quadric surfaces. There are other quartics not of this description.

quadriradiate (kwod-ri-rā′di-āt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *radius*, ray (> *radiatus*, radiate): see *radiate*.] Having four rays, as a fish's fin; tetractinal, as a sponge-spicule; in *bot.*, having four radii or prolongations: as, a *quadriradiate* mass of chlorophyl.

quadrireme (kwod′ri-rēm), *n.* [< L. *quadriremis* (LL. also *quatriremis*), a vessel fitted with four banks of oars, < *quattuor* (*quadri-*), = E. *four*, + *remus*, oar: see *oar*[1].] A galley with four banks of oars or rowers, mentioned as in use occasionally among the ancient Greeks and Romans.

quadrisacramentalist (kwod-ri-sak-ra-men′tąl-ist), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *sacramentum*, sacrament, + *-al* + *-ist*.] Same as *quadrisacramentarian*.

quadrisacramentarian (kwod-ri-sak″ra-men-tā′ri-ąn), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *sacramentum*, sacrament, + *-arian*.] One of a small body of German Protestants in the middle of the sixteenth century, who held that the four sacraments of baptism, the eucharist, holy orders, and absolution are requisite for salvation.

quadrisection (kwod-ri-sek′shon), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *sectio*(*n-*), a cutting: see *section*.] A section into four equal parts.

quadriseptate (kwod-ri-sep′tāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *septum*, a partition: see *septum*, *septate*.] Having four septa or partitions.

quadriserial (kwod-ri-sē′ri-ąl), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *series*, a row: see *serial*.] Set or arranged in four rows or series: four-rowed; quadrifarious; tetrastichous.

> The production of the ambulacral element in some starfishes is much more rapid than general growth, thus producing a crushing together of the plates in the direction of the length, in some cases carried to such an extent that the tube-feet in each furrow become *quadriserial*.
> *Amer. Nat.*, Feb., 1890, p. 161.

quadrisetose (kwod-ri-sē′tōs), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *sæta*, *seta*, a bristle: see *seta*, *setose*.] In *entom.*, bearing four setæ or bristles.

quadrispiral (kwod-ri-spī′rąl), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *spira*, a coil, a spire: see *spire*, *spiral*.] In *bot.*, having four spirals.

> Elaters [of *Fimbriaria*] rather short, uni-*quadrispiral*.
> *Underwood*, Hepaticæ of N. A., p. 39.

Quadrisulcata (kwod″ri-sul-kā′tą), *n. pl.* [NL., neut. pl. of *quadrisulcatus*: see *quadrisulcate*.]

A group of hoofed quadrupeds having four toes; the quadrisulcate ungulate mammals.

quadrisulcate (kwod-ri-sul'kāt), *a.* [< NL. *quadrisulcatus*, < L. *quattuor* (*quadri-*), = E. *four*, + *sulcus*, a furrow: see *sulcus*, *sulcate*.] Having four grooves, furrows, or sulci; specifically, in *mammal.*, having a four-parted hoof; four-toed; quadridigitate.

quadrisyllabic (kwod″ri-si-lab'ik), *a.* [< *quadrisyllab(le)* + *-ic*.] Consisting of four syllables; pertaining to or consisting of quadrisyllables.

quadrisyllabical (kwod″ri-si-lab'i-kal), *a.* [< *quadrisyllabic* + *-al*.] Same as *quadrisyllabic*.

quadrisyllable (kwod-ri-sil'a-bl), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *syllaba*, syllable: see *syllable*.] A word consisting of four syllables.

A distinction without a difference could not sustain itself; and both alike disguised their emptiness under this pompous *quadrisyllable*.
De Quincey, Roman Meals. (*Davies.*)

quadritactic (kwod-ri-tak'tik), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + Gr. τακτικός, pertaining to arrangement: see *tactic*.] Of the nature of a point on a surface or skew curve where four consecutive points are in one plane.—**Quadritactic point.** See *tritactic point*, under *point*[1].

quadritubercular (kwod'ri-tū-bėr'kū-lăr), *a.* Same as *quadrituberculate*.

By the suppression of one of the primitive cusps we arrive at the *quadritubercular* tooth. *Nature*, XLI. 467.

quadrituberculate (kwod″ri-tū-bėr'kū-lāt), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *tuberculum*, tubercle: see *tubercle*, *tuberculate*.] Having four tubercles: as, a *quadrituberculate* molar.

quadrivalent (kwod-riv'a-lent), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + *valen(t-)s*, ppr. of *valere*, be strong.] In *chem.*, noting an atom the equivalence of which is four, or an element one atom of which is equivalent, in combining power, to four atoms of hydrogen; tetradic; tetratomic.

quadrivalve (kwod'ri-valv), *a.* and *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + *valva*, a door: see *valve*.] **I.** *a.* Same as *quadrivalvular*.

II. *n.* One of a set of four folds or leaves forming a door.

quadrivalvular (kwod-ri-val'vū-lăr), *a.* [< L. *quattuor* (*quadri-*), = E. *four*, + NL. *valvula*, dim. of L. *valva*, valve: see *valve*.] In *zoöl.* and *bot.*, having four valves or valvular parts.

quadrivia, *n.* Plural of *quadrivium*.

quadrivial (kwod-riv'i-al), *a.* and *n.* [< L. *quadricius*, having four ways, + *-al*. Cf. *trivial*.] **I.** *a.* 1. Having four ways meeting in a point; leading in four directions.

A forum, with *quadrivial* streets.
B. Jonson, Expostulation with Inigo Jones.

2. Belonging to the quadrivium: thus, *quadrivial astrology* is astrology in the sense in which astrology is a branch of the quadrivium—that is, astronomy.

II. *n.* One of the four arts constituting the quadrivium.

The *quadrivials*—I meane arythmetike, musike, geometrie, and astronomie—& with them all skill in the perspectiues, are now smallie regarded in either of them [the universities]. *Holinshed*, Descrip. of England, ii. 3.

quadrivious (kwod-riv'i-us), *a.* [< L. *quadrivius*, of the cross-roads, lit. having four ways, < *quattuor* (*quadri-*), = E. *four*, + *via* = E. *way*.] Going in four directions.

When the cheese was so rotten with them [vermin] that only the twigs and string kept it from tumbling to pieces and walking off *quadrivious*, it came to table.
C. Reade, Cloister and Hearth, xxiv.

quadrivium (kwod-riv'i-um), *n.*; pl. *quadriviæ* (-ē). [< LL. *quadrivium*, *quadruvium*, the four branches of mathematics, a particular use of L. *quadrivium*, a place where four ways meet, neut. of *quadrivius*, having four ways: see *quadrivious*. Cf. *trivium*.] The collective name of the four branches of mathematics according to the Pythagoreans—arithmetic (treating of number in itself), music (treating of applied number), geometry (treating of stationary number), and astronomy (treating of number in motion). This Pythagorean quadrivium, preceded by the trivium of grammar, logic, and rhetoric, made up the seven liberal arts taught in the schools of the Roman empire.

quadrivoltine (kwod-ri-vol'tin), *n.* [< L. *quattuor* (*quadri-*), = E. *four*, + It. *volta*, turn, time, + *-ine*[2].] A silkworm which yields four crops of cocoons a year.

quadroon (kwod-rön'), *n.* [An alteration (simulating words in *quadri-*, *quadru-*) of *quarteroon*, < Sp. *cuarteron*, a quadroon, one who is one fourth black; also, a fourth part; < *cuarto*, a fourth: see *quart*[1], *quarter*[1].] The offspring of a mulatto and a white person; a person having one fourth African blood.

quadro-quadro-quartic (kwod″rō-kwod″rō-kwâr'tik), *n.* [< *quadric* + *quadric* + *quartic*.] A non-plane curve formed by the intersection of two quadric surfaces.

quadroxid, quadroxide (kwod-rok'sid, -sid or -sīd), *n.* [< L. *quattuor* (*quadri-*, *quadr-*), = E. *four*, + *oxid*, *oxide*.] In *chem.*, a compound of four equivalents of oxygen and one of another element, or a simple oxid containing four atoms of oxygen.

quadrum (kwod'rum), *n.* [L., square, anything square in form, neut. of (LL.) *quadrus*, four-cornered, square: see *quadra*[1], *quadrate*.] In *music*, same as *natural*, 7.

quadruman, quadrumane (kwod'rö-man, -mān), *n.* [< F. *quadrumane*, < NL. *quadrumanus*, four-handed: see *quadrumanous*.] A four-handed quadruped; an animal capable of using all four feet as hands; specifically, a member of the *Quadrumana*.

Quadrumana (kwod-rö'ma-na), *n. pl.* [NL., neut. pl. of *quadrumanus*, four-handed: see *quadrumanous*.] An order of *Mammalia* named by Blumenbach in 1791, including all kinds of apes, monkeys, and lemurs; the quadrumanous mammals: so called because their hind as well as fore feet can be used as hands. The term is scarcely used now, being superseded by *Primates*; but *Primates* includes both the *Bimana* (man alone) and the *Quadrumana* of the earlier systems. When the name was in vogue the *Quadrumana* were usually divided into *Catarrhini*, Old World apes and monkeys; *Platyrrhini*, New World monkeys; and *Strepsirrhini*, lemurs.

quadrumanous (kwod-rö'ma-nus), *a.* [< NL. *quadrumanus*, four-handed, < L. *quattuor* (*quadru-*), = E. *four*, + *manus*, hand: see *main*[3].] Four-handed; having all four feet fitted for use as hands: said of mammals, as opossums, etc.; specifically, of or pertaining to the *Quadrumana*. Also *quadrimanous*.

The strongly convex upper lip frequently seen among the lower classes of the Irish is a modified *quadrumanous* character. *E. D. Cope*, Origin of the Fittest, p. 291.

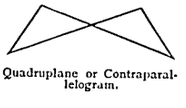
quadruped (kwod'rö-ped), *a.* and *n.* [= F. *quadrupède* = Pr. *quadrupedi* = Sp. *cuadrúpede*, *cuadrúpedo* = Pg. *quadrupede* = It. *quadrupede*, *quadrupedo*, < L. *quadrupes*, *quadripes* (*-ped-*), having four feet, a four-footed creature, < *quattuor* (*quadru-*), = E. *four*, + *pes* (*ped-*) = E. *foot*.] **I.** *a.* Four-footed; having four limbs fitted for sustaining the body and for progression; habitually going on all fours: opposed to *aliped* and *biped*: correlated with *quadrumanous* and *pedimanous*: chiefly said of mammals, but also of four-footed reptiles, as lizards and tortoises. Compare *quadrumanous*.

II. *n.* A four-footed or quadruped animal: especially, a four-footed mammal, as distinguished from a *biped*, as man or a bird.

quadrupedal (kwod'rö-ped-al), *a.* and *n.* [= OF. *quadrupedal* = Sp. *cuadrupedal* = Pg. *quadrupedal*; as *quadruped* + *-al*.] **I.** *a.* Quadruped or four-footed; especially, going on all fours, or adapted or restricted to that mode of progression: as, the *quadrupedal* shape; *quadrupedal* locomotion.

II.† *n.* A quadruped. [Rare.]

The coldest of any *quadrupedal*.
Howell, Parly of Beasts, p. 11.



quadrupedated (kwod'rö-pe-dā-ted), *a.* [< *quadruped* + *-ate*[1] + *-ed*[2].] Made or become four-footed or like a beast; turned into a quadruped. [Rare.]

Deformed and luxate with the prosecution of vanities; *quadrupedated* with an earthly, stooping, grovelling covetousness. *Rev. T. Adams*, Works, I. 399.

quadrupedism (kwod'rö-ped-izm), *n.* [< *quadruped* + *-ism*.] The state of being a quadruped; the condition of being four-footed, as a beast. [Rare.]

Among the Mahometans . . . *quadrupedism* is not considered an obstacle to a certain kind of canonisation.
Southey, The Doctor, cxcix. (*Davies.*)

quadruplane (kwod'rö-plān), *n.* [< L. *quattuor* (*quadru-*), = E. *four*, + *planum*, a plane: see *plane*[1].] A plane quadrilateral having its opposite or alternate sides equal and one pair of these crossing each other.

Quadruplane or Contraparallelogram.

quadruple (kwod'rö-pl), *a.* and *n.* [< F. *quadruple* = Sp. *cuádruplo* = Pg. It. *quadruplo*, < L. *quadruplus*, fourfold, *quadruplum*, a fourfold quantity, < *quattuor* (*quadru-*), = E. *four*, + *-plus*, -fold: see *-fold*.] **I.** *a.* Fourfold; four times told.

A law that to bridle theft doth punish thieves with a *quadruple* restitution hath an end which will continue as long as the world itself continueth.
Hooker, Eccles. Polity, iii. 10.

A *quadruple* Jacquard, or four separate Jacquards fixed in one frame. *A. Barlow*, Weaving, p. 275.

Quadruple counterpoint, in *music*, counterpoint in which four melodies are so contrived as to be mutually usable above or below one another by transposition. Twenty-four different dispositions of such melodies are possible. Compare *double* and *triple counterpoint* (which see, under *counterpoint*[2], 3).—**Quadruple crown,** a size of printing-paper, 30 × 40 inches. [Eng.]—**Quadruple demy,** a size of printing-paper, 35 × 45 inches. [Eng.]—**Quadruple foolscap,** a size of printing-paper, 27 × 34 inches. [Eng.]—**Quadruple medium,** a size of printing-paper, 38 × 48 inches. [Eng.]—**Quadruple post,** a size of printing-paper, 32 × 40 inches. [Eng.]—**Quadruple pot,** a size of printing-paper, 26 × 32 inches. [Eng.]—**Quadruple quaver,** in *musical notation*, same as *hemidemisemiquaver*.—**Quadruple ratio.** See *ratio*.—**Quadruple rhythm** or **time,** in *music*, rhythm or time characterized by four beats or pulses to the measure. See *rhythm*.—**Quadruple royal,** a size of printing-paper, 40 × 50 inches. [Eng.]

II. *n.* A number, sum, etc., four times as great as that taken as the standard: as, to receive the *quadruple* of a given sum.

quadruple (kwod'rö-pl), *v.*; pret. and pp. *quadrupled*, ppr. *quadrupling*. [< F. *quadrupler*, < LL. *quadruplare*, make fourfold, < L. *quadruplus*, fourfold: see *quadruple*, *a.*] **I.** *trans.* To make four times as much or as many; multiply by four; repeat four times; make, do, or cause to happen four times over.

The trade of Scotland has been more than *quadrupled* since the first erection of the two publick banks.
Adam Smith, Wealth of Nations, ii. 2.

II. *intrans.* To become four times as much or as many; repeat itself four times.

quadruplet (kwod'rö-plet), *n.* [< *quadruple* + *-et*.] 1. Any combination of four objects or parts grouped, united, or acting together: as, a *quadruplet* of springs, consisting of four elliptic springs coupled together and acting as one spring. Also called *quartet*.—2. One of four born at a single birth.—3. A bicycle for four riders.

quadruplex (kwod'rö-pleks), *a.* and *n.* [< L. *quadruplex*, fourfold, < *quattuor* (*quadru-*), = E. *four*, + *plicare*, fold: see *plicate*.] **I.** *a.* Fourfold: applied to a system of telegraphy in which four messages may be transmitted simultaneously over one wire.

II. *n.* An instrument by means of which four messages may be transmitted simultaneously over one wire.

Sometimes abbreviated *quad*.

quadruplex (kwod'rö-pleks), *v. t.* [< *quadruplex*, *n.*] To make quadruplex; arrange for fourfold transmission.

If the line is already duplexed, the phonophore will *quadruplex* it. *Elect. Rev.* (Amer.), XIV. 6.

quadruplicate (kwod-rö'pli-kāt), *v. t.*; pret. and pp. *quadruplicated*, ppr. *quadruplicating*. [< L. *quadruplicatus*, pp. of *quadruplicare* (> OF. *quadrupler*, *quadrupliquer*), make fourfold, < *quadruplex*, fourfold: see *quadruplex*.] To make fourfold; double twice.

quadruplicate (kwod-rö'pli-kāt), *a.* and *n.* [Also *quadriplicate*; < L. *quadruplicatus*, make fourfold: see the verb.] **I.** *a.* Fourfold; four times repeated: as, a *quadruplicate* ratio or proportion. Also *quadriplicated*.

II. *n.* One of four things corresponding in all respects to one another, or to a common original.

quadruplication (kwod-rö-pli-kā'shon), *n.* [= F. *quadruplication* = Sp. *cuadruplicacion* = Pg. *quadruplicação* = It. *quadruplicazione*, < LL. *quadruplicatio*(*n-*), a making fourfold, < L. *quadruplicare*, make fourfold: see *quadruplicate*.] The act of making fourfold; a taking of four times the simple sum or amount.

quadruplicature (kwod-rö'pli-kā-tūr), *n.* [< *quadruplicate* + *-ure*.] The act of quadruplicating; also, that which is fourfold—that is, folded twice, so as to make four layers: correlated with *duplicature*: as, the great omentum is a *quadruplicature* of peritoneum.

quadruplicity (kwod-rö-plis'i-ti), *n.* [< ML. *quadruplicita*(*t-*)*s*, the character of being fourfold, < L. *quadruplex*, fourfold: see *quadruplex*.] The character of being quadruplex.

This *quadruplicity*, these elements,
From whom each body takes his existence.
Times' Whistle (E. E. T. S.), p. 117.

quadruply (kwod'rō-pli), *adv.* In a quadruple or fourfold degree; to a fourfold extent or amount.

If the person accused makes his innocence plainly to appear upon his trial, the accuser is immediately put to . . . death; and out of his goods or lands the innocent person is *quadruply* recompensed.
Swift, Gulliver's Travels, i. 6.

quære (kwē'rē), *n.* [L., impv. of *quærere*, seek, seek to learn, question; as a noun, in accom. E. spelling, *query:* see *query*.] Same as *query*.

quæsitum (kwē-sī'tum), *n.*; pl. *quæsita* (-tą). [L., neut. of *quæsitus*, pp. of *quærere*, seek, ask: see *quest*[1].] Something sought or required.

A thesis which an argument supposes to be in question is called *quæsitum;* and opposed to that is a thesis from which the argument proceeds—a thesis necessarily connected with the argument, but not in question: such a thesis is called a datum. *Westminster Rev.*, CXXVIII. 747.

quæsta (kwes'tą), *n.*; pl. *quæstæ* (-tē). [ML., fem. of L. *quæsitus*, pp. of *quærere*, seek, obtain: see *quest*[1].] In the middle ages, one of a class of indulgences or remissions of penance which were granted by the Pope to those who contributed certain specified sums of money to the church.

quail[3] (kwāl), *n.* [Early mod. E. also *quayle*, Sc. *quailzie;* < ME. *quaille, quayle, qwayle*, < OF. *quaille*, F. *caille* = Pr. *calha* = OSp. *coalla* = It. *quaglia*, < ML. *quaquila*, also *quaquara, quaquadra, quisquila* (also, after OF., etc., *qualia*), < MD. *quakele, quackel*, D. *kwakkel* (MD. also *quartel*, D. *kwartel*) = MLG. *quackele*, LG. *quackel*, a quail; so called in reference to its cry, < MD. *quacken*, D. *kwaken* = MLG. *quaken*, quack: see *quack*[1].] 1. A small gallinaceous bird of the Old World, related to the partridge, and belonging to the genus *Coturnix*. The common Messina or migratory quail of Europe and Africa is *C. communis* or *C. dactylisonans*, highly esteemed for the table.

Common Migratory or Messina Quail of Europe (*Coturnix communis*).

The bill is much smaller and weaker than in the partridge, and the nasal fossæ are mostly feathered. The wings are pointed by the first, second, and third quills; the first is emarginate on the inner web; the tail is very short, soft, and slight, not half as long as the wing. The feet are small, with the tarsus shorter than the middle toe and claw, and slightly feathered above. The length of the bird is about 7 inches. The plumage is much variegated, the most conspicuous markings being sharp lance-linear stripes, whitish or buff, over most of the upper parts. This quail has several times been imported into the United States, but has failed thus far to become naturalized. There are many other quails of the same genus in various parts of the Old World, but none are indigenous to the New.

2. One of the various small gallinaceous birds more or less closely resembling the quail proper: loosely applied, with or without a qualifying term, especially in the United States, to all the species of *Ortyx* or *Colinus, Lophortyx, Oreortyx, Callipepla, Cyrtonyx*, and other genera of American *Orlygimæ* or *Odontophorinæ*.

Bob-white, or Common Quail of America (*Ortyx virginiana*).

Among such, the species of bob-white, as *Ortyx virginiana*, the common partridge or quail of sportsmen, are the nearest to the Old World species of *Coturnix*. In the United States, wherever the ruffed grouse, *Bonasa umbella*, is called *pheasant*, the bob-white is called *partridge:* where that grouse is called *partridge*, the bob-white is known as *quail*. See also cuts under *Callipepla, Cyrtonyx, Lophortyx*, and *Oreortyx*.

If we must borrow a name from any Old World birds for our species of Ortyx, Lophortyx, Callipepla, etc., the term "*quail*" is rather more appropriate than "partridge." *Coues*, Key to N. A. Birds, p. 596.

3†. A prostitute. Also called *plover*. [Low.]

Here's Agamemnon—an honest fellow enough, and one that loves *quails*. *Shak.*, T. and C., v. 1. 57.

It may be laid down as a general rule, though subject to considerable *qualifications* and exceptions, that history begins in novel and ends in essay. *Macaulay*, History.

But, all *qualifications* being made, it is undeniable that there is a certain specialization of the nervous discharge, giving some distinctiveness to the bodily changes by which each feeling is accompanied.
H. Spencer, Prin. of Psychol., § 495.

6†. Appeasement; pacification.

Out of that will I cause these of Cyprus to mutiny; whose *qualification* shall come into no true taste again but by the displanting of Cassio *Shak.*, Othello, II. 1. 282.

Property qualification, the holding of a certain amount of property as a condition to the right of suffrage or the exercise of some other public function. This condition in the case of suffrage has been common in ancient and modern times, and still prevails to a considerable extent in Europe. In the United States it has disappeared in the different States the last one, Rhode Island, having abolished it (with a few exceptions) in 1888. In many States a small property qualification is a condition of service as a juror.

qualificative (kwol'i-fi-kā-tiv), *a.* and *n.* [= F. *qualificatif* = Pg. *qualificativo*; < NL. *qualificativus*, < ML. *qualificare*, qualify: see *qualify*.] I. *a.* Serving to qualify or modify, or having the power to do so; qualifying.

Divinely. *Harper's Mag.*, LXXVIII. 184.

quality (kwol'i-ti), *n.*; pl. *qualities* (-tiz). [< OF. *qualite*, F. *qualité* = Sp. *cualidad*, *calidad* = Pg. *qualidade* = It. *qualità*, < L. *qualita(t-)s*, property, nature, state, quality (Cicero, tr. Gr. ποιοτης), < *qualis*, interrog., of what kind, of what sort; rel., of such a kind, of such sort, such as, as; indef., having some quality or other; < *quis*, fem. abl. *quā*, who, what: see *who*.] 1. That from which anything can be said to be such or such; a character expressible by an adjective admitting degrees of comparison, but not explicitly relative nor quantitative: thus, blueness, hardness, agility, and mirthfulness are *qualities*. The precise meaning of the word is governed by its prominence in Aristotelian philosophy, which formed part of a liberal education till near the end of the seventeenth century, though the modified doctrine of Ramus was taught at Cambridge. Aristotle makes quality one of his categories, or highest genera, and thereby distinguishes it absolutely from substance, quantity, and relation, as well as from place, time, action, passion, habit, and posture. A quality is further said by Aristotle to be something which has a contrary, which admits of degree, and which is a respect in which things agree and also differ. But no writers, not even Aristotle himself, have strictly observed these distinctions; and Cicero, much followed by the Ramists, uses the word quite loosely. *Quality* has, however, always been opposed to *quantity*; and few writers call the universal attributes of matter or those of mind *qualities*.

There is somewhat contrarie unto *qualitie*, as vertue is contrarie unto vice, wit unto folie, manhode unto cowardise. The thing conteinyng or receivyng any *qualitie* maie be saied to receive either more or less. As one man is thoughte to be wiser then another, not that wisdome it self is either greater or lesse, but that it maie bee in some manne more and in some manne lesse. By *qualitie* things are compted either like or unlike. Those things are like whiche are of like *qualitie* and have proprieties bothe accordingly. *Wilson*, Rule of Reason (1551).

Our good or evil estate after death dependeth most upon the *quality* of our lives. *Hooker*, Eccles. Polity, v. 46.

Every sin, the oftener it is committed, the more it acquireth in the *quality* of evil.
Sir T. Browne, Religio Medici, i. 42.

Qualities do as well seem to belong to natural bodies generally considered as place, time, motion, and those other things. *Boyle*, Origin of Forms, Pref.

The power to produce any idea in our mind, I call *quality* of the subject wherein that power is.
Locke, Human Understanding, II. viii. 8.

The three *qualities* which are usually said to distinguish atom from atom are shape, order, and position.
W. Wallace, Epicureanism, p. 174.

2. One of those characters of a person or thing which make it good or bad; a moral disposition or habit. This use of the word, which comes from Aristotle, was much more common and varied down to the end of the eighteenth century than now. Good characters were called *qualities* more often than bad ones.

All the *qualities* that man
Loves woman for. *Shak.*, Cymbeline, v. 5. 166.

You must now speak Sir John Falstaff fair;
Which swims against your stream of *quality*.
Shak., 2 Hen. IV., v. 2. 34.

To-night we'll wander through the streets, and note
The *qualities* of people. *Shak.*, A. and C., i. 1. 51.

As we do in our *quality* much want.
Shak., T. G. of V., iv. 1. 58.

I am weary of this trade of fortune-telling, and mean to give all over when I come into England; for it is a very ticklish *quality*.
Fletcher (and another), Fair Maid of the Inn, v. 2.

Kneeling is the sinner's posture; if thou come hither in the *quality* of a sinner, . . . put thyself into the posture of a sinner, kneel. *Donne*, Sermons, vii.

The saints would often leave their cells,
And stroll about, but hide their *quality*,
To try good people's hospitality.
Swift, Baucis and Philemon.

A marriage, at the Halifax parish church, between John Bateman, of Hipperholme, in that parish, and a Margaret Aldersleye (no address or *quality* given).
N. and Q., 6th ser., X. 189.

7. Persons of the same calling or fraternity. [Rare.]

To thy strong bidding task
Ariel and all his *quality*. *Shak.*, Tempest, i. 2. 193.

8. Nobility or gentry, either abstractly (as, persons of *quality*) or concretely (as, the *quality*). But the former is obsolescent, the latter obsolete or now vulgar.

Gentlemen of blood and *quality*.
Shak., Hen. V., iv. 8. 95

Two or three great silver flagons, made with inscriptions as gifts of the King to such and such persons of *quality* as did stay in town the late great plague, for the keeping things in order in the town. *Pepys*, Diary, III. 120.

A nymph of *quality* admires our knight;
He marries, bows at Court, and grows polite.
Pope, Moral Essays, iii. 385.

9†. Character in respect to dryness or moisture, heat or cold, these being the elemental qualities from which it was supposed other properties, especially those of drugs and the temperaments, were compounded.

The burning *quality*
Of that fell poison. *Shak.*, K. John, v. 7. 8.

10†. Cause; occasion: an incorrect use.

My brother Troilus lodges there to-night:
Rouse him and give him note of our approach,
With the whole *quality* wherefore.
Shak., T. and C., iv. 1. 44.

11. In *logic:* (*a*) The character of a proposition as affirmative or negative. [This use comes from Appuleius, a Latin writer of the second century.]

How is a simple proposition divided according to *qualitie?* Into an affirmative and negative proposition.
Blundeville, Arte of Logicke, III. i.

(*b*) The character of apprehension as clear and distinct or obscure and confused. [This use is due to Kant.]

In relation to their subject, that is, to the mind itself, they [concepts] are considered as standing in a higher or a lower degree of consciousness — they are more or less clear, more or less distinct; this . . . is called their *quality*. *Sir W. Hamilton*, Logic, viii.

Accidental quality, a quality not distinguishing one species from another, but such that its subject might lose it without ceasing to be the same kind of substance.—**Active, alterative, or alterant quality**, a quality by force of which a body acts: thus, heat is an *active quality* of fire.—**Affective quality.** Same as *affection*, 6.—**Categories of quality.** See *category*.—**Contingent quality**, a derivative quality not necessarily involved in any primitive quality.—**Contrariety of quality.** See *contrariety*.—**Corporeal quality**, a natural quality of a kind of substance.—**Cosmical quality**, a quality of a body dependent upon the presence of some unperceived thing, as its color upon the presence of the luminiferous ether.—**Elemental** or **first quality** (tr. Gr. πρωτη διαφορη), one of the four qualities, hot and cold, moist and dry, which, according to Aristotle, distinguish the four elements, earth being dry and somewhat cold, water cold and somewhat moist, air moist and somewhat hot, fire hot and somewhat dry. Of these qualities, hot and cold are active, moist and dry passive. The hot segregates different kinds of substance, the cold brings them together; the moist has no definite boundary of its own, but readily receives one; the dry has its own boundary, and does not easily receive another. The effort of the Aristotelians constantly was to account for the properties of compound bodies by these first qualities, and this was especially done by physicians in regard to drugs.—**Essential quality**, a quality the essential difference of some species.—**Imputed quality†.** See *impute*.—**Intentional quality**, a character the predication of which states a fact, but not the true mode of existence of that fact: thus, it is a fact that the celestial bodies are accelerated toward one another; but, if action at a distance be not admitted, attraction is an *intentional quality*.—**Logical quality.** See def. 10, above.

Manifest, occult, original qualities. See the adjectives.—**Mechanical quality**, a quality explicable upon the principles of mechanics.—**Patible quality†** (tr. Gr. ποιοτης παθητικη), one that directly affects one of the senses.—**Predicamental quality**, quality in the strict sense, in which it is one of the ten predicaments or categories of Aristotle.—**Primary quality**, one of the mathematical characters of bodies, not strictly a quality, and not the object of any single sense exclusively. Locke enumerates these as solidity, extension, figure, motion or rest, and number.—**Primitive quality**, a quality which cannot be conceived to be a result of other qualities.—**Quality of a sound.** See *timbre*.—**Quality of estate**, in *law*, the manner in which the enjoyment of an estate is to be exercised while the right of enjoyment continues.—**Real quality.** (*a*) A quality really existing in a body, and not intentional. (*b*) A quality really existing in a body, and not imputed.—**Secondary quality.** (*a*) A patible quality. (*b*) A derivative quality.—**Secundo-primary quality**, a character which in being known as it affects us is ipso facto known as it exists, as hardness.—**Sensible** or **sensile quality.** Same as *patible quality*.—**Tactile quality.** (*a*) A quality known by the touch. (*b*) A patible quality.—**The quality**, persons of high rank, collectively. [Now vulgar.]

I shall appear at the next masquerade dressed up in my feathers and plumage like an Indian prince, that *the quality* may see how pretty they will look in their travelling habits. *Addison*, Guardian, No. 112.

The quality, as the upper classes in rural districts are designated by the lower.
Trollope, Barchester Towers, xxxv.

=Syn. 1 and 2. *Quality, Property, Attribute, Accident, Characteristic, Character, Affection, Predicate, Mark, Difference, Diathesis, Determination.* *Quality* is that which makes or helps to make a person or thing such as he or it is. It is not universal, and in one popular sense it implies an excellence or a defect. In popular speech a *quality* is intellectual or moral; in metaphysics it may be also physical. A *property* is that which is viewed as peculiarly one's own, a peculiar quality. An *attribute* is a high and lofty character: the *attributes* of God are natural as omniscience, omnipotence, etc., and moral, as holiness, justice, mercy, etc. "*Accident* is an abbreviated expression for accidental or contingent quality." (*Sir W. Hamilton*, Metaph., vi.) *Characteristic* is not a term of logic or philosophy; it stands for a personal, peculiar, or distinguishing quality: as, yellow in skin, horn, milk, etc., is a *characteristic* of Guernsey cattle. *Characteristics* may be mental, moral, or physical. *Character* is the most general of these words; a *character* is anything which is true of a subject. In another sense *character* (as a collective term) is the sum of the characteristics of a person or thing, especially the moral characteristics. The word always views them as making a unit

or whole, and has lower and higher uses. The other words are somewhat technical. *Affection* is used in various senses. *Predicate* and *mark* are very general words in logic. *Difference* is a character distinguishing one class of objects from others. *Diathesis*, the corresponding Greek form, is applied in medicine to peculiarities of constitution. *Determination* is a more recent philosophical term denoting a character in general.

It would be felt as indecorous to speak of the *qualities* of God, and as ridiculous to speak of the *attributes* of matter. *Sir W. Hamilton*, Metaph., vi.

Property is correctly a synonym for peculiar *quality*; but it is frequently used as co extensive with *quality* in general. *Sir W. Hamilton*, Metaph., vi.

We have no direct cognizance of what may be called the substantive existence of the body, only of its *accidents*. *J. H. Newman*, Parochial Sermons, I. 273.

Affability is a general *characteristic* of the Egyptians of all classes. *E. W. Lane*, Modern Egyptians, I. 261.

To judge human *character*, a man may sometimes have very small experience, provided he has a very large heart. *Bulwer*, What will he Do with It? v. 4.

quality-binding (kwol'i-ti-bīn″ding), *n.* A kind of worsted tape used for binding the borders of carpets and similar work. *Simmonds.*

quallet, *n.* A Middle English form of *whale*[1].

qualm (kwäm), *n.* [Also dial. *calm*; < ME. *qualm*, *quelm*, pestilence, death, < AS. *cwealm*, death, slaughter, murder, destruction, plague, pestilence (= OS. *qualm*, death, destruction, = D. *kwalm*, suffocating vapor, smoke, = OHG. *qualm*, *chwalm*, MHG. *qualm*, *twalm*, slaughter, destruction, G. *qualm*, suffocating vapor, vapor, steam, damp, smoke, nausea, = Sw. *qvalm*, suffocating air, sultriness, = Dan. *kvalm*, suffocating air, *kvalme*, nausea), < *cwelan*, die, whence *cwellan*, cause to die, kill: see *quail*[1], and cf. *quale*[1] and *quell*.] 1†. Illness; disease; pestilence; plague.

A thousand slain, and not of *qualme* ystarve. *Chaucer*, Knight's Tale, l. 1156.

2. A sudden attack of illness; a turn of faintness or suffering; a throe or throb of pain.

Some sudden *qualm* hath struck me at the heart,
And dimm'd mine eyes. *Shak.*, 2 Hen. VI., I. 1. 54.

3. Especially, a sudden fit or seizure of sickness at the stomach; a sensation of nausea.

Falstaff. How now, Mistress Doll!
Hostess. Sick of a *calm*. *Shak.*, 2 Hen. IV., ii. 4. 40.

For who without a *qualm* hath ever look'd
On holy garbage, though by Homer cook'd?
Roscommon, Translated Verse.

4. A scruple or twinge of conscience; compunction; uneasiness.

Some seek, when queasy conscience has its *qualms*,
To lull the painful malady with alms.
Cowper, Charity l. 147.

5†. The boding cry of a raven.

As ravenes *qualm*, or schrychynge of thise owlis.
Chaucer, Troilus, v. 382.

qualm (kwäm), *v. i.* [< *qualm*, *n.*] 1. To be sick; suffer from qualms. [Rare.]

Above the rest,
Let Jesse's sov'reign flow'r perfume my *qualming* breast.
Quarles, Emblems, v. 2.

2. To cause pain or qualms.

Solicitude discomposes the head, jealousy the heart; envy *qualms* on his bowels, prodigality on his purse.
Gentleman Instructed, p. 560. (*Davies.*)

qualmiret (kwal'mīr), *n.* [A var. of *quavemire*, appar. simulating *quail*[1], *qualm*.] Same as *quagmire*.

Whosoeuer seketh it in ani other place, and goeth about to set it out of men's puddels and *qualmires*, and not out of the most pure and cleare fountaine itselfe
Bp. Gardiner, True Obedience, fol. 9.

qualmish (kwä'mish), *a.* [< *qualm* + *-ish*[1].] 1. Sick at the stomach; inclined to vomit; affected with nausea or sickly languor.

I am *qualmish* at the smell of leek.
Shak., Hen. V., v. 1. 22.

2. Uneasy.

Elizabeth was not desirous of peace. She was *qualmish* at the very suggestion. *Motley*, Hist. Netherlands, I. 521.

qualmishly (kwä'mish-li), *adv.* In a qualmish manner.

qualmishness (kwä'mish-nes), *n.* The state of being qualmish; nausea.

quamash (kwa-mash'), *n.* Same as *camass*.

quamash-rat (kwa-mash'rat), *n.* Same as *camass-rat*.

quamoclit (kwam'ō-klit), *n.* [Mex.] 1. The cypress-vine, *Ipomœa Quamoclit*.—2. [*cap.*] [NL.] A section of the genus *Ipomœa*, including the cypress-vine, formerly regarded as a genus.

quam proxime (kwam prok'si-mē). [L.: *quam*, as; *proxime*, most nearly, < *proximus*, nearest: see *proxime*.] As near as may be; nearly.

quandang (kwan'dang), *n.* [Australian.] A small Australian tree, *Fusanus acuminatus*, or its fruit. The latter, called *native peach*, is said to be almost the only Australian fruit relished by Europeans. The kernel of the seed (quandang-nut) as well as the pulp is edible. Also *quandong* and *quantong*.

quandary (kwon'dą-ri or kwon-dā'ri), *n.*; pl. *quandaries* (-riz). [Origin unknown; perhaps a dial. corruption (simulating a word of L. origin with suffix *-ary*) of dial. *wandreth*, evil, plight, peril, adversity, difficulty: see *wandreth*. The change of initial *w-* to *wh-* (hw-) occurs in some dialectal forms, e. g. in *whant*, a frequently heard pron. of *want* (as, I don't *whant* it). Medial *w* often suffers dialectal change to *qu* (as in *squete* for *sweet*), and instances of the change of *wh-* to *qu-* are numerous (Sc. *qua*, *quha*, for *who*, *quhar* for *where*, etc.). The notion that *quandary* comes from F. *qu'en dirai-je*, 'what shall I say of it,' is absurd.] A state of difficulty or perplexity; a state of uncertainty, hesitation, or puzzlement; a pickle; a predicament.

I leave you to judge . . . in what a *quandaric* . . . Pharicles was brought. *Greene*, Mamillia.

That much I fear forsaking of my diet
Will bring me presently to that *quandary*
I shall bid all adieu.
Beau. and Fl., Knight of Burning Pestle, i. 1.

We are in a great *quandary* what to do.
Pepys, Diary, I. 245.

quandary (kwon'dą-ri or kwon-dā'ri), *v.*; pret. and pp. *quandaried*, ppr. *quandarying*. [< *quandary*, *n.*] I. *trans.* To put into a quandary; bring into a state of uncertainty or difficulty.

Methinks I am *quandary'd*, like one going with a party to discover the enemy's camp, but had lost his guide upon the mountains. *Otway*, Soldier's Fortune, iii.

II. *intrans.* To be in a difficulty or uncertainty; hesitate.

He *quandaries* whether to go forward to God, or, with Demas, to turn back to the world.
Rev. T. Adams, Works, I. 505. (*Davies.*)

quandy (kwan'di), *n.*; pl. *quandies* (-diz). [Origin obscure.] A duck, the oldwife or southsoutherly, *Harelda glacialis*. See cut under *Harelda*. [Massachusetts.]

quannet (kwan'et), *n.* [Origin obscure.] 1. A kind of file, used especially for scraping zinc plates for the process denominated anastatic printing. *Ure.*—2. A flat file set in a frame like a plane, used in the manufacture of combs.

Tortoise shell handles . . . are smoothed with a float or single cut file, technically known as a *quannet*.
O. Byrne, Artisan's Handbook, p. 410.

quanon, *n.* Same as *kanun*.

quant (kwant), *n.* [Also *quont*; < ME. *quante*, *whante*, a pole, stick, rod; cf. *kent*[1].] 1. A walking-stick. [Prov. Eng.]—2. A pushing-pole with a flat board or cap at one end to prevent it from sinking into the mud, used by bargemen; also, a jumping-pole, similarly fitted, used in marshes. The name is also given to the cap. [Prov. Eng.]

quanta, *n.* Plural of *quantum*.

quantativet (kwon'tą-tiv), *a.* Same as *quantitative*.

The notions of quantity, and of the two most simple differences of *quantative* things rarity and density.
Sir K. Digby, Treatise of Bodies (1644), iv.

quantic (kwon'tik), *n.* [< L. *quantus*, how great, how much (see *quantity*), + *-ic*.] In *math.*, a rational integral homogeneous function of two or more variables. Quantics are classified according to their dimensions, as *quadric*, *cubic*, *quartic*, *quintic*, etc., denoting quantics of the second, third, fourth, fifth, etc., degrees. They are further distinguished as *binary*, *ternary*, *quaternary*, etc., according as they contain two, three, four, etc., variables. The word was introduced by Cayley in 1854.—**Order of a quantic**, the degree of a quantic.—**The equation of a quantic**. See *equation*.

quantical (kwon'ti-kal), *a.* Relating to quantics.

quantification (kwon″ti-fi-kā'shon), *n.* [< NL. as if **quantificatio(n-)*, < **quantificare*, quantify: see *quantify*.] 1. The act of attaching quantity to anything: as, the *quantification* of the predicate.—2. The act of determining the quantity.—**Quantification of the predicate**, the attaching of the signs of logical quantity, *every* and *some*, to the predicates of propositions. The resulting propositional forms, according to Hamilton, the protagonist of the opinion that this should be done in formal logic, are: All A is all B; any A is not any B; all A is some B; any A is not some B; some A is all B; some A is not any B; some A is some B; some A is not some B. But these forms include but one decidedly useful addition to the usual scheme (all A is all B), and are systematic only in appearance, as De Morgan has abundantly shown. The doctrine essentially implies that the copula should be considered as a sign of identity; the usual doctrine makes it a sign of inclusion. According to the most modern school of formal logicians, the question is not of great importance, but should be decided against the quantification of the predicate. Aristotle examined and rejected the quantification of the predicate, on the ground that Every A is every B can be true only if A and B are one individual.

The doctrine of the *quantification of the predicate*, set forth in 1827 by Mr. George Bentham, and again set forth under a numerical form by Professor De Morgan, is a doctrine supplementary to that of Aristotle.
H. Spencer, Study of Sociol., p. 223.

quantify (kwon'ti-fī), *v. t.*; pret. and pp. *quantified*, ppr. *quantifying*. [< NL. **quantificare*, < L. *quantus*, how much, how many, + *-ficare*, < *facere*, make: see *quantity* and *-fy*.] To determine the quantity of; modify or determine with regard to quantity; mark with the sign of quantity: as, to *quantify* a syllable or a verse: more especially a term in logic.—**Quantified proposition**. See *proposition*.

quantitative (kwon'ti-tā-tiv), *a.* [= F. *quantitatif* = Pr. *quantitatiu* = Sp. *cuantitativo* = Pg. It. *quantitativo*, < ML. *quantitativus* (Abelard), < L. *quantita(t-)s*, quantity: see *quantity*.] Relating or having regard to quantity or measurement.

If the thing may be greater or less, . . . then *quantitative* notions enter, and the science must be Mathematical in nature. *Jevons*, Pol. Econ., Int., p. 8.

Perhaps the best *quantitative* verses in our language . . . are to be found in Mother Goose, composed by nurses wholly by ear and beating time as they danced the baby on their knee. *Lowell*, Study Windows, p. 266.

The logic of probability is related to ordinary syllogistic as the *quantitative* to the qualitative branch of the same science. *C. S. Peirce*, Theory of Probable Inference.

Quantitative analysis, in *chem.* See *analysis*.—**Quantitative atrophy.** Same as *simple atrophy*.—**Quantitative feet**, **meters.** See *accentual feet*, under *accentual*.—**Quantitative geometry.** Same as *metric geometry* (which see, under *geometry*).—**Quantitative logic**, the doctrine of probability.

quantitatively (kwon'ti-tā-tiv-li), *adv.* In a quantitative manner; with regard to quantity.

quantitativeness (kwon'ti-tā-tiv-nes), *n.* The state or condition of being quantitative.

In Geology, in Biology, in Psychology, most of the previsions are qualitative only; and where they are quantitative their *quantitativeness*, never quite definite, is mostly very indefinite. *H. Spencer*, Study of Sociol., p. 45.

quantitivet (kwon'ti-tiv), *a.* Same as *quantitative*. [Rare.]

Compounding and dividing bodies according to *quantitive* parts. *Sir K. Digby*, Man's Soul, iii.

quantitively (kwon'ti-tiv-li), *adv.* So as to be measured by quantity; quantitatively.

quantity (kwon'ti-ti), *n.*; pl. *quantities* (-tiz). [< ME. *quantitee*, *quantite*, < OF. *quantite*, F. *quantité* = Sp. *cantidad* = Pg. *quantidade* = It. *quantità*, < L. *quantita(t-)s*, relative greatness or extent (tr. Gr. *ποσότης*), < *quantus*, how much, how many, < *quam*, how, in what manner, < *qui*, who, = E. *who*: see *who*, *what*, *how*[1].] 1. The being so much in measure or extent; technically, the intrinsic mode by virtue of which a thing is more or less than another; a system of relationship by virtue of which one thing is said to be more or less than another; magnitude.

Thy zodiak of thin Astralabie is shapen as a compass wich that contieneth a large brede, as aftur the *quantite* of thin astralable. *Chaucer*, Astrolabe, I. 21.

Quantity and number differ only in thought (ratione) from that which has quantity and is numbered.
Descartes, Prin. of Philos. (tr. by Veitch), ii. § 8.

The science of number is founded on the hypothesis of the distinctness of things; the science of *quantity* is founded on the totally different hypothesis of continuity.
W. K. Clifford, Lectures, I. 337.

2. In the concrete, an object regarded as more or less; a quantum; any amount, magnitude, or aggregate, in a concrete sense: as, a *quantity* of water: sometimes erroneously used to denote that which should be enumerated rather than measured: as, a *quantity* of people.

Any perfectly regular system of objects whose relations are definable in advance, and capable of construction in the imagination, forms a system of quantity capable of being dealt with by mathematical reasoning. The quantities of the mathematician, being constructed according to a definition laid down in advance, are imaginary, and in that sense abstract; but as being objects of the imagination, and not merely of the discursive reason, they are concrete. Mathematical quantities are either discrete (as whole numbers) or continuous. They may also be multiple, as vectors.

Thei don rightfulle Juggementes in every cause, bothe of riche and pore, smale and grete, aftre the *quantytee* of the trespas that is mys don. *Mandeville*, Travels, p. 287.

Forty thousand brothers
Could not, with all their *quantity* of love,
Make up my sum. *Shak.*, Hamlet, v. 1. 293.

There is a farre greater *quantity* of buildings in this [Exchange] then in ours. *Coryat*, Crudities, I. 212.

Where the ground is seen burning continually about the *quantity* of an acre. *Purchas*, Pilgrimage, p. 19.

Heat, considered with respect to its power of warming things and changing their state, is a *quantity* strictly capable of measurement, and not subject to any variations in quality or in kind. *Clerk Maxwell*, Heat, p. 57.

3. A large or considerable amount.

Warm antiscorbutical plants taken in *quantities* will occasion stinking breath. *Arbuthnot*, Aliments, vi. 7, § 2.

4†. A piece or part, especially a small portion; anything very little or diminutive.

Away, thou rag, thou *quantity*, thou remnant.
Shak., T. of the S., iv. 3. 112.

5†. Proportion; correspondent degree.

Things base and vile, holding no *quantity*,
Love can transpose to form and dignity.
Shak., M. N. D., i. 1. 232.

6. In *anc. orthoëpy, pros.*, and *metrics*, the relative time occupied in uttering a vowel or a syllable; that characteristic of a vowel or a syllable by which it is distinguished as long or short; syllabic measure or time; prosodic length. In ancient Greek and Latin pronunciation a long vowel or syllable occupied nearly, or in deliberate enunciation fully, twice the time of a short vowel or syllable, and the grammarians accordingly assumed the average short vowel or syllable as the prosodic unit (mora), and taught that a long vowel or syllable was equal to two short ones. Some vowels or syllables varied in time between these two limits and were called *common*, admitting of metrical use as either longs or shorts. In certain situations (elision, ecthlipsis) vowels were much shorter in pronunciation than the average short, and, although audible, were disregarded in metrical measurement. A syllable was long either by nature or by position (see *long*[1], *a.*, 5 (*a*)). In the English pronunciation of Latin and Greek, quantity in the proper sense is entirely disregarded, except in so far as the length of the penult affects the accent according to the Latin rule; and English writers use the phrase *false quantity* for a false accentuation. Thus, to pronounce *vec-ti-gal* *rec-ti-gal* is called a "false quantity," but to pronounce the *a* alike in *pater* and *mater* is not so designated.

All composed in a metre for Catullus,
All in *quantity*, careful of my motion.
Tennyson, Experiments, Hendecasyllabics.

7. In *logic*, that respect in which universal and particular propositions differ. See *proposition*, and *logical quantity*, below.—**8.** In *elect.*, the amount of electricity which passes through any section of a circuit in a unit of time: more exactly termed the *strength of the current*. A battery is arranged for quantity when the positive poles of all the cells are connected and all the negative poles are connected, so that the current is the maximum when the external resistance is small.—**Absolute quantity**, quantity considered as belonging to an object in itself, without reference to any other.—**Auxiliary quantity.** See *auxiliary*.—**Broken quantity**, discrete quantity.—**Categorical quantity†**, that accident which has parts outside of one another; the quantity of which Aristotle treats in his book of the Categories.—**Categories of quantity.** See *category*, 1.—**Commensurable quantities**, quantities having a common measure.—**Complex quantity**, a multiple quantity, or one which requires two or more numbers to state it; especially, an imaginary quantity of the form $A + Bi$, where $i^2 = -1$.—**Compound quantity.** See *compound*[1].—**Constant quantities**, in *math.*, a quantity which remains invariably the same while others increase or decrease; a quantity which, though it may be indeterminate, is not studied in reference to its progressive variation.—**Continuous or continued quantity**, a system of concatenated quantity which includes the limit of every convergent series of quantities it contains. See *continuity*, 2.—**Corporeal quantity**, quantity of space or spatial extension, as length, area, volume, etc.—**Definite quantity**, in *logic*, the quantification of a proposition in a more definite way than by the distinction of "some" and "all." There are various systems of definite quantity.—**Dimensive quantity.** Same as *corporeal quantity*.—**Discrete quantity**, quantity proceeding by discrete steps, belonging to a system such that its quantities are susceptible of being connected, one to one, with the whole or a part of the series of whole numbers. The system of ordinal numbers is the most familiar example of discrete quantity; another example is the system of ordinary vulgar fractions.—**Dissimilar quantities**, quantities such that no one is a real multiple of another.—**Dual quantity**, a system of quantity having only two values in any one direction, as in the Boolian algebra.—**Elliptic quantity**, a system of quantity (as the quantity of angles) in which there are no real infinite distances, but in which any quantity on being sufficiently increased returns into itself: so called because the ellipse has no real point at infinity.—**Extensive quantity.** See *extensive*.—**External or extrinsic quantity.** See *external*.—**Flowing quantity.** See *flowing*.—**Heterogeneous quantities.** See *heterogeneous*.—**Hyperbolic quantity**, a system of quantity containing such quantities that there are, in some directions at least, two different absolute limits, generally $+\infty$ and $-\infty$. Thus, if it were the property of a yardstick to shorten on receding from a fixed center, this might happen according to such a law that no finite number of layings down of the yardstick could carry the measurement beyond two limits in every, or in some, directions. Points lying beyond these, if such there were, would be at imaginary distances. Such measurement would make a system of hyperbolic quantity.—**Imaginary quantity.** See *imaginary*.—**Impossible quantity.** Same as *imaginary quantity*.—**Improper quantity.** Same as *intensive quantity*. Reid defines *improper quantity* as that which cannot be measured by its own kind—that is, everything not extension, duration, number, nor proportion.—**Incommensurable quantities.** See *incommensurable*.—**Indeterminate quantity.** See *indeterminate*.—**Inference of transposed quantity.** See *inference*.—**Infinite quantity**, a quantity infinitely greater than every measurable quantity. See *infinite*.—**Infinitesimal quantity**, a quantity infinitely less than every measurable quantity. See *infinitesimal*, *n.*—**Intensive quantity.** See *intensive*.—**Internal quantity.** See *internal*.—**Intrinsic quantity**, the older name of *intensive quantity*.—**Irrational quantity**, a quantity not expressible by any whole number or fraction, but usually by means of a square or higher root of a rational quantity; in Euclid, however, by an irrational quantity is meant one incommensurable with the unit of the same kind. In this phrase, *irrational* [tr. Gr. ἄλογος] means 'inexpressible'; it does not mean 'absurd,' though these quantities are called *surds*.—**Like quantities**, quantities one of which multiplied by a scalar quantity gives the other.—**Limited quantity**, a system of quantities all finite, and having an absolute maximum and minimum in every direction.—**Logical quantity**, that character by virtue of which one term contains or is contained by another, and that in three senses: (*a*) *Quantity of extension*, or logical breadth, a relative character of a term such that when it is in excess the term is predicable of all the subjects of which another is predicable, and of more besides; or a relative character of a concept such that when it is in excess the concept is applicable in all the cases in which another is applicable. (*b*) *Quantity of comprehension* or *intension*, or logical depth, a relative character of a term such that when it is in excess the term has all the predicates of another term, and more besides; or a relative character of a proposition such that when it is in excess the proposition is followed by all the consequents of another proposition, and more besides. (*c*) *Quantity of science* (Aquinas) or *of information*, a relative character of a concept such that when it is in excess it has all the subjects and predicates of another concept, and more besides, owing to its being in a mind which has more knowledge. *Logical quantity* is to be distinguished from the *quantity of a proposition*.—**Mathematical quantities.** See *mathematical*.—**Measurable quantity**, a system of quantities every one of which can be stated to any desired degree of approximation by the sums of numerical multiples and submultiples of a finite number of units; a system of quantities embracing only finite quantities together with certain isolated infinities.—**Measure of a quantity.** See *measure*.—**Multiple quantity**, a quantity which can be exactly expressed only by means of two or more numbers, as a geographical position.—**Natural quantity**, quantity in a sense more concrete than the mathematical; quantity as joined to sensible matter, as when we speak of two different but equal quantities of water or lead.—**Negative quantity**, a fictitious quantity in mathematics, in most cases inconceivable, but never involving any logical contradiction in itself, supposed to belong to a line of quantity continuing the line of ordinary or positive quantity below zero for an infinite distance. In many cases a negative quantity has an interpretation: thus, the negative of a dollar owned is a dollar owed, the negative of a temperature above zero is the same degree of temperature below zero, etc.—**Numeral quantity**, number.—**Parabolic quantity**, a quantity belonging to such a system of quantity that on increasing through infinity it immediately reappears on the negative side of zero. Such are Cartesian coördinates in ordinary geometry.—**Permanent quantity.** See *permanent*.—**Physical quantity**, any character in nature susceptible of more or less, such as velocity, atomic weight, elasticity, heat, electric strength of current, etc.—**Positive quantity.** See *positive*.—**Predicamental quantity.** See *predicamental*.—**Proper quantity.** Same as *extensive quantity*.—**Propositional quantity**, the quantity of a proposition in logic. See *logical quantity*, above.—**Protensive quantity**, duration in time.—**Quantity of action**, the line-integral of the momentum.—**Quantity of an eclipse.** See *eclipse*.—**Quantity of curvature**, the reciprocal of the radius of curvature.—**Quantity of electricity**, in *electrostatics*, the amount of electricity upon a charged body. It depends upon the capacity of the body, which, in the case of a sphere, is proportional to the radius (see *capacity*), and upon the potential of the electricity. It is numerically equal to the product of these two factors. In electrodynamics it is measured (in coulombs) by the amount of electricity furnished by a current in one second.—**Quantity of estate**, in *law*, the time during which the right of enjoyment of the property in question is to continue.—**Quantity of heat.** See *heat*, 2.—**Quantity of magnetism**, the strength of a magnetic pole; the force it exerts upon an equal pole at the unit distance.—**Quantity of matter**, the mass, as measured by weighing in a balance.—**Quantity of motion.** See *motion*.—**Quesitive quantity**, quantity expressed by an interrogative numeral.—**Radical quantities.** See *radical*.—**Rational quantity**, a quantity expressible by a whole number or fraction multiplied by the unit of the same kind; in Euclid, a commensurable quantity.—**Real quantity**, that kind of quantity which extends from zero to infinity, and from infinity through the whole series of negative values to zero again.—**Reciprocal of a quantity.** See *reciprocal*.—**Reciprocal quantities.** See *reciprocal*.—**Scalar quantity**, the ratio between two quantities of the same kind; a real number. This is the definition of Hamilton, but subsequent writers sometimes include imaginaries among scalars.—**Semi-infinite quantity**, a system of quantity which is limited at one end and extends to infinity in the other.—**Similar quantities**, quantities of the same kind whose ratios are numbers.—**Sophistic quantity**, an imaginary quantity.—**Superinfinite quantity**, a system of quantity which extends through infinity into a new region. Hyperbolic quantity is a special kind of superinfinite quantity in which there are only two regions.—**Syncategorematic quantity**, quantity as expressed by a syncategorematic word, or generally by any word not a noun.—**Terminal quantity**, in *logic*, the quantity of a term, as opposed to the quantity of a proposition.—**Transcendental quantity**, intensive quantity as opposed to predicamental quantity: so called because different from the quantity treated by Aristotle under the category of quantity.—**Transposed quantity**, logical quantity transposed from one subject in the premise to another in the conclusion.—**Unidimensional quantity**, a system of quantities all of the same kind, otherwise called *simple quantity*.—**Unlike quantities**, quantities which have not a numerical ratio between them.—**Unlimited quantity**, a system of quantities such that, any two A and B being given, a third C exists such that B lies between A and C; a system of quantity which has no absolute maximum nor minimum in any direction.—**Unreal quantity**, an imaginary quantity.—**Variable quantity**, a quantity whose progressive changes are under consideration.—**Vector quantity**, the quantity which belongs to a right line considered as having direction as well as length, but which is equal for all parallel lines of equal length; any quantity capable of representation by a directed right line, without considering its position in space; a quantity whose square is a negative scalar.—**Virtual quantity.** Same as *intensive quantity*.

quantity-culture (kwon'ti-ti-kul″tūr), *n.* See the quotation.

Quantity-culture . . . means a culture, whether pure or not, where a great quantity or bulk of bacteria are growing. *Hueppe*, Bacteriological Investigations (trans.), p. 5.

W. Browne, Britannia's Pastorals.

quar[2]†, *n.* An obsolete form of *quarry*[3].

When the Falcon (stooping thunder-like)
With sudden souse her [a duck] to the ground shall strike,
And, with the stroak, make on the sense-less ground
The gut-less *Quar* once, twice, or thrice rebound.
Sylvester, tr. of Du Bartas's Weeks, ii., The Lawe.

quar[3] (kwär), *v. i.* [Origin uncertain.] To coagulate: said of milk in the female breast. *Halliwell.* [Prov. Eng.]

[Garden mint] is very good to be applied to the breastes that are stretched forth and swollen and full of milke, for it slaketh and softeneth the same, and keepeth the mylke from *quarring* and crudding in the brest.
Lyte, Dodoens, p. 246 (quoted in Cath. Ang., p. 84).

quarantinable (kwor'an-tēn-a-bl), *a.* [< *quarantine* + *-able*.] Admitting of quarantine; amenable to or controlled by quarantine.

quarantine (kwor'an-tēn), *n.* [Formerly also *quarantain*, *quarantaine*, also *carentane* (Lent); = D. *quarantaine*, *karanteine* = G. *quarantäne* = Sw. *karantän* = Dan. *karantæne* (< F.) = Sp. *cuarentena* = Pg. *quarentena* = Pr. *quarantena*, *carantena*, < OF. *quarantaine*, *quarentaine*, *quarantine*, F. *quarantaine* = Turk. *karantina*, < It. *quarantina*, *quarentina*, *quarantana*, *quarentana*, a number of forty, a period of forty days, esp. such a period of forty days, more or less, for the detention and observation of goods and persons suspected of infection, < ML. *quarantena*, *quarentena* (after Rom.), a period of forty days, Lent, quarantine, also a measure of forty rods (see *quarentene*), < L. *quadraginta* (> It. *quaranta* = F. *quarante*), forty, = E. *forty*: see *forty*.] 1. A period of forty days. Specifically — (*a*) The season of Lent. (*b*) In *law*, a period of forty days during which the widow of a man dying seized of land at common law may remain in her husband's chief mansion-house, and during which time her dower is to be assigned. (*c*) See def. 2.

2. A term, originally of forty days, but now of varying length according to the exigencies of the case, during which a ship arriving in port and known or suspected to be infected with a malignant contagious disease is obliged to forbear all intercourse with the place where she arrives. The United States first adopted a quarantine law in February, 1799. This law required federal officers to assist in executing State or municipal quarantine regulations. On April 29th, 1878, a national quarantine law was enacted, authorizing the establishment in certain contingencies of national quarantines.

To perform their *quarantine* (for thirty days, as Sir Rd. Browne expressed it in the order of the Council, contrary to the import of the word, though in the general acceptation it signifies now the thing, not the time spent in doing it) *Pepys*, Diary, Nov. 26, 1663.

We came into the port of Argostoli on the twenty second, and went to the town; I desired to be ashoar as one performing *quarantain*.
Pococke, Description of the East, II. ii. 170

3. The enforced isolation of individuals and certain objects coming, whether by sea or by land, from a place where dangerous communicable disease is presumably or actually present, with a view to limiting the spread of the malady. *Quain.* — 4. Hence, by extension: (*a*) The isolation of any person suffering or convalescing from acute contagious disease. [Colloq.] (*b*) The isolation of a dwelling or of a town or district in which a contagious disease exists.

It was . . . a relief when neighbours no longer considered the house in *quarantine* [after typhus].
George Eliot, Middlemarch, xxvii.

Shak., Hen. VIII., ii. 3. 14.

Double quarrel, *eccles.*, a complaint of a clerk to the archbishop against an inferior ordinary, for delay of justice.

No *double quarrel* shall hereafter be granted out of any of the archbishop's courts at the suit of any minister whosoever, except he shall first take his personal oath that the said eight-and-twenty days at the least are expired, etc. *95th Canon of the Church of England* (1603).

To pick a quarrel. See *pick*[1]. — **To take up a quarrel†**, to compose or adjust a quarrel; settle a dispute.

I knew when seven justices could not *take up a quarrel*, but when the parties were met themselves, one of them thought but of an If, . . . and they shook hands.
Shak., As you Like it, v. 4. 104.

=Syn. 5 and 6. *Quarrel*, *Altercation*, *Affray*, *Fray*, *Mêlée*, *Brawl*, *Broil*, *Scuffle*, *Wrangle*, *Squabble*, *Feud*. A *quarrel* is a matter of ill feeling and hard words in view of supposed wrong: it stops just short of blows; any use beyond this is now figurative. *Altercation* is the spoken part of a quarrel, the parties speaking alternately. An *altercation* is thus a quarrelsome dispute between two persons or two sides. *Affray* and *fray* express a quarrel that has come to blows in a public place: they are often used of the struggles of war, implying personal activity. *Mêlée* emphasizes the confusion in which those engaged in an affray or struggle are mingled. *Brawl* emphasizes the unbecoming character and noisiness of the quarrel; while *broil* adds the idea of entanglement, perhaps with several: two are enough for a *brawl*; at least three are needed for a *broil*: as, a *brawl* with a neighbor; a neighborhood *broil*. A *scuffle* is, in this connection, a confused or undignified struggle, at close quarters, between two, to throw each other down, or a similar struggle of many. A *wrangle* is a severe, unreasoning, and noisy, perhaps confused, altercation. A *squabble* is a petty wrangle, but is even less dignified or irrational. A *feud* is a deeply rooted animosity between two sets of kindred, two parties, or possibly two persons. See *animosity*.

quarrel[1] (kwor'el), *v.*; pret. and pp. *quarreled* or *quarrelled*, ppr. *quarreling* or *quarrelling*. [Early mod. E. also *quarel*, *querel*; < OF. *querceler*, *quereller*, complain, complain of, accuse, sue, claim, F. *quereller*, quarrel with, scold, refl. have a quarrel, quarrel, = Pr. *querellar* = Sp. *querellar*, complain, lament, bewail, complain of, = Pg. *querelar*, complain, = It. *querelare*, complain of, accuse, indict, refl. complain, lament, < L. *querelari*, make a complaint, ML. *querelare*, complain, complain of, accuse, < L. *querela*, complaint, quarrel: see *quarrel*[1], *n.*] I. *intrans.* 1. Sir Gawayne and the Green Knight (E. E. T. S.), l. 1324.

2. A beast of the chase when pursued or slain; any creature hunted by men or by beasts or birds of prey, especially after it has been killed.

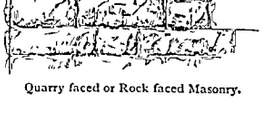
I watch'd his eye,
And saw how falcon-like it tower'd, and flew
Upon the wealthy *quarry*.
Fletcher (*and another*), False One, iv. 1.

As a falcon from the rocky height
Her *quarry* seen, impetuous at the sight,
Forth-springing instant, darts herself from high,
Shoots on the wing, and skims along the sky.
Pope, Iliad, xiii. 92.

3. Hunted or slaughtered game, or any object of eager pursuit.

And let me use my sword, I'ld make a *quarry*
With thousands of these quarter'd slaves.
Shak., Cor., i. 1. 202.

quarry[3]† (kwor'i), *v.* [< *quarry*[3], *n.*] **I.** *intrans.* To prey, as a vulture or harpy.



Like the vulture that is day and night *quarrying* upon Prometheus's liver. *Sir R. L'Estrange.*

II. *trans.* To provide with prey.

Now I am bravely *quarried*. *Beau. and Fl.*

A soldier of renown, and the first provost
That ever let our Roman eagles fly
On swarthy Ægypt, *quarried* with her spoils.
B. Jonson, Poetaster, v. 1.

quarry-faced (kwor'i-fāst), *a.* Rough faced, as taken from the quarry: noting a type of building-stone and masonry built of such stone.

Quarry faced or Rock faced Masonry.

n. An old entered and reclaimed hawk. *Halliwell.*

quarrying-machine (kwor'i-ing-ma-shēn'), *n.* A form of gang-drill for cutting channels in native rock; a rock-drill. Such machines are usually combined in construction with the motor which operates them, and are placed on a railway-track for convenience in moving them along the surface of the stone to be cut.

quarryman (kwor'i-man), *n.*; pl. *quarrymen* (-men). [< *quarry*[2] + *man*.] A man who is occupied in quarrying stones.

quarry-slave (kwor'i-slāv), *n.* A slave compelled to work in a quarry.

Thou go not, like the *quarry slave* at night,
Scourged to his dungeon. *Bryant*, Thanatopsis.

quarry-water (kwor'i-wâ''tėr), *n.* The water which is mechanically held between the particles of a newly quarried rock, and which gradually disappears by evaporation when this is kept from exposure to the weather. A part of this water only disappears after the rock has been heated to the boiling-point, and this is usually called *hygroscopic moisture*. The quantity of quarry-water held by rocks varies greatly in amount, according to their composition and texture. Some rocks which are so soft that they can be cut with a saw or chisel when freshly quarried become much harder after exposure to the air for a few weeks.

The longer the stone [limestone] has been exposed to the air, the less fuel will be consumed in driving off its inherent moisture, or *quarry-water*.
Spons' Encyc. Manuf., I. 619.

quart[1] (kwârt), *n.* [< ME. *quarte*, < OF. *quarte*, F. *quarte*, f., < L. *quarta* (sc. *pars*), a fourth part; cf. OF. *quart*, F. *quart*, m., = Sp. *cuarto* = Pg. *quarto* = It. *quarto*, fourth, a fourth part, quarter; < L. *quartus*, fourth (= E. *fourth*), appar. for **quatuartus*, with ordinal (superl.) formative *-tus* (E. *-th*), < *quattuor* = E. *four*: see *four*, and compare *quadrate*, *quarter*[1], etc.] **1†.** A fourth part or division; a quarter.

And Camber did possesse the Western *quart*.
Spenser, F. Q., II. x. 14.

2. A unit of measure, the fourth part of a gallon; also, a vessel of that capacity. Every gallon of liquid measure has a quart, and in the United States there is a quart of dry measure, although the use of the gallon of that measure is confined to Great Britain. In England the peck, or fourth part of a bushel, is sometimes called a *quart*.

1 United States liquid quart	= 0.9463 liter.
1 United States dry quart	= 1.1017 liters.
1 imperial quart	= 1.1359 liters.
1 Scotch quart	= 3.393 liters.

Before the adoption of the metric system, there were measures of capacity corresponding to the quart in almost every part of Europe.

Go fetch me a *quart* of sack; put a toast in 't.
Shak., M. W. of W., iii. 5. 3.

Yet would you . . . rail upon the hostess, . . .
Because she brought stone jugs and no seal'd *quarts*.
Shak., T. of the S., Ind., ii. 89.

Glass bottles of all qualities I buys at three for a halfpenny, . . . but very seldom indeed 2*d.*, unless it's something very prime and big like the old *quarts*.
Mayhew, London Labour and London Poor, II. 122.

3. In *music*, the interval of a fourth: prefixed to the name of an instrument, it denotes one pitched a fourth lower or a fourth higher than the ordinary instrument.

A succession of parallel *quarts*, quints, and octaves, which would be intolerable to modern ears.
The Academy, Jan. 18, 1890, p. 51.

4. In Gloucestershire and Leicestershire, England, three pounds of butter; in the Isle of Man, seven pounds—that is, the fourth part of a quarter.—**5.** A Welsh measure of length or surface; a pole of 3½ to 4½ yards.

quart[2] (kärt), *n.* [< F. *quarte*, a sequence of four cards at piquet, also a position in fencing; particular uses of *quarte*, a fourth: see *quart*[1].] **1.** In *card-playing*, a sequence of four cards. A *quart major* is a sequence of the highest four cards in any suit.

If the elder hand has *quart major* and two other Aces, the odds are only 5 to 4 against his taking in either the Ten to his *quart*, or another Ace.
The American Hoyle, p. 136.

2. One of the eight thrusts and parries in fencing. A thrust in quart is a thrust, with the nails upward, at the upper breast, which is given direct from the ordinary position taken by two fencers when they engage, the left of their foils touching. A parry in quart guards this blow. It is produced by carrying the hand a few inches to the left without lowering hand or point.—**Quart and tierce**, practice between fencers, one thrusting in quart and tierce (see *tierce*) alternately, and the other parrying in the same positions. It is confounded with *tirer au mur* (fencing at the wall), which is simply practice for the legs, hand, and eyes against a stationary mark, usually a plastron hung on the wall.

The assassin stab of time was parried by the *quart and tierce* of art. *Smollett*, tr. of Gil Blas, iv. 7.

How subtle at *tierce and quart* of mind with mind!
Tennyson, In Memoriam, W. G. Ward.

quart[3]†, *a.* [ME. *quart*, *quarte*, *qwarte*, *quert*, *qwert*, *whert*; origin obscure.] Safe; sound; in good health. *Prompt. Parv.*, p. 420.

quart[3]†, *n.* [ME. *quart*, *qwart*, *querte*; < *quart*[3], *a.*] Safety; health.

And liftith us up in-to heuene-riche.
Hymns to Virgin, etc. (E. E. T. S.), p. 23.

quartan (kwâr'tan), *a.* and *n.* [Early mod. E. also *quartain*; < ME. *quarteyne*, < OF. *quartaine*, F. *quartaine* = Pr. *quartana*, *cartana* = Sp. *cuartana* = Pg. *quartão* = It. *quartana*, < L. *quartana* (sc. *febris*), quartan fever, fem. of *quartanus*, of or pertaining to the fourth, < *quartus*, fourth: see *quart*[1].] **1.** *a.* Having to do with the fourth; especially, occurring every fourth day: as, a *quartan* ague or fever (one which recurs on the fourth day—that is, after three days).

The *quartan*-fever, shrinking every limb,
Sets me a-capering straight.
Ford, Perkin Warbeck, iii. 2.

The sins shall return periodically, like the revolutions of a *quartan* ague. *Jer. Taylor*, Works (ed. 1835), I. 104.

II. *n.* **1.** An intermitting ague that occurs every fourth day, both days of consecutive occurrence being counted, as on Sunday, Wednesday, Saturday, Tuesday, etc.

After you felt your selfe deliuered of your *quartaine*.
Guevara, Letters (tr. by Hellowes, 1577), p. 13.

The *quarteyn* is gendrid of myche haboundaunce of malencolye that is corrumpid withinne the body.
Booke of Quinte Essence (ed. Furnivall), p. 20.

2. A measure containing the fourth part of some other measure.

quartaner†, *n.* [ME. *quartenare*, < ML. *quartenarius*, < *quartana*, the quartan: see *quartan*.] One who has the quartan.

quartation (kwâr-tā'shon), *n.* [< L. *quartus*, fourth (see *quart*[1]), + *-ation*.] The parting of gold and silver by the use of nitric acid. It is so called because an alloy consisting of more than one part of gold to three parts of silver is very little affected by the acid; hence it is necessary, in the case of alloys very rich in gold, to fuse them with so much additional silver that the gold shall form not more than a fourth of the whole.

In that operation that refiners call *quartation*, which they employ to purify gold, three parts of silver are so exquisitely mingled by fusion with a fourth part of gold (whence the operation is denominated) that the resulting mass acquires several new qualities by virtue of the composition. *Boyle*, Works, I. 504.

quart d'écu† (kär dā-kü'). [F.] An old French coin: same as *cardecu*.

Sir, for a *quart-d'écu* he will sell the fee-simple of his salvation. *Shak.*, All's Well, iv. 3. 311.

quarte (kärt), *n.* [F., lit. a fourth part: see *quart*[1], *quart*[2].] Same as *quart*[2].

quarter[1] (kwâr'tėr), *n.* [< ME. *quarter*, *quartere*, dial. *wharter*, quarter (= D. *kwartier* = G. *quartier* = Sw. *quarter* = Dan. *kvarteer*, quarter), < OF. *quartier*, *quarter*, *cartier*, a fourth part, quarter, as of mutton, etc., = Sp. *cuartel* = Pg. *quartel* = It. *quartiero*, *quartiere*, quarter, < L. *quartarius*, a fourth part of any measure, esp. of a sextarius, a quarter, quartern, ML. *quartarius*, also neut. *quartarium*, also (after Rom.) *quarterius*, *quarterium*, a quarter, etc., < L. *quartus*, fourth: see *quart*[1]. Cf. *quarter*[2].] **1.** One of four equal or equivalent parts into which anything is or may be divided; a fourth part or portion; one of four equal or corresponding divisions.

I have a kinsman not past three *quarters* of a mile hence.
Shak., W. T., iv. 3. 85.

Specifically—(*a*) The fourth part of a yard or of an ell.

The stuarde in honde schalle haue a stafe,
A fyngur gret, two *wharters* long,
To reule the men of court ymong.

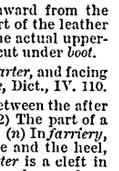
(*d*) The fourth part of an hour.

Sin' your true love was at your yates,
It's but twa *quarters* past.
The Drowned Lovers (Child's Ballads, II. 170).

He always is here as the clock 's going five—
Where is he? . . . Ah, it is chiming the *quarter!*
F. Locker, The Old Government Clerk.

(*e*) In *astron.*, the fourth part of the moon's period or monthly revolution: as, the first *quarter* after the change or full. (*f*) One of the four parts into which the horizon is supposed to be divided; one of the four cardinal points: as, the four *quarters* of the globe; but, more widely, any region or point of the compass: as, from what *quarter* does the wind blow? people thronged in from all *quarters*; hence, indefinitely, any direction or source: as, my information comes from a high *quarter*.

Upon Elam will I bring the four winds from the four *quarters* of heaven. Jer. xlix. 36.



I own I was hurt to hear it, as I indeed was to learn, from the same *quarter*, that your guardian, Sir Peter, and Lady Teazle have not agreed lately as well as could be wished. *Sheridan*, School for Scandal, i. 1.

(*g*) In *nav.*, the fourth part of the distance from one point on the compass-card to another, being the fourth of 11° 15'—that is, about 2° 49'. Also called *quarter-point*. Evelyn, Diary, May 1, 1657.

They would not adventure to bring them to us, but *quartered* them in another house, though in the same town. *R. Knox* (Arber's Eng. Garner, I. 344).

5†. To diet; feed.

Scrimansky was his cousin-german,
With whom he served, and fed on vermin;
And when these fail'd, he'd suck his claws,
And *quarter* himself upon his paws.
S. Butler, Hudibras, I. ii. 268.

6. To furnish as portion; deal out; allot; share.

But this isle,
The greatest and the best of all the main,
He *quarters* to his blue-hair'd deities.
Milton, Comus, l. 29.

When the queen frown'd, or smil'd, he knows . . .
Whose place is *quarter'd* out, three parts in four.
Pope, Satires of Donne, iv. 136.

7. In *her.*, to bear quarterly upon one's escutcheon: thus, a man *quarters* the arms of his father with those of his mother, if she has been an heiress. The verb *to quarter* is used even when more than two coats of arms are united upon one escutcheon, and when, therefore, more than four compartments appear. See *quartering*, 4.

Slen. They [the Shallow family] may give the dozen white luces in their coat; . . . I may *quarter*, coz.
Shal. You may, by marrying.
Shak., M. W. of W., i. 1. 23.

quarter-round (kwâr'tėr-round), *n.* 1. In *arch.*, a molding whose contour is exactly or approximately a quadrant: same as *ovolo*.

> In the *quarter round* of the cornish without there are spouts carved with a lip and flowers that do not project.
> *Pococke*, Description of the East, II. i. 100.

2. Any tool adapted for forming quarter-rounds, as an ovolo-plane.—**Quarter-round tool**, a chisel adapted for cutting concave or convex moldings.

quarter-saver (kwâr'tėr-sā′vėr), *n.* A device attached to a knitting-machine to prevent the work from running off if the yarn breaks or runs out.

quarter-sawed (kwâr'tėr-sâd), *a.* Same as *quartered*, 4.

quarter-seal (kwâr'tėr-sēl), *n.* The seal kept by the director of the Chancery of Scotland. It is in the shape and impression of the fourth part of the great seal, and is in the Scotch statutes called the *testimonial of the great seal*. Gifts of lands from the crown pass this seal in certain cases. *Bell.*

quarter-section (kwâr'tėr-sek″shon), *n.* In the United States Government Land Survey, a square tract of land containing 160 acres, and constituting one fourth of a section.

quarter-sessions (kwâr'tėr-sesh″onz), *n. pl.* 1. A criminal court held quarterly in England by justices of the peace in counties (in Ireland by county-court judges), and by the recorder in boroughs, and having jurisdiction of minor offenses and administration of highway laws, poor-laws, etc. In several of the United States a somewhat similar court is known by this name.

> A great broad shoulder'd genial Englishman, . . .
> A *quarter-sessions* chairman, abler none.
> *Tennyson*, Princess, Conclusion.

2. In Scotland, a court held by the justices of the peace four times a year at the county towns, and having power to review sentences pronounced at the special and petty sessions. Abbreviated *Q. S.*

quarter-sling (kwâr'tėr-sling), *n.* One of the supports for a yard on either side of its center.

quarter-square (kwâr'tėr-skwār), *n.* The fourth part of the square of a number. Tables of quarter-squares are sometimes used to replace logarithms, on account of the property that ¼ $(x+y)^2 + ¼ (x-y)^2 = xy$.

quarter-staff (kwâr'tėr-stâf), *n.*; pl. *quarter-staves* (-stāvz). An old English weapon formed of a stout pole about 6½ feet long. It was grasped by one hand in the middle, and by the other between the middle and the end. In the attack the latter hand shifted from one quarter of the staff to the other, giving the weapon a rapid circular motion, which brought the ends on the adversary at unexpected points.

> A stout frere I met,
> And a *quarter-staffe* in his hande.
> *Playe of Robyn Hode* (Child's Ballads, V. 420).

Quarter-staff Dr. Johnson explains to be "A staff of defence, so called, I believe, from the manner of using it; one hand being placed at the middle, and the other equally between the end and the middle."
Strutt, Sports and Pastimes, p. 357.

> The two champions, being alike armed with *quarter-staves*, stepped forward. . . . The miller, . . . holding his *quarter-staff* by the middle, and making it flourish round his head, . . . exclaimed boastfully, "Come on, churl, an thou darest!"
> *Scott*, Ivanhoe, xl.

quarter-stanchion (kwâr'tėr-stan″shon), *n.* *Naut.*, a strong stanchion in the quarters of a square-sterned vessel, one such stanchion forming the extreme boundary of the stern on each side.

quarter-stuff (kwâr'tėr-stuf), *n.* Plank one fourth of an inch in thickness. *E. H. Knight.*

quarter-tackle (kwâr'tėr-tak″l), *n.* A purchase sometimes used on the quarter of a lower yard to hoist boats, etc.

quarter-timber (kwâr'tėr-tim″bėr), *n.* 1. *Naut.*, one of the framing-timbers in a ship's quarters. See cut under *counter*.—2. In *carp.*, scantling from two to six inches deep. *E. H. Knight.*

quarter-tone (kwâr'tėr-tōn), *n.* In *musical acoustics*, an interval equivalent to one half of a semitone or half-step. The term is loosely applied to a variety of small intervals, especially to enharmonic ones.

quarter-trap (kwâr'tėr-trap), *n.* In theaters, a small trap on each side of the stage, on a line with the first entrance.

quarter-turn (kwâr'tėr-tėrn), *n.* The arc subtending an angle of 90°; a bend or change of direction at right angles.—**Quarter-turn belt, gooseneck**, etc. See *belt*, etc.

quarter-undulation (kwâr″tėr-un-dū-lā'shon), *n.* In *optics*, a quarter of a wave-length.—**Quarter-undulation plate**, a plate (as of mica) so thin as to cause in a refracted ray a retardation equal to one fourth of a wave-length. Such a plate is used in determining in the polariscope the positive or negative character of a uniaxial crystal.

quarter-vine (kwâr'tėr-vīn), *n.* An American vine, *Bignonia capreolata*. It is so called because, owing to the projection of medullary tissue in four wing-like layers from the middle to near the surface, a short section of the stem, when gently twisted in the hand, will divide into quarters. See *cross-vine*.

quarter-waiter (kwâr'tėr-wā″tėr), *n.* An officer or gentleman usher of the English court who is one of a number in attendance by turns for a quarter of a year at a time. Also called *quarterly waiter*.

> *Gentleman Usher.* "No, do as I bid thee; I should know something that have beene a *quarter-wayter* [in the queen's service] these fifteen yeares."
> *Sir J. Davies*, Dialogue, Tanner MS. 79.

quarter-watch (kwâr'tėr-woch), *n.* *Naut.*, one half of the watch on deck.

> On the whaling ground in the southern fishery, when a ship is hove to in mid-ocean, they stand *quarter-watches*, one-fourth of the working hands, or half of each watch, being on duty, headed by the boat-steerers
> *Fisheries of U. S.*, V. ii. 229.

quarter-wind (kwâr'tėr-wind), *n.* *Naut.*, a wind blowing on a vessel's quarter.

quarter-yard (kwâr'tėr-yärd), *n.* An old ale-measure. See *ale-yard* and *half-yard*.

quartet, quartette (kwâr-tet′), *n.* [< It. *quartetto*, a quartet, < L. *quartus*, fourth: see *quart*1.] 1. In *music*: (*a*) A composition or movement for four solo parts, either vocal or instrumental, usually without accompaniment. Specifically, an instrumental work, usually for four stringed instruments, written in sonata form, and planned like a small symphony; a string-quartet. The quartet is the highest variety of chamber-music. It first reached its full development at the end of the eighteenth century. (*b*) A company of four singers or players who perform quartets. A mixed vocal quartet properly consists of a soprano (treble), an alto, a tenor, and a bass. A string-quartet consists of two violins, a viola, and a violoncello. (*c*) In an orchestra the stringed instruments collectively, and in oratorio music the principal vocal soloists, are sometimes loosely called the quartet.—2. A stanza of four lines.—3. Same as *quadruplet*. *Car-Builder's Dict.*—**Double quartet.** (*a*) A composition for eight voices or instruments, especially for four violins, two violas, and two violoncellos. *Grove.* (*b*) The performers of such a composition, whether vocal or instrumental.—**Quartet choir**, a church choir consisting only of a mixed quartet, especially when made up of expert singers.

quartetto (kwâr-tet′ō), *n.* [It.] Same as *quartet*.

quartfull, quartiful, *a.* [ME. *quartyfulle, quarful*; < *quart*3 + *-ful*.] In good health; prosperous. *Cath. Ang.*

quartfulness, *n.* [ME. *quarfulnesse*; < *quartful* + *-ness*.] Prosperity. *Cath. Ang.*

quartic (kwâr'tik), *a.* and *n.* [< L. *quartus*, fourth. (see *quart*1), + *-ic*.] I. *a.* In *math.*, of the fourth degree; especially, of the fourth order.—**Quartic symmetry**, symmetry like that of a regular octagon; in general, symmetry arising from the vanishing of the cubinvariant of a quartic.

II. *n.* An algebraic function of the fourth degree; a quantic of the fourth degree.—**Bicircular quartic.** See *bicircular*.—**Ex-cubo-quartic**, a non-plane curve formed by the intersection of a quadric and a cubic surface which have, besides, two non-intersecting straight lines in common.

quartiful, *a.* See *quartfull*.

quartile (kwâr'til), *n.* [< L. *quartus*, fourth (see *quart*1), + *-ile*.] In *astrol.*, an aspect of planets when their longitudes differ by 90°. See *aspect*, 7.

> The heavens threaten us with their comets, stars, planets, with their great conjunctions, eclipses, oppositions, *quartiles*, and such unfriendly aspects.
> *Burton*, Anat. of Mel., p. 87.

> Or Mars and Venus, in a *quartil*, move
> My pangs of jealousy for Arcite's love.
> *Dryden*, Pal. and Arc., i. 500.

quartilunar (kwâr-ti-lū'nėr), *a.* [< L. *quartus*, fourth (see *quart*1), + *luna*, moon: see *lunar*.] Pertaining to or consisting of one fourth of a lunar month. [Rare.]

> Such [tidal] waves as these may follow their causes, in periodic times, not diurnally alone, as influenced by sun and moon, but in semilunar or *quartilunar* intervals.
> *Fitz Roy*, Weather Book, p. 96.

quartine (kwâr'tin), *n.* [< L. *quartus*, fourth (see *quart*1), + *-ine*1.] In *bot.*, a supposed fourth integument of some ovules, counting from the outermost. It is really only a layer of the secundine or of the nucleus.

quartinvariant (kwâr-tin-vā'ri-ant), *n.* [< L. *quartus*, fourth, + E. *invariant*.] An invariant of the fourth degree in the coefficients.

quartisection (kwâr-ti-sek'shon), *n.* [< L. *quartus*, fourth, + E. *section*.] Separation into four equal parts; quadrisection.

quartisternal (kwâr-ti-stėr'nal), *n.* [< L. *quartus*, fourth, + *sternum*, breast-bone.] In *anat.*, the fourth sterneber, counting from the manubrium backward; that bone of the sternum which is opposite the fourth intercostal space. [Rare.]

quartle (kwâr'tl), *n.* [A var. of *quarter*1.] Same as *quarter*1. *Halliwell.*

quartlet (kwârt'let), *n.* [ME. *quartelette*, < OF. **quartelet*, < *quart*, fourth: see *quart*1.] A tankard or goblet holding a quart.

> Item, ij. *quartelettes*, of dyvers sortes, weiyng xlviij. unces.
> *Paston Letters*, I. 472.

quarto (kwâr'tō), *n.* and *a.* [Short for L. (NL.) *in quarto*: L. *in*, in; *quarto*, abl. of *quartus*, fourth: see *quart*1.] I. *n.* A size of book in which the leaf is one fourth of a described or implied size of paper. The sheet folded twice in cross directions makes the square quarto, or regular quarto; folded twice in the same direction makes the long quarto. A cap quarto is 7 × 8½ inches; demy quarto, 8 × 10½ inches; folio-post quarto, 8½ × 11 inches; medium quarto, 9 × 12 inches; royal quarto, 10 × 13 inches. The leaf of a quarto is understood to have a broad and short shape. Abbreviated 4to.

> In my library there is a large copy of the Apocrypha, in what may be called elephant *quarto*, printed for T. Cadell and W. Davies, by Thomas Bensley, 1816.
> *N. and Q.*, 7th ser., IX. 356.

Broad quarto. See *broad folio*, under *broad*.—**Small quarto**, a square octavo; a book having eight leaves to a sheet but the shape of a quarto.

II. *a.* Noting the size of a book in which a sheet makes four leaves: as, a *quarto* volume; being of the size or shape of the leaves of a quarto: as, *quarto* paper; a *quarto* edition.

Quartodeciman (kwâr-tō-des'i-man), *n.* and *a.* [< ML. *quartadecimani*, pl., < L. *quarta decima* (sc. *dies lunæ*), the fourteenth (day of the moon), fem. of *quartus decimus*, fourteenth, < *quartus*, fourth, + *decimus*, tenth: see *quart*1 and *decimal*.] I. *n.* A member of one of those early Christian communities which celebrated the Paschal festival on the fourteenth day of the month Nisan (the same day as that on which the Jews celebrated their Passover), without regard to the day of the week. This practice led to great confusion and to a wide-spread controversy (the *Quartodeciman controversy*). In modern times this question has been much misunderstood, from a failure to distinguish the "Pascha" which was the anniversary of Christ's crucifixion from that which was the anniversary of his resurrection. The Quartodeciman usage was finally condemned by the Council of Nice, A. D. 325.

II. *a.* Relating to the Quartodecimans or to their practice of celebrating the Paschal feast.

> As to the origin and precise nature of the *Quartodeciman* observance, there is not yet an entire agreement.
> *G. P. Fisher*, Begin. of Christianity, p. 334.

Quartodecimani (kwâr-tō-des-i-mā'nī), *n. pl.* [See *Quartodeciman*.] The Quartodecimans.

Quartodecimanian (kwâr-tō-des-i-mā'ni-an), *n.* and *a.* [< *Quartodeciman* + *-ian*.] Same as *Quartodeciman*. Also *Quartadecimanian*.

quartole (kwâr'tōl), *n.* [< L. *quartus*, fourth: see *quart*1.] In *music*, a group of four notes to be performed in the time of three or six. Compare *decimole, quintole*, etc.

quartraint (kwâr'trān), *n.* An improper form of *quatrain*.

quartridge† (kwâr'trij), *n.* An obsolete form of *quarterage*.

quartz (kwârts), *n.* [= F. *quartz* = Sp. *cuarzo* = Pg. It. *quarzo* = D. *kwarts* = Sw. *qvarts* = Dan. *kvarts* = Russ. *kvartsŭ*, < MHG. *quarz* (pl. *querze*), G. *quarz*, rock-crystal, quartz.] The

common form of native silica, or the oxid of silicon (SiO_2). Silica is also found in nature in the minerals opal and tridymite (which see). Quartz occurs crystallized and massive, and in both states is most abundantly diffused, being one of the constituents of granite, gneiss, and many other crystalline rocks, forming quartzite and sandstone, and making up the mass of the sand of the sea-shore. When crystallized it commonly occurs in hexagonal prisms, terminated by hexagonal pyramids. It belongs, however, to the rhombohedral division of the hexagonal system, and its forms are sometimes very complex. Optically it is remarkable as exhibiting the phenomenon of circular polarization, the right- and left-handed character of the crystals optically corresponding to the arrangement of the modifying trapezohedral planes present. It scratches glass readily (hardness 7), gives fire with steel, becomes electrified by friction, and also by heating and pressure. It is infusible in the flame of the blowpipe, and insoluble in ordinary reagents except hydrofluoric acid. Its specific gravity is 2.66 when pure, and the luster vitreous or in some cases greasy to dull. The colors are various, as white or milky, gray, reddish, yellowish, or brownish, purple, blue, green. When colorless, or nearly so, and crystallized, it is known as rock-crystal (which see): here belong the 'Lake George diamonds," etc. Other distinctly crystalline varieties are the pink, called rose-quartz; the milk-white, milk-quartz; the purple or bluish-violet, amethyst; the smoky-yellow or brown, smoky quartz or Cairngorm stone, called *morion* when black or nearly so; the yellow, false topaz or citrine; the aventurin, spangled with scales of mica or hematite; sagenitic, containing acicular crystals of rutile; the cat's-eye, opalescent through the presence of asbestos fibers. The cryptocrystalline varieties are named according either to color or to structure: here belong chalcedony, agate in many forms, onyx, sardonyx, carnelian, heliotrope, prase, chrysoprase, flint, hornstone, jasper, basanite, agatized wood, etc. (see these words). The transparent varieties of quartz (amethyst, smoky quartz, etc.) are used for cheap jewelry, also when colorless for spectacles (then called *pebble*), and for optical instruments. Quartz prisms are useful in spectrum analysis, since quartz is highly transparent to the ultra-violet rays. (See *spectrum*.) Beautiful spheres of rock-crystal, sometimes several inches in diameter, occur in Japan. The massive colored kinds of quartz are much used as ornamental stones, especially the agates and agatized or fossil wood, onyx, etc. In these cases the colors are often produced or at least heightened by artificial means. Pulverized quartz is employed in making sandpaper; also when pure for glass-making, and in the manufacture of porcelain. Quartz-veins are often found in metamorphic rocks, and frequently contain rich deposits of gold; hence, in California and other gold-mining regions mining in the solid rock is commonly called *quartz-mining*, in contradistinction to *placer* and *hydraulic mining*. See cut under *geode*.—**Babel quartz**, a curious form of quartz crystals found at Beer Alston in Devonshire, England, the under surface of which shows the impression of the crystals of fluor-spar upon which the quartz was deposited. Also called *Babylonian quartz*.—**Capped quartz**, a variety of crystallized quartz occurring in Cornwall, England, embedded in compact quartz. When the matrix is broken the crystals are revealed, and a cast of their pyramidal terminations in intaglio is obtained. Another kind consists of separable layers or caps, due to successive interruptions in the growth of the crystal, with perhaps a deposition of a little clay between the layers.—**Milky quartz**. Same as *milk-quartz*.

quartz-crusher (kwârts'krush″ėr), *n.* A machine for pulverizing quartz.

quartziferous (kwârt-sif'ę-rus), *a.* [< *quartz* + *-i-ferous*.] Consisting of quartz, or chiefly of quartz; containing quartz.

quartzite (kwârt'sīt), *n.* [< *quartz* + *-ite*2.] A rock composed essentially of the mineral quartz. It is a rock of frequent occurrence, and often forms deposits of great thickness. Quartzite is rarely without a granular structure, either perceptible to the naked eye or visible with the aid of the microscope. Sometimes, however, this structure is with great difficulty perceptible. It is generally held by geologists that quartzite has resulted from the alteration of quartzose sand, pressure and the presence of siliciferous solutions having thoroughly united the grains of which the rock was originally composed. The quartzose material of which many veins are made up (material which must have been deposited from a solution) is not generally designated as quartzite, this sense being reserved for such quartz as is recognized by its stratigraphic position to have been formed from sedimentary material.

quartzitic (kwârt-sit'ik), *a.* [< *quartzite* + *-ic*.] Of or pertaining to quartzite or quartz; consisting of quartzite or quartz.

quartz-liquefier (kwârts'lik'wę-fī-ėr), *n.* An apparatus in which comminuted auriferous quartz is dissolved to liberate the gold.

quartz-mill (kwârts'mil), *n.* 1. A machine for pulverizing quartz, differing in character from the ordinary mill in which the ore is pulverized by stamping, but intended to serve the same purpose. See *stamp-mill*.—2. An establishment where auriferous quartz is stamped or in some other way reduced to a powder, and the gold separated from it by amalgamation; a stamp-mill.

quartzoid (kwârt'soid), *a.* [< *quartz* + *-oid*.] In *crystal.*, a double six-sided pyramid, represented by uniting two six-sided single pyramids base to base.

quartzose (kwârt'sōs), *a.* [< *quartz* + *-ose*.] Composed of quartz. Quartzose rocks are such as are essentially made up of the mineral quartz. Also *quartzous*.

quartz-porphyry (kwârts'pôr″fi-ri), *n.* See *porphyry*.

quartz-reef (kwârts'rēf), *n.* Same as *quartz-vein*. [Australian.]

quartz-rock (kwârts'rok), *n.* Quartzite.

quartz-sinter (kwârts'sin″tėr), *n.* Siliceous sinter.

quartz-trachyte, *n.* See *trachyte*.

quartz-vein (kwârts'vān), *n.* A deposit of quartz in the form of a vein. Most of the gold obtained from mining in the solid rock, and not by washing of detrital material, comes from veins of which the gangue is entirely or chiefly quartz; hence auriferous veins are often called *quartz-veins*, and mining for gold in the rock is called *quartz-mining*.

quartzy (kwârt'si), *a.* [< *quartz* + *-y*1.] Containing or abounding in quartz; pertaining to quartz; partaking of the nature or qualities of quartz; resembling quartz.

The iron ore is still further separated from its granitic or *quartzy* matrix by washing.
Sir George C. M. Birdwood, Indian Arts, II. 4.

quas (kwas), *n.* Same as *kvass*.

quash1 (kwosh), *v.* [< ME. *quashen, quaschen, quassen, quessen*, < OF. *quasser, casser, quassier, quesser, kaisser*, break in pieces, bruise, shatter, maltreat, destroy, F. *casser*, break, shatter, < L. *quassare*, shake or toss violently, shatter, fig. shatter, impair, weaken, freq. of *quatere*, pp. *quassus*, shake, shatter, break in pieces; whence also ult. E. *concuss, discuss, percuss, rescue*. In the fig. sense this verb (L. *quassare*) merges with F. *casser*, annul: see *quash*2.] **I.** *trans.* 1. To beat down or beat in pieces; crush.

Aboute scho whirles the whele, and whirles me undire,
Tille alle my qwarters that whille whare *qwaste* al to peces!
Morte Arthure (E. E. T. S.), l. 3390.

The whales
Against sharp rocks, like reeling vessels *quash'd*,
Though huge as mountains, are in pieces dash'd.
Waller, Battle of the Summer Islands, ii.

2. To crush; subdue; put down summarily; quell; extinguish; put an end to.

The word Puritan seemes to be *quasht*, and all that heretofore were counted such are now Brownists.
Milton, Church-Government, i. 6.

The Commotions in Sicily are *quashed*, but those of Naples increase. *Howell*, Letters, iii. 1.

To doubts so put, and so *quashed*, there seemed to be an end for ever. *Lamb*, Witches.

II. *intrans.* To be shaken with a noise; make the noise of water when shaken.

The erthe quook and *quashte* as hit quyke were.
Piers Plowman (C), xxi. 61.

A thin and fine membrane strait and closely adhering to keep it [the brain] from *quashing* and shaking.
Ray, Works of Creation, ii.

quash2 (kwosh), *v. t.* [< ME. **quashen*, < OF. *quasser*, prop. *casser*, annihilate, annul, F. *casser*, annul, < LL. *cassare*, annihilate, destroy, annul, < L. *cassus*, empty, hollow, fig. empty, vain, useless, futile, null: see *cass*1, *cash*1, *cassation*1, *cashier*1, etc.] To make void; annul; in *law*, to annul, abate, overthrow, or set aside for insufficiency or other cause: as, to *quash* an indictment.

Pleas in abatement (when the suit is by original) conclude to the writ or declaration by praying "judgment of the writ, or declaration, and that the same may be *quashed*," cassetur, made void, or abated.
Blackstone, Com., III. xx.

quash3 (kwosh), *n.* [Perhaps so called with ref. to its being easily broken; < *quash*1, *v.* *Squash*2 is of Amer. Ind. origin.] †. A pompion. *Halliwell.*—2. Same as *squash*2 (?).

The Indian kale, ochro, *quash*, peppers, nckys, and a variety of pulse being natural to the climate [of Jamaica].
T. Roughley, Jamaica Planter's Guide (1823), p. 74.

quashey (kwosh'i), *n.* [Cf. *quash*3.] A pumpkin.

With regard to these said *quasheys*, . . . the best way of dressing them is to stew them in cream.
Southey, Letters (1823), iii. 391. (*Davies.*)

quashy-quasher (kwosh'i-kwosh″ėr), *n.* A small tree, *Thevetia neriifolia*, of the West Indies and tropical America. It has saffron-colored funnel-shaped flowers, its wood is hard and even-grained, and its seeds yield a fixed oil called *exile oil*.

quasi (kwā'sī), *conj.* or *adv.* [L., as if, just as, as it were, about, nearly, < *quam*, as, how, + *si*, if.] As if; as it were; in a manner: used in introducing a proposed or possible explanation.

quasi-. [< L. *quasi*, as if, as it were: see *quasi*.] A prefix or apparent adjective or adverb (and hence often written without the hyphen) meaning 'seeming,' 'apparent' (equivalent to 'as it were,' 'in appearance,' in predicate use), expressing some resemblance, but generally implying that what it qualifies is in some degree fictitious or unreal, or has not all the features of what it professes to be: as, a *quasi*-argument; a *quasi*-historical account. In construction and partly in sense it is like *pseudo-*.

The popular poets always represent Macon, Apolin, Tervagant, and the rest as *quasi*-deities, unable to resist the superior strength of the Christian God.
Lowell, Among my Books, 2d ser., p. 110.

A *quasi* hereditary priesthood is in each.
J. F. Clarke, Ten Great Religions, vi. 7.

Henry . . . allowed the Archbishop of Canterbury to exercise a *quasi*-legatine authority under himself, and with a check in Chancery on his proceedings.
Stubbs, Medieval and Modern Hist., p. 250.

Quasi contract, a legal relation existing between parties to which the law attaches some of the characteristics of a contractual relation. See *natural obligation*, under *natural*.—**Quasi corporation, délit, entail**. See the nouns.—**Quasi delict** (LL. *quasi delictum*), in *Rom. law*, the contravention of certain police regulations which imposed a penalty upon a person for certain acts committed by any one belonging to his family—for example, throwing of water out of the windows. The distinction between *delicta* and *quasi delicta* has been followed by some authors whose writings are based on the common law; and *quasi delicta* are defined as those acts by which damage is done to the obligee, though without the negligence or intention of the obligor, and for which damage the obligor is bound to make satisfaction. As, however, intention is not necessary to constitute a delict (tort), the distinction seems to be unnecessary in modern systems.

quasi-evolute (kwā'sī-ev″ō-lūt), *n.* In *math.*, the envelop of the quasi-normal of a curve.

quasi-fee (kwā'sī-fē), *n.* In *law*, an estate gained by wrong. *Wharton.*

quasi-geometrical (kwā-sī-jē-ō-met'ri-kal), *a.* Relating to hyperspace.

quasi-heirloom (kwā'sī-ār″lōm), *n.* See *heirloom*, 1.

Quasimodo (kwas-i-mō'dō). [= F. *quasimodo*; so called because the introit for this day begins with the words "*Quasi modo* geniti infantes," As new-born babes (1 Pet. ii. 2): L. *quasi*, as if; *modo*, just now, lately.] Same as *Low Sunday*. Also called *Quasimodo Sunday* and *Quasimodogeniti Sunday*. See *low*2.

quasi-normal (kwā-sī-nôr'mal), *n.* The harmonic conjugate of the tangent to a curve with respect to the lines joining its point of contact to two fixed points.

quasi-period (kwā-sī-pē'ri-ọd), *n.* That constant which, added to the variable of a quasi-periodic function, multiplies the constant by a fixed function.

quasi-periodic (kwā-sī-pē-ri-od'ik), *a.* Noting a function such that, when the variable is increased by a certain fixed amount, it has its value multiplied by a fixed function: thus, l^x is *quasi-periodic*, because $l^{x+1} = l \cdot l^x$.

quasi-radiate (kwā-sī-rā'di-āt), *a.* In *bot.*, slightly radiate: noting the heads of some composites whose ray-florets are small and inconspicuous.

quasi-realty (kwā-sī-rē'al-ti), *n.* In *law*, things which are fixed in contemplation of law to realty, but are movable in themselves, as heirlooms, title-deeds, court-rolls, etc. *Wharton.*

quasi-tenant (kwā-sī-ten'ant), *n.* In *law*, an undertenant who is in possession at the determination of an original lease, and is permitted by the reversioner to hold over. *Wharton.*

quasi-trustee (kwā″sī-trus-tē'), *n.* In *law*, a person who reaps a benefit from a breach of trust, and so becomes answerable as a trustee. *Wharton.*

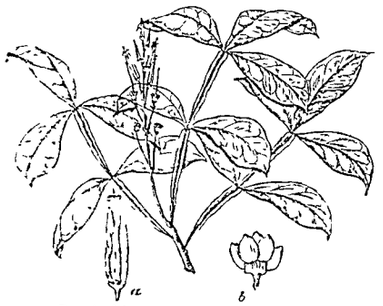
quasje, *n.* See *coati*.

quass1†, *v.* A Middle English form of *quash*1.

quass2† (kwas), *n.* Same as *kvass*.

With spiced Meades (wholsome but deer),
As Meade Obarne and Mead Cherunk,
And the base *Quasse* by Peasants drunk.
Pimlyco or Runne Red Cap (1609), quoted in Gifford's Jonson, VII. 241.

quassation (kwa-sā'shon), *n.* [< L. *quassatio*(*n*-), a shaking or beating, < *quassare*, shake, shatter: see *quash*1.] The act of shaking; concussion; the state of being shaken.



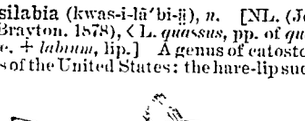
Continual contusions, threshing, and *quassations*.
Gayton, Notes on Don Quixote, p. 68.

quassative (kwas'a-tiv), *a.* [< L. *quassatus*, pp. of *quassare*, shake: see *quash*1.] Tremulous; easily shaken.

A Frenchman's heart is more *quassative* and subject to tremor than an Englishman's.
Middleton, Anything for a Quiet Life, iii. 2.

Quassia (kwash'iạ), *n.* [NL. (Linnæus, 1763), named after *Quassi* or *Coissi*, a negro slave in Surinam, who used its bark as a remedy for fever. *Quassi, Quassy*, or *Quashy* was a common name of negroes.] 1. A genus of plants, of the order *Simarubaceæ* and tribe *Simarubeæ*.

It is characterized by a large columnar receptacle bearing a small five-lobed calyx, five long erect petals, ten thread-like stamens, and a five-lobed ovary ripening into five fleshy drupes. There are 2 species: one, little known, is from



Branch of *Quassia amara*, with inflorescence.
a, a flower; *b*, the fruit.

tropical Africa; the other, *Q. amara*, is a tall and smooth tree of tropical America, with intensely bitter wood, bearing alternate pinnate leaves with a winged petiole, and having terminal racemes of large scarlet tubular flowers. 2. [*l. c.*] A drug, also called *bitter-wood*, consisting of the wood of *Picræna* (*Quassia*) *excelsa*, and of two or three related trees; also, a medicinal preparation from these woods. The original tree was *Quassia amara*, the Surinam quassia. Its wood is still in use in France and Germany, but is largely superseded by that of the more abundant *Picræna excelsa*, a tall tree, the bitter-ash of Jamaica and some smaller islands. A substitute for these is *Simaruba amara*, the mountain-damson or bitter damson or stavewood of the West Indies and northern South America. Quassia-wood is imported in billets, and appears in the shops in the form of chips, raspings, etc. As a remedy it possesses in the highest degree the properties of the simple bitters. Its virtues are due to the principle quassin. Cups turned from the wood impart a bitter taste to their contents, and were once popular. A sweetened infusion of quassia is useful to destroy flies. *Picræna excelsa* has sometimes been substituted for hops in brewing, but this use is considered deleterious. See *bitter ash* (under *ash*[1]), *bitter-wood*, and *mountain damson*.

quassia-tree (kwash'iạ-trē), *n.* Any of the trees producing the drug quassia; a bitterwood-tree.

Quassilabia (kwas-i-lā'bi-ạ), *n.* [NL. (Jordan and Brayton, 1878), < L. *quassus*, pp. of *quatere*, shake, + *labrum*, lip.] A genus of catostomoid fishes of the United States: the hare-lip suckers.

Quassilabia lacera.

Q. lacera is the cutlips, or May, splitmouth, or rabbit-mouth sucker, a singular fish of the Ohio valley and southward, of an olivaceous or brownish color above, the sides and belly silvery, the lower fins tinged with orange, and a peculiar formation of the mouth which has suggested both the technical and the vernacular names.

quassin (kwas'in), *n.* [< *quassia* + *-in*[2].] The neutral bitter principle of quassia (*Picræna excelsa*). This substance crystallizes from aqueous solutions in very small white prisms. Its taste is intensely bitter, but it is destitute of odor. It is scarcely soluble in common ether, slightly soluble in water, and more soluble in alcohol. Also called *quassiin*.

quassite (kwas'it), *n.* [< *quassia* + *-ite*[2].] Same as *quassin*.

quasum†, *pron.* [ME., < *qua*, dial. form of *who*, + *sum*, mod. E. *some*.] Whoso.

> *Qua-sum* this tale can beter tende,
> For Cristis loue he hit amende.
> *Holy Rood* (E. E. T. S.), p. 120.

quat[1] (kwot), *v.* [< OF. *quatir*, *quattir*, *catir*, press down, strike down, plunge, sink, hide, refl. crouch, squat, hide, = It. *quattare*, dial. *cattare*, crouch, lie close, squat, < L. *coactare*, press together, constrain, force, < *cogere*, pp. *coactus*, press together, urge: see *cogent*. Cf. *squat*, *v.*, the same as *quat*, with a prefix; and cf. also the related *cache*[1] and *squash*[1].] I. *trans.* 1†. To press down; subdue.

> The renowne of her chastitie was such that it almost *quatted* those sparkes that heated him on to such lawlesse affection.
> *Greene*, Never too Late (Works, ed. Dyce, Int., p. xxi.).

2†. To oppress; satiate.

> Had Philotimus been served in at the first course, when your stomach was not *quatted* with other daintier fare, his relish had perhaps been something loathsome.
> *Philotimus*, 1583. (*Nares.*)

> To the stomack *quatted* with dainties al delicates seeme queasie. *Lyly*, Euphues, Anat. of Wit, p. 44.

3. To flatter. *Halliwell.* [Prov. Eng.]

II† *intrans.* To squat.

quat[2]† (kwot), *n.* [Origin obscure.] 1. A pustule or pimple.—2. Figuratively, a small, shabby, or insignificant person.

> I have rubb'd this young *quat* almost to the sense,
> And he grows angry. *Shak.*, Othello, v. i. 11.

quat[3]† (kwot), *v. t.* [A strong pret. and pp. of *quit*, used also as inf.] To quit.

quat[3] (kwot), *p. a.* [See *quat*[3], *v.*] Quit; free; released. [Scotch.]

quat[4], *pron.* A dialectal form of *what*.

quata (kwä'tạ), *n.* Same as *coaita*.

quatch[1] (kwoch), *v. i.* [Origin obscure.] To tell; be a telltale; peach. *Halliwell.* [Prov. Eng.]

quatch[1] (kwoch), *n.* [< *quatch*[1], *v.*] A word. *Halliwell.* [Prov. Eng.]

> Noe; not a *quatch*, sad poets; doubt you
> There is not greife enough without you?
> *Bp. Corbet*, Elegy on Death of Queen Anne. (*Davies.*)

quatch[2]† (kwoch), *a.* [Cf. *quat*[1], *squat* (?).] Squat; flat.

> It is like a barber's chair, that fits all buttocks; the pin-buttock, the *quatch*-buttock, the brawn buttock, or any buttock. *Shak.*, All's Well, ii. 2. 18.

quater-cousin, *n.* Same as *cater-cousin*.

quaterfoil, *n.* See *quatrefoil*.

quatern (kwä'tėrn), *a.* [< L. *quaterni*, four each, by fours, distributive, < *quattuor*, four: see *quart*[1]. Cf. *quire*[2].] Consisting of four; fourfold; growing by fours: as, *quatern* leaves.

quaternary (kwä-tėr'nạ-ri), *a.* and *n.* [< L. *quaternarius*, consisting of four each, containing four, < *quaterni*, four each, by fours: see *quatern*.] I. *a.* 1. Consisting of four; arranged or grouped in fours.

> Reproductive organs . . . solitary or *quaternary* in the same sporangium.
> *Le Maout and Decaisne*, Botany (trans.), p. 966.

2. [*cap.*] In *geol.*, noting that part of the geological series which is more recent than the Tertiary; Post-tertiary. (See *Tertiary.*) The oldest and most general division of the Quaternary is into *diluvial* and *alluvial* by which terms are meant respectively coarse detrital material and fine detrital material—the one the result of rapid, the other of slower currents of water. The former presence of ice, both fixed and floating, over a part of the northern hemisphere, and especially in the regions where geology was earliest cultivated, has greatly complicated the question of this division of the Quaternary into subgroups or epochs. Thus *diluvial* has come to be replaced for the most part by *glacial*; and some English geologists divide the Quaternary into *glacial* and *recent*, using the term *Pleistocene* also as the equivalent of *glacial*. The term *recent* has also as its synonym both *alluvial* and *human*. While the essential difference between Tertiary and Quaternary is theoretically supposed to be that in the former a portion of the fossil species are extinct, while in the latter all are living, this does not apply in the case of land-animals, especially the mammals. In fact, there is, over extensive areas, great difficulty in deciding the question whether certain formations shall be called Tertiary or Quaternary, as, for instance, in the case of the Pampean deposits, which, although containing great numbers of species of mammals all or nearly all extinct, are generally considered by geologists as being of Quaternary age.

3. In *old chem.*, noting those compounds which contained four elements, as fibrin, gelatin, etc. —4. In *math.*, containing, as a quantic, or homogeneous integral function, four variables. A surface may be called a *quaternary locus*, because defined by a quaternary equation, or one equating a quaternary quantic to zero.—**Quaternary cubic.** See *cubic.*—**Quaternary number**, ten: so called by the Pythagoreans because equal to 1 + 2 + 3 + 4. Pythagoras, in the oath of the brotherhood, was called the revealer of the quaternary number, on account of some secret of arithmetic, possibly an abacus.—**Quaternary quadrics.** See *quadric.*

II. *n.* A group of four things.

> The objections I made against the *quaternary* of elements and ternary of principles needed not to be opposed so much against the doctrines themselves.
> *Boyle*, Works, I. 586.

quaternate (kwä-tėr'nāt), *a.* [< NL. *quaternatus*, < L. *quaterni*, four each: see *quatern.*] Consisting of four.—**Quaternate leaf**, a leaf that consists of four leaflets.

quaternion (kwä-tėr'ni-ọn), *n.* [Also *quarternion*; < L. *quaternio*(*n*-), the number four, a body or group of four, < *quaterni*, four each, by fours: see *quatern.*] 1. A set, group, or body of four: applied to persons or things.

> He put him in prison, and delivered him to four *quaternions* of soldiers. Acts xii. 4.

> Myself . . . am called Anteros, or Love's enemy; the more welcome therefore to thy court, and the fitter to conduct this *quarternion*. *B. Jonson*, Cynthia's Revels, v 3.

> When and where this *quarternion* rhyme, as it is used by Bercco, was first introduced, cannot be determined.
> *Ticknor*, Span. Lit., I. 27.

2. A word of four syllables; a quadrisyllable.

> The triads and *quaternions* with which he loaded his speech. *Scott.*

3. A fourfold quantity capable of being expressed in the form $xi + yj + zk + w$, where x, y, z, w are scalars, or real numbers, while i, j, k are vectors, or quantities whose squares are negative scalars. The calculus of such quantities is termed *quaternions*.

> A *Quaternion* is the quotient of two vectors, or of two directed right lines in space, considered as depending on a system of Four Geometrical Elements, and as expressible by an algebraical symbol of Quadrinomial Form. The science, or Calculus, of *Quaternions* is a new mathematical method wherein the foregoing conception of a *quaternion* is unfolded and symbolically expressed, and is applied to various classes of algebraical, geometrical, and physical questions, so as to discover many new theorems, and to arrive at the solution of many difficult problems.
> *Sir W. Rowan Hamilton.*

Conjugate of a quaternion. See *conjugate.*—**Conjugate quaternions.** See *conjugate.*—**Quaternion group.** See *group*[1].

quaternion (kwä-tėr'ni-ọn), *v. t.* [< *quaternion*, *n.*] To divide into quaternions, files, or companies.

> The Angels themselves . . . are distinguisht and *quaterniond* into their celestiall Princedomes.
> *Milton*, Church-Government, i. 1.

quaternionist (kwä-tėr'ni-ọn-ist), *n.* [< *quaternion* + *-ist.*] A student of quaternions.

> Do we depart wider from the primary traditions of arithmetic than the *Quaternionist* does?
> *J. Venn*, Symbolic Logic, p. 91.

quaternity (kwä-tėr'ni-ti), *n.* [= F. *quaternité*; as *quatern* + *-ity.*] 1. The state of being four; the condition of making up the number four.

> The number of four stands much admired, not only in the *quaternity* of the elements, which are the principles of bodies, but in the letters of the name of God.
> *Sir T. Browne*, Vulg. Err., iv. 12.

2. A group of four.

> So that their whole scale, of all that is above body, was indeed not a trinity, but a *quarternity*, or four ranks and degrees of beings one below another.
> *Cudworth*, Intellectual System, p. 557.

quateron, *n.* Same as *quadroon*.

quatorzain (ka-tôr'zān), *n.* [Formerly also *quaterzayn*; < OF. *quatorzaine*, *quatorsaine*, the number fourteen, < *quatorze*, fourteen: see *quatorze.*] A stanza or poem of fourteen lines; a sonnet.

> Put out your rush candles, you poets & rimers, and bequeath your crazed *quarterzayns* to the chandlers; for loe I here he commeth that hath broken your legs.
> *Nashe*, quoted in Pierce Penilesse, Int., p. xxiv.

> His [Drayton's] next publication is Idea's mirror; Amours in *Quatorzains*, 1594. It contains fifty-one sonnets. *N. and Q.*, 6th ser., X. 61.

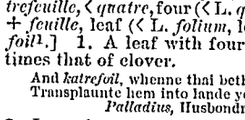
quatorze (ka-tôrz'), *n.* [< F. *quatorze*, < L. *quatuordecim*, fourteen, < *quattuor*, four, + *decem*, ten: see *fourteen.*] In the game of piquet, the four aces, kings, queens, knaves, or tens: so called because such a group of four, in the hand that holds the highest, counts fourteen points.

quatrain (kwot'rān), *n.* [Formerly also, improp., *quartrain*; < F. *quatrain*, a stanza of four lines, < *quatre*, four, < L. *quattuor* = E. *four*: see *four.*] A stanza of four lines riming alternately.

> I have chosen to write my poem in *quatrains*, or stanzas of four in alternate rhyme, because I have ever judged them more noble, and of greater dignity both for the sound and number, than any other verse in use amongst us.
> *Dryden*, Account of Annus Mirabilis.

> Who but Landor could have written the faultless and pathetic *quatrain*?—
> I strove with none, for none was worth my strife;
> Nature I loved, and, next to Nature, Art;
> I warmed both hands before the fire of life;
> It sinks, and I am ready to depart.
> *Stedman*, Vict. Poets, p. 69.

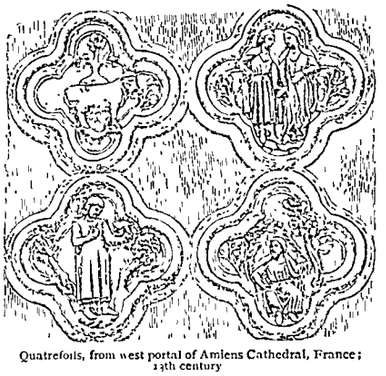
quatrayle†, *n.* [< OF. *quatre-ayle*, etc., < *quatre*, four, + *ayle*, grandfather: see *ayle.*] A male ancestor three generations earlier than one's grandfather.



> Thomas Gould, . . . who died in 1520. He was the *quatrayle* of Zaccheus Gould[6], the New England immigrant.
> *New England Bibliopolist*, I. 71.

quatre-cousin†, *n.* Same as *cater-cousin*.

quatrefoil (kat'ėr-foil), *n.* [Also *quaterfoil*, *quarterfoil*; < ME. *katrefoil*, < OF. (and F.) *quatrefeuille*, < *quatre*, four (< L. *quattuor* = E. *four*), + *feuille*, leaf (< L. *folium*, leaf): see *four* and *foil*[1].] 1. A leaf with four leaflets, as sometimes that of clover.



> And *katrefoil*, whenne thai beth up yspronge,
> Transplaunte hem into lande ydight with dounge.
> *Palladius*, Husbondrie (E. E. T. S.), p. 191.

2. In *arch.*, an opening or a panel divided by cusps or foliations into four foils, or, more correctly, the figure formed by the cusps. This

Quatrefoils

ornament resembles the four petals of a cruciform flower, but is certainly not derived from imitation of such a flower. Bands of small quatrefoils are much used as orna-

ments in the English Perpendicular style, and sometimes in the Decorated. The same name is given also to flowers and leaves of similar form carved in relief as ornaments on moldings, etc. See also cut under *gallery*.

3. In *her.*, a four-leaved grass, or leaf divided into four leaflets, used as a bearing.—**Cross quatrefoil.** See *cross*[1].—**Double quatrefoil.** Same as *eight-foil* or *octofoil*.

quatrible (kat'ri-bl), *n.* [< OF. *quadruble, quadrouble, quadruple*, a piece of music for four voices or four instruments, < *quadruple*, fourfold: see *quadruple*.] In *medieval music*, a descant in parallel fourths to the cantus firmus.

quatrible (kat'ri-bl), *v. t.*; pret. and pp. *quatribled*, ppr. *quatribling*. [< *quatrible*, *n.*] In *medieval music*, to sing a descant at the interval of a fourth from the cantus firmus. See *diaphony*, 2. Compare *quintible*.

quatront, *a.* An obsolete variant of *quatern*. *Halliwell.*

quatto, *n.* Same as *coaita*.

quattrino (kwä-trē'nō), *n.* [It. (ML. *quatrinus*), < *quattro*, four: see *four*.] An Italian coin of about the value of a half a United States cent.

The *quattrino*, a square coin which was struck during his [Lorenzo's] reign. *C. C. Perkins*, Italian Sculpture, p. 356, note.

quattrocentist (kwat-rō-chen'tist), *n.* [= F. *quattrocentiste*, < It. *quattrocentista*, quattrocentist, < *quattrocento* (see *quattrocento*) + *-ist*.] An Italian of the fifteenth century; specifically, an Italian artist of the style of art called quattrocento.

It was a revelation to me, and I began to trace the purity of work in the *quattrocentists* to this drilling of undeviating manipulation which fresco-painting had furnished to them. *Contemporary Rev.*, XLIX. 476.

quattrocento (kwät-rō-chen'tō), *n.* and *a.* [It., lit. 400 (< *quattro*, < L. *quattuor*, four, + *cento*, < L. *centum*, hundred), but used as an abbreviation of *mille quattrocento*, 1400, with ref. to the century (1401–1500) in question. Cf. *cinque-cento*.] I. *n.* The fifteenth century considered as an epoch of art or literature, and especially in connection with Italy: as, the sculpture of the *quattrocento*. The painters of the early part of the period had not yet attained the power to render their conceptions with entire freedom; but their coloring is very beautiful, and their sentiment in general nobler than that of the artists who followed them.

II. *a.* Belonging to, or living or produced in, the fifteenth century; of the style of the fifteenth century: as, *quattrocento* sculpture.

quatuor (kwat'ū-ôr), *n.* [< L. *quatuor*, prop. *quattuor*, = E. *four*: see *four*.] In *music*, a quartet.

quaught (kwâcht), *v. t.* and *i.* [Early mod. E. also *quaght*; Sc. *waught, waucht*; origin uncertain. Cf. *quaff*.] To drink; quaff.

I *quaught*, I drinke all out.
Wyll you *quaght* with me? *Palsgrave.*

quavet (kwāv), *v. i.* [Early mod. E. also *quecave*; < ME. *quaven*, earlier *cwavien*; akin to *quab*[1], *quap*[1]. Hence freq. *quaver*, q. v.] To quiver; shake.

The daye for drede with-drowe, and derke bicam the sonne, The wal [veil] wagged and clef [was rent], and al the worlde *quaued*. *Piers Plowman* (B), xviii. 61.

While thy mighte
Can keepe my harte *quevringe* or quicke.
Puttenham, Partheniades, vi.

quavet (kwāv), *n.* [< ME. *quave*; < *quave*, *v.*] A shaking; trembling. *Prompt. Parv.*, p. 419.

quavemiret (kwāv'mīr), *n.* [Also contr. *quamire*; < *quave* + *mire*. Cf. *quagmire, quakemire*.] Same as *quagmire*. *Palsgrave.*

A muddie *quavemire*. *Mir. for Mags.*, p. 653.

Howbeit, Aratus would not suffer the Achaians to follow them, because of bogs and *quavemires*, but sounded the retreat. *North*, tr. of Plutarch, p. 670.

quaver (kwā'vėr), *v.* [< ME. *quaveren*, freq. of *quave*; cf. LG. *quabbeln* = G. *quabbeln, quappeln*, quiver, tremble, freq. of the form represented by E. *quab*[1]. Cf. *quiver*[1].] I. *intrans.* 1. To have a tremulous motion; tremble; vibrate.

It semythe that the worlde is alle *quaverynge*; it will reboyle somwher, so that I deme yonge men shall be cherysshed. *Paston Letters*, III. 174.

At the end of this Hole is a Membrane, . . . stretched like the Head of a Drum, . . . to receive the Impulse of the Sound, and to vibrate or *quaver* according to its reciprocal Motions. *Ray*, Works of Creation, p. 263.

If the finger be moved with a *quavering* motion, they [the colors] appear again. *Newton*, Opticks.

Her hand trembled, her voice *quavered* with that emotion which is not strength. *Stedman*, Vict. Poets, p. 143.

2. To sing or sound with the wavy tones of an untrained voice, or with a distinctly tremulous tone; hence, to sing, in general; also, to perform a shake or similar melodic embellishment with the voice or an instrument.

You'd swear that Randal, in his rustic strains,
Again was *quavering* to the country swains.
Dryden and Soames, tr. of Boileau's Art of Poetry, ii.

Now sportive youth
Carol incondite rhythms with suiting notes,
And *quaver* unharmonious. *J. Philips*, Cider, ii.

II. *trans.* To sing in an artless manner or with tremulous tone.

And for Musick an old hoarse singing man riding ten miles from his Cathedral to *Quaver* out the Glories of our Birth and State. *Shadwell*, The Scowrers.

We will *quaver* out Peccavimus together.
Thackeray, Philip, xxvii.

quaver (kwā'vėr), *n.* [< *quaver*, *v.*] 1. A quivering; a trembling.

The worth of such actions is not a thing to be decided in a *quaver* of sensibility or a flush of righteous common sense. *R. L. Stevenson*, The English Admirals.

2. A tremulous or quivering sound or tone.

And the choristers' song, that late was so strong,
Grew a *quaver* of consternation.
Southey, Old Woman of Berkeley.

3. A shake or similar embellishment, particularly in vocal music.

I heard a certaine French man who sung very melodiously with curious *quavers*.
Coryat, Crudities, I. 36, sig. D.

It has at least received great improvements among us, whether we consider the instrument itself, or those several *quavers* and graces which are thrown into the playing of it. *Addison*, The Cat-Call.

4. An eighth-note (which see).—**Quaver-rest**, in *musical notation*, same as *eighth-rest*.

quaverer (kwā'vėr-ėr), *n.* One who or that which quavers; a warbler.

quaveringly (kwā'vėr-ing-li), *adv.* In a quavering or tremulous manner.

quavery (kwā'vėr-i), *a.* [< *quaver* + *-y*[1].] Shaky; unstable.

A *quavery* or a maris and unstable foundacion must be holpe with great pylys of alder rammed downe, and with a frame of tymbre called a crossaundre.
Norman, quoted in Prompt. Parv., p. 419.

quaving† (kwā'ving), *n.* [< ME. *quarying*; verbal n. of *quave*, *v.*] A shaking or trembling, as of the earth. *Sir T. Elyot*, Castle of Health, i. 2.

quaviver†, *n.* [Origin uncertain. Cf. *river*.] A fish, the sea-dragon or dragonet; a kind of gurnard. See *gurnard* and *Trigla*.

Tumle, the great sea-dragon, or *quaviver*; also the gurnard, called so at Roan. *Cotgrave.*

Vive, the *quaviver*, or sea-dragon. *Cotgrave.*

Traigne, the sea-dragon, viver, *quaviver*. *Cotgrave.*

quawk (kwâk), *v. i.* [Imitative; cf. *squawk*.] To croak; caw. [Prov. Eng.]

quawk (kwâk), *n.* [Imitative; cf. *quawk*, *v.*] The qua-bird or night-heron, *Nyctiardea grisea nævia*. Also *quark, squawk*. [Local, U. S.]

quay[1], *n.* An obsolete or dialectal form of *whey*.

quay[2] (kē), *n.* [A more recent spelling, after the F. *quay*, now *quai*, of the earlier E. *kay, key* (the mod. pron. kē prop. belongs to *key* only): see *key*[2], *kay*[2].] A landing-place; a place where vessels are loaded and unloaded; a wharf: usually constructed of stone, but sometimes of wood, iron, etc., along a line of coast or a river-bank or round a harbor or dock.

Make *quays*, build bridges, or repair Whitehall.
Pope, Imit. of Horace, II. ii. 120.

To ascertain the limits of all ports, and to assign proper wharfs and *quays* in each port for the exclusive landing and loading of merchandise. *Blackstone*, Com., I. vii.

quay[2] (kē), *v. t.* [< *quay*[2], *n.*] To furnish with a quay or quays.

quayage (kē'āj), *n.* [Formerly *keyage*; < F. *quayage*, < *quay*, a key, quay: see *quay*[2].] Duty paid for repairing a quay, or for the use of a quay; quay-dues; wharfage.

quay-berth (kē'bėrth), *n.* A berth for a ship next to a quay.

quayed†, *a.* A manufactured form of *quailed*, past participle of *quail*[1]. *Spenser.*

que[1], *n.* Same as *cue*[2].

que[2], *n.* A dialectal form of *cow*[1]. *Halliwell.*

queach[1]† (kwēch), *v. i.* A variant of *quitch*[1].

queach[2] (kwēch), *n.* [Also *quitch*; < ME. *quecche*, a thicket.] 1. A thick bushy plot; a thorny thicket.

Thei rode so longe tiſl thei com in to a thikke *queche* in a depe valey. *Merlin* (E. E. T. S.), iii. 540.

2. A plat of ground left unplowed on account of queaches or thickets. *Halliwell.* [Prov. Eng.]

queachy[1] (kwē'chi), *a.* [Also *quecchy*; < *queach*[1] + *-y*[1].] Shaking; moving, yielding, or trembling under the feet, as wet or swampy ground.

'Twixt Penwith's furthest point and Goodwin's *queachy* sand. *Drayton*, Polyolbion, ii. 396.

I'n got no daughter o' my own—ne'er had one—an' I warna sorry, for they're poor *queechy* things, gells is. *George Eliot*, Adam Bede, x. (*Davies.*)

queachy[2]† (kwē'chi), *a.* [Early mod. E. also *quechy*; < *queach*[2] + *-y*[1].] Bushy; thick.

The owle, that hates the day and loues to flee by night, Hath *queachie* bushes to defende him from Apollo's sight. *Turberville*, That All Things Have Release.

Our blood is changed to Inke, our haires to Quils,
Our eyes halfe buried in our *quechy* plots.
Heywood, Golden Age, v. 1.

queal[1] (kwēl), *v. i.* [An earlier and more original form of *quail*[1].] To faint away. *Halliwell.* [Prov. Eng.]

queal[2], *n.* An obsolete or dialectal form of *wheal*.

quean (kwēn), *n.* [(*a*) Also dial. (Sc.) *quine*; early mod. Etheredge, She Would if she Could, iii. 3.

Quebec group. In *geol.*, a division of the Lower Silurian established by the Canada Geological Survey, of very uncertain value.

According to recent researches by Mr. Selwyn, the *Quebec group* as defined by Logan embraces three totally distinct groups of rocks, belonging respectively to Archæan, Cambrian, and Lower Silurian horizons.
Geikie, Text-Book of Geol., p. 691.

Quebec oak. See *oak.*

quebracho (ke-brä'chō), *n.* [Pg., contr. from *quebra-hacha*, 'ax-breaker'; so called in allusion to the hardness of the wood; < *quebrar*, break, + *hacha, facha*, ax: see *hatchet.*] The name of several hard-wooded South American trees of economic value. The white quebracho (*quebracho blanco*) is *Aspidosperma Quebracho*, best known for its medicinal bark. (See *quebracho bark*, under *bark*2.) The red quebracho (*quebracho colorado*) is *Schinopsis* (*Loxopterygium*) *Lorentzii*, of the La Plata region. Its wood and bark form an important tanning-material, very rapid in action, exported to Europe in bulk and in extract. Its timber is extremely hard and strong. Another quebracho is *Iodina rhombifolia* of the *Santalaceæ* (*quebracho flojo*), its wood and bark being mixed with the last.—**Quebracho gum**, the dried juice or watery extract of *Schinopsis Lorentzii*. It is used for the relief of dyspnœa.

See *quean.*] 1. The consort of a king.

Thursdaye, the laste daye of Aprylle, to Lasheles, where lyethe *quene* Elyanour of Englonde, and in an abbey of her awne foundacyon. *Sir R. Guylforde*, Pylgrymage, p. 4.

I'll undertake to make thee Henry's *queen*.
Shak., 1 Hen. VI., v. 3. 117.

2. A woman who is the sovereign of a realm; a female sovereign. In countries under monarchical rule females are sometimes excluded from the throne, and seldom if ever succeed in direct lineal descent. In the line of succession to the British throne the eldest son of the sovereign is the heir, to the exclusion of older sisters; but a daughter who has no brothers succeeds, to the exclusion of younger brothers of her father or their male descendants. The exceptionally long reign of Queen Victoria (who succeeded in right of her deceased father, the Duke of Kent, to the exclusion of his younger brothers) has familiarized English-speaking communities of the present day with the form *queen's* instead of *king's* in such phrases as *queen's counsel, the queen's English*, etc.

Of lower Syria, Cyprus, Lydia,
Absolute *queen*. *Shak.*, A. and C., iii. 6. 11.

Now what I am ye know right well — your *Queen*,
To whom . . . ye did promise full
Allegiance and obedience to the death.
Tennyson, Queen Mary, ii. 2.

3. Figuratively, a woman who is chief or preeminent among others; one who presides: as, *queen* of beauty; *queen* of the May (see *May-queen*).

Venus, the *queen* of Love, was but thy figure,
And all her graces prophecies of thine.
Shirley, Traitor, iii. 3.

Isabel, thro' all her placid life,
The *queen* of marriage, a most perfect wife.
Tennyson, Isabel.

4. Hence, anything personified as chief or greatest, when considered as possessing female attributes.

The Cathedrall Church of this Citie [Amiens] is dedicated to our Lady, being the very *Queene* of al the Churches in France. *Coryat*, Crudities, I. 15.

Show this *queen* of cities that so fair
May yet be foul. *Cowper*, Task, i. 727.

Seven hundred years and fifty-three
Had Rome been growing up to might,
And now was *queen* of land and sea.
Domett, Christmas Hymn.

5. In *entom.*, a queen bee or queen ant.—6. A playing-card on which a queen is depicted.

The knave of Diamonds tries his wily arts,
And wins (oh shameful chance!) the *Queen* of Hearts.
Pope, R. of the L., iii. 88.

7. In *chess*, the piece which is by far the most powerful of all for attack. See *chess*1. Abbreviated *Q.*—8. A variety of roofing-slate, measuring 3 feet long and 2 feet wide. Compare *duchess*, 2.—**Court of Queen's Bench.** See *Court of King's Bench*, under *court.*—**Dollar queen**, in *apiculture*, an untested queen bee, bred from a purely bred mother that has mated with one of her own race: so called because the standard price was supposed to be one dollar. The price of dollar queens, however, varies from 75 cents to $2. *Phin*, Dict. of Apiculture, p. 57.—**Keeper of the Queen's prison.** See *Marshal of the King's* (or *Queen's*) *Bench*, under *marshal.*—**Marshal of the queen's household.** See *marshal.*—**Problem of the queens.** See *problem.*—**Queen Anne's bounty.** See *bounty.*—**Queen Anne style**, in *arch.*, the style which obtained in England in the early part of the eighteenth century, and produced many commodious and dignified buildings, particularly in domestic architecture; also, specifically, a nondescript style purporting to follow the above, and reproducing some of the exterior forms and ornaments of the original, much in vogue in the United States, especially for suburban cottages, from about 1880.—**Queen bee.** See *bee.*—**Queen closer.** See *closer*1 (*b*).—**Queen consort.** See *consort*1.—**Queen dowager**, the widow of a deceased king.—**Queen mother**, a queen dowager who is also mother of the reigning sovereign.—**Queen of heaven.** (*a*) A title often given to the goddess Astarte or Ashtoreth.

The women knead their dough to make cakes to the *queen of heaven*, . . . that they may provoke me to anger.
Jer. vii. 18.

With these in troop
Came Astoreth, whom the Phœnicians call'd
Astarte, *queen of heaven*, with crescent horns.
Milton, P. L., i. 439.

(*b*) Among Roman Catholics, a title given to the Virgin Mary.—**Queen of the May**, a young girl crowned with flowers and enthroned as the central figure of the May-day sports.—**Queen regent, queen regnant**, a queen who holds the crown in her own right, or a queen who reigns as regent.—**Queen's advocate.** Same as *lord advocate* (which see, under *advocate*).—**Queen's color**, in the British army, one of the pair of colors belonging to every regiment. In the line it is a union jack charged with some regimental devices; in the Guards it is a crimson flag, sometimes having the jack in the dexter chief, but always having the royal cipher and regimental devices. See *color*, and *a pair of colors*, under *pair*1. *Boutell*, English Heraldry.—**Queen's counsel, enemy, gambit.** See *counsel*, etc.—**Queen's evidence.** See *king's evidence*, under *evidence.*—**Queen's gap**, a gap in a dam, a style of fishway used in British waters. It has been occasionally used in America for alewives. In low dams it answers well for salmon.—**Queen's herb**, snuff: so called (in the latter part of the sixteenth century) because Catharine de' Medici acquired a taste for it soon after the introduction of tobacco into France.—**Queen's keys.** See *key*1.—**Queen's messenger.** See *messenger.*—**The queen's English.** See *English.*—**The queen's peace.** See *peace.*

queen1 (kwēn), *v.* [< *queen*1, *n.*] I. *intrans.* To play the queen; act the part or character of a queen; domineer: with an indefinite *it.*

A three-pence bow'd would hire me,
Old as I am, to *queen it*.
Shak., Hen. VIII., ii. 3. 37.

Xerxes went out of his way with his army to do homage to the great plane-tree that *queened it* in the desert alone.
P. Robinson, Under the Sun, p. 85.

II. *trans.* 1. In *chess*, to make a queen of: said of a pawn on its reaching the eighth square.—2. In *apiculture*, to supply with a queen; introduce a queen to: said of a colony of bees. *Phin*, Dict. of Apiculture, p. 57.

quercitron (kwėr'sit-ron), *n.* [Irreg. < L. *quercus*, an oak, + *citrus*, a tree of the lemon kind: see *citron*.] 1. The black or dyers' oak, *Quercus tinctoria*, a tree from 70 to 100 feet high, common through the eastern half of the United States and in southern Canada. Its wood is of some value, and its bark is of considerable importance. The latter, though outwardly dark, is inwardly yellow, whence the tree is also called *yellow* or *yellow-bark oak*.

2. The bark of this tree. It contains, in the principle quercitrin, a yellow dye, which is now used in the form of a preparation called *flavin*. It is also used for tanning, and occasionally in medicine, but the coloring matter hinders these applications.

quercitron-bark (kwėr'sit-ron-bärk), *n.* Same as *quercitron*, 2.

quercitron-oak (kwėr'sit-ron-ōk), *n.* Same as *quercitron*, 1.

quercivorous (kwėr-siv'ō-rus), *a.* [< L. *quercus*, an oak, + *vorare*, devour.] In *zoöl.*, feeding on the oak, as an insect.

Quercus (kwėr'kus), *n.* [NL. (Malpighi, 1675), < L. *quercus*, an oak, = E. *fir*, q. v.] A genus of dicotyledonous trees, the oaks, type of the apetalous order *Cupuliferæ* and of the tribe *Quercineæ*. It is characterized by usually slender and pendulous or erect staminate catkins, the stamens and calyx-lobes of each flower being six in number, and by the scattered or clustered fertile flowers, composed of an ovary commonly with three cells, six ovules, and a three-lobed stigma, surrounded by an involucre of more or less consolidated scales, which becomes a hardened cupule or cup around the flat or rounded base of the nut or acorn. There are about 300 species, natives of all north temperate regions, extending through Mexican mountains and the Andes into the United States of Colombia, and in the mountains of Asia to the Moluccas. They are entirely absent in South America beyond the equator, in Australasia and the Pacific islands, and in Africa outside of the Mediterranean region. They are mainly trees of large size, hard and durable wood, and slow growth, sprouting repeatedly from the root; a few only are never more than shrubs. The characteristic oak-leaf is alternate, thin, and veiny, deeply and pinnately lobed, with the lobes either rounded, as in the white oak, or ending in bristle-points, as in the black and red oaks; but the genus includes great diversity of form, ranging to thick and entire evergreen leaves in the live-oak and others. (See cut under *oak*.) The fruit or acorn matures in one year in the white oak, bur-oak, post-oak, live-oak, and the chestnut-oaks; in other Atlantic species, the biennial-fruited oaks, in two. The yellowish catkins precede or accompany the leaves. The numerous American and European species all belong (with the exception of *Q. densiflora*, the peach-oak of California) to the subgenus *Lepidobalanus* (Endlicher, 1841), with slender and loose-flowered proper aments, and broad cupules with imbricated scales. Of these over 50 are found in Mexico and Central America, and about 40 within the United States 25 of which occur only east of the Rocky Mountains, and about 15 in California. They extend in North America as far north as 45°, in Europe to 56°. The oaks of central and eastern Asia constitute five other sections, mostly with erect staminate spikes, and include about 106 species. See *oak*, *acorn*, *black-jack*, *blue-jack*, *encino*, *holm-oak*, *kermes-oak*, *live-oak*, *pin-oak*, *post-oak*, *red-oak*, *roble*, *scrub-oak*, *shingle-oak*, *valonia-oak*, *wainscot-oak*, *water-oak*, *willow-oak*.

Fixing full eyes of *question* on her face, . . .
"But thou art closer to this noble prince?"
Tennyson, Coming of Arthur.

2. That which is asked; an inquiry; a query; the expression of a desire to know something indicated more or less definitely. In grammar, questions are classed as (1) *direct* (*independent*): as, John is here? is John here? who is that? (2) *indirect* (*dependent*), taking the form of an object-clause: as, he asks if John is here; he asks who that is; (3) *simple*: as, is that man a soldier? (4) *double* (*alternative*, *compound*, *disjunctive*): as, is that man a soldier or a civilian? (5) *indirect double*: as, he asks whether that man is a soldier or not; (6) *deliberative* or *doubting*: as, shall I do it? shall we remain? (7) *positive*: as, is that right?—with emphasis on the verb this expects the answer "No"; (8) *negative*: as, is not that right?—this expects the answer "Yes."

Answer me
Directly unto this *question* that I ask.
Shak., 1 Hen. IV., ii. 3. 89.

None but they doubtless who were reputed wise had the *Question* propounded to them.

He is likewise a rival of mine—that is, of my other self's, for he does not think his friend Captain Absolute ever saw the lady *in question*. *Sheridan*, The Rivals, ii. 1.

Mr. Wall and his ally exert themselves to make up for the painful absence *in question* to their utmost power.
W. M. Baker, New Timothy, p. 213.

Leading question, a question so put as to suggest the answer which is desired, and thus to lead to and prepare the way for such an answer. A party is not allowed to put a leading question to his own witness except in matters purely introductory, and not touching a point in controversy; and except that if his witness is obviously hostile or defective in memory the court may in its discretion allow a leading question. A party may put leading questions in cross-examining his adversary's witness.—**Mixed questions.** See *mixed*.—**Out of question,** doubtless; beyond question.

Out of question, you were born in a merry hour.
Shak., Much Ado, ii. 1. 346.

Out of the question, not worthy of or requiring consideration; not to be thought of.

It is *out of the question* to ask the Diet for money to clear off the enormous debts; so that it is difficult to guess how the matter will end
Contemporary Rev., XLIX. 287.

Previous question, in *parliamentary practice*, the question whether a vote shall be come to on the main issue or not, brought forward before the main or real question is put by the speaker, and for the purpose of avoiding, if the vote is in the negative, the putting of this question. The motion is in the form, "that the question be now put," and the mover and seconder vote against it. In the House of Representatives of the United States (it is not used in the Senate), and in many State legislatures, the object of moving the previous question is to cut off debate and secure immediately a vote on the question under consideration; hence, therefore, the mover and seconder vote in the affirmative.

The great remedy against prolix or obstructive debate is the so-called *previous question* which is moved in the form "Shall the main question be now put?" and when ordered closes forthwith all debate and brings the House to a direct vote on that main question.
J. Bryce, American Commonwealth, I. 130.

Question of fact, question of law. See *fact*, 3.—**Question of order.** See *order*.—**Question of privilege.** See *privilege*.—**Real question.** See *real*¹.—**The Questions,** the Shorter Catechism of the Westminster Assembly of Divines. The governour wrote to some of the assistants about it and, upon advice with the ministers, it was agreed to *call* . . . them [the offenders] *in question*
Winthrop, Hist. New England, I. 172.

To pop the question. See *pop*¹.—**Syn. 2.** *Question, Query, Inquiry, Interrogation,* and *Interrogatory* agree in expressing a form of words used in calling for information or an answer from another. *Question* is the most general in its meaning, and *inquiry* stands next. *Query* stands for a question asked without force, a point about which one would like to be informed: the word is used with all degrees of weakness down to the mere expression of a doubt: as, I raised a *query* as to the strength of the bridge. A *question* may be put in order to test another's knowledge; the other words express an asking for real information. *Interrogatory* is a strong word, expressing an authoritative or searching question that must be explicitly answered, sometimes in law a written question. *Inquiry* is somewhat milder and less direct than *question*, the order of strength being *query, inquiry, question, interrogation*. There is no perceptible difference between *interrogation* and *interrogatory*, except that the former may express also the act. See *ask*¹ and *examination*.—**4** and **5.** Proposition, motion, topic, point

question (kwes'chon), *v.* [< OF. *questionner*, < ML. *quæstionare*, question, < L. *quæstio*(*n*-), question: see *question*, *n.*] **I.** *intrans.* 1. To ask a question or questions; inquire or seek to know; examine.

quicklime (kwik'lim), *n.* [< *quick* + *lime*[1].] Calcium oxid, CaO; burned lime; lime not yet slaked with water. Quicklime is prepared by subjecting chalk, limestone, or other natural calcium carbonate to intense heat, when carbonic acid, water, and any organic matter contained in the carbonate are driven off. It is a white amorphous infusible solid, which readily absorbs carbonic acid and water when exposed to the air. In contact with water, quicklime slakes, each molecule of the oxid combining with a molecule of water and forming calcium hydrate, $Ca(OH)_2$, or slaked lime. It is most largely used in making mortar and cement, but has numberless other uses in the arts.

quickling (kwik'ling), *n.* [< *quick* + *-ling*[1].] A young insect. *Halliwell*. [Prov. Eng.]

The *quickness* of the edge.
Beau. and Fl., Maid's Tragedy, i. 1.

A few drops thige, and add a pleasant *quickness*.
Mortimer.

=Syn. 2. *Quickness*, *Fastness*, *Speed*, *Celerity*, *Swiftness*, *Fleetness*, *Rapidity*, *Velocity*, haste, expedition, despatch, alertness, liveliness. *Quickness* is the generic term. *Quickness*, *fastness*, *speed*, and *rapidity* may have relation to time only, or to space passed through or over; the others apply only to space. "*Swift* to hear," in Jas. i. 19, is a bold figure. *Celerity* is swift voluntary movement; but we do not ordinarily speak of the movements of an animal as having *celerity*. *Fleetness* also is voluntary, and is applied to animals; we may speak by figure of the *fleetness* of a yacht. The word suggests quickness in getting over the ground by the use of the feet: we speak of the *swiftness* or *rapidity* of the swallow's or the pigeon's flight; the *fleetness* of Atalanta, a hound, a deer. *Swiftness* is presumably not too great for carefulness or thoroughness; *rapidity* may be too great for either. *Velocity* is the attribute of matter in motion; the word is especially a technical term for the rate of movement of matter, whether fast or slow. We speak also of the *velocity* of sound or light. *Rapidity* has less suggestion of personality than any of the others, except *velocity*. See *nimble*. – 3. Dexterity, adroitness, expertness, facility, knack. – 4. Penetration.

quicksand (kwik'sand), *n.* [< ME. *quyksande* (= D. *kwikzand* = G. *quicksand* = Icel. *kviksandr* = Sw. *qvicksand* = Dan. *kvikssand*); < *quick* + *sand*.] A movable sand-bank in a sea, lake, or river; a large mass of loose or moving sand mixed with water formed on many seacoasts, at the mouths and in the channels of rivers, etc., sometimes dangerous to vessels, and especially to travelers.

And fearing lest they should fall into the *quicksands* [should be cast upon the Syrtis, R. V.], [they] strake sail and so were driven. Acts xxvii. 17.

And what is Edward but a ruthless sea?
What Clarence, but a *quicksand* of deceit?
Shak., 3 Hen. VI., v. 4. 26.

quicksandy (kwik'san-di), *a.* [< *quicksand* + *-y*.] Containing or abounding in quicksands; consisting of or resembling quicksands.

quieting-chamber (kwī'et-ing-chām'bėr), *n.* In a steam-engine, an exhaust-pipe fitted with a number of small branch tubes the sections of which, taken together, equal that of the main pipe. It is intended to prevent the usual noise of blowing off steam.

quietism (kwī'et-izm), *n.* [= F. *quiétisme* = Sp. Pg. It. *quietismo* = G. *quietismus*, < NL. *quietismus;* as *quiet* + *-ism.*] 1. That form of mysticism which consists in the entire abnegation of all active exercise of the will and a purely passive meditation on God and divine things as the highest spiritual exercise and the means of bringing the soul into immediate union with the Godhead. Conspicuous exponents of quietism were Molinos and Mme. Guyon, in the seventeenth century. See *Molinist*[2].

If the temper and constitution were cold and phlegmatic, their religion has sunk into *quietism;* if bilious or sanguine, it has flamed out into all the frenzy of enthusiasm.
Warburton, Alliance, i.

The Monks of the Holy Mountain [Mount Athos], from the eleventh century, appeared to have yielded to a kind of *quietism*, and to have held that he who, in silence and solitude, turned his thoughts with intense introspection on himself, would find his soul enveloped in a mystic and ethereal light, the essence of God, and be filled with pure and perfect happiness.
J. M. Neale, Eastern Church, i. 870, note.

2. The state or quality of being quiet; quietness. [Rare.]

He . . . feared that the thoughtlessness of my years might sometimes make me overstep the limits of *quietism* which he found necessary.
Godwin, Mandeville, I. 110. (*Davies.*)

quietist (kwī'et-ist), *n.* [= F. *quiétiste* = Sp. Pg. It. *quietista* = G. *quietist*, < NL. *quietista;* as *quiet* + *-ist.*] 1. One who believes in or practises quietism: applied especially [*cap.*] to a body of mystics (followers of Molinos, a Spanish priest) in the latter part of the seventeenth century. Somewhat similar views were held by the Euchites, Beghards, Beguines, Hesychasts, Brethren of the Free Spirit, and others of less note.

The best persons have always held it to be the essence of religion that the paramount duty of man upon earth is to amend himself; but all except monkish *quietists* have annexed to this the additional duty of amending the world, and not solely the human part of it, but the material, the order of physical nature. *J. S. Mill.*

2. One who seeks or enjoys quietness; one who advocates a policy of quietness or inactivity.

Too apt, perhaps, to stay where I am put. I am a *quietist* by constitution. *The Century*, XXVI. 280.

quietistic (kwī-e-tis'tik), *a.* [< *quietist* + *-ic.*] Of or pertaining to quietists or quietism.

Jeanne Marie . . . Guyon, . . . a leading exponent of the *quietistic* mysticism of the 17th century.
Encyc. Brit., XI. 341.

quietive (kwī'et-iv), *n.* [< *quiet* + *-ive.*] That which has the property of inducing quiet or calm, as a sedative medicine.

Every one knows of a few plants that are good as laxatives, emetics, sudorifics, or *quietives*.
Pop. Sci. Mo., XXVIII. 529.

quietize (kwī'et-īz), *v. t.* [< *quiet, a.*, + *-ize.*] To make quiet; calm.

Solitude, and patience, and religion have now *quietized* both father and daughter into tolerable contentment.
Mme. D'Arblay, Diary, V. 271. (*Davies.*)

quietly (kwī'et-li), *adv.* In a quiet state or manner. Especially—(*a*) Without motion or agitation; in a state of rest.

Lie *quietly*, and hear a little more;
Nay, do not struggle.
Shak., Venus and Adonis, l. 709.

(*b*) Without tumult, alarm, dispute, or disturbance; peaceably: as, to live *quietly*.

After all these Outrages, the King proclaimed Pardon to all such as would lay down Arms and go *quietly* home.
Baker, Chronicles, p. 138.

(*c*) Calmly; tranquilly; without agitation or violent emotion; patiently.

Quietly, modestly, and patiently recommend his estate to God. *Jer. Taylor.*

Then came her father, saying in low tones
"Have comfort," whom she greeted *quietly*.
Tennyson, Lancelot and Elaine.

(*d*) In a manner to attract little or no observation; without noise: as, he *quietly* left the room.

Sometimes . . . [Walpole] found that measures which he had hoped to carry through *quietly* had caused great agitation *Macaulay*, Horace Walpole.

He shut the gate *quietly*, not to make a noise, but never looked back. *Mrs. Oliphant*, Poor Gentleman, xxxvi.

quietness (kwī'et-nes), *n.* [< ME. *quietness;* < *quiet* + *-ness.*] The state of being quiet, still, or free from action or motion; freedom from agitation, disturbance, or excitement; tranquillity; stillness; calmness.

It is great *quyetnesse* to haue people of good behaviour in a house. *Babees Book* (E. E. T. S.), p. 64.

In *quietness* and in confidence shall be your strength.
Isa. xxx. 15.

quietous† (kwī'et-us), *a.* [< *quiet* + *-ous.*] Quiet; peaceable.

Bryngynge men to a *quyetouse* holde and sure step in the Lorde. *Bp. Bale*, Image, i.

quietously† (kwī'et-us-li), *adv.* [< *quietous* + *-ly*[2].] In a quietous manner; quietly. *Bp. Bale.*

quietsome† (kwī'et-sum), *a.* [< *quiet* + *-some.*] Calm; still; undisturbed.

But let the night be calme and *quietsome*.
Spenser, Epithalamion, l. 326.

quietude (kwī'e-tūd), *n.* [< F. *quiétude* = Sp. *quietud* = It. *quietudine*, < L. *quietudo*, quietness, rest, calmness, for **quietitudo*, < *quietus*, quiet: see *quiet, a.*] Rest; repose; quiet; tranquillity.

A future *quietude* and serenitude in the affections.
Sir H. Wotton, Reliquiæ, p. 79.

Never was there a more venerable *quietude* than that which slept among their sheltering boughs.
Hawthorne, Marble Faun, viii.

There broods upon this charming hamlet an old-time *quietude* and privacy. *H. James, Jr.*, Pass. Pilgrim, p. 42.

quietus (kwī-ē'tus), *n.* [< ML. *quietus*, or *quietus est*, (he is) 'free' or 'quitted,' i. e. he is discharged from the debt: a formula in noting the settlement of accounts: see *quiet, a.*] 1. A final discharge of an account; a final settlement; a quittance.

Till I had signed your *quietus*. *Webster.*

I hoped to put her off with half the sum;
That's truth; some younger brother would have thank'd me,
And given [me] my *quietus*. *Shirley*, The Gamester, v. 1.

Hence—2. A finishing or ending in general; stoppage.

When he himself might his *quietus* make
With a bare bodkin. *Shak.*, Hamlet, iii. 1. 75.

Why, you may think there's no being shot at without a little risk; and if an unlucky bullet should carry a *quietus* with it—I say it will be no time then to be bothering you about family matters. *Sheridan*, The Rivals, v. 3.

3. A severe blow; a "settler." *Halliwell.* [Slang.]

quight†, *adv.* An erroneous spelling of *quite*[1].

qui-hi, qui-hye (kwī'hī'), *n.* [Hind. *koi hai*, 'who is there?'] 1. In Bengal, the Anglo-Indian call for a servant, one being always in attendance, though not in the room.

The seal motto [of a letter] *qui hi* ("who waits") denoting that the bearer is to bring an answer.
J. W. Palmer, The New and the Old, p. 208.

2. Hence, the popular nickname for an Anglo-Indian in Bengal.

The old boys, the old generals, the old colonels, the old *qui-his* from the club came and paid her their homage.
Thackeray, Newcomes, lii. (*Davies.*)

Quiina (kwi-ī'nä), *n.* [NL. (Aublet, 1775), from the native name in Guiana.] A genus of polypetalous plants of the order *Guttiferæ*, type of the tribe *Quiineæ*. It is characterized by ovary-cells with two ovules, the numerous stamens and several styles all filiform, and the fruit a berry with fibrous interior and from one to four woolly seeds, each filled by the two thick and distinct seed-leaves. The 17 species are natives of tropical America. They are trees or shrubs or sometimes climbers, bearing opposite or whorled stipulate leaves, elegantly marked with transverse veinlets. The small flowers are arranged in short axillary panicles or terminal racemed clusters. *Q. Jamaicensis* is an entire-leafed species, known in Jamaica as *old-woman's tree*.

quilting-frame (kwil'ting-frām), *n.* A frame with adjustable bars, wires, etc., used for stretching flat a fabric for quilting or for convenience in embroidering upon it.

Quimper pottery. See *pottery*.

quin (kwin), *n.* [Possibly < Ir. *cuine*, *cun*, coin, money; with ref. to the shape.] A kind of scallop or pecten. Also *queen*, *squin*. [Local, Eng.]

quina (kwī'nä or kē'nä), *n.* [= F. *quina*, < Sp. Pg. *quina* (NL. *quina*), < S. Amer. (Peruv.) *quina*, *kina*, bark.] The bark of various species of *Cinchona:* also applied in Brazil to some other febrifugal barks.

quinamia (kwi-nā'mi-ä), *n.* [NL., < *quina* + *am(ide)* + *-ia*.] Same as *quinamine*.

quinamicine (kwi-nam'i-sin), *n.* [< *quinamine:* an arbitrary form.] An artificial alkaloid obtained from quinamine. Its formula is $C_{19}H_{24}N_2O_2$.

quinamidine (kwi-nam'i-din), *n.* [< *quina* + *amide* + *-ine*[2].] An artificial alkaloid obtained from quinamine. It is isomeric with quinamicine.

quinamine (kwi-nam'in), *n.* [< *quina* + *amine*.] A natural crystalline alkaloid, with the formula $C_{19}H_{24}N_2O_2$, obtained from various cinchona barks. Also called *quinamia*.

quinancy†, *n.* An obsolete form of *quinsy*.

quinancy-wort†, *n.* An obsolete form of *quinsy-wort*. *Miller*, English Plant Names.

quinaquina (kē-nä-kē'nä), *n.* [Also *quinquina* = F. *quinquina* = Sp. *quinaquina*, < Peruv. *quinaquina*, the tree which yields the bark called *quina:* see *quina*.] The bark of various species of *Cinchona*. See *kin-kina*.

quinarian (kwī-nā'ri-an), *a.* and *n.* [< *quinary* + *-an*.] I. *a.* Quinary, as a system of classification; classified in sets of five. In zoology the word notes specifically the circular or so-called natural system of classification, originally propounded by Macleay in 1819, and further elaborated especially by Vigors and Swainson. As subsequently modified and formulated by Swainson in 1835, it rests substantially upon the following five propositions: (1) Every natural series of beings, in its progress from a given point, returns or tends to return to that point, thus forming a circle. (2) The primary circular divisions of every group are actually three, or apparently five. (3) The contents of such a circular group are symbolically or analogically represented by the contents of all other circles in the animal kingdom. (4) These primary divisions of every group are characterized by definite peculiarities of form, structure, and economy, which, under diversified modifications, are uniform throughout the animal kingdom, and are therefore to be regarded as the primary types of nature. (5) The different ranks or degrees of the circular groups are nine in number, each being involved within the other. None of these propositions being intelligible, the system soon fell into disuse, and is now regarded as entirely groundless and fanciful.

II. *n.* In *zoöl.*, one who proposed, practised, or taught the quinary system of classification; an adherent of the quinary system.

There were not wanting other men in these islands whose common sense refused to accept the metaphorical doctrine and the mystical jargon of the *Quinarians;* but so strenuously and persistently had the latter asserted their infallibility, and so vigorously had they assailed any who ventured to doubt it, that most peaceable ornithologists found it best to bend to the furious blast, and in some sort to acquiesce at least in the phraseology of the self-styled interpreters of Creative Will.
A. Newton, Encyc. Brit., XVIII. 16.

quinarius (kwī-nā'ri-us), *n.* [L.: see *quinary*.] An ancient Roman republican and imperial silver coin, in value half the denarius, or about 8 cents United States money. It was originally equivalent to five asses, but after the depreciation of the as, to eight. It was also called *victoriatus* from the figure of Victory stamped upon it. It appears to have been first coined at Rome 177 B. C., after the victories of Clodius in Istria.

quinary (kwī'nȧ-ri), *a.* and *n.* [= F. *quinaire* = Sp. Pg. It. *quinario*, < L. *quinarius*, containing five, < *quini*, five each, < *quinque*, five, = E. *five*.] I. *a.* 1. Divided in a set of five, as parts or organs of most radiates.

A *quinary* division of segments.
Adams, Manual of Nat. Hist., p. 328.

2. In *zoöl.*, same as *quinarian*.

Swainson's system of classification was peculiar. He endeavored to establish "circular" or *quinary* analogies throughout the animal kingdom. *Amer. Nat.*, XXI. 889.

The mischief caused by this theory of a *Quinary* System [in zoology] was very great, but was chiefly confined to Britain. *A. Newton*, Encyc. Brit., XVIII. 15.

Quinary system, or quinary classification. See *quinarian*.

II. *n.*; pl. *quinaries* (-riz). A whole composed of five parts or elements.

Quaternaries or compounds formed of four elements, *quinaries*, sextaries, etc., according as the number of the constituent elements increases.
Pop. Sci. Mo., XXXIV. 740.

quinate[1] (kwī'nāt), *a.* [< L. *quini*, five each, + *-ate*[1].] In *bot.*, having an arrangement of five similar parts together, as five leaflets on a petiole.

quinate[2] (kwī'nāt), *n.* [< *quin(ic)* + *-ate*[1].] In *chem.*, a salt of quinic acid.

quince[1] (kwins), *n.* [Formerly also *quence;* < ME. *quence*, an extension of *quine*, appar. orig. plural taken as singular: see *quine*[2]. Cf. L. *cydonia*, pl., quince. Less prob. a reduction of OF. *coignasse*, the largest kind of quince; < *coin*, quince: see *quine*[2].] 1. The fruit of the tree *Pyrus Cydonia*. (See def. 2.) It is pear-shaped, or in one variety apple-shaped, large, sometimes weighing a pound, of a golden-yellow color when ripe, and

Branch with Fruit of Quince (*Pyrus Cydonia*).

very fragrant. The quince was known to the ancients, and it has been argued that the golden apples of the Hesperides were quinces. While raw it is hard and austere, but it becomes edible by boiling or baking, and is largely used for jelly, preserves, and marmalade (see etymology of *marmalade*), and for flavoring sauces of other fruits. The seeds of the common quince are used in medicine and the arts, on account of their highly mucilaginous coat. In decoction they afford a demulcent application, and they are sometimes used in eye lotions. Their mucilage is employed in making bandoline and in marbling books. See *bandoline*.

Of ripen'd *Quinces* such the yellow Hue.
Congreve, tr. of Ovid's Art of Love, iii.

2. The fruit-tree *Pyrus Cydonia*, sometimes classed as *Cydonia vulgaris*, the latter genus being based (insufficiently) on the many-seeded cells of the fruit. The quince is a small hardy tree, usually dwarfed, but sometimes reaching 15 or 20 feet in height, having crooked spreading branches which produce the flowers singly at their ends. Besides bearing fruit, the quince often serves as a stock for dwarfing the pear. The local origin of the quince is not clearly known, but it occurs spontaneously from northwestern India westward through the Mediterranean basin. The name *quince* applies also to any of the plants formerly referred to *Cydonia*. See the phrases below.—**Bengal quince,** *Ægle Marmelos*. See *Ægle*.—**Chinese quince,** a species, *Pyrus Cathayensis* (*Cydonia Sinensis*), resembling the Japanese quince, but less ornamental. Its large green egg-shaped fruit can be used to make jelly.—**Japanese quince,** a garden shrub, *Pyrus* (*Cydonia*) *Japonica*, a great favorite, on account chiefly of its abundant early large scarlet or crimson flowers, varying to white. It is well suited for ornamental hedges. The fruit, which resembles a small apple, is inedible, but is sometimes used for making jelly. Also called *japonica* and, locally, *burning bush*. *P. (C.) Maulei*, more lately from Japan, bears abundant smaller orange-scarlet flowers on every twig.—**Portugal quince,** a variety of the common quince, having superior finely colored fruit, but less productive than other sorts.—**Quince-essence.** See *œnanthic ether*, under *œnanthic*.

quince[2]† (kwins), *n.* [ME. *quynce;* appar. an abbr. form of *quinsy, quinancy*.] Scrofula.

For the *quynce*. Take horehownde and columbyne, and sethe it in wyne or ale, and so thereof let hym dryncke fyrste and laste. *MS. Rec. Med.* (*Halliwell.*)

quince[3] (kwins), *n.* Same as *quinze*.

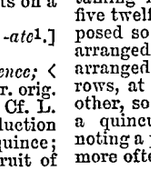
quincentenary (kwin-sen'te-nā-rī), *a.* and *n.* [Irreg. < L. *quin(que)*, five, + *centenarius*, consisting of a hundred: see *centenary*.] I. *a.* Relating to or consisting of five hundred, especially five hundred years.

II. *n.* 1. That which consists of or comprehends five hundred.—2. A five-hundredth anniversary.

It saves us from the reproach of having allowed the *quincentenary* of the Canterbury Pilgrimage to pass by utterly unnoticed. *The Academy*, Nov. 24, 1888, p. 331.

quince-tree (kwins'trē), *n.* The tree that bears the quince, *Pyrus Cydonia*. See *quince*[1].

quince-wine (kwins'wīn), *n.* A drink made of the fermented juice of the quince.



quinch (kwinch), *v. i.* [A var. of *quitch*[1], appar. simulating *winch* for *wince*.] 1†. To move; stir; wince; flounce.

But Cato did abid it a long time, and never *quinched* for it, nor shewed countenance of fear.
North, tr. of Plutarch, p. 638.

Nee parte of all that realme shall be able or dare see much as to *quinche*. *Spenser*, State of Ireland.

2. To make a noise. *Halliwell.* [Prov. Eng.]

quincuncial (kwin-kun'shal), *a.* [= F. *quinconcial* = It. *quinconciale*, < L. *quincuncialis*, containing five twelfths, < *quincunx*, five twelfths: see *quincunx*.] Disposed so as to form a quincunx; arranged in a set of five; also, arranged in two sets of oblique rows, at right angles to one another, so that five together form a quincunx; in *bot.*, sometimes noting a pentastichous arrangement of leaves; more often noting an estivation.

Quincuncial arrangement.

Now for the order of setting trees either in groves, hopyards, or vineyards, we ought to follow the usuall manner of chequer row called *quincuntiall*.
Holland, tr. of Pliny, vii. 11.

Quincuncial estivation, the imbricated arrangement of five petals in a bud, in which the first and second are external, the fourth and fifth internal, and the third has one margin external, overlying the fifth, the other internal, overlapped by the first.—**Quincuncial map-projection.** See *projection*.

quincuncially (kwin-kun'shal-i), *adv.* In a quincuncial manner or order.

It is no wonder that this quincunciall order was first and still affected as gratefull unto the eye: for all things are seen *quincuncially*. *Sir T. Browne*, Urn-burial, iv.

quincunx (kwin'kungks), *n.* [= F. *quinconce* = Pg. *quincunce*, a quincunx; < L. *quincunx* (*quincunc-*), five twelfths (of anything), < *quinque*, = E. *five*, + *uncia*, a twelfth part: see *five* and *ounce*[1].] 1. An arrangement of five objects in a square, one at each corner and one in the middle (thus, ⁘); especially, an arrangement, as of trees, in such squares continuously. A collection of trees in such squares forms a regular grove or wood, presenting parallel rows or alleys in different directions, according to the spectator's position. See diagram under *quincuncial*.

Before them obliquely, in order of *quincunx*, were pits dug three foot deep. *Bladen*, tr. of Cæsar's Com., vii. 31.

The single *quincunx* of the Hyades upon the neck of Taurus. *Sir T. Browne*, Urn-burial, iii.

2. In *bot.*, same as *quincuncial estivation* (which see, under *quincuncial*).—3. In *astrol.*, the position of planets when distant from each other five signs or 150°.

quincunxial (kwin-kungk'shal), *a.* An erroneous form of *quincuncial*.

In *quincunxial* æstivation . . . two of the five pieces are exterior. *Le Maout and Decaisne*, Botany (trans.), p. 86.

quindecagon (kwin-dek'ȧ-gon), *n.* [< L. *quinque*, = E. *five*, + E. *decagon*.] In *geom.*, a plane figure with fifteen sides and fifteen angles.

quindecemvir (kwin-dē-sem'vėr), *n.* [Altered in the second vowel to suit *decemvir;* < L. *quindecimvir*, < *quindecim*, = E. *fifteen* (see *quindecim*), + *vir*, a man.] In *Rom. antiq.*, one of a body of fifteen magistrates who, at the close of the republic, had charge of the Sibylline books. They succeeded the board of the decemvirs (*decemviri sacris faciundis*, or *decemviri sacrorum*), who were keepers of the Sibylline books from 367 B. C., and who continued the functions of the duumvirs, or two patricians of high rank who kept the books under the kings. It was the duty of the quindecemvirs to celebrate the festival of Apollo and the secular games, and they were all regarded as priests of Apollo.

quindecemvirate (kwin-dē-sem'vi-rāt), *n.* [< L. *quindecimviratus*, the dignity of a quindecemvir, < *quindecimviri*, the quindecemvirs: see *quindecemvir*.] The body or office of the quindecemvirs.

quindecim† (kwin'dē-sim), *n.* [< LL. *quindecimus* (L. *quintus decimus*), fifteenth, < L. *quindecim*, fifteen, < *quinque*, = E. *five*, + *decem* = E. *ten*.] A fifteenth part of anything.

Ouer and beside hath also beene declared what vnreasonable collections of monie from time to time, as *quindecims*, subsidies, tenths, &c. *Foxe*, Martyrs, p. 208, an. 1257.

quindecima (kwin-des'i-mȧ), *n.* [ML., fem. of *quindecimus*, fifteenth: see *quindecim*.] 1. In

music, the interval of a fifteenth, or double octave.—2. An organ-stop two octaves above the foundation-stops.

quindenet, *n.* [ME. *quyndene*, < OF. *quindesme* (?), < ML. *quindecimus*, fifteenth: see *quindecim*. Cf. ML. *quindena*, a period of fifteen days.] The fifteenth day, counting inclusively from a certain date.

And that done, he toke his leue of seynt Denys about ye *quyndene* of Pasche. *Fabyan*, Chron., II., an. 1347.

quindismet, *n.* Same as *quindecim*.

In the parliament of 6 R. 2. pars 2 num. 11. the bishop of Norwich offered before the king and lords that, if the king would grant him the *quindisme* and disme of the laity and clergy . . . *Prynne*, Treachery and Disloyalty, iv. 7.

quine[1], *n.* A dialectal (Scotch) form of *queen*.

quine[2]†, *n.* [< ME. *quyne, coine, coin*, < OF. *coin*, F. *coing* = Pr. *codoing*, m., = It. *cotogna*, f., a quince, < L. *Cydonium, Cydoneum* (sc. *malum*), < Gr. Κύδωνι (sc. μῆλον), a quince, lit. 'apple of Cydonia,' < Κύδωνία, Κυδωνίς, Cydonia, an ancient Greek city of Crete: see *Cydonia*. Cf. *quince*[1], *quiddany*.] A quince.

quine[3]†, *adv.* An obsolete dialectal form of *whence*.

quinet (kwī'net), *n.* [< OF. *quignet, quoignet, coignet, enignet*, a little wedge, dim. of *quoin, coin*, a wedge: see *coin*[1], *coign*.] A wedge. *Halliwell.* [Prov. Eng.]

quinia (kwin'i-ạ), *n.* [NL., < *quina*, q. v.] An older name for *quinine*.

quinible (kwin'i-bl), *n.* [ME. *quynible*, ult. < L. *quinque* = E. *five*. Cf. *quatrible*.] In *music*, an interval of a fifth; a descant sung at the fifth.

Therto he song som tyme a loud *quynyble*.
Chaucer, Miller's Tale, l. 146.

To sing a *quinible* means to descant by singing fifths on a plain-song.
Chappell, Popular Music of the Olden Time, p. 34.

quinible (kwin'i-bl), *v. i.* [< *quinible*, *n.*] In *music*, to sing a descant at the interval of a fifth. See *diaphony*, 2.

quinic (kwin'ik), *a.* [< *quina* + *-ic*.] Same as *kinic*.

quinicia (kwi-nish'iạ), *n.* [NL., < *quinic*, q. v.] Same as *quinicine*.

quinicine (kwin'i-sin), *n.* [< *quinic* + *-ine*[2].] The isomeric alkaloid into which quinine or quinidine is converted by heat, differing from them in being dextrogyrate and amorphous.

quinidamine (kwin-i-dam'in), *n.* [< *quina* + *-id-* + *amine*.] An alkaloid of cinchona barks, with the formula $C_{19}H_{24}N_2O_2$. Also called *cinchonamine*.

quinidine (kwin'id-in), *n.* [< *quina* + *-id-* + *-ine*[2].] A base ($C_{20}H_{24}N_2O_2$) isomeric with quinine, and occurring associated with it in some cinchona barks. It crystallizes in large transparent prisms, almost insoluble in water, but tolerably soluble in alcohol. It neutralizes acids, and forms salts with them which much resemble the corresponding quinine salts, but crystallize more easily. Their action on the system is similar to that of quinine, but less powerful. Also called *conchinine*.

quinine (kwin'ēn or ki-nēn' or kwī'nīn), *n.* [= F. *quinine* = Sp. Pg. *quinina* = It. *chinina, chinino*, < NL. *quinina*, quinine, < *quina*, Peruvian bark: see *quina* and *-ine*[2].] A very important vegetable alkali ($C_{20}H_{24}N_2O_2$), obtained from the bark of several trees of the genus *Cinchona*. It is colorless, inodorous, and extremely bitter. With acids it forms crystallizable salts, the most important of which is the sulphate, extensively used in medicine. It is antiperiodic, antipyretic, antineuralgic, and tonic.

quininism (ki-nēn'izm), *n.* [< *quinine* + *-ism*.] Same as *cinchonism*.

quiniretin (kwin-i-ret'in), *n.* [< *quinine;* second element obscure.] The flocculent precipitate deposited in solutions of quinine by the action of sunlight. It has the same chemical composition as quinine, but no alkaloidal properties.

quinisext (kwin'i-sekst), *a.* [< L. *quini*, five each, five, + *sextus*, sixth.] Bearing some relation to five and six or to the fifth and sixth. —**Quinisext Council.** See *Constantinopolitan Council*, under *Constantinopolitan*.

quinism (kwī'nizm), *n.* [< *quina* + *-ism*.] Same as *cinchonism*.

quink-goose (kwingk'gös), *n.* [< *quink* (imitative) + *goose*.] The brent-goose, *Berniela brenta*. See cut under *brent-goose*.

quinnat (kwin'at), *n.* [The native name.] The king-salmon, *Oncorhynchus quinnat*. Also called *chavicha* and *equinna*. See *Oncorhynchus* and *salmon*.

quinoa (kē'nō-ạ), *n.* [Also *quinua;* Peruv.] An annual herb, *Chenopodium Quinoa*, native in Peru, Chili, etc., and there much cultivated for its farinaceous seeds. These afford a meal which can be made into cakes, but not into leavened bread. A favorite preparation is a kind of broth or gruel called *carapulgue*, prepared from these seeds and seasoned with red pepper, etc. The quinoa is somewhat grown in England, the seed being eaten by fowls, and the leaves used like spinach. The plant resembles some common species of goosefoot or pigweed. A variety having white seeds is the one yielding food; the red seeds of another variety are used in decoction as an application for sores and bruises, and their husk has emetic and antiperiodic properties. Also called *petty-rice*.

They [the Incas of Peru] had also Maiz, *Quinua*, Pulse, Fruit-trees, with Fruit on them all, of Gold and Silver resembling the natural.
S. Clarke, Geog. Descr. (1671), p. 281.

quinoline (kwin'ō-lin), *n.* [< *quina* + *-ol-* + *-ine*[2].] Same as *chinoline*.—**Quinoline blue**, a coal-tar color formerly used in dyeing: it is very fugitive to light.

quinologist (kwi-nol'ō-jist), *n.* [< *quinolog-y* + *-ist*.] One who is versed in quinology.

quinology (kwi-nol'ọ-ji), *n.* [< NL. *quina* + Gr. *-λογία*, < *λέγειν*, speak, say.] The sum of scientific knowledge concerning quinine and other cinchona alkaloids.

quinone (kwin'ōn), *n.* [< *quina* + *-one*.] 1. The general name applied to all benzene derivatives in which two hydrogen atoms are replaced by two oxygen atoms.—2. Specifically, a compound obtained by distilling kinic acid with diluted sulphuric acid and peroxid of manganese, or by the oxidation of aniline with chromic acid. It is in the form of a sublimate of fine golden-yellow crystals, slightly soluble in cold water and very volatile, and has a piercing irritating odor in the state of vapor. Also written *kinone*.

quinquagenarian (kwin″kwạ-je-nā'ri-ạn), *a.* and *n.* [= F. *quinquagénaire* = Sp. *quincuagenario* = It. *quinquagenario*, < L. *quinquagenarius*, consisting of fifty, < *quinquageni*, fifty each, < *quinquaginta*, fifty, < *quinque* = E. *five*.] **I.** *a.* Being fifty years of age.

II. *n.* A person aged fifty or between fifty and sixty.

Dancers of fifty are a very different sort of *quinquagenarians* from sitters of fifty. *The New Mirror* (1843), II. 34.

quinquagesima (kwin-kwạ-jes'i-mạ), *n.* [L., fem. of *quinquagesimus*, fiftieth, < *quinquaginta*, fifty: see *fifty*.] A period of fifty days.—**Quinquagesima Sunday**, the Sunday immediately preceding Ash Wednesday, being the fiftieth day before Easter (both inclusive), and the last Sunday before Lent; Shrove Sunday.

quinquangular (kwin-kwang'gū-lạr), *a.* [< L. *quinquangulus*, five-cornered, < L. *quinque*, = E. *five*, + *angulus*, corner, angle: see *angle*[3].] Having five angles.

quinquarticular (kwin-kwär-tik'ū-lạr), *a.* [< L. *quinque*, = E. *five*, + *articulus*, joint, article.] Consisting of or relating to five articles.—**Quinquarticular controversy**, the controversy between the Arminians and the Calvinists on the "five points." See *the Five Articles and the Five Points*, under *article*.

You may perhaps be able to grapple with the difficulties of the *quinquarticular controversy* without discredit to yourselves. *Bp. Horsley*, Charge, Aug., 1800.

quinque-angled (kwin-kwē-ang'gld), *a.* [< L. *quinque*, = E. *five*, + E. *angled*.] Quinquangular.

quinquecapsular (kwin-kwē-kap'sụ-lạr), *a.* [< L. *quinque*, = E. *five*, + *capsula*, capsule.] In *bot.* and *zoöl.*, having five capsules.

quinquecostate (kwin-kwē-kos'tāt), *a.* [< L. *quinque*, = E. *five*, + *costa*, a rib.] In *zoöl.* and *bot.*, having five ribs or costæ, in any sense.

quinquedentate (kwin-kwē-den'tāt), *a.* [< L. *quinque*, = E. *five*, + *den(t-)s* = E. *tooth:* see *dentate*.] In *bot.* and *zoöl.*, having five teeth or serrations of any kind.

quinquedentated (kwin-kwē-den'tā-ted), *a.* [< *quinquedentate* + *-ed*[2].] Same as *quinquedentate*.

quinquedigitate (kwin-kwē-dij'i-tāt), *a.* [< L. *quinque*, = E. *five*, + *digitus*, finger: see *digitate*.] Having five fingers or toes; pentadactyl.

quinquefarious (kwin-kwē-fā'ri-us), *a.* [< L. *quinque*, = E *five*, + *-farius*, as in *bifarious*, etc.] 1. In *bot.*, disposed in five vertical ranks. *Gray.* —2. In *zoöl.*, disposed or arranged in five sets, rows, or series; quinqueserial; pentastichous.

quinquefid (kwin'kwē-fid), *a.* [< L. *quinque*, = E. *five*, + *findere* (√ *fid*), cleave, split.] In *bot.*, cleft into five segments. See *cleft*[2], 2.

quinquefoliate (kwin-kwē-fō'li-āt), *a.* [< L. *quinquefolius*, five-leaved (< *quinque*, = E. *five*, + *folium* = Gr. *φύλλον*, leaf), + *-ate*[1].] In *bot.*, having five leaves, or, more commonly but less properly, five leaflets.

quinquefoliated (kwin-kwē-fō'li-ā-ted), *a.* [< *quinquefoliate* + *-ed*[2].] Same as *quinquefoliate*.

quinquefoliolate (kwin-kwē-fō'li-ō-lāt), *a.* [< L. *quinque*, = E. *five*, + NL. *foliolum*, a leaflet: see *foliolate*.] In *bot.*, having five leaflets: said of compound leaves.

quinquegrade (kwin'kwē-grād), *a.* [< L. *quinque*, = E. *five*, + *gradus*, degree: see *grade*[1].] In *music*, consisting of five tones.—**Quinquegrade scale.** Same as *pentatonic scale* (which see, under *scale*).

quinqueliteral (kwin-kwē-lit'ẹ-rạl), *a.* [< L. *quinque*, = E. *five*, + *littera, litera*, letter: see *literal*.] Consisting of five letters.

quinquelobate (kwin-kwē-lō'bāt), *a.* [< L. *quinque*, = E. *five*, + NL. *lobus*, lobe: see *lobate*.] In *bot.* and *zoöl.*, having five lobes.

quinquelobed (kwin'kwē-lōbd), *a.* [< L. *quinque*, = E. *five*, + E. *lobe* + *-ed*[2].] Same as *quinquelobate*.

quinquelocular (kwin-kwē-lok'ū-lịr), *a.* [< L. *quinque*, = E. *five*, + *loculus*, a cell: see *locular*.] In *zoöl.* and *bot.*, having five loculi, cavities, or cells.

quinquenerved (kwin'kwē-nėrvd), *a.* [< L. *quinque*, = E. *five*, + *nervus*, nerve, + *-ed*[2].] Same as *quintuplinerved*.

quinquennalia (kwin-kwe-nā'li-ạ), *n. pl.* [L., neut. pl. of *quinquennalis*, that takes place every fifth year: see *quinquennial*.] In *Rom. antiq.*, public games celebrated every fifth year. See *quinquennial*, *n.*, 2.

quinquenniad (kwin-kwen'i-ad), *n.* [< L. *quinquennium*, a period of five years (see *quinquennium*), + *-ad*[1].] A period of five years.

So sleeping, so aroused from sleep
Thro' sunny decads new and strange,
Or gay *quinquenniads*, would we reap
The flower and quintessence of change.
Tennyson, The Day-Dream, L'Envoi.

quinquennial (kwin-kwen'i-ạl), *a.* and *n.* [For **quinquennal*, < L. *quinquennalis*, occurring once in five years, < *quinquennis*, of five years, < *quinque*, = E. *five*, + *annus*, year.] **I.** *a.* 1. Occurring once in five years.—2. Recurring in the fifth year, reckoning both years of occurrence; occurring every fourth year. See II., 2.

With joyous banquets had he crown'd
The great *quinquennial* festival of Jove.
West, tr. of Pindar's Nemean Odes, xi.

3. Lasting five years.

II. *n.* 1. A period of five years; a quinquenniad; hence, something characterized by such a period or interval, as an anniversary, or a college catalogue.—2. A festival or celebration occurring once in four years; an anniversary in the fifth year. In this sense both the first and last years of the cycle of occurrence were reckoned, as was the invariable system in antiquity. Thus, the Olympian, Pythian, and Isthmian games, all celebrated once in four years, were all quinquennials.

quinquennially (kwin-kwen'i-ạl-i), *adv.* Once in five years; during a period of five years.

quinquennium (kwin-kwen'i-um), *n.* [L., < *quinquennis*, of five years: see *quinquennial*.] A period of five years.

A common form in England consisted of an upright post, on the top of which

Movable Quintain, 14th century.
(From Strutt's "Sports and Pastimes of the People of England.")

was a horizontal bar turning on a pivot; to one end of this a sandbag was attached, to the other a broad board; and it was a trial of skill to strike or tilt at the broad end with a lance, and pass on before the bag of sand could whirl round and strike the tilter on the back.

My better parts
Are all thrown down, and that which here stands up
Is but a *quintain*, a mere lifeless block.
Shak., As you Like It, i. 2. 263.

The *quintain* in its original state was not confined to the exercise of young warriors on horseback; it was an object of practice for them on foot, in order to acquire strength and skill in assaulting an enemy with their swords, spears, and battle axes.
Strutt, Sports and Pastimes, p. 183.

2. The game or exercise of tilting at the quintain.

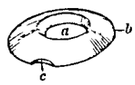
(*e*) In *gun.*, a wooden wedge used to hold a gun at a desired elevation.—**Cantick-quoin.** Same as *canting-coin*.

quoin (koin), *v. t.* [< *quoin*, *n.*] To wedge, steady, or raise with quoins, as a stone in building a wall, the types in a chase, etc.: generally with *up*. See *quoin*, *n.*, 2.

"They [flat stones] are exactly what I want for my wall —just the thing for *quoining up*." What Mr. Grey meant by *quoining up* was filling in the spaces under the large stones when they did not fit exactly to those below them, and thus wedging them up to their proper level.
Jacob Abbott, Wallace, vii.

quoin-post (koin'pōst), *n.* In *hydraul. engin.*, the heel-post of a lock-gate. *E. H. Knight.*

quoit (kwoit), *v.* [Also *coit;* < ME. *coiten, coyten*, < OF. *coiter, coitier, quoitier, cuiter*, press, push, hasten, incite, prob. < L. *coactare*, force, freq. of *cogere*, compel: see *cogent*. Cf. *quat*[1]; cf. also *quail*[2], ult. < L. *coagulare*.] I. *trans.* To throw as a quoit; throw.



Quoit him down, Bardolph. *Shak.*, 2 Hen. IV., ii. 4. 206.

Hundreds of tarred and burning hoops were skilfully *quoited* around the necks of the soldiers, who struggled in vain to extricate themselves from these fiery tuffs.
Motley, Dutch Republic, II. 468.

II. *intrans.* To throw quoits; play at quoits.

For Python slain, he Pythian games decreed,
Where noble youths for mastership should strive,
To *quoit*, to run, and steeds and chariots drive.
Dryden, tr. of Ovid's Metamorph., i. 600.

quoit (kwoit), *n.* [Also *coit*, also dial. *quait;* < ME. *coite, coyte;* cf. *quoit, v.*] 1. A flattish ring of iron, used in playing a kind of game. It is generally from 8¼ to 9½ inches in external diameter, and between 1 and 2 inches in breadth, convex on the upper side and slightly concave on the under side, so that the outer edge curves downward, and is sharp enough to cut into soft ground.

Quoit
a, central opening; *b*, marginal edge, which, when the quoit is skilfully pitched, cuts into the earth; *c*, thumb-notch, by which the thrower is enabled to give the quoit a spinning motion on an axis at right angles with the marginal edge.

He willed us also himselfe to sit downe before him the distance of a *quoit's* cast from his tent.
Hakluyt's Voyages, I. 355.

'Tis not thine to hurl the distant dart,
The *quoit* to toss, the pond'rous mace to wield,
Or urge the race, or wrestle on the field.
Pope, Iliad, xxiii. 713.

Formerly in the country the rustics, not having the round perforated *quoits* to play with, used horse-shoes, and in many places the *quoit* itself, to this day, is called a shoe. *Strutt*, Sports and Pastimes, p. 142.

2. *pl.* The game played with such rings. Two pins, called *hobs*, are driven part of their length into the ground some distance apart; and the players, who are divided into two sides, stand beside one hob, and in regular succession throw their quoits (of which each player has two) as near the other hob as they can. The side which has the quoit nearest the hob counts a point toward game, or, if the quoit is thrown so as to surround the hob, it counts two. The game only slightly resembles the ancient exercise of throwing the discus, which has, however, been often translated by this English word.

A' plays at *quoits* well. *Shak.*, 2 Hen. IV., ii. 4. 266.

The game of *quoits*, or colts, . . . is more moderate, because this exercise does not depend so much upon superior strength as upon superior skill.
Strutt, Sports and Pastimes, p. 141.

3. A quoit-shaped implement used as a weapon of war; a discus. Those used by the Sikhs are of polished steel with sharp edges, and are sometimes richly ornamented with damascening or the like.

quoivest, *n.* Plural of *quoif*, an old form of *coif*.

quo jure (kwō jō'rē). [So called from these words in the writ: L. *quo*, by what, abl. sing. neut. of *qui*, who, which, what; *jure*, abl. sing. of *jus*, law, right.] In *law*, a writ which formerly lay for him who had land wherein another challenged common of pasture time out of mind: it was to compel him to show by what title he challenged it. *Wharton.*

quokt, **quoket**. Obsolete strong preterits of *quake*.

quoll (kwol), *n.* [Australian.] An Australian marsupial mammal, *Dasyurus macrurus*.

quo minus (kwō mī'nus). [So called from these words in the writ: L. *quo*, by which, abl. sing. of *quod*, which, neut. of *qui*, who; *minus*, less: see *minus*.] An old English writ, used in a suit complaining of a grievance which consisted in diminishing plaintiff's resources, as for instance, waste committed by defendant on land from which plaintiff had a right to take wood or hay. The Court of Exchequer, whose original jurisdiction related to the Treasury, acquired its jurisdiction between private suitors by allowing a plaintiff by the use of this writ to allege that, by reason of the defendant's not paying the debt sued for, the plaintiff was less able (quo minus) to discharge his obligations to the crown.

quondam (kwon'dam), *a.* and *n.* [L., formerly, < *quom, cum*, when, + *-dam*, a demonstr. particle.] I. *a.* Having been formerly; former: as, one's *quondam* friend; a *quondam* schoolmaster.

This is the *quondam* king. *Shak.*, 3 Hen. VI., iii. 1. 23.

Farewell, my hopes! my anchor now is broken:
Farewell, my *quondam* joys, of which no token
Is now remaining.
Beau. and Fl., Woman-Hater, iii. 2.

II. *n.* A person formerly in an office; a person ejected from an office or a position.

Make them *quondams*, out with them, cast them out of their office. *Latimer*, 4th Sermon bef. Edw. VI., 1549.

As yet there was never learned man, or any scholar or other, that visited us since we came into Bocardo, which now in Oxford may be called a college of *quondams*.
Bp. Ridley, in Bradford's Letters (Parker Soc., 1853), II. 84.

quondamship† (kwon'dam-ship), *n.* [< *quondam* + *-ship.*] The state of being a quondam.

As for my *quondamship*, I thank God that he gave me the grace to come by it by so honest a means.
Latimer, 4th Sermon bef. Edw. VI., 1549.

Quoniam (kwō'ni-am), *n.* [So called from the initial word in the L. version: L. *quoniam*, since now, although, < *quom, cum*, when, since, + *jam*, now.] 1. In the *Rom. Cath. liturgy:* (*a*) A part of the Gloria. (*b*) A musical setting of the words of the above.—2†. [*l. c.*] A sort of drinking-cup.

Out of can, *quoniam*, or jourdan.
Healy, Disc. of New World, p. 69. (*Nares.*)

quont, *n.* See *quant*.

quookt, **quooket**. Obsolete preterits and past participles of *quake*.

quorlt, *v.* A Middle English form of *whirl*.

quorum (kwō'rum), *n.* [Formerly also *corum;* < L. *quorum*, 'of whom,' gen. pl. of *qui*, who: see *who*. In commissions, etc., written in Latin, it was common, after mentioning certain persons generally, to specify one or more as always to be included, in such phrases as *quorum unum A. B. esse volumus* (of whom we will that A. B. be one); such persons as were to be in all cases necessary therefore constituted a quorum.] 1. In England, those justices of the peace whose presence is necessary to constitute a bench. Among the justices of the peace it was formerly customary to name some eminent for knowledge and prudence to be of the quorum; but the distinction is now practically obsolete, and all justices are generally "of the quorum."

He that will not cry "amen" to this, let him live sober, seem wise, and die o' the *corum*.
Beau. and Fl., Scornful Lady, i. 2.

I must not omit that Sir Roger is a justice of the *quorum*.
Addison, Spectator, No. 2.

2. The number of members of any constituted body of persons whose presence at or participation in a meeting is required to render its proceedings valid, or to enable it to transact business legally. If no special rule exists, a majority of the members is a quorum; but in a body of considerable size the quorum may by rule be much less than a majority, or in a smaller one much more. Forty members constitute a quorum or "house" in the British House of Commons.

In such cases, two thirds of the whole number of Senators are necessary to form a *quorum*
Calhoun, Works, I. 175.

Others [regulations] prescribe rules for the removal of unworthy members, and guard against the usurpation of individuals by fixing a *quorum*.
Stubbs, Const. Hist., § 367.

3†. Requisite materials.

Here the Dutchmen found fullers' earth, a precious treasure, whereof England hath, if not more, better than all Christendom besides; a great commodity of the *quorum* to the making of good cloath.
Fuller, Ch. Hist., III. ix. 12. (*Davies.*)

Quorum of Twelve, or **Quorum**, a name given collectively to the twelve apostles in the Mormon Church. See *Mormon*[2].

quost†, *n.* An obsolete spelling of *coast*.

quota (kwō'tä), *n.* [< It. *quota*, a share, < L. *quota* (sc. *pars*), fem. of *quotus*, of what number, how many, < *quot*, how many, as many as, akin to *qui*.] A proportional part or share; share or proportion assigned to each; any required or proportionate single contribution to a total sum, number, or quantity.

They never once furnished their *quota* either of ships or men *Swift*, Conduct of the Allies.

The power of raising armies, by the most obvious construction of the articles of the confederation, is merely a power of making requisitions upon the states for *quotas* of men. *A. Hamilton*, Federalist, No. 22.

quotability (kwō-tạ-bil'i-ti), *n.* [< *quotable* + *-ity* (see *-bility*).] Capability of or fitness for being quoted; quotable quality.

It is the prosaicism of these two writers [Cowper and Moore] to which is owing their especial *quotability*.
Poe, Marginalia, xxviii. (*Davies.*)

quotable (kwō'tạ-bl), *a.* [< *quote* + *-able.*] Capable of or suitable for being quoted or cited.

Mere vividness of expression, such as makes *quotable* passages, comes of the complete surrender of self to the impression, whether spiritual or sensual, of the moment.
Lowell, Among my Books, 1st ser., p. 176.

quotableness (kwō'tạ-bl-nes), *n.* Quotability.
Athenæum, Nov. 24, 1888, p. 693.

quotably (kwō'tạ-bli), *adv.* So as to be quoted; in a quotable manner.

All qualities of round coal prices are weak, though not *quotably* lower. *The Engineer*, LXV. 513.

quotation (kwō-tā'shọn), *n.* [< *quote* + *-ation.*] 1. The act of quoting or citing.

Classical *quotation* is the parole of literary men all over the world. *Johnson*, in Boswell, an. 1781.

Emerson . . . believed in *quotation*, and borrowed from everybody, . . . not in any stealthy or shame-faced way, but proudly *O. W. Holmes*, Emerson, xii.

2. That which is quoted; an expression, a statement, or a passage cited or repeated as the utterance of some other speaker or writer; a citation.

When the *quotation* is not only apt, but has in it a turn of wit or satire, it is still the better qualified for a medal, as it has a double capacity of pleasing.
Addison, Ancient Medals, iii.

3. In *com.*, the current price of commodities or stocks, published in prices-current, etc.

A *quotation* of price such as appears in a daily price list is, if there has been much fluctuation, only a very rough guide to the actual rates of exchange that have been the basis of the successive bargains making up the day's business. *Encyc. Brit.*, XXII. 465.

4. [Abbr. of *quotation-quadrat.*] In *printing*, a large hollow quadrat, usually of the size 3 × 4 picas, made for the larger blanks in printed matter. [U. S.] = Syn. 2. Extract. See *quote.*

quotational (kwō-tā'shọn-al), *a.* [< *quotation* + *-al.*] Of or pertaining to quotations; as a quotation.

quotationist (kwō-tā'shọn-ist), *n.* [< *quotation* + *-ist.*] One who makes quotations.

Considered not altogether by the narrow intellectuals of *quotationists* and common places.
Milton, Divorce, To the Parlament.

quotation-mark (kwō-tā'shọn-märk), *n.* One of the marks used to note the beginning and the end of a quotation. In English, quotation marks generally consist of two inverted commas at the beginning and two apostrophes at the end of a quotation, but a single comma and a single apostrophe are also used especially in Great Britain. In the former case the marking of a quotation within a quotation is single, in the latter, properly double. Single quotation-marks are often used, as in this work, to mark a translation. Quotation-marks for printing in French, German, etc., are types specially cut and cast for this use, and in some fonts for printing in English characters have been made for the beginning of quotations corresponding in reverse to the apostrophes at the end.

quote (kwōt), *v.*; pret. and pp. *quoted*, ppr. *quoting.* [Formerly also *cote*; < OF. *quoter, coter*, F. *coter*, letter, number, quote (in commercial use), < ML. *quotare*, mark off into chapters and verses, give a reference, < L. *quotus*, of what number, how many, < *quot*, as many as.] I. *trans.* 1†. To note down; set down in writing; hence, in general, to note; mark; observe.

A fellow by the hand of nature mark'd,
Quoted and sign'd to do a deed of shame.
Shak., K. John, iv. 2. 222.

I am sorry that with better heed and judgement
I had not *quoted* him *Shak.*, Hamlet, ii. 1. 112.

Wherfore I was desirous to see it again and to read it with more deliberation and, being sent to me a second time, it was thus *quoted* in the margent as ye see.
Foxe, Martyrs, p. 1110, an. 1543.

2. To adduce from some author or speaker; cite, as a passage from some author or a saying of some speaker; name, repeat, or adduce as the utterance of some other person, or by way of authority or illustration; also, to cite the words of: as, to *quote* a passage from Homer; to *quote* Shakspere or one of his plays; to *quote* chapter and verse.

He *quoted* texts right upon our Saviour, though he expounded them wrong. *Atterbury.*

As long as our people *quote* English standards they dwarf their own proportions. *Emerson*, Conduct of Life.

3. In *writing* or *printing*, to inclose within quotation-marks; distinguish as a quotation or as quoted matter by marking: as, the dialogue in old books is not *quoted*.—4. In *com.*, to name, as the price of stocks, produce, etc.; name the current price of.—**Quoted matter**, in *printing*, composed types that are inclosed by quotation-marks: thus, " ".—Syn. 2. *Quote, Cite, Adduce, Recite.* When we *quote* or *recite*, we repeat the exact words; when we *cite* or *adduce*, we may only refer to the passage without quoting it, or we may give the substance of the passage. We may *quote* a thing for the pleasure that we take in it or for any other reason: as, to *quote* a saying of Izaak Walton's. We *cite* or *adduce* a thing in proof of some assertion or doctrine: as, to *cite* an authority in court; to *adduce* confirmatory examples. *Adduce*, besides being broader in its use, is stronger than *cite*, as to urge in proof. *Recite*, in this connection, applies to the quoting of a passage of some length: as, to *recite* a law; to *recite* the conversation of Lorenzo and Jessica at Belmont. It generally implies that the passage is given orally from memory, but not necessarily, as a petition *recites*, etc.; the others may be freely used of that which is read aloud or only written.

II. *intrans.* To cite the words of another; make a quotation.

quote (kwōt), *n.* [In def. 1, < OF. *quote;* in other senses < *quote*, *v.*] 1†. A note upon an author.

O were thy margents cliffes of itching lust,
Or *quotes* to chalke out men the way to sin,
Then were there hope that multitudes wold thrust
To buy thee. *C. Tournour*, Transformed Metamorpho[sis], Author to his Booke.

2. A quotation, or the marking of a quotation.

This column of "Local Notes and Queries" . . . has been succeeded by a column entitled "Notes and *Quotes*."
N. and Q., 7th ser., VII. 505.

3. A quotation-mark: usually in the plural. [Colloq.]—4†. A quotient. [Rare.]

quoteless (kwōt'les), *a.* [< *quote* + *-less.*] Not capable or worthy of being quoted; unquotable.
Wright.

quoter (kwō'tėr), *n.* One who quotes or cites the words of an author or a speaker.

Next to the originator of a good sentence is the first *quoter* of it. *Emerson*, Quotation and Originality.

quoteworthy (kwōt'wėr'ᵺi), *a.* Deserving of quotation. [Rare.]

In Horne's "Spirit of the Age" are some *quoteworthy* remarks. *The New Mirror* (N. Y., 1843), III.

quoth (kwōth). Preterit of *quethe.* [Obsolete or archaic.]

"Good morrow, fool," *quoth* I. "No, sir," *quoth* he,
"Call me not fool till heaven hath sent me fortune."
Shak., As you Like It, ii. 7. 18.

Quoth the raven, "Nevermore." *Poe*, The Raven.

quotha (kwō'ᵺä), *interj.* [For *quoth a*, and that for *quoth he, a* being a corruption of *he*: see a^6.] Forsooth! indeed! originally a parenthetical phrase used in repeating the words of another with more or less contempt or disdain.

Here are ye clavering about the Duke of Argyle and this man Martingale gaun to break on our hands, and lose us gude sixty pounds—I wonder what duke will pay that, *quotha*. *Scott*, Heart of Mid-Lothian, xxiv.

quotidian (kwō-tid'i-ạn), *a.* and *n.* [< ME. *cotidien*, < OF. *quotidien, cotidien*, F. *quotidien* = Pr. *cotidian, cotedian* = Sp. *cotidiano* = Pg. It. *quotidiano*, < L. *quotidianus, cottidianus*, daily, < *quotidie, cottidie, cotidie*, daily, < *quot*, as many as, + *dies*, day: see *dial.*] I. *a.* Daily; occurring or returning daily: as, a *quotidian* fever.

Common and *quotidian* infirmities that so necessarily attend me. *Sir T. Browne*, Religio Medici, ii. 7.

Like the human body, with a *quotidian* life, a periodical recurrence of ebbing and flowing tides.
Gladstone, Might of Right, p. 173.

Double quotidian fever. See *fever*[1].

II. *n.* 1. Something that returns or is expected every day; specifically, in *med.*, a fever whose paroxysms return every day.

He seems to have the *quotidian* of love upon him.
Shak., As you Like it, iii. 2. 383.

A disposition which to his he finds will never cement, a *quotidian* of sorrow and discontent in his house.
Milton, Divorce, ii. 16.

2†. A cleric or church officer who does daily duty.—3†. Payment given for such duty.

quotient (kwō'shent), *n.* [= F. *quotient;* with accom. term. *-ent*, < L. *quoties, quotiens*, how often, how many times, < *quot*, how many, as many as.] In *math.*, the result of the process of division; the number of times one quantity or number is contained in another. See *division*, 2.—**Differential quotient.** Same as *differential coefficient* (which see, under *coefficient*).

quotiety (kwō-tī'e-ti), *n.* [< L. *quoties*, how often (see *quotient*) + *-e-ty.*] The proportionate frequency of an event.

quotity (kwot'i-ti), *n.* [< L. *quot*, how many, + *-i-ty.*] 1. The number of individuals in a collection.—2. A collection considered as containing a number of individuals. *Carlyle*, French Rev., I. ii.

quotqueant, *n.* A corruption of *cotquean.*

Don *Quot quean*, Don Spinster! wear a petticoat still, and put on your smock a' Monday.
Fletcher (and another), Love's Cure, ii. 2.

quotum (kwō'tum), *n.* [L., neut. of *quotus*, of what number, how many, < *quot*, how many, as many as.] A quota; a share; a proportion. [Rare.]

The number of names which are really formed by an imitation of sound dwindles down to a very small *quotum* if cross-examined by the comparative philologist.
Max Müller.

quo warranto (kwō wo-ran'tō). [So called from these words in the writ: L. *quo*, by what (abl. sing. neut. of *quis*, who, which, what); ML. *warranto*, abl. of *warrantum*, warrant: see *warrant.*] In *law*, a writ calling upon a person or body of persons to show by what warrant they exercise a public office, privilege, franchise, or liberty. It is the remedy for usurpation of office or of corporate franchises, etc.—**Information or action in the nature of a quo warranto**, a statement of complaint by a public prosecutor or complainant to the court: now used in many jurisdictions in lieu of the ancient writ of *quo warranto.*

Quran, *n.* Same as *Koran.*

quyt, *n.* Same as *quey.* *Halliwell.*

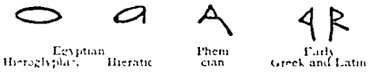
qwhat†, *pron.* A Middle English dialectal form of *what.*



qwichet, *pron.* An obsolete dialectal form of *which.*

qy. An abbreviation of *query.*

1. The eighteenth letter and fourteenth consonant in the English alphabet, representing a character having a like position and value in the alphabets from which the English is derived—the Latin, Greek, and Phenician. Specimens of its early forms (as in the case of the other letters: see especially *A*) are given below:

Egyptian Hieroglyphic. Hieratic. Phenician. Early Greek and Latin.

The tag below the curve by which the English (and the Latin) R differs from the later Greek form P was added to the latter in order to distinguish it from the *p*-sign after this had assumed its present form; the addition was first made on Greek ground, but was abandoned there when the distinction of the *p*- and *r*-signs had become established in another way. The value of the character has always been essentially the same; it represents a continuous sonant utterance made between the tip of the tongue and the roof of the mouth, at a point more or less removed backward from the upper front teeth. The sound is so resonant and continuable as to be nearly akin with the vowels; and it is, in fact, used as a vowel in certain languages, as Sanskrit and some of the Slavic dialects: in normal English pronunciation, however, it never has that value. By its mode of production it is nearly akin with *l*, and *r* and *l* are to a large extent interchangeable with one another in linguistic history. It is often classed as a "liquid," along with *l*, *m*, *n*; less often, but more accurately, as a semivowel, with *l*, *y*, *w*. It also, on no small scale, answers as corresponding sonant (in languages that have no *z*) to *s* as surd, and comes from *s* under sonantizing influences: so in Sanskrit, in Latin (as *ara* from *asa*), and in Germanic (as in our *were*, plural of *was*). In Anglo-Saxon the initial *r* of many words was aspirated (that is, pronounced with an *h* before it), as *hring* (our *ring*); but the aspiration was long ago abandoned, both in pronunciation and in spelling. In Greek initial *r* was always thus aspirated, and the combination was transliterated in Latin by *rh* instead of *hr*: hence the frequency of *rh* in our words of Greek derivation. Moreover, such an *r*, when by inflection or composition made medial, became *rr*, and double *r* was in general viewed as *rrh*: whence that spelling in many of our words (for example, *diarrhea*, *hemorrhage*, *catarrh*, etc.): in recent scientific words and names taken from Greek, the Greek rule and Latin practice as regards the doubling and aspiration of the *r* are often neglected. The mode of production of the *r*-sound itself varies greatly in different languages and dialects. Normally its utterance is combined with a distinct trilling or vibration of the tip of the tongue, in various degrees (the sound is thence often called the "dog's letter," *littera canina*). But in ordinary English pronunciation this vibration is either extremely slight, or, more commonly, altogether wanting; in fact, the tip of the tongue is drawn too far back into the dome of the palate to admit of vibration; the English *r* is a smooth *r*. But further, in many localities, even among the most cultivated speakers, no *r* is ever really pronounced at all unless followed (in the same word, or, if final, in the word following) by a vowel (for example, in *are*, *farther*, pronounced *ah*, *father*); it either simply disappears, or, as after most long vowels, is replaced by a bit of neutral vowel sound, of ə or ɐ; and after such a long vowel, if it comes to be pronounced by the addition of a vowel, it retains the same neutral-vowel sound as transition sound (for example, in *faring*, *fearing*, *pouring*, *during*, *fcing*, *souring*: the pronunciation is indicated in this work by retaining the *r* in the same syllable with the long vowel: thus, fârˈing, fērˈing, etc.). An *r* has a stronger and more frequent influence upon the character of the preceding vowel than any other consonant; hence the reduction to similarity of the vowel-sounds in such words as *pert*, *dirt*, *curt*, *earn*, *myrrh*. If all our *r*'s that are written are pronounced, the sound is more common than any other in English utterance (over seven per cent.); the instances of occurrence before a vowel, and so of universal pronunciation, are only half as frequent. There are localities where the normal vibration of the tip of the tongue is replaced by one of the uvula, making a guttural trill, which is still more entitled to the name of "dog's letter" than is the ordinary *r*: such are considerable parts of France and Germany; the sound appears to occur only sporadically in English pronunciation.

2. As a medieval Roman numeral, 80, and with a line over it (R̄), 80,000.—3. As an abbreviation: (*a*) Of *Rex* or *Regina*, as in George *R.*, Victoria *R.* (*b*) Of *Royal*, as in *R. N.* for *Royal Navy*, *R. A.* for *Royal Academy* or *Academician*, or for *Royal Arch* (in freemasonry). (*c*) Prefixed to a medical prescription (℞), of *recipe*, take. (*d*) [*l. c.*] *Naut.*: (1) In a ship's log-book, of *rain*. (2) When placed against a man's name in the paymaster's book, of *run away*. (*e*) Of *right* (right-hand), as in *R. A.* for *right ascension*, *R. H. E.* for *right second entrance* (on the stage of a theater). (*f*) In *math.*, *r* is generally a radius vector of coördinates, R the radius of a circle, ρ a radius of curvature. (*g*) Of *rupee*.—**The three R's**, reading, writing, and arithmetic: a humorous term. It originated with Sir William Curtis (1752–1829), an eminent but illiterate alderman and lord mayor of London, who, on being asked to give a toast, said, "I will give you the three R's, Riting, Reading, and Rithmetic."

> Parochial education in Scotland had never been confined to *the three R's*. *Times* (London).

rat, *n.* An obsolete form of *roe*[1]. *Chaucer.*

Ra (rä). *n.* [Egypt.] In *Egypt. mythol.*, the sovereign sun-god of the Memphite system, the chief Egyptian personification of the Supreme Being. He was often confounded to some extent with the Theban Amen. In art he was typically represented as a hawk-headed man bearing on his head the solar disk and the royal uræus.

R. A. An abbreviation of (*a*) *Royal Academy*; (*b*) *Royal Academician*; (*c*) *Royal Arch*; (*d*) *right ascension*.

rabbet-plane (rabˈet-plān), *n.* A plane for plowing a groove along the edge of a board. Rabbet-planes are so shaped as to adapt them to peculiar kinds of work. In a *square-rabbet plane* the cutting edge is square across the sole; in a *skew-rabbet plane* the bit is set obliquely

Square Rabbet-plane.

across the sole; in a *side-rabbet plane* the cutter is on the side, not on the sole.

rabbet-saw (rab'et-sâ), *n.* A saw used for making rabbets. Such saws commonly have an adjustable fence or gage to insure the proper placing of the groove.

rabbi (rab'i or rab'ī), *n.*; pl. *rabbis* (rab'iz or rab'īz). [Early mod. E. also *rabbie, rabby;* < ME. *rabi, raby* = OF. *rabbi, rabi, raby,* < LL. *rabbi,* < Gr. ῥαββί, < Heb. (Aramaic) *rabbī*, master, lord (much used in the Targums for all degrees of authority, from king and high priest down to chief shepherd), lit. 'my master' or 'my lord' (= Ar. *rabbi*, 'my master' or 'my lord'); with pronominal suffix *-i*, < *rab*, master, lord (= Ar. *rabb*, master, lord, the Lord, God, cf. *rabba*, mistress), < *rābab*, be great. Cf. *rab*[2], *rabbin, rabban, rabboni.*] Literally, 'my master': a title of respect or of office (of higher dignity than *rab*) given to Jewish doctors or expounders of the law. In modern Jewish usage the term is strictly applied only to those who are authorized by ordination to decide legal and ritualistic questions, and to perform certain designated functions, as to receive proselytes, etc.; but it is given by courtesy to other distinguished Jewish scholars. By persons not Hebrews it is often applied to any one ministering to a Jewish congregation, to distinguish him from a Christian clergyman.

> God liketh nat that *Raby* men us calle.
> *Chaucer*, Summoner's Tale, l. 479.
>
> They said unto him *Rabbi* (which is to say, being interpreted, Master (*i. e.*, Teacher)). John i. 38.

> It is expressly against the laws of our own government when a minister doth serve as a stipendiary curate, which kind of service nevertheless the greatest *rabbins* of that part do altogether follow. *Hooker*, Eccles. Polity, v. 80.
>
> Now he (Salmasius) betakes himself to the fabulous *rabbins* again. *Milton*, Ans. to Salmasius, iii. 85.

rabbinate (rab'in-at), *n.* [< *rabbin* + *-ate*[3].] The dignity or office of a rabbi.

> Gradually the Talmud, which had been once the common pabulum of all education, passed out of the knowledge of the laity, and was abandoned almost entirely to candidates for the *rabbinate*. *Encyc. Brit.*, XIII. 681.

rabbinic (ra-bin'ik), *a.* and *n.* [= F. *rabbinique*, as *rabbin* + *-ic.*] I. *a.* Same as *rabbinical.*

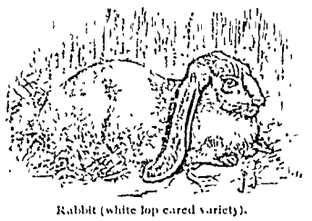
II. *n.* [*cap.*] The language or dialect of the rabbis; the later Hebrew.

rabbinical (ra-bin'i-kal), *a.* [< *rabbinic* + *-al.*] Pertaining to the rabbis, or to their opinions, learning, and language. The term *rabbinical* has been applied to all the Jewish exegetical writings composed after the Christian era.

> We will not buy your *rabbinical* fumes, we have One that calls us to buy of him pure gold tried in the fire.
> *Milton*, On Def. of Humb. Remonst.
>
> It is but a legend I know,
> A fable, a phantom, a show,
> Of the ancient *rabbinical* lore.
> *Longfellow*, Sandalphon.

Rabbinical Hebrew. See *Hebrew.*

rabbinically (ra-bin'i-kal-i), *adv.* In a rabbinical manner; like a rabbi.



rabbinism (rab'in-izm), *n.* [< F. *rabbinisme* = Sp. *rabinismo*; as *rabbin* + *-ism.*] 1. A rabbinic expression or phrase; a peculiarity of the language of the rabbis.—2. A system of religious belief prevailing among the Jews from the return from the Jewish captivity to the latter part of the eighteenth century, the distinguishing feature of which was that it declared the oral law to be of equal authority with the written law of God.

rabbinist (rab'in-ist), *n.* [Also *rabbanist;* < F. *rabbiniste* = Sp. *rabinista*; as *rabbin* + *-ist.*] Among the Jews, one who adhered to the Talmud and the traditions of the rabbins, in opposition to the Karaites, who rejected the traditions. See *rabbinism.*

> Those who stood up for the Talmud and its traditions were chiefly the rabbins and their followers, from whence the party had the name of *rabbinists*.
> *Stackhouse*, Hist. Bible, II. vii. 4.

rabbinite (rab'in-it), *n.* [< *rabbin* + *-ite*[2].] Same as *rabbinist.*

rabbit[1] (rab'it), *n.* [Early mod. E. also *rabbate, rabet;* < ME. *rabet*, rabbit, appar. < OF. **rabot*, indicated in F. dial. *rabotte*, a rabbit; cf. OD. *robbe*, D. *rob*, a rabbit; LG. G. *robbe*, a sea-dog, seal; Gael. *rabaid, rabait*, a rabbit. Cf. F. *râble*, the back of a rabbit, Sp. Pg. *rabo*, tail, hind quarters, Sp. *rabel*, hind quarters. An older E. name is *cony.* The native name for the rabbit is *hare* (including hares and rabbits).] 1. A rodent mammal, *Lepus cuniculus*, of the hare family, *Leporidæ;* a kind of hare notable for burrowing in the ground. This animal is indigenous to Europe, but has been naturalized in many other countries, and is the original of all the domestic breeds. It is smaller than the common hare of Europe, *L. timidus* or *variabilis*, with shorter ears

Rabbit (white lop-eared variety).

and limbs. The natural color is brownish, but in domestication black, gray, white, and pied individuals are found. The ears are naturally erect, but in some breeds they fall; such rabbits are called *lopped* or *lop-eared*, and degrees of lopping of the ears are named *half-lops* and *full-lops*. Rabbits breed in their burrows or warrens, and also freely in hutches: they are very prolific, bringing forth several times a year, usually six or eight at a litter, and in some countries where they have been naturalized they multiply so rapidly as to become a pest, as in Australia for example. The fur is used in the manufacture of hats and for other purposes, and the flesh is esteemed for food.

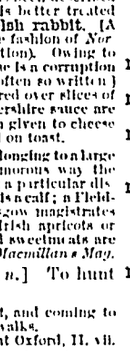
Hence—2. Any hare; a leporid, or any member of the *Leporidæ*. The common gray rabbit or wood-rabbit of the United States is *L. sylvaticus*, also called *cottontail* and *molly cottontail*, a variety of which (or a closely related species) is the sage-rabbit of western North America, *L. artemisia*. The marsh-rabbit is *L. palustris;* the swamp-rabbit of the Southern States is *L. aquaticus*. Various large long-eared and long-limbed hares of western North America are called *jack-rabbits* or *jackass-rabbits*. The South American rabbit or hare is the tapeti, *L. brasiliensis*. See cuts under *cottontail, jack-rabbit*, and *hare.*—**Native rabbit**, in Australia, a long-eared kind of bandicoot, *Macrotis lagotis.*—**Snow-shoe rabbit**, that variety of the American varying hare which is found in the Rocky Mountains. It turns white in winter, and at that season the fur of the feet is very heavy. It has been described as a distinct species, *Lepus bairdi*, but is better treated as a local race of *L. americanus.*—**Welsh rabbit.** [A term of jocular origin, formed after the fashion of *Norfolk capon*, a red herring, etc. (see quotation). Owing to an absurd notion that *rabbit* in this phrase is a corruption of *rarebit* (as if 'a rare bit'), the word is often so written.] Cheese melted with a little ale, and poured over slices of hot toast. Cream, mustard, or Worcestershire sauce are occasionally added. The name has been given to cheese toasted but not entirely melted, and laid on toast.

> *Welsh rabbit* is a genuine slang term, belonging to a large group which describe in the same humorous way the special dish or product or peculiarity of a particular district. For examples . . . an Essex lion is a calf; a Fleet-lane duck is a baked sheep's head; Glasgow magistrates or Norfolk capons are red herrings, Irish apricots or Munster plums are potatoes; Gravesend sweetmeats are shrimps. *Macmillan's Mag.*

rabbit[1] (rab'it), *v. t.* [< *rabbit*[1], *n.*] To hunt or trap rabbits.

> She liked keeping the score at cricket, and coming to look at them fishing or *rabbiting* in her walks.
> *T. Hughes*, Tom Brown at Oxford, II. vii.
>
> "I suppose," pursued Mr. Morley presently, "that you have been indulging in the Englishman's usual recreation of slaughter." "I've been *rabbiting*. If that's what you mean," answered Sir Christopher shortly.
> *W. E. Norris*, Miss Shafto, xiv.

rabbit[2]† (rab'it), *n.* [< OF. (and F.) *rabot*, a plasterers' beater: see *rabbet.*] 1. A wooden implement used in mixing mortar. *Colgrave.*—2. A wooden can used as a drinking-vessel.



> Strong beer in *rabits* and clinking penny cans,
> Three pipes for two pence, and such like trepans.
> *Praise of Yorkshire Ale* (1697), p. 1. (*Halliwell.*)

rabbit[3] (rab'it), *v. t.* [Appar. a corruption of *rabate* (cf. *rabbet*), used as a vague imprecation.] An interjectional imperative, equivalent to *confound.*

> "*Rabbit* the fellow," cries he, "I thought, by his talking so much about riches, that he had a hundred pounds at least in his pocket."
> *Fielding*, Joseph Andrews. (*Latham.*)
>
> *Rabbit* me, I am no soldier. *Scott.*

rabbit-berry (rab'it-ber'i), *n.* The buffalo-berry, *Shepherdia argentea.*

rabbit-brush (rab'it-brush), *n.* A tall shrubby composite plant, *Bigelovia graveolens*, growing abundantly in alkaline soils of western North America, often, like the sage-brush (but at lower elevations), monopolizing the ground over large tracts. It furnishes a safe retreat for the large jack-rabbits of the plains. It is a disagreeably scented plant, with numerous bushy branches which are more or less whitened by a close tomentum, narrow leaves, and yellow flowers. There are 4 or 5 well-marked varieties, differing chiefly in the width of the leaves, in the degree of whiteness, and in size.

Flowering Plant of Rabbit-brush (*Bigelovia graveolens*). *a*, a head; *b*, a flower.

rabbitear (rab'it-ēr), *n.* A long slender oyster; a razorblade.

Ah! ye Jewes, worse than dogges *rabiate*.
Lamentation of Mary Magdalen.

rabiator (rā'bi-ā-tor), *n.* [< ML. *rabiator*, a furious man, < *rabiare*, rave, go mad: see *rabiate*. The Sc. *rubature*, a robber, bully, It. *rubatore*, a robber, < ML. **rubator*, does not seem to be connected.] A furious animal or person; a violent, greedy person. [Scotch.]

rabic (rab'ik), *a.* [< *rabi(es)* + *-ic.*] Of or pertaining to rabies; affected or caused by rabies.

Of eight unvaccinated dogs, six succumbed to the intravenous inoculation of *rabic* matter.
Tyndall, Int. to Lady C. Hamilton's tr. of Life of Pasteur, [p. 40.

In the interval it [a dog] manifests *rabic* symptoms.
Medical News, XLVIII. 223.

rabid (rab'id), *a.* [= OF. *rabi, rabit* = Sp. *rabido* = Pg. It. *rabido*, < L. *rabidus*, mad, furious, < *rabere*, be mad, rage: see *rabies*, and cf. *rage*, *n.*] 1. Furious; raging; mad.

With *rabid* hunger feed upon your kind.
Dryden, tr. of Ovid's Metamorph., xv. 258.

Like *rabid* snakes that sting some gentle child
Who brings them food *Shelley*, Revolt of Islam, v. 7.

Sleep is the sure antidote of insanity, the cure of idiocy, . . . without whose potent anodynes every creature would run *rabid*. *A. B. Alcott*, Table-Talk, p. 71.

2. Specifically — (*a*) Affected with rabies or hydrophobia, as a dog, wolf, horse, or man; hydrophobic; mad. (*b*) Pertaining to rabies: as, *rabid* virus. — 3. Excessively or foolishly intense; rampant: as, a *rabid* Tory; a *rabid* teetotaler.

In the *rabid* desire to say something easily, I scarcely knew what I uttered at all. *Poe*, Tales, I. 289.

rabidity (rā-bid'i-ti), *n.* [< ML. *rabidita(t-)s*, rabidness, < L. *rabidus*, rabid: see *rabid.*] The state of being rabid; rabidness; specifically, rabies. [Rare.]

Although the term hydrophobia has been generally applied to this terrible disease, I have preferred that of rabies, or *rabidity*, as being more characteristic of the chief phenomena manifested by it both in man and the lower animals. *Copland*, Dict. Pract. Med., Rabies, § 2.

I fear that he [Macaulay] is one of those who, like the individual whom he has most studied, will "give up to party what was meant for mankind." At any rate, he must get rid of his *rabidity*. He writes now on all subjects as if he certainly intended to be a renegade.
Disraeli, Young Duke, v. 6.

rabidly (rab'id-li), *adv.* [< *rabid* + *-ly*[2].] In a rabid manner; madly; furiously.

rabidness (rab'id-nes), *n.* [< *rabid* + *-ness.*] The state of being rabid; furiousness; madness.

rabies (rā'bi-ēz), *n.* [< L. *rabies*, rage, madness, fury: see *rage*, *n.*] An extremely fatal infectious disease of man and many other animals, with predominant nervous symptoms. In man (where it is called *hydrophobia*) the period of incubation lasts in a majority of cases from three to six months or more. Cases where it is said to have lasted several years are ill sustained. The outbreak begins with malaise, anorexia, headache, and slight difficulty in swallowing. After one or two days of these prodromal symptoms the stage of tonic spasms begins, most marked at first in the pharyngeal muscles and in the attempt to swallow, especially liquids, but proceeding to involve the respiratory muscles and others of the trunk and those of the extremities. These convulsions are accompanied by extreme anxiety and oppression, and may be elicited by any stimulus, but especially by attempts to drink or by the sound or sight of liquids. They may last from a few minutes to half an hour. The pulse-rate increases, the temperature is more or less raised, and there may be decided delirium. After from one to three days the period of paralysis succeeds, followed shortly by death. The mortality after the development of the malady is nearly 100 per cent. The disease is communicated to man by inoculation from a rabid animal, usually by a dog-bite. The maximum number of inoculations occur in the early spring or winter, the minimum in late summer or fall. The saliva of rabid dogs seems to be somewhat rabigenic two or three days before the animal shows any evident signs of ill-health. Of persons bitten by rabid animals only a fraction develop rabies, estimated at from 16 per cent. for light wounds through the clothing up to 80 per cent. for wounds of exposed parts. The records of Pasteur's laboratories show a reduction to less than 1 per cent. when such persons are treated by his method. See *Pasteurism*.

rabietic (rā-bi-et'ik), *a.* [Irreg. < *rabies* + *-et* + *-ic.*] Pertaining or relating to rabies; of the nature of or resembling rabies.

To M. Grancher was most justly accorded the very agreeable task of expounding in a few simple and unadorned sentences the results of the anti-*rabietic* treatment of M. Pasteur. *Nature*, XXXIX. 73.

rabific (rā-bif'ik), *a.* [< L. *rabies*, madness, + *facere*, make (see *-fic*).] Communicating rabies or canine madness; capable of causing hydrophobia.

Rabific virus is obtained from a rabbit which has died after inoculation by trepanning. *Encyc. Brit.*, XX. 202.

rabigenic (rab-i-jen'ik), *a.* [< L. *rabies*, madness, + *gignere, genere*, produce, √ **gen*, bear, produce: see *-gen.*] Same as *rabific*.

rabinet† (rab'i-net), *n.* [Origin obscure.] A small piece of ordnance formerly in use, weighing about 300 pounds, and carrying a ball about 1½ inches in dinmeter.

rabious† (rā'bi-us), *a.* [< OF. *rabieux* = Sp. *rabioso* = Pg. *raivoso* = It. *rabbioso*, < L. *rabiosus*, full of rage, raging, < *rabies*, rage, fury: see *rabies* and *rage*.] Wild; raging; fierce.

Ethelred languishing in minde and body, Edmond his sonne, surnamed Ironside (to oppose youth to youth), was imployed against this *rabious* inuador.
Daniel, Hist. Eng., p. 15. (*Davies.*)

rabitet, *n.* [ME., also *rabett, rabyghte*, war-horse, < Icel. *rābitr*, an Arabian steed (cf. Icel. *rābitar*, Arabs), = MHG. *rārit, ravit*, a war-horse, < OF. *arabit, arrabi*, an Arabian horse, < *Arabe*, Arab: see *Arab.*] A war-horse.

Syr Gye bestrode a *rabyghte*,
That was moche and lyghte.
MS. Cantab. Ff. ii. 38, f. 121. (*Halliwell.*)

rabonet, *n.* [= Sp. *rábano* = Pg. *rabano, rabão*, < L. *raphanus*, a radish: see *Raphanus.*] A radish. *Gerarde*, Herball.

rabot (rab'ot), *n.* [< F. *rabot:* see *rabbet.*] A hard-wood rubber used in rubbing marble to prepare it for polishing. *E. H. Knight.*

raca (rā'kä), *a.* [Formerly also *racha;* LL. *raca*, < Gr. ῥακά, < Chal. *rēkā*, an insulting epithet of doubtful meaning, connected perhaps with *raq*, spit, spit upon (Ar. *rīq*), or with *rīqā*, empty, valueless (Ar. *raīq*, vain, futile).] Worthless; naught: a transliterated word occurring in Mat. v. 22, common among the Jews in Christ's time as an expression of contempt.

raccahout (rak'a-hōt), *n.* [< F. *racahout*, a corruption of Ar. *rāqaut, rāqoūt*, or *rāqaout*, a nourishing starch with analeptic properties. But this Ar. word may be the F. *ragoût*, OF. *ragoust*, imported into the East during the Crusades: see *ragout.*] A starch or meal prepared from the edible acorns of the belote oak, *Quercus Ballota*, sometimes recommended as a food for invalids. Mixed with sugar and aromatics, it is used by the Arabs as a substitute for chocolate. (*Encyc. Dict.*) The so-called *racahout des Arabes*, sold in France, is a mixture made from edible acorns, salep, chocolate, potato-starch, rice flour, vanilla, and sugar. *Larousse.*

raccoon, *n.* See *racoon*.

raccourcy (ra-kör'si), *a.* [< OF. *raccourci*, pp. of *raccourcir*, shorten, cut off, < *re-*, again, + *ac-*

courcir, shorten, < *a-* + *court*, short: see *curt*.] In *her.*, same as *couped*.

race[1] (rās), *n.* [Early mod. E. also *rase;* < ME. *rase, ras,* commonly *rees, res,* a rush, running, swift course, swift current, a trial of speed, etc., < AS. *rēs,* a rush, swift course, onset (cf. *gār-rās,* 'spear-rush,' fight with spears), = Icel. *rās,* a race, running, course, channel: see *race*[1], *v.*, and cf. *race*[2]. The AS. form *rēs,* ME. *rees, res,* would produce a mod. E. **reese;* the form in noun and verb, *race,* prop. *rase,* is due to the Scand. cognates, and perhaps also in part, in the verb, to confusion with *race*[5], *v.*] 1. A rush; running; swift course.

Whenne thei were war of Moises,
Thei fleyze away al in a *res*.
Cursor Mundi. (*Halliwell.*)

That I ful ofte, in suche a *res*,
Am werye of myn owen lyf.
Gower, Conf. Amant.

The flight of many birds is swifter than the *race* of any beasts. *Bacon*, Nat. Hist., § 681.

2. A course which has to be run, passed over, or gone through; onward movement or progression; career.

How soon hath thy prediction, Seer blest,
Measured this transient world, the *race* of time,
Till time stand fix'd! *Milton*, P. L., xii. 554.

Eternity! that boundless *Race*
Which Time himself can never run.
Congreve, Imit. of Horace, II. xiv. 1.

Succeeding Years their happy *Race* shall run,
And Age unheeded by Delight come on.
Prior, Henry and Emma.

My Arthur, whom I shall not see
Till all my widow'd *race* be run.
Tennyson, In Memoriam, lx.

3. A contest of speed; a competitive trial of speed, especially in running, but also in riding, driving, sailing, rowing, walking, or any mode of progression. The plural, used absolutely, commonly means a series of horse-races run at a set time over a regular course: as, to go to the *races;* the Epsom *races*.

To the bischope in a *ras* he ran.
Old Eng. Metr. Homilies, I. 141.

Part on the plain, or in the air sublime,
Upon the wing or in swift *race* contend,
As at the Olympian games *Milton*, P. L., II. 529.

The *races* were then called bell courses, because . . . the prize was a silver bell *Strutt*, Sports and Pastimes, p. 107.

4†. Course, as of events; progress.

The prosecution and *race* of the war carrieth the defendant to assail and invade the ancient and indubitate patrimony of the first aggressor. *Bacon*, War with Spain.

5†. Struggle; conflict; tumult; trouble.

Othes hue him sworen in stude ther he wes,
To buen him hold ant trewe for alles cunnes *res*.
Execution of Sir Simon Fraser (Child's Ballads, VI 276).

Hem rued the *res* that thei ne rest had.
Alexander of Macedoine (E. E. T. S.), l. 389.

Redelieche in that *res* the recuurere that me falles,
As whan I haue ani hap to here of that barne.
William of Palerne (E. E. T. S.), l. 439.

6†. Course; line of onward movement; way; route.

The souldier victourer is not woonte to spare any that commethe in his *rase*
R. Eden, tr. of Peter Martyr (First Books on America, [ed. Arber, p. 122).

Consolation race. See *consolation*.—**Flat race,** a horse-race over level or clear ground, as opposed to a hurdle-race or steeplechase.—**Obstacle-race.** See *obstacle*.

race[1] (rās), *v.*; pret. and pp. *raced,* ppr. *racing.* [< ME. *rasen, resen,* rush, run, hasten, < AS. *rāsan,* rush, move violently, also rush on, attack, rush into; = OD. *rāsen,* rage, = MLG. *rasen,* MHG. G. *rasen,* rage, = Icel. *rāsa* = Sw. *rasa* = Dan. *rase,* race, rush, hurry: see *race*[1], *n.*, 1. The form *race,* prop. *rase,* is due to the Scand. cognates: see the noun.] I. *intrans.* 1. To run swiftly; run in, or as if engaged in, a contest of speed.

Saladin began to *rase* for ire
Richard Coer de Lion, l. 3633.

The *racing* place, call'd the Hippodromus, without the gate of Canopus, was probably in the plain towards the canal *Pococke*, Description of the East, I. 10.

But I began
To thrid the musky-circled mazes, wind
And double in and out the boles, and *race*
By all the fountains, fleet I was of foot.
Tennyson, Princess, iv.

2. To run with uncontrolled speed; go or revolve wildly or with improper acceleration: said of a steam-engine, a wheel, a ship's screw, or the like, when resistance is diminished without corresponding diminution of power.

No centrifugal governor could have so instantaneously cut off the steam: it would not have acted till the engine began to *race*.
S. P. Thompson, Dynamo-Elect. Mach., p. 93.

A big steamer in a heavy seaway often rests upon two waves, one under her bows and the other under her stern, while the 'midship section has practically no support from the water; and, again, her bows will be almost out of water and her screw *racing*. *Sci. Amer.*, N. S., LVII. 144.

3. To practise horse-racing as an occupation; be engaged in the business of running horses.

II. *trans.* 1. To cause to run or move swiftly push or drive onward in, or as if in, a trial of speed: as, to *race* a horse; to *race* steamers.—2. To run, or cause horses, etc., to run, in competition with; contend against in a race.

Swore, boxed, fought cocks, and *raced* their neighbor's horses. *Irving*, Knickerbocker, p. 176.

[Colloquial in both uses.]

race[2] (rās), *n.* [A particular use of *race*[1], as 'a swiftly running stream'; but perhaps in part due to OF. *rase, raise,* a ditch, channel, = Pr. *rasa,* a channel; origin uncertain.] A strong or rapid current of water, or the channel or passage for such a current; a powerful current or heavy sea sometimes produced by the meeting of two tides: as, the *Race* of Alderney; Portland *Race*.

This evening the Talbot weighed and went back to the Cowes, because her anchor would not hold here, the tide set with so strong a *race*.
Winthrop, Hist. New England, I. 4.

Near the sides of channels and near the mouths of bays the changes of the currents are very complex; and near the headlands separating two bays there is usually at certain times a very swift current, termed a *race*.
Encyc. Brit., XXIII. 353.

(*a*) A canal or watercourse from a dam to a water-wheel: specifically called the *head-race.* (*b*) The watercourse which leads away the water after it leaves the wheel: specifically called the *tail-race.*

race[3] (rās), *n.* and *a.* [< F. *race* (> G. *rasse, race* = Sw. *ras* = Dan. *race,* breed of horses, etc.), dial. *raice* = Pr. Sp. *raza* = Pg. *raça* = It. *razza,* race, breed, lineage, < OHG. *reiz, reiza,* MHG. *reiz* (G. *riss*), line, scratch, stroke, mark, = Icel. *reitr,* scratch, < *rita,* scratch, = AS. *writan* = E. *write:* see *write*. No connection with *race*[4], root, < L. *radix,* though *race*[3] may have been influenced by this word in some of its uses: see *race*[4].] I. *n.* 1. A genealogical line or stock; a class of persons allied by descent from a common ancestry; lineage; family; kindred: as, the Levites were a *race* of priests; to be of royal or of ignoble *race*.

She is a gentlewoman of very absolute behaviour, and of a good *race*. *B. Jonson*, Epicœne, iii. 2.

He lives to build, not boast, a generous *race;*
No tenth transmitter of a foolish face.
Savage, The Bastard.

2. An ethnical stock; a great division of mankind having in common certain distinguishing physical peculiarities, and thus a comprehensive class appearing to be derived from a distinct primitive source: as, the Caucasian *race;* the Mongolian *race;* the Negro *race*. See *man*, 1.

I cannot with any accuracy speak of the English *race;* that would be claiming for ourselves too great a place among the nations of the earth.
E. A. Freeman, Amer. Lects., p. 14.

3. A tribal or national stock; a division or subdivision of one of the great racial stocks of mankind, distinguished by minor peculiarities: as, the Celtic *race;* the Finnic *race* is a branch of the Mongolian; the English, French, and Spaniards are mixed *races*.—4. The human family; human beings as a class; mankind: a shortened form of *human race:* as, the future prospects of the *race;* the elevation of the *race*.

She had no companions of mortal *race*.
Shelley, Sensitive Plant, ii. 4.

5. A breed, stock, or strain of domesticated animals or cultivated plants; an artificially propagated and perpetuated variety. Such races differ from natural species or varieties in their tendency to revert to their original characters, and lose those artificially acquired, when they are left to themselves. Many thousands of races have been produced and named.

There is a *race* of sheep in this country with four horns, two of them turning upwards, and two downwards.
Pococke, Description of the East, II. i. 196.

The truth of the principle of prepotency comes out more clearly when distinct *races* are crossed.
Darwin, Var. of Animals and Plants, xiv.

Specifically—(*a*) In *zoöl.*, a geographical variety; a subspecies, characteristic of a given faunal area, intergrading with another form of the same species. (*b*) In *bot.*: (1) A variety so fixed as to reproduce itself with considerable certainty by seed. Races may be of spontaneous origin or the result of artificial selection. (2) In a broader use, any variety, subspecies, species, or group of very similar species whose characters are continued through successive generations. *Bentham*, Address to Linn. Soc., 1869.

6. Any fixed class of beings more or less broadly differentiated from all others; any general aggregate of mankind or of animals considered as a class apart; a perpetuated or continuing line of like existences: as, the human *race;* the *race* of statesmen; the equine or the feline *race*.

That provident care for the welfare of the offspring which is so strongly evinced by many of the insect *race*.
Say.

7†. A line or series; a course or succession: used of things.

A *race* of wicked acts
Shall flow out of my anger, and o'erspread
The world's wide face. *B. Jonson*, Sejanus, ii. 2.

8†. A strong peculiarity by which the origin or species of anything may be recognized, as, especially, the flavor of wine.

Order. There came not six days since from Hull a pipe of rich canary. . . .
Greedy. Is it of the right *race?*
Massinger, New Way to Pay Old Debts, i. 3.

9†. Intrinsic character; natural quality or disposition; hence, spirit; vigor; pith; raciness.

Now I give my sensual *race* the rein.
Shak., M. for M., ii. 4. 160.

I think the Epistles of Phalaris to have more *race*, more spirit, more force of wit and genius than any others I have ever seen. *Sir W. Temple*, Anc. and Mod. Learning.

=Syn. *Tribe, Clan,* etc. See *people*.

II. *a.* Of or pertaining to a race. [Rare.]

The pyramids are *race* monuments.
New Princeton Rev., V. 235.

race[4] (rās), *n.* [Formerly also *raze;* < OF. *raïs, raïz* = Sp. *raiz* = Pg. *raiz* = It. *radice,* a root, < L. *radix,* a root: see *radix, radish*.] A root. See *race-ginger,* and *hand,* 13 (*a*).

I have a gammon of bacon, and two *razes* of ginger, to be delivered as far as Charing Cross.
Shak., 1 Hen. IV., ii. 1. 27.

By my troth, I spent eleven pence, beside three *races* of ginger.
Greene and Lodge, Looking Glass for Lond. and Eng.

race[5]† (rās), *v. t.* [< ME. *racen, rasen,* by apheresis from *aracen,* root up: see *arace*[1], and cf. *rash*[3].] To tear up; snatch away hastily.

After he be-helde towarde the fier, and saugh the flesshe that the knaue hadde rosted that was the I-nough, and *raced* it off with his hondes madly, and rente it a-sonder in peces. *Merlin* (E. E. T. S.), iii. 424.

And *raas* it fromo his riche mene and ryste it in sondyre.
Morte Arthure (E. E. T. S.), l. 362.

race[6]†, *v. t.* An obsolete form of *rase*[1], *raze*[1].

race[7] (rās), *n.* [Origin obscure.] A calcareous concretion in brick-earth. [Prov. Eng.]

What were at first supposed to be pebbles in one of the samples from Tantah prove on examination to be calcareous concretions (*race* or kunkur).
Proc. Roy. Soc., XXXIX. 213.

racé (ra-sā'), *a.* In *her.*, same as *indented*.

race-card (rās'kärd), *n.* A printed card containing information about the races to be run at a meeting on a race-course.

I remember it because I went to Epsom races that year to sell *race cards*.
Mayhew, London Labour and London Poor, I. 431.

race-cloth (rās'klôth), *n.* A saddle-cloth used in horse-racing, having pockets for the weights that may be prescribed.

race-course (rās'kōrs), *n.* 1. A plot of ground laid out for horse-racing, having a track for the horses, usually elliptical, and accommodations for the participants and spectators.—2. The canal along which water is conveyed to or from a water-wheel.

race-cup (rās'kup), *n.* A piece of plate forming a prize at a horse-race. Originally such a piece of plate had the form of a goblet or drinking-cup, whence the name.

race-ginger (rās'jin'jėr), *n.* Ginger in the root, or not pulverized.

race-ground (rās'ground), *n.* Ground appropriated to races.

race-horse (rās'hôrs), *n.* 1. A horse bred or kept for racing or running in contests; a horse that runs in competition. The modern race-horse, though far inferior to the Arab in point of endurance, is perhaps the finest horse in the world for moderate heats, such as those on common race-tracks. It is generally longer-bodied than the hunter, and the same power of leaping is not required. This animal is of Arabian, Berber, or Turkish extraction, improved and perfected by careful crossing and training. See *racer*, 2.
2. The steamer-duck.—3. A rear-horse; any mantis.

Race-knife.

race-knife (rās'nīf), *n.* A tool with a bent-over lip for scribing, marking, numbering, and other purposes. *E. H. Knight.*

racemation (ras-ē-mā'shon), *n.* [< LL. *racematio*(*n*-), the gleaning of grapes, < L. *racemus,* a cluster of grapes: see *raceme*.] 1. The gathering or trimming of clusters of grapes. [Rare.]

Having brought over some curious instruments out of Italy for *racemation*, engrafting, and inoculating, he was a great master in the use of them.
Bp. Burnet, Bp. Bedell, p. 120. (*Latham.*)

2. A cluster, as of grapes; the state of being racemose, or having clustered follicles, as a gland. [Rare.]

The whole *racemation* or cluster of eggs.
Sir T. Browne, Vulg. Err., iii. 28.

raceme (ra-sēm'), *n.* [= F. *racème*, a cluster, = Sp. Pg. *racimo* = It. *racemo*, < L. *racemus*, a cluster of grapes; allied to Gr. *ῥάξ* (gen. *ῥαγός*), a berry, esp. a grape. Cf. *raisin*[1], from the same source.] A cluster; specifically, in *bot.*, a simple inflorescence of the centripetal or indeterminate type, in which the several or many flowers are borne on somewhat equal axillary pedicels along a relatively lengthened axis or rachis. Examples are furnished by the currant, the lily-of-the-valley, the locust, etc. A raceme becomes compound when the single flowers are replaced by racemes. See *inflorescence*, compare *spike*, and see cuts under *Actæa*, *inflorescence*, and *Ornithogalum*.

racemed (ra-sēmd'), *a.* [< *raceme* + *-ed*[2].] In *bot.*, disposed in racemes: said of flowers or fruits, or of the branches of a racemosely compound inflorescence.

race-meeting (rās'mē'ting), *n.* A meeting for the purpose of horse-racing.

How many more *race-meetings* are there now than there were in 1850? *Quarterly Rev.*, CXLV. 70.

racemic (ra-sem'ik), *a.* [< *raceme* + *-ic.*] Pertaining or relating to grapes in clusters, or to racemes.—**Racemic acid**, $C_4H_6O_6$, an acid isomeric with tartaric acid, found along with the latter in the tartar obtained from certain vineyards on the Rhine. It is a modification of the ordinary tartaric acid, differing from it in its physical but not in its chemical properties. Also called *paratartaric acid*.

racemiferous (ras-ē-mif'ē-rus), *a.* [< L. *racemus*, a cluster (see *raceme*), + *ferre* = E. *bear*[1].] Bearing racemes.

racemiform (ra-sē'mi-fôrm), *a.* [< L. *racemus*, a cluster, + *forma*, form.] In *bot.*, having the form of a raceme.

racemocarbonic (ra-sē'mō-kär-bon'ik), *a.* [< *racemic* + *carbonic.*] Formed from or consisting of racemic and carbonic acids.—**Racemocarbonic acid.** Same as *dexoxalic acid* (which see, under *dexoxalic*).

racemose (ras'ē-mōs), *a.* [Also *racemous*; = F. *racemeux* = Sp. Pg. *racimoso* = It. *racemoso*, < L. *racemosus*, full of grapes, < *racemus*, bunch of grapes: see *raceme*, *raisin.*] 1. In *bot.*: (*a*) Having the character or appearance of a raceme: said of a flower-cluster. (*b*) Arranged in racemes: said of the flowers.—2. In *anat.*, clustered or aggregate, as a gland; having ducts which divide and subdivide and end in bunches of follicles. It is a common type of glandular structure, well exemplified in the salivary glands and the pancreas. See cut under *parotid*.—**Racemose adenoma**, a tumor originating from glandular tissue and resembling closely the appearance and structure of a racemose gland: found in the breast and in salivary and sebaceous glands.

racemosely (ras'ē-mōs-li), *adv.* So as to form or resemble a raceme or racemes.

racemous (ras'ē-mus or ra-sē'mus), *a.* Same as *racemose*.

racemule (ras'ē-mūl), *n.* [< NL. **racemulus*, dim. of L. *racemus*, a cluster: see *raceme.*] In *bot.*, a small raceme.

racemulose (ra-sem'ū-lōs), *a.* [< NL. *racemulosus*, full of small racemes, < **racemulus*, a small raceme: see *racemule.*] In *bot.*, resembling a racemule, or arranged in racemules.

race-plate (rās'plāt), *n.* A wrought-iron or steel traversing-platform for heavy guns, upon which the gun is moved in a horizontal arc and moves backward in recoil.

racer (rā'sėr), *n.* [= Icel. *rāsari*, a racer, race-horse; as *race*[1] + *-er*[1].] 1. One who races; a runner or contestant in a race or in races of any kind.

Besmear'd with filth, and blotted o'er with clay,
Obscene to sight, the rueful *racer* lay.
Pope, Iliad, xxiii. 912.

2. A race-horse.

The *racer* is generally distinguished by his beautiful Arabian head; his fine and finely-set on neck; his oblique lengthened shoulders; well-bent hinder legs; his ample muscular quarters; his flat legs rather short from the knee downwards; and his long and elastic pastern.
Quoted in *T. Bell's British Quadrupeds*, p. 382.

3. Hence, anything having great speed.

Coal will be transferred across the Atlantic in cargo boats for the use of the ocean *racers*. *Engineer*, LXVI. 77.

4. In a brajding-machine, a traversing support for tension and spool-holding apparatus.—5. A snake of the genus *Scotophis* (or *Coluber*), *S. obsoletus*, also called *pilot black-snake* or *pilot-snake*. It is black, with a mottled black and yellow belly, and has the median dorsal scales carinated.—6. A snake, *Bascanion constrictor*, the common black-snake of the eastern United States. It is blue or blue-black, with greenish-blue belly, and has smooth scales.—7. A poor, thin, or spent fish; a slink: applied to mackerel, shad, salmon, etc.—8. A sand-crab. See *Oxypoda*.—**Blue racer.** See *blue-racer.*

race-track (rās'trak), *n.* The track or path over which a race is run; a race-course.

raceway (rās'wā), *n.* 1. An artificial passage for water flowing from a fall or dam; a mill-race. Compare *mill-race.* See *race*[2].—2. In *fish-culture*, a fishway.

racht, *n.* See *ratch*[2].

rachamah, *n.* In *ornith.* See *Neophron.*

rache[1]†, *n.* See *ratch*[1].

rache[2]†, *v.* An obsolete form of *reach*[1].

rache[3]†, *v. t.* An obsolete assibilated form of *rack*[1].

rachial (rā'ki-al), *a.* [< *rachis* + *-al.*] Pertaining to a rachis; rachidial. Also *rhachial.*

rachialgia (rā-ki-al'ji-ą), *n.* [NL., prop. *rhachialgia*, < Gr. *ῥάχις*, spine, + *ἄλγος*, pain.] Pain in the spine, especially neuralgic pain. Also *rhachialgia.*

rachialgic (rā-ki-al'jik), *a.* [< *rachialgia* + *-ic.*] Affected with rachialgia. Also *rhachialgic.*

Rachianectes (rā'ki-a-nek'tēz), *n.* [NL. (Cope), also *Rhachianectes*, < Gr. *ῥαχία*, a rocky shore, + *νήκτης*, a swimmer, < *νήχειν*, swim.] A genus of whalebone whales of the family *Balænopteridæ* and subfamily *Agaphelinæ*, containing the gray whale of the North Pacific, *R. glaucus*, combining the small head, slender form, and narrow flippers of a finner-whale with the lack of a dorsal fin and absence of folds of skin on the throat of a right whale. This whale attains great size, and its pursuit is an important branch of the fisheries in the waters it is found in, sometimes attended with special dangers. The parasites chiefly affecting *R. glaucus* are a whale-louse, *Cyamus scammoni* and a barnacle, *Cryptolepas rachianecti.*

Rachicallis (rā-ki-kal'is), *n.* [NL. (A. P. de Candolle, 1830), < Gr. *ῥαχία*, a rocky shore, + *καλλός*, beauty.] A genus of rubiaceous shrubs belonging to the tribe *Rondeletieæ*, differing from *Rondeletia* chiefly in its half-superior septicidal capsule. There is only one species, *R. rupestris*, called *carpwort*, growing on the rocky coasts of the West Indies. It is a low shrub bearing narrow decussate leaves with sheathing stipules, and small solitary yellow flowers sessile in the axils.

rachides, *n.* Plural of *rachis.*

rachidial (rā-kid'i-ąl), *a.* [Also *rhachidial*; < Gr. *ῥαχις* (assumed stem **ῥαχιδ-*), the spine, + *-al.*] Of or pertaining to a rachis, in any sense; rachial.

rachidian (rā-kid'i-an), *a.* [Also *rhachidian*; < F. *rachidien*, < Gr. *ῥαχις* (assumed stem **ῥαχιδ-*), the spine, + *-an.*] Same as *rachidial.*

The teeth of the radula are divided by nearly all students of that organ into *rhachidian* or median, lateral, and uncinal. *W. H. Dall*, Science, iv. No. 81, Aug. 22, 1884.

Rachidian bulb. Same as *medulla oblongata*.—Rachidian canal, the spinal or neural canal.

Rachiglossa (rā-ki-glos'ą), *n. pl.* [Also *Rhachiglossa*; NL., < Gr. *ῥαχις*, the spine, + *γλῶσσα*, tongue.] Those mollusks which are rachiglossate; specifically, a division of gastropods so characterized, including the *Buccinidæ*, *Muricidæ*, *Volutidæ*, etc. See cut under *ribbon.*

rachiglossate (rā-ki-glos'āt), *a.* [Also *rhachiglossate*; < Gr. *ῥαχις*, the spine, + *γλῶσσα*, tongue.] In *Mollusca*, having upon the lingual ribbon or radula only a single median tooth, or a median tooth with only an admedian one on each side of it, in any one of the many transverse series or cross-rows of radular teeth. The formula is 0-I-0 or I-I-I, where the 0 is a cipher and I means one.

rachilla (rā-kil'ą), *n.* [Also *rhachilla*; NL., < Gr. *ῥάχις*, the spine, + dim. *-illa.*] In *bot.*, a little rachis; a secondary rachis in a compound inflorescence, as of a spikelet in a grass.

Rachiodon (rā-ki'ō-don), *n.* [NL.: see *rachiodont.*] The typical genus of *Rachiodontidæ*, having a series of enamel-tipped vertebral processes projecting into the esophagus and serving as teeth: synonymous with *Dasypeltis* (which see). The type is *R. scaber*, of Africa, a snake which lives much on eggs, and has this contrivance for not smashing them till they get down its throat, when the sagacious serpent swallows the contents and spits out the shell. Also *Rhachiodon.*

rachiodont (rā'ki-ō-dont), *a.* [Also *rhachiodont*; < Gr. *ῥάχις*, the spine, + *ὀδούς* (*ὀδοντ-*) = E. *tooth.*] Having processes of the spinal column which function as teeth; belonging to the *Rachiodontidæ.*

Rachiodontidæ (rā''ki-ō-don'ti-dē), *n. pl.* [NL., < *Rachiodon* (*-odont-*) + *-idæ.*] A family of colubriform ophidians, named from the genus *Rachiodon*: same as the subfamily *Dasypeltinæ.* Also *Rhachiodontidæ.*

Rachiopteris (rā-ki-op'tē-ris), *n.* [NL., < Gr. *ῥάχις*, the spine, + *πτερίς*, fern: see *Pteris.*] A name under which Schimper has grouped various fragments of the rachides or stems of fossil ferns. Specimens of this nature have been described by Lesquereux as occurring in the coal-measures of Illinois, and by Dawson as having been found in the Devonian of New York.

rachipagus (rā-kip'ą-gus), *n.*; pl. *rachipagi* (*-jī*). [NL., < Gr. *ῥάχις*, the spine, + *πάγος*, that which is fixed or firmly set, < *πηγνύναι*, make fast.] In *teratol.*, a double monster united at the spine.

rachis (rā'kis), *n.*; pl. *rachides* (-ki-dēz). [Also *rhachis*; NL., < Gr. *ῥάχις*, the spine, a ridge (of a mountain-chain), a rib (of a leaf).] 1. In *bot.*: (*a*) The axis of an inflorescence when somewhat elongated; the continuation of the peduncle along which the flowers are ranged, as in a spike or a raceme. (*b*) In a pinnately compound leaf or frond, the prolongation of the petiole along which the leaflets or pinnæ are disposed, corresponding to the midrib of a pinnately veined simple leaf. See cut under *compound.*—2. In *zoöl.* and *anat.*: (*a*) The vertebral column. (*b*) The stem, shaft, or scape of a feather, as distinguished from the web, vane, or vexillum; especially, that part of the stem which bears the vexillum, as distinguished from the calamus or quill. See *quill*, 4.

Rye-grass (*Lolium perenne*). *a*, Rachis.

The differentiation of the feather into *rachis* and vexillum. *Gegenbaur*, Comp. Anat. (trans.), p. 419.

(*c*) The median part of the radula of a mollusk, usually bearing teeth which differ from those on each side of it.—3. The axial skeleton of various polyp-colonies, as of *Gorgonia*; some axial part, or formation like a midrib, as in crinoids.—**Generative rachis**, in crinoids, a cellular rod or cord which lies in the genital canal in connection with the visceral generative tissue, and the enlargements of which in the pinnules form the genital glands.

rachitic (rā-kit'ik), *a.* [Also *rhachitic*; < F. *rachitique*; as *rachitis* + *-ic.*] 1. In *anat.*, of or pertaining to the spinal column; spinal; vertebral. [Rare.]—2. Pertaining to or affected with rachitis; rickety.

rachitis (rā-ki'tis), *n.* [NL. (Dr. Glisson, 1650, in his work "De *Rachitide*"), as if lit. 'inflammation of the spine' (prop. *rhachitis*, < Gr. *ῥάχις*, the spine, + *-itis*), but adopted as a Latinized form for E. *rickets*: see *rickets.*] 1. A disease of very early life, characterized by a perversion of nutrition of the bones, by which uncalcified osteoid tissue is formed in place of bone, and the resorption of bone is quickened. Hence the bones are flexible, and distortions occur, such as crooked legs, heart-shaped pelvis, or curvature of spine. See *rickets.*
2. In *bot.*, a disease producing abortion of the fruit or seed.—**Rachitis fœtalis annularis**, intra-uterine formation of annular thickenings on the diaphyses of the long bones. Also called *rachitis intra-uterina annularis.*—**Rachitis fœtalis micromelica**, intra-uterine stunting of the bones in their longitudinal growth. Also called *rachitis uterina micromelica.*

rachitome (rak'i-tōm), *n.* [Also *rhachitome*; < F. *rachitome*, < Gr. *ῥάχις*, the spine, + *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] An anatomical instrument for opening the spinal canal, without injuring the medulla.

rachitomous (rā-kit'ō-mus), *a.* [Also *rhachitomous*; < Gr. *ῥάχις*, the spine, + *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] Segmented, as a vertebra of many of the lower vertebrates which consists of a neural arch resting on a separate piece on each side, the pleurocentrum, which in turn rests on a single median piece below, the intercentrum; having or characterized by such vertebræ, as a fish or batrachian, or the backbone of such animals. See *embolomerous.* *E. D. Cope.*

Both kinds of vertebræ (*rachitomous* and embolomerous) can be found in the same animal. *Science*, VI. 98.

racial (rā'shąl), *a.* [< *race*[3] + *-ial.* Cf. *facial.*] Relating or pertaining to race or lineage, or to a race or races of living beings; characteristic of race or of a race.

Man, as he lived on the earth during the time when the most striking *racial* characteristics were being developed. *W. H. Flower*, Encyc. Brit., XV. 445.

racially (rā'shąl-i), *adv.* In a racial manner; in relation to or as influenced by race or lineage.

The unification of the *racially* most potent people of whom we have record. *The Academy*, Aug. 3, 1889, p. 66.

Raciborskia (ras-i-bôr'ski-ii), *n.* [NL. (Berlese), < *Raciborski*, a Polish botanist.] A genus of myxomycetous fungi, giving name to the family *Raciborskiaceæ*.

Raciborskiaceæ (ras-i-bôr-ski-ā'sē-ē), *n. pl.* [NL., < *Raciborskia* + *-aceæ*.] A small family of myxomycetous fungi, taking its name from the genus *Raciborskia*, and having the peridium naked and distinctly stipitate, and the capillitium violaceous.

racily (rā'si-li), *adv.* [< *racy* + *-ly*2.] In a racy manner; piquantly; spicily.

racinet, *n.* [ME.; < OF. *racine*, *rachine*, F. *racine* = Pr. *racma*, *razina*, root, < ML. as if **radicina*, dim. of L. *radix* (*radic-*), root: see *radix*. Cf. *race*4.] A root.

Unlefulle lust, though it be sote,
And of alle yvelle the *racyne*.
Rom. of the Rose, l. 4881.

raciness (rā'si-nes), *n.* [< *racy* + *-ness*.] The quality of being racy; peculiarly characteristic and piquant flavor or style; spiciness; pungency.

racing (rā'sing), *n.* [Verbal n. of *race*1, *v.*] The running of races; the occupation or business of arranging for or carrying on races, especially between horses.

The Queen [Anne] was fond of *racing*, and gave her 100*l.* gold cups to be run for, as now: nay more, she not only kept race horses, but ran them in her own name.
Ashton, Social Life in Reign of Queen Anne, I. 302.

racing-bell (rā'sing-bel), *n.* A grelot or small bell given as a prize for a horse-race: such a prize was frequent in the sixteenth century. Bells of this form exist of silver, from an inch to two inches and a half in diameter, with inscriptions and dates.

racing-bit (rā'sing-bit), *n.* A light jointed-ring bit, the loose rings of which range in size from 3 to 6 inches.

racing-calendar (rā'sing-kal'en-dėr), *n.* A detailed list of races run or to be run.

rack1 (rak), *v. t.* [Early mod. E. also *wrack* (by confusion with *wrack*1); not found as a verb in ME. or AS., except the secondary forms AS. *reccan*, as below, and ME. *raxen*, < AS. *racan*, **racsan*, stretch oneself (see *rax*); prob. < MD. *racken*, stretch, reach out, torture, rack, = G. *recken*, stretch, torture; a collateral form of AS. *reccan* (pret. *rehte*), stretch out, also correct, direct, rule, guide, tell, etc. (> ME. *recchen*, stretch, also tell: see *retch*1 and *rach*1, *reckon*), = OS. *rekkian*, stretch, = MD. *recken*, D. *rekken* = MLG. *reken*, stretch, = OHG. *recchan*, MHG. *recken*, stretch, extend, = Icel. *rekja*, stretch, trace (cf. *rekkja*, strain), = Dan. *rakke* = Sw. *racka*, reach, hand, stretch, = Goth. **rakjan*, in comp. *uf-rakjan*, stretch out; prob. = L. *regere*, rule, lit. 'stretch out,' 'make straight' (in *por-rigere*, stretch forth, *e-rigere*, straighten out, erect, etc.) (pp. *rectus*, straight, = E. *right*), = Gr. ὀρέγειν, stretch, = Lith. *rezau*, *rezyti*, stretch, = Skt. √ *arj*, stretch. Akin to *rake*2, reach, extend, but prob. not to *rake*1, nor to *reach*1, with which, however, *rach*1 has been partly confused. The verb and esp. the noun *rack* show great confusion and mixture of senses, and complete separation is difficult. In some senses the verb is from the noun.] 1. To stretch; stretch out; strain by force or violence; extend by stretching or straining.

Which yet they *rack* higher to foure hundred threescore and ten thousand yeares.
Purchas, Pilgrimage, p. 51.

I know your hearts are like two lutes *rack'd* up
To the same pitch. *The Slighted Maid*, p. 53. (*Nares*)

Suits in love should not,
Like suits in law, be *rack'd* from term to term.
Shirley, Hyde Park, I. 2.

2. To strain so as to rend; wrench by strain or jar; rend; disintegrate; disjoint: as, a *racking* cough; to *rack* a ship to pieces by slanting shot.

The duke
Dare no more stretch this finger of mine than he
Dare *rack* his own *Shak.*, M. for M., v. 1. 317

3. To torture by violent stretching; stretch on a frame by means of a windlass; subject to the punishment of the rack. See *rack*1, *n.*, 2 (*b*).

He was *racked* and miserably tormented, to the intent he should either change his opinion or confesse other of his profession. *Foxe*, A Table of French Martyrs, an. 1551

An answer was returned by Lord Killultagh to the effect that "you ought to *rack* him if you saw cause, and hang him if you found reason." *Encyc. Brit.*, XXIII. 406.

Noblemen were exempt, the vulgar thought,
From *racking*, but, since law thinks otherwise,
I have been put to the rack.
Browning, Ring and Book, I. 202.

Hence—4. To put in torment; affect with great pain or distress; torture in any way; disturb violently.

My soul is *rack'd* till you dissolve my fears.
Beau. and Fl. (?), Faithful Friends, i. 1.

Lord, how my soul is *rack'd* betwixt the world and thee!
Quarles, Emblems, v. 9.

I will not *rack* myself with the Thought.
Steele, Grief A-la-Mode, v. 1.

Kinrald was *racked* with agony from his dangling broken leg, and his very life seemed leaving him.
Mrs. Gaskell, Sylvia's Lovers, xxxviii.

5. To strain with anxiety, eagerness, curiosity, or the like; subject to strenuous effort or intense feeling; worry; agitate: as, to *rack* one's invention or memory.

A barbarous phrase has often made me out of love with a good sense; and doubtful writing hath *wracked* me beyond my patience. *B. Jonson*, Discoveries.

It doth *rack* my brain why they should stay thus.
Shirley, Love in a Maze, v. 5.

6. To stretch or draw out of normal condition or relation; strain beyond measure or propriety; wrest; warp; distort; exaggerate; overstrain: chiefly in figurative uses.

Albeit this is one of the places that hath been *racked*, as I told you of *racking* Scriptures.
Latimer, Sermon of the Plough.

For it so falls out
That what we have we prize not to the worth
While we enjoy it, but, being lack'd and lost,
Why, then we *rack* the value.
Shak., Much Ado, iv. 1. 222.

Pray, *rack* not honesty. *Fletcher*, Loyal Subject, ii. 6.

Hyperbole is *racked* to find terms of adoring admiration for the queen. *Whipple*, Ess. and Rev., II. 28.

7. To exact or obtain by rapacity; get or gain in excess or wrongfully. See *rack-rent*. [Obsolete or archaic.]

Each place abounding with fowle injuries,
And fild with treasure *rackt* with robberies.
Spenser, Mother Hub. Tale, l. 1306.

Why, honest master, here lies all my money,
The money I ha' *rack'd* by usury.
Fletcher (*and another*), Sea Voyage, i. 1.

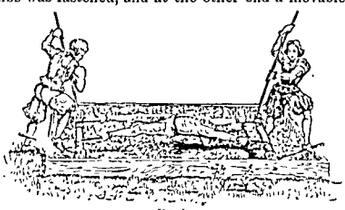
Good for nought but to persuade their lords
To *rack* their rents and give o'er housekeeping.
Middleton, Anything for a Quiet Life, i. 1.

8†. To subject to extortion; practise rapacity upon; oppress by exaction.

The commons hast thou *rack'd*; the clergy's bags
Are lank and lean with thy extortions.
Shak., 2 Hen. VI., i. 3. 131.

Here are no hard Landlords to *racke* us with high rents, or extorting fines. *Capt. John Smith*, Works, II. 186.

9. In *mining*, to wash on the rack. See *rack*1, *n.*, 5 (*c*).—10. To place on or in a rack or frame made for the purpose, either for storage or for temporary need, as for draining, drying, or the like.—11. To form into or as if into a rack or grating; give the appearance of a rack to.—12. *Naut.*, to seize together with cross-turns, as two ropes.—**Racking turns**, turns taken alternately over and under ropes, to bind them together.—**To rack a tackle**, to seize two parts of a tackle together with rope-yarn or spun yarn, so that, if the fall is let go, the strain will not be loosened.



rack1 (rak), *n.* [< ME. *racke*, a rack (for torture), *rakke*, a straight bar, a rack for hay, a framework, *rekke*, a bar, a framework above a manger, a bar, a rack (for torture), later *rak*, rack (as a roost, a frame for dishes, weapons, etc.); < MD. *racke*, D. *rak*, a rack, = LG. *rakk*, a shelf, = G. *rack*, a bar, rail, *reck*, a frame, trestle, rack for supporting things, dial. *reck*, scaffold, wooden horse; the lit. sense being either (*a*) active, 'that which stretches,' as an appliance for bending a bow, a frame for stretching the limbs in torture (*rack* in this sense also involving the sense of 'framework' merely), or (*b*) passive, 'that which is stretched,' hence a straight bar (cf. Icel. *rakkr*, *rakr*, straight, = Sw. *rak*, straight), a frame of bars (such as the grating above a manger), a framework used in torture (involving also the orig. active notion of 'stretching'), a bar with teeth, a thing extorted, etc.; from the verb. Cf. G. *reckbank*, a rack (means of torture), < *recken*, stretch, + *bank*, bench.] 1†. A bar.

Hevle *rekkes* binde to hire fet.
Early Eng. Poems and Lives of Saints (ed. Furnivall), xv. [192.

2. A frame or apparatus for stretching or straining. Specifically—(*a*) A windlass or winch for bending a bow, the part of the crossbow in which the gaffle moved. *Halliwell.*

These bows . . . were bent only by a man's immediate strength, without the help of any bender or *rack*.
Bp. Wilkins, Math. Magick. (*Latham.*)

(*b*) An instrument of torture by means of which the limbs were pulled in different directions, so that the whole body was subjected to a great tension, sufficient sometimes to cause the bones to leave their sockets. The form of application of the torture differed at different times. The rack consisted essentially of a platform on which the body was laid, having at one end a fixed bar to which one pair of limbs was fastened, and at the other end a movable bar

Rack.

to which the other limbs were fastened, and which could be forcibly pulled away from the fixed bar or rolled on its own axis by means of a windlass. See *judicial torture*, under *torture*.

Galows and *racke*.
Caxton, tr. of Reynard the Fox (ed. Arber), p. 24.

Take him hence; to the *rack* with him! We'll touse you Joint by joint, but we will know his purpose.
Shak., M. for M., v. 1. 313.

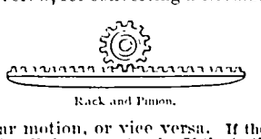
3. Punishment by the rack, or by some similar means of torture.

You have found a Person who would suffer *Racks* in Honour's Cause. *Congreve*, Way of the World, iv. 13.

Hence—4. A state of torture or extreme suffering, physical or mental; great pain; rending anxiety; anguish. See *on the rack*, below.

A fit of the stone puts a king to the *rack*, and makes him as miserable as it does the meanest subject.
Sir W. Temple.

5. A grating or open framework of bars, wires, or pegs on or in which articles are arranged or deposited: much used in composition, as in bottle-*rack*, card-*rack*, hat-*rack*, letter-*rack*, etc. Specifically—(*a*) A grating on which bacon is laid. (*b*) An open wooden framework placed above a manger or the like, in which fodder for horses or cattle is laid.



From their full *racks* the generous steeds retire.
Addison.

(*c*) An openwork siding, high and flaring outward, placed on a wagon for the conveyance of hay or straw, grain in the sheaf, or other light and bulky material. (*d*) In *printing*, an upright framework, with side-cleats or other supports, for the storing of cases, of boards or galleys of type, etc.: distinguished as *case-rack*, *galley-rack*, etc. (*e*) *Naut.*, a fair-leader for a running rigging. (*f*) The cob-iron of a grate. *Halliwell.* (*g*) A framework for a table aboard ship to hold dishes, etc., so as to keep them from sliding or falling off: same as *fiddle*, 2. (*h*) A frame for holding round shot in holes; a shot-rack. (*i*) In *metal.*, an inclined wooden table on which fine ore is washed on a small scale. It is one of the various simpler forms of the buddle. (*j*) In *wooden-cloth manuf.*, a frame in a stove or room heated by steam-pipes on which the cloth is stretched tightly after washing with fullers' earth. (*k*) In *organ-building*, one of the thin boards, with perforations, which support the upper part of the feet of the pipes.

6. In *mach.*, a straight or very slightly curved metallic bar, with teeth on one of its edges, adapted to work into the teeth of a wheel, pinion, or endless screw, for converting a circular

Rack and Worm.

Rack and Pinion.

into a rectilinear motion, or vice versa. If the rack is curved, it is called a *segment rack*. If the teeth are placed on the rack obliquely and it is used with a worm instead of a wheel, it forms a *rack-and-worm gear*; in the cut, *a* is the worm, *b* the rack, and *c* a friction-wheel on which the back of *b* rolls, and which holds *b* intermeshed with *a*. See also cut under *mutilated*.

7. An anglers' creel or fish-basket.—8. A fish-weir.—9. A measure of lacework counting 240 meshes perpendicularly.—10. Reach: as, to work by *rack* of eye (that is, to be guided by the eye in working).—11†. That which is extorted; exaction.

The great rents and *racks* would be insupportable.
Sir E. Sandys, State of Religion

In a high rack, in a high position. *Halliwell.* [Prov. Eng.]—**On the rack**, on the stretch by or as if by means of a rack; hence, in a state of tension or of torturing pain or anxiety.

I wou'd have him ever to continue *upon the Rack* of Fear and Jealousie. *Congreve*, Way of the World, ii. 1.

My Head and Heart are *on the Rack* about my Son.
Steele, Conscious Lovers, iv. 1.

Rack and pinion. See def. 6, above.—**Rack-and-pinion jack**, a lifting-jack in which power is applied by means of a rack and pinion.—**Rack-and-pinion press**, a press in which force is transmitted through a pinion to a rack connected with the follower. *E. H. Knight.*—**Rack-cutting machine**, a milling-machine for cutting the teeth of racks.—**To live at rack and manger**, to live sumptuously and recklessly without regard to pecuniary means; live on the best without reck of payment.

But while the Palatine was thus busily employ'd, and lay with all his sea-horses, unbridl'd, unsaddl'd, *at rack*

and manger, secure and careless of any thing else but of carrying on the great work which he had begun . . .
The Pagan Prince (1669). (*Naves.*)

A blustering, dissipated human figure . . . tearing out the bowels of St. Edmundsbury Convent (its larders namely and cellars) in the most ruinous way, by *living at rack and manger* there. *Carlyle*, Past and Present, II. 1.

To put to the rack, to subject to the torture of the rack; cause to be racked; hence, to torment with or about anything; subject to a state of keen suffering.

rack[2] (rak), *n.* [< ME. **rakke*, < AS. *hraccæ*, *hracca*, *hrecca*, the back of the head (L. *occiput*: Sweet, Old Eng. Texts, p. 549).] The neck and spine of a fore quarter of veal or mutton, or the neck of mutton or pork. *Halliwell.*

A rack of mutton, sir.
And half a lamb. *Middleton*, Chaste Maid I. II. 2.

rack[3†] (rak), *v. i.* [Altered, to conform to *rack*[3], *n.*, from ME. *reken* (pret. *rac*), drive, move, tend, < Icel. *reka*, drive, drift, toss, = Sw. *räka* = Dan. *rage*, reject, drift, = AS. *wrecan*, drive, wreak, E. *wreak*: see *wreak*. Cf. *rack*[3], *n.*] 1. To drive; move; go forward rapidly; stir.

His spere to his herte rac. *Lawman*, I. 9220.
To her a-yeine he gan to *reke*. *Octovian*, l. 1152.
Ichwule forthur *reke*. *Old and Middle Scots*, l. 1602.

2. To drive, as flying clouds.

Three glorious suns, each one a perfect sun;
Not separated with the racking clouds,
But severed in a pale clear-shining sky.
Shak., 3 Hen. VI., II. 1. 27.

The clouds *rack* clear before the sun. *E. Jonson.*

rack[3] (rak), *n.* [< ME. *rac*, *rak*, *rakke*, < Icel. *rek*, drift, a thing drifted ashore, jetsam; cf. *reki*, drift, jetsam; < *reka*, drive, drift: see *rack*[3], *v.* Cf. *rack*[1] = *wrack*[1], *wreck*.] Thin flying broken clouds; especially, detached fragments of raggy cloud, commonly occurring with rain-clouds.

There a tempest horn to take on the tyrres high
A rak and a rayde wynde rore in her eyre.
Destruction of Troy (E. E. T. S.), l. 1284

The great globe itself,
Yea, all which it inherit, shall dissolve
And, like this insubstantial pageant faded
Leave not a *rack* behind.
Shak., Tempest, IV. 1. 156.

The cloudy *rack* slow journeying in the west.
Keats, Endymion, II.

As when across the sky the driving *rack* of the rain-cloud
Grows for a moment thin, and betrays the sun by its brightness. *Longfellow*, Miles Standish, ix.

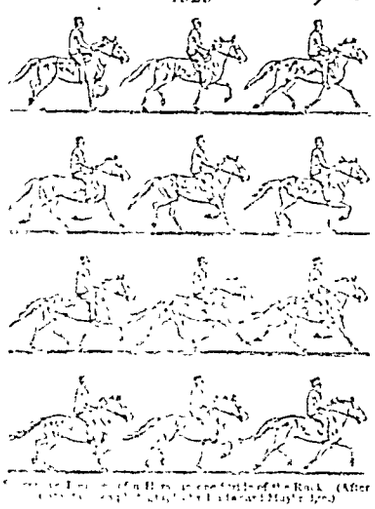
rack[4] (rak), *n.* [Another spelling of *wrack*: see *wrack*[1], *n.*, and cf. *rack*[3], from the same ult. source.] Same as *wrack*[1]: now used in the phrases *to go to rack*, *to go to rack and ruin*.

We fell to talk largely of the want of some person to understanding to look after the business, but all *go to rack*.
Pepys.

rack[5] (rak), *n.* [A var. of *rale*[2], a path, track: see *rake*[2].] 1. A rude narrow path, like the track of a small animal. *Halliwell.* [Prov. Eng.]—2. A rut in a road. *Halliwell.* [Prov. Eng.]

rack[6] (rak), *v.* A dialectal form of *reek*.

rack[7†] (rak), *v. t.* [A dial. form for what would be reg. **retch*, < ME. *reechen*, *raechen*, *rechen* (pret. *rahte*, *rehte*, *raughte*), rule, < AS. *reccan*, direct, extend, reach forth, explain, say: see *rack*[1], and cf. *retch*[1] and *reckon*.] To relate; tell. *Halliwell.*



rack[8] (rak), *v. i.* [Perhaps a particular use of *rack*[3], *v.* By some supposed to be a var. of *rock*[2].] To move with the gait called a rack.

His Rain-deer, *racking* with proud and stately pace,
Giveth to his flock a right beautiful grace.
Peele, An Eclogue.

Ferratu (It.), a bolting cloth, a sieve; a *racking* of a horse. *Ferrattare*, to sift or boult meale. Also a *racking* between an amble and a trot. *Florio.*

rack[8] (rak), *n.* [< *rack*[8], *v.*] A gait of the horse between a trot and a gallop (or canter), in which the fore feet move as in a slow gallop, while the hind feet move as in a trot (or pace). It is usually an artificial gait, but is sometimes hereditary or natural. There is much confusion of terms in respect to this gait, due to the fact that the gait itself is sometimes variously, according as the racker carries the one or the other fore foot foremost in the galloping motion of the fore feet; that many confound the rack with the pace, the two words often being used as synonymous; and that many have mistaken the use of the words *pace* and *amble*. There is abundant evidence that the American "pace" of to-day is the "amble" of Europeans of the last century and earlier. The motion of the hind feet is the same in the trot, the pace, and the rack. In the trot the diagonal hind and fore feet move nearly simultaneously. In the pace or amble the hind and fore feet of the same side move nearly simultaneously. See cut in next column.

rack[9] (rak), *n.* [A var. of *rock*[3], by confusion with *rack*[1]. Cf. *rack*[8], a supposed var. of *rock*[2].] A distaff; a rock.

The sisters turn the wheel,
Empty the woolly reed, and fill the reel
Dryden, tr. of Virgil's Georgics, iv. 423.

rack[10] (rak), *v. t.* [Appar. first in pp. *racked*, *rackt*; < OF. *raquer*, pp. *raqué*, in *vin raqué*, "small or corse wine, squeezed from the dregs of the grapes, already drained of all their best moisture" (Cotgrave); origin uncertain; according to Wedgwood, < Languedoc *araca*, rack, < *raco*, husks or dregs of grapes; according to Skeat, for orig. **rasquer* = Sp. Pg. Pr. *rascar*, scratch: cf. Sp. Pg. *rasgar*, tear apart: see *rash*[3].] To draw off from the lees; draw off, as pure liquor from its sediment: as, to *rack* cider or wine; to *rack* off liquor.

Rackt wines—that is, wines cleansed and so purged that it may be said is drawne from the lease. *Markham*, 1617.

rack[11] (rak), *n.* [Partly by apheresis from *arrack*; cf. Sp. *raque*, arrack, Turk. *raqi*, a spirituous drink, from the same ult. source: see *arrack*.] 1. Same as *arrack*.

Their ordinary drink is Tea: but they make themselves merry with hot *Rack*, which sometimes also they mix with their Tea. *Dampier*, Voyages, II. i. 53.

2. A liquor made chiefly of brandy, sugar, lemons (or other fruit), and spices. *Halliwell.*—**Rack punch**, a punch made with arrack.

I don't love *rack punch*. *Swift*, To Stella, xxiv.

If slices of ripe pineapple be put into good arrack, and the spirit kept for a considerable time it mellows down and acquires a very delicious flavour. This quality is much valued for making *rack-punch*.
Spons' Encyc. Manuf., I. 220.

rack[12] (rak), *n.* [Origin obscure.] A young rabbit. See the quotation.

Racks, or young rabbits about two months old, which have not lost their first coat. *Ure*, Dict., IV. 380.

rackabones (rak'a-bōnz), *n.* [< *rack*[1], *v.*, + *a* (insignificant) + *bones*.] A very lean person or animal. [Colloq., U. S.]

He is a little afraid that this mettlesome charger cannot be trusted going down hill, otherwise he would let go of the old *rackabones* that hobbles behind [the vehicle].
New York Tribune, June 13, 1862.

rackapelt (rak'a-pelt), *n.* [Cf. *rackabones*.] An idle rascal. *Halliwell.* [Prov. Eng.]

rackarock (rak'a-rok), *n.* [< *rack*[1], *v.*, + *a*[2] + *rock*[1]. Cf. *rendrock*.] An explosive consisting of about three parts of potassium chlorate to one part of nitrobenzol.

rack-block (rak'blok), *n.* *Naut.*, a range of sheaves cut in one piece of wood for running-ropes to lead through.

rack-calipers (rak'kal'i-pėrz), *n. pl.* Calipers of which the legs are actuated by a rack-and-pinion motion. *E. H. Knight.*

rack-car (rak'kär), *n.* A freight-car roofed over and with sides formed of slats with open spaces between.

rack-compass (rak'kum'pas), *n.* A joiners' compass with a rack adjustment. *E. H. Knight.*

racker[1] (rak'ėr), *n.* [= D. *rakker* = MLG. *racker*, *racher*, LG. *rakker* = G. *racker* = Sw. *rackare* = Dan. *rakker*; as *rack*[1], *v.*, + *-er*[1].] 1. One who puts to the rack; a torturer or tormentor.—2. One who wrests, twists, or distorts.

Such *rackers* of orthography. *Shak.*, L. L. L., v. 1. 21.

3. One who harasses by exactions: as, a *racker* of tenants. *Swift.*

racker[2] (rak'ėr), *n.* [< *rack*[8] + *-er*[1].] A horse that moves with a racking gait.

racker[3] (rak'ėr), *n.* [< *rack*[10] + *-er*[1].] A device for racking liquor, or drawing it off from the lees; also, a person who racks liquors.

The filling of casks is effected by Smith's *rackers*.
Engineer, LXVI. 151.

racket[1] (rak'et), *n.* [< Gael. *racaid*, a noise, disturbance, < *rac*, make a noise like geese or ducks; Ir. *racan*, noise, riot. Cf. *rackle*.] 1. A disorderly, confusing noise, as of commingled play or strife and loud talk; any prolonged clatter; din; clamor; hurly-burly.

Pray, what's all that *racket* over our heads? . . . My brother and I can scarce hear ourselves speak.
Sterne, Tristram Shandy, II. 6.

2. A disturbance; a row; also, a noisy gathering; a scene of clamorous or eager merriment. [Colloq.]

Char. Adzflesh, forsooth, yonder haz been a most heavy *racket*; by the zide of the wood there is a curious hansom gentlewoman lies as dead as a herring, and bleeds like any stuck pig. *Unnatural Mother* (1698). (*Nares.*)

3. A clamorous outburst, as of indignation or other emotion; a noisy manifestation of feeling: as, to make a *racket* about a trifle; to raise a *racket* about one's ears. [Colloq.]—4. Something going on, whether noisily and openly or quietly; a special proceeding, scheme, project, or the like: a slang use of very wide application: as, what's the *racket*? (what is going on?); to go on a *racket* (to engage in a lark or go on a spree); to be on to a person's *racket* (to detect his secret aim or purpose); to work the *racket* (to carry on a particular scheme or undertaking, especially one of a "shady" character); to stand the *racket* (to take the consequences, or abide the result).

He is ready as myself to stand the *racket* of subsequent proceedings.
Daily Telegraph (London), Sept. 8, 1882. (*Encyc. Dict.*)

He had been off on the *racket*, perhaps for a week at a time.
Daily Telegraph (London), Nov. 16, 1885. (*Encyc. Dict.*)

"Lucky I learned that signal *racket*," said Jack, as, still at a furious pace, he made cuts in different directions with his extemporized flag. *The Century*, XXXIX. 527.

To give the name of legislation to the proceedings at Albany over the Fair Bill yesterday would be an abuse of language. The proper name for them was "tumbling to the *racket*." The Assembly passed the bill without debate and almost unanimously, much as they might pass a bill authorizing a man to change his name.
New York Evening Post, Jan. 20, 1890.

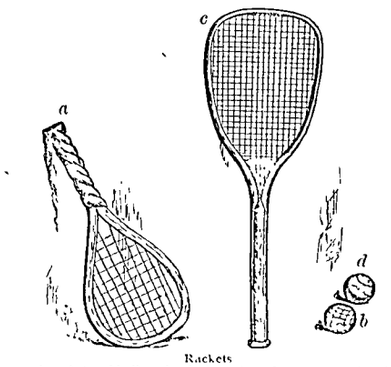
5. A smart stroke; a rap. [Prov. Eng. and Scotch.]

racket[1] (rak'et), *v.* [< *racket*[1], *n.*] I. *intrans.* 1. To make a rattling or clattering noise; raise a tumult; move noisily.

The wind blazed and *racketed* through the narrow space between the house and the hill. *S. Judd*, Margaret, I. 17.

2. To engage or take part in a racket of any kind; frequent noisy or tumultuous scenes; carry on eager or energetic action of some special kind. [Colloq.]

Old General Pierpont, his great-great-grandfather, was a general in the British army in Italy, an he *racketed* round 'mong them diabobs out there, an' got no end o' gold an' precious stones. *H. B. Stowe*, Oldtown, p. 571.



3. To be dissipated; indulge to excess in social pleasures. [Colloq.]

I have been *racketing* lately, having dined twice with Rogers and once with Grant.
Macaulay, in Trevelyan, I. 302.

II. *trans.* To utter noisily or tumultuously; clamor out. [Rare.]

Then think, then speak, then drink their sound again,
And *racket* round about this body's court
These two sweet words, 'Tis safe.
B. Jonson, Case is Altered, iv. 4.

racket[2] (rak'et), *n.* [Also *racquet*, *raquet*; < ME. *raket* = D. *raket* = MLG. *ragget* = G. *racket*, *rakett* = Dan. Sw. *raket*, < OF. assibilated *rachete*, *rachette*, *rasquete*, *rasquette*, a racket, battledore, also the palm of the hand, F. *raquette*, a racket, battledore, < Sp. *raqueta* = It. *racchetta*, also *lacchetta*, a racket, battledore (cf. ML. *racha*), < Ar. *rāhat*, palm of the hand, pl. *rāh*, the palms; cf. *palm*[1], 7, the game so called, tennis.] 1. The instrument with which players at tennis and like games strike the ball; a bat consisting usually of a thin strip of wood bent into a somewhat elliptical hoop,

across which a network of cord or catgut is stretched, and to which a handle is attached.

But kanstow pleyen *raket* to and fro?
Chaucer, Troilus, iv. 160.

Th' Hail, which the Winde full in his face doth yerk,
Smarter than *Racquets* in a Court re-lerk
Balls 'gainst the Walls of the black-boorded house.
Sylvester, tr. of Du Bartas's Weeks, II., The Captaines.

'Tis but a ball handled to and fro, and every man carries a *racket* about him, to strike it from himself among the rest of the company.
Swift, Tale of a Tub, Author's Pref.

2. *pl.* A modern variety of the old game of tennis.

He could shoot, play *rackets*, whist, and cricket better than most people, and was a consummate horseman on any animal under any circumstances
Whyte Melville, White Rose I. xiii.

Some British officers, playing *rackets*, had struck a ball to where he was sitting. *Nineteenth Century* XXVI. 501.

3. A kind of net. *Halliwell.*—4. A snow-shoe: an Anglicized form of the French *raquette*. [Rare.]

Their [the Canadian Indians'] Dogges are like Foxes, which spend not, nor euer glue ouer, and haue *rackets* tyed vnder their feet, the better to runne on the snow.
Purchas, Pilgrimage, p. 753.

5. A broad wooden shoe or patten for a horse or other draft-animal, to enable him to step on marshy or soft ground.—6. A bird's tail-feather shaped like a racket; a spatule. The racket may result from a spatulate enlargement of the web at or near the end of the feather, or from the lack, natural or artificial, of webbing along a part of the feather beyond which the feather is webbed, or from coiling of the end of the feather. These formations are exhibited in the motmots, in some humming birds and birds of paradise, and in various others, and are illustrated in the figures under *Momotus*, *Prioniturus*, and *Cucinnaurus*. Some feathers springing from the head acquire a similar shape: see cut under *Paradisea*.

7†. A musical instrument of the seventeenth century, consisting of a mouthpiece with a double reed, and a wooden tube repeatedly bent upon itself, and pierced with several finger-holes. Its compass was limited, and the tone weak and difficult to produce. Several varieties or sizes were made, as of the bombard, which it resembled. Early in the eighteenth century it was replaced by the modern bassoon.

8. An organ-stop giving tones similar to those of the above instrument.

racket[2]† (rak'et), *v. t.* [< *racket*[2], *n.*] To strike with or as if with a racket; toss.

rack-railway (rak'rāl'wā), *n.* A railway operated with the aid of rack-rails.

The first *rack-railway* in France was opened lately at Langres.
Nature, XXXVII. 328.

rack-rent (rak'rent), *n.* [< *rack*[1], *v.*, + *rent*[2], *n.*] A rent raised to the highest possible limit; a rent greater than any tenant can reasonably be expected to pay: used especially of land-rents in Ireland.

Some thousand families are . . . preparing to go from hence and settle themselves in America, . . . the farmers, whose beneficial bargains are now become a *rack-rent* too hard to be borne, and those who have any ready money, or can purchase any by the sale of their goods or leases, because they find their fortunes hourly decaying.
Swift, Intelligencer, No. 19.

Rack-rent . . . is the highest annual rent that can be obtained by the competition of those who desire to become tenants. It is not a strictly legal term, though sometimes used in Acts of Parliament, in legal documents it is represented by "the best rent that can be obtained without a fine."
F. Pollock, Land Laws, p. 152.

rack-rent (rak'rent), *v.* [< *rack-rent*, *n.*] I. *trans.* To subject to the payment of rack-rent.

The land-lord *rack-renting* and evicting him [the tenant] with the help of the civil and military resources of the law.
W. S. Gregg, Irish Hist. for Eng. Readers, p. 160.

II. *intrans.* To impose rack-rents.

Hence the chief gradually acquired the characteristics of what naturalists have called "synthetic" and "prophetic" types, combining the features of the modern gombeen man with those of the modern *rack renting* landlord.
Huxley, Pop. Sci. Mo., XXXVI. 783.

rack-renter (rak'ren^{t}tėr), *n.* [< *rack-rent* + *-er*[1].] 1. One who is subjected to the payment of rack-rent.

The yearly rent of the land, which the *rack-renter* or under tenant pays.
Locke.

2. One who rack-rents his tenants.

The entire Tory and Unionist alliance went on its knees, so to speak, during the Autumn to implore the *rack-renters* to moderation.
Contemporary Rev., LI. 121.

rack-saw (rak'sâ), *n.* A wide-toothed saw.

rack-stick (rak'stik), *n.* A stick suitably prepared for stretching or straining a rope or the like, as in fastening a load on a wagon.—**Rack-stick and lashing**, a piece of two-inch rope, about 6 feet long, fastened to a picket about 15 inches long, having a hole in its head, to receive the rope. *Farrow*, Mil. Encyc.

rack-tail (rak'tāl), *n.* In a repeating clock, a bent arm connected with the striking-mechanism, having a pin at its end which drops upon the notched wheel that determines the number of strokes.

rackwork (rak'wėrk), *n.* A piece of mechanism in which a rack is used; a rack and pinion or the like. See cut under *rack*[1].

raconteur (ra-kôn-tėr'), *n.* [F., < *raconter*, relate: see *recount*[1].] A story-teller; a person given to or skilled in relating anecdotes, recounting adventures, or the like.

There never was, in my opinion, a *raconteur*, from Charles Lamb or Theodore Hook down to Gilbert à Beckett or H. J. Byron, . . . who spoke and told anecdotes at a dinner-table, . . . that was not conscious that he was going to be funny.
Lester Wallack, in Scribner's Mag., IV. 721.

racoon, raccoon (ra-kön'), *n.* [Formerly also *rackoon*, *rackcoon*, by apheresis from earlier *arocoun*, *aroughcun*, *aroughcond*, < Amer. Ind. *arathcone*, *arrathkune*, a racoon. Hence, by further apheresis, *coon*. The F. *raton*, racoon, is an accom. form, simulating F. *raton*, a rat: see *ratten*.] A small plantigrade carnivorous quadruped of the arctoid series of the order *Feræ*, belonging to the family *Procyonidæ* and genus *Procyon*. The common racoon is *P. lotor*, so called from its habit of dipping its food in water, as if

washing it, before eating. This animal is about 2 feet long, with a stout body, a bushy ringed tail, short limbs, pointed ears, broad face, and very sharp snout, of a general grayish coloration, with light and dark markings on the face. It is common in southerly parts of the United States, and feeds on fruits and other vegetable as well as animal substances. Its flesh is eatable, and the fur, much used for making caps, is called *coonskin*. The racoon is readily tamed, and makes an amusing pet. Other members of the genus are *P. psora* of California (perhaps only a nominal species) and the quite distinct *P. cancrivorus*, the crab-eating racoon, of the warmer parts of America, known as the *agouara*.

A beast they call *Arougheun*, much like a badger, but vseth to liue on trees as squirrels doe.
Capt. John Smith, Virginia, I. 124.

Quil-darting Porcupines and *Rackcoones* be
Castled in the hollow of an aged Tree.
S. Clarke, Four Plantations in America (1670), p. 32.

racoon-berry (ra-kön'ber'i), *n.* The May-apple, *Podophyllum peltatum*. [U. S.]

racoon-dog (ra-kön'dog), *n.* An Asiatic and Japanese animal of the family *Canidæ*, *Nyctereutes procyonoides*, a kind of dog having an aspect suggesting a racoon. See cut under *Nyctereutes*.

racoon-oyster (ra-kön'ois'tėr), *n.* An uncultivated oyster growing on muddy banks exposed at low tide. [Southern coast, U. S.]

racoon-perch (ra-kön'pėrch), *n.* The common yellow perch, *Perca americana*, of the Mississippi valley: so called from bands around the body something like those of a racoon's tail. See cut under *perch*[1].

Racovian (ra-kō'vi-an), *a.* and *n.* [< *Racow* (in Poland) (NL. *Racovia*) + *-ian*.] I. *a.* Pertaining or relating to Rakow, a town of Poland, or to the Socinians, who made it their chief seat in the first part of the seventeenth century: as, the *Racovian* Catechism (a popular exposition of Socinianism: see *catechism*, 2).

II. *n.* An inhabitant of Rakow, or an adherent of the Unitarian doctrines formerly taught there; specifically, a Polish Socinian.

racquet, *n.* See *racket*[2].

racy (rā'si), *a.* [< *race*[3] + *-y*[1].] 1. Having an agreeably peculiar flavor, of a kind that may be supposed to be imparted by the soil, as wine; peculiarly palatable.

The hospitable sage, in sign
Of social welcome, mix'd the *racy* wine.
Pope, Odyssey, iii. 593.

2. Having a strong distinctive and agreeable quality of any kind; spirited; pungent; piquant; spicy: as, a *racy* style; a *racy* anecdote.

Brisk *racy* verses, in which we
The soil from whence they came taste, smell, and see.
Cowley, Ans. to Verses.

His ballads are *raciest* when brimmed with the element that most attracts the author.
E. C. Stedman, Poets of America, p. 283.

Rock English has gone round the world; but at home we still preserve the *racy* idioms of our fathers.
R. L. Stevenson, The Foreigner at Home.

3. Pertaining to race or kind; racially distinctive or peculiar; of native origin or quality.

Yorkshire has such families here and there, . . . peculiar, *racy*, vigorous; of good blood and strong brain.
Chas. Kingsley, Misc., Shirley, ix.

The eyes [of a Gordon setter] must be full of animation, of a rich color, between brown and gold; the neck must be clean and *racy*.
The Century, XXXI. 138.

= Syn. 1 and 2. *Racy*, *Spicy*. These words agree in expressing a quality that is relished, physically or mentally. Literally, *racy* applies to the peculiar flavor which wines derive from the soil, and *spicy* to the flavor given to food, beverages, etc., by spice. Figuratively, that is *racy* which is agreeably fresh and distinctive in thought and expression; that is *spicy* which is agreeably pungent to the mind, producing a sensation comparable to that which spice produces in taste. Pointedness is essential to *spicy*, and likely to be found in *racy*.

rad[1] (rad), *a.* [< ME. *rad*, < Icel. *hræddr* = Sw. *rädd* = D. *ra(d*, afraid.] Afraid; frightened. [Old Eng. and Scotch.]

We were so rad ouerlikon,
When that he pit besyde the stone,

raddet, An obsolete preterit of *read*[1].

raddle[1] (rad'l), *n.* [Early mod. E. *radel*, *redle*; also (in verb) *ruddle*; perhaps a transposed form of *hurdle*; or formed from *wreathe* or *writhe* (cf. *writhle*, *v.*) and confused with *hurdle*, or with *riddle*[1] (ME. *redel*, etc.), a curtain.] 1. A hurdle. [Prov. Eng.]—2. *pl.* Small wood or sticks split like laths to bind a wall for the plastering it over with loam or mortar. *Kennett.* (*Halliwell.*)

In old time the houses of the Britons were slightly set up with a few posts and many *radels*, with stable and all cities under one roofe.
Harrison, Descrip. of Britain, ii. 12. (*Holinshed's Chron.*)

3. A piece of wood interwoven with others between stakes to form a fence. [Prov. Eng.]—4. A hedge formed by interweaving the shoots and branches of trees or shrubs. [Prov. Eng.]—5. A wooden bar with a row of upright pegs, employed by domestic weavers in some places to keep the warp of a proper width, and to prevent it from becoming entangled when it is wound upon the beam.—6. In *metal-working*, a rabble.

raddle[1] (rad'l), *v. t.*; pret. and pp. *raddled*, ppr. *raddling*. [Formerly also *redle*, *ruddle*; < *raddle*[1], *n.*] 1. To weave; interweave; wind together; wattle.

Raddling or working it up like basket work.
Defoe, Robinson Crusoe, xxv.

2†. To "baste"; beat.

Robin Hood drew his sword so good,
The peddler drew his brand,
And he both *raddled* him, bold Robin Hood,
So that he scarce can stand.
Ballad of Robin Hood.

raddle[2] (rad'l), *n.* [Var. of *reddle*, *ruddle*[1].] 1. Same as *reddle*.—2. A layer of red pigment.

Some of us have more serious things to hide than a yellow cheek behind a *raddle* of rouge.
Thackeray, Roundabout Papers, A Medal of George the Fourth.

raddle[3] (rad'l), *v. t.*; pret. and pp. *raddled*, ppr. *raddling*. [< *raddle*[2], *n.*] 1. To paint with or as if with raddle; color coarsely, as with rouge.

Can there be any more dreary object than those whitened and *raddled* old women who shudder at the slips?
Thackeray, Newcomes, xx.

2. To get over (work) in a careless, slovenly manner. [Prov. Eng.] *Imp. Dict.*

raddle-hedge (rad'l-hej), *n.* Same as *raddle*[1], 4.

raddleman†, *n.* Same as *reddleman*. *Fuller*, Worthies, III. 38.

raddock (rad'ok), *n.* A dialectal form of *ruddock*.

raddour†, *n.* See *redour*.

rade[1]† (rād). A dialectal (Old English and Scotch) preterit of *ride*.

rade[2] (rād), *n.* A dialectal (Scotch) or obsolete form of *road*.

radeau (ra-dō'), *n.*; pl. *radeaux* (-dōz'). [< F. *radeau* = Pr. *radelh*, < ML. "*radellus* (also, after OF., *radellus*, *rasellus*), dim. of L. *ratis*, raft, vessel.] A raft.

There seven ships under sail, and one at anchor above Split Rock, and behind it the *radeau* That I saw.
Irving. (*Webster.*)

Rademacher's plaster. See *plaster*.

radevoret, *n.* [ME., prob. of OF. origin; perhaps orig. OF. "*ras de Vore*: *ras* (Sp. It. *raso*), a sort of smooth cloth (see *rash*[3]); *de*, of; "*Vore*, perhaps the town of *Lavaur* in Languedoc. Cf. F. *ras de Chalons*, *ras de Gennes*, similar cloth from the places named.] A sort of cloth or textile fabric usually explained as 'tapestry' or 'striped stuff tapestry.'

This wel fil by ayen of had fo yonthe
So that she werken an I cnil rowden kouthe,
And I weven in stole the *radevere*,
And yet of wymmen I ath he wored yore.
Chaucer, Good Women, l. 2572.

radget (raj), *n.* Same as *rodger*.

radial (rā'di-al), *a.* and *n.* [< F. *radial* = It. *radiale*, < NL. *radialis*, < L. *radius*, ray, radius: see *radius*, *ray*[1].] I. *a.* Of or pertaining to a ray or a radius (or radii); having the character or appearance of a ray or a radius; grouped or appearing like radii or rays; shooting out as from a center; being or moving in the direction of the radius.

At a little distance from the center the wind is probably nearly *radial*.
Science, III. 91.

Specifically (*a*) In *anat.*, of or pertaining in any way to the radius (see *radius*, 2): as, the *radial* artery, nerve, vein; *radial* attachments or movements, the *radial* side or aspect of the arm, wrist, or hand; the *radial* group of muscles, the *radial* prevator or supinator. (*b*) In *z.*, rayed, radiate, or radiating, or pertaining to the rays, arms, or radiating processes of an animal or relating to the radially disposed or actinomeric parts of the *Actinozoa* and similar animals. See cut under *madreporan*. (*c*) In *ichth.*, of or pertaining to the radialia. See *radialia* (*c*).

The cartilaginous, or ossified, basal and *radial* supports of the fins. *Huxley*, Anat. Vert., p. 55.

(*d*) In *bot.*: (1) Belonging to a ray, as of an umbel or of a flower-head in the *Compositæ*. (2) Developing uniformly on all sides of the axis, opposed to *dorsal* or *dorsoventral*. *Gray*. —**Radial ambulacral vessels.** See *ambulacral*. —**Radial artery**, the smaller of the branches resulting from the bifurcation of the brachial artery at the elbow, extending in a straight line on the outer side of the front of the forearm to the wrist, where it turns around the radial side of the carpus and descends to the upper part of the first interosseous space, where it penetrates the palm of the hand to help form the deep palmar arch. Just above the wrist it lies subcutaneously on the ulnar side of the tendon of the long supinator, and is here commonly felt in ascertaining the pulse. Its chief branches, besides the muscular and cutaneous ones, are the radial recurrent and the anterior and posterior carpals. —**Radial axle-box.** See *axle-box*. —**Radial bundle**, in *bot.*, a fibrovascular bundle in which the phloem and xylem are arranged in alternating radii. Compare *closed*, *collateral*, and *concentric bundle*, under *bundle*.

The last form is the *radial*, where the *bundles* of phloem and xylem are arranged alternately in the central fibrovascular axis. *Encyc. Brit.*, XII. 18.

Radial cells, in *ecton.*, same as *pedestal cells* (*tubes*) (which see, under *pedestal*). —**Radial curve**, in *geom.*, a curve most conveniently expressed by means of the radius vector as one coordinate: spirals and the quadratrix of Dinostratus are *radial curves*. —**Radial drilling-machine.** See *drilling-machine*. —**Radial fibers of the retina.** See *sustentacular fibers*, under *sustentacular*. —**Radial formula**, the expression of the number of rays in the fins of a fish by the initial letters of the names of the fins and the numbers of their rays: thus, the *radial formula* for the yellow perch is D. XIII. + I. 14; A. II. + 7; P. 15; V. I. 5—where the Roman numerals are the spines and the Arabic the rays of the dorsal, anal, pectoral, and ventral fins respectively. —**Radial nerve.** See *nerve*. —**Radial-piston water-wheel.** See *water-wheel*. —**Radial plates**, in crinoids, the set or system of plates which includes the joints of the stem, arms and pinnules, the centrodorsal plate, and the radial plate proper; distinguished from *perisomatic plates*. —**Radial recurrent artery**, a branch of the radial artery, given off near its origin, that turns backward to join in the anastomosis about the elbow. —**Radial symmetry.** See *symmetry*. —**Radial vein.** See *marginal vein*, under *marginal*.

II. *n.* A radiating or radial part; a ray. Specifically, in *anat.* and *zoöl.*: (*a*) A radiale. (*b*) In *ichth.*, the radius or hypocoracoid (a bone). (*c*) One of the joints of the branches of a crinoid, between the brachials and the basals; one of the joints of the second order, or of a division of the basals. See cut under *Crinoidea*.

The two *radials* [of a crinoid] on either side of the largest basal . . . are broader than the other two.
Quart. Jour. Geol. Soc., XLV. 150.

(*d*) The fourth joint, counting from the base, of the pedipalp of a spider.

radiale (rā-di-ā'lē), *n.*; pl. *radialia* (-li-ä). [NL., neut. of *radialis*, radial: see *radial*.] In *zoöl.* and *anat.*: (*a*) The radiocarpal bone; that bone of the wrist which is situated on the radial side of the proximal row of carpals, in special relation with the radius. In man this bone is the scaphoid. Compare *ulnare*, and see cuts under *hand* and *carpus*. (*b*) One of the rays of the cup of a crinoid. See *radial*, *n.* (*c*), and cut under *Crinoidea*. (*c*) A cartilage radiating from the base of the fins of elasmobranchiate fishes. See cut under *pterygium*. (*d*) Same as *radial*, *n.* (*b*). See *hypercoracoid*.

radialis (rā-di-ā'lis), *n.*; pl. *radiales* (-lēz). [NL. *radialis* (sc. *musculus*, etc.), radial: see *radial*.] In *anat.*, a radial muscle, artery, vein, or nerve: chiefly used adjectively as a part of certain Latin phrase-names of muscles: as, flexor carpi *radialis*; extensor carpi *radialis* longior or brevior. See *flexor*, *extensor*.

radiality (rā-di-al'i-ti), *n.* [< *radial* + *-ity*.] The character or structure of a radiate organism; formation of rays, or disposition of rayed parts; radial symmetry. Sometimes called *radiateness* and *radiism*.

radialization (rā-di-al-i-zā'shon), *n.* [< *radialize* + *-ation*.] Arrangement in radiating forms; radiation.

Thus the rocks exhibit much evidence of a silicification (and often of a *radialization* possibly connected with it).
Quart. Jour. Geol. Soc., XLV. 267.

radialize (rā'di-al-īz), *v. t.*; pret. and pp. *radialized*, ppr. *radializing*. [< *radial* + *-ize*.] To render radiate; make ray-like.

One fragment exhibits part of a large *radialized* structure within a spherulitic matrix.
Quart. Jour. Geol. Soc., XLV. 249.

radially (rā'di-al-i), *adv.* 1. In a radial or radiating manner; in the manner of radii or rays: as, lines diverging *radially*.

As the growth [of the fungus] spreads outward *radially*, the inner hyphæ, having sucked all the organic matter out of the ground, perish.
S. B. Herrick, Wonders of Plant Life, p. 82.

2. In *entom.*, toward or over the radius (a vein of the wing): as, a color-band *radially* dilated.

radian (rā'di-an), *n.* [< *radius* + *-an*.] The angle subtended at the center of a circle by an arc equal in length to the radius. Also called the *unit angle* in circular measure. It is equal to 57° 17′ 44″.80625 nearly.

radiance (rā'di-ans), *n.* [< F. *radiance*, < ML. *radiantia*, radiance, < L. *radian(t-)s*, radiant: see *radiant*.] 1. Brightness shooting in rays or beams; hence, in general, brilliant or sparkling luster; vivid brightness.

The sacred *radiance* of the sun. *Shak.*, Lear, i. 1. 111.

The Sun, . . .
Girt with omnipotence, with *radiance* crown'd
Of majesty divine. *Milton*, P. L., vii. 191.

Life, like a dome of many colour'd glass,
Stains the white *radiance* of eternity.
Shelley, Adonais, lii.

2. Radiation.

Thus we have . . . (3) Theory of *radiance*.
J. Clerk Maxwell, in Encyc. Brit., XIX. 2.

= Syn. 1. *Radiance*, *Brilliance*, *Brilliancy*, *Effulgence*, *Refulgence*, *Splendor*, *Luster*. These words agree in representing the shooting out of rays or beams in an impressive way. *Radiance* is the most steady; it is generally a light that is agreeable to the eyes, hence the word is often chosen for corresponding figurative expressions: as, the *radiance* of his cheerfulness; the *radiance* of the gospel. *Brilliance* represents a light that is strong, often too strong to be agreeable, and marked by variation or play and penetration: as, the *brilliance* of a diamond or of fireworks. Hence, figuratively, the *brilliance* of the scene at a wedding; the *radiance* of humor, the *brilliancy* of wit. *Brilliance* is more often literal, *brilliancy* figurative. *Effulgence* is splendid light, seeming to fill to overflowing every place where it is: a strong, flooding, but not necessarily intense or painful light: as, the *effulgence* of the noonday sun; the *effulgence* of the attributes of God. Hence a courtier might by figure speak of the *effulgence* of Queen Elizabeth's beauty. *Refulgence* is often the same as *effulgence*, but sometimes weaker. *Splendor*, which is more often used figuratively, is, when used literally, about the same as *refulgence*. *Luster* is the only one of these words which does not imply that the object gives forth light; *luster* may be used where the light is either emitted or reflected, but latterly more often reflected: as, the *luster* of silk. *Luster* is generally, like *brilliance*, a varying light, but it may be simply two or three degrees weaker than *splendor*. For comparison with *glisten*, *glitter*, etc., see *glare*, *v. i.*

'Twere all one
That I should love a bright particular star
And think to wed it, he is so above me.
In his bright *radiance* and collateral light
Must I be comforted. *Shak.*, All's Well, i. 1. 99.

There is an appearance of *brilliancy* in the pleasures of high life which naturally dazzles the young. *Craig.*

Effulgence of my glory, Son beloved.
Milton, P. L., vi. 680.

Though they fell, they fell like stars,
Streaming *splendour* through the sky.
Montgomery, Battle of Alexandria.

The smiling infant in his hand shall take
The crested basilisk and speckled snake,
Pleased the green *lustre* of the scales survey,
And with their forky tongues shall innocently play.
Pope, Messiah, l. 82.

radiancy (rā′di-an-si), *n.* [As *radiance* (see *-cy*).] Same as *radiance*.

radiant (rā′di-ant), *a.* and *n.* [Early mod. E. *radiaunt*; < OF. *radiant*, F. *radiant* = Sp. Pg. *radiante* = It. *radiante, raggiante*, < L. *radian(t-)s*, ppr. of *radiare*, radiate, shine: see *radiate*.] I. *a.* 1. Darting, shooting, or emitting rays of light or heat; shining; sparkling; beaming with brightness, literally or figuratively: as, the *radiant* sun; a *radiant* countenance.

Mark, what *radiant* state she spreads.
Milton, Arcades, l. 14.

A sudden star, it shot through liquid air,
And drew behind a *radiant* trail of hair.
Pope, R. of the L., v. 128.

His features *radiant* as the soul within.
O. W. Holmes, Vestigia Quinque Retrorsum.

2. Giving out rays; proceeding in the form of rays; resembling rays; radiating; also, radiated; radiate: as, *radiant* heat.

Jonas . . . made him a shadowynge place for his defence agaynst the *radyaunt* heet of the sonne in the syde of an hyll. *Bp. Fisher*, Seven Penitential Psalms, Ps. cxxx.

The passage of *radiant* heat, as such, through any medium does not heat it at all.
W. B. Carpenter, Energy in Nature (1st ed.), p. 45.

When this [radiation of fibers] takes place in an open cavity, producing brush-like forms, they are termed *radiant*.
Encyc. Brit., XVI. 370.

3. In *her.*: (*a*) Edged with rays: said of an ordinary or other bearing such as is usually bounded with straight lines, the rays generally appearing like long indentations. See *ray*[1], 8. (*b*) Giving off rays, which do not form a broken or indented edge to the bearing, but stream from it, its outline being usually perfect and the rays apparently streaming from behind it.—4. In *bot.*, radiating; radiate.—**Radiant energy.** See *energy*.—**Radiant heat.** See *heat*, 2.—**Radiant matter**, a phrase used by Crookes to describe a highly rarefied gas, or "ultra gaseous matter," which is found to produce certain peculiar mechanical and luminous effects when a charge of high-potential electricity is passed through it. For example, in a vacuum tube exhausted to one millionth of an atmosphere (a Crookes tube) the molecules of the gas present are projected from the negative pole in streams, and if they are made to strike against a delicately poised wheel they set it in motion. If on a piece of calcite, they make it phosphorescent, etc.—**Radiant neuration**, in *entom.*, neuration characterized by a number of veins radiating outward from a small roundish areolet or cell in the disk of the wing, as in certain *Diptera*.—**Radiant point**, in *physics*, the point from which rays of light or heat proceed. Also called *radiating point*.—**Radiant veins** or **nervures**, in *entom.*, veins or nervures radiating from a single small wing-cell.—**Syn. 1.** Beaming, resplendent. See *radiance*.

Or, a Chief Radiant, Sable

II. *n.* 1. In *optics*, a luminous point or object from which light radiates to the eye, or to a mirror or lens; a point considered as the focus of a pencil of rays.—2. In *astron.*, the point in the heavens from which the shooting-stars of a meteoric shower seem to proceed: thus, the *radiant* of the shower of November 13th is near the star ζ Leonis, and these meteors are hence called the *Leonides*. Similarly the meteors of November 27th (which are connected with Biela's comet, and are often called the *Bielides*) have their radiant not far from γ Andromedæ, and are also known as the *Andromedes* or *Andromedids*.

radiantly (rā′di-ant-li), *adv.* 1. With radiant or beaming brightness; with glittering splendor.—2. By radiation; in the manner of rays; radiatingly. [Rare.]

Healthy human actions should spring *radiantly* (like rays) from some single heart motive.
Ruskin, Elements of Drawing, III.

Radiaria† (rā-di-ā′ri-ä), *n. pl.* [NL., neut. pl. of *radiarius*, radiate: see *radiary*.] 1. In Lamarck's classification (1801–12), a class of animals, divided into the orders *Mollia*, or acalephs, and *Echinoderma* (the latter including the *Actiniæ*).—2. In Owen's classification (1855), a subprovince of the province *Radiata*, containing the five classes *Echinodermata*, *Bryozoa*, *Anthozoa*, *Acalephæ*, and *Hydrozoa*.—3. In H. Milne-Edwards's classification (1855), the first subbranch of *Zoöphytes* (contrasted with *Sarcodaria*), containing the three classes of echinoderms, acalephs, and corals or polyps.

radiary† (rā′di-ā-ri), *a.* and *n.* [= F. *radiaire*, < NL. *radiarius*, < L. *radius*, a ray, radius: see *radius*.] In *zoöl.*, same as *radiate*.

Radiata (rā-di-ā′tä), *n. pl.* [NL., neut. pl. of L. *radiatus*, radiate: see *radiate*, *a.*] 1. In Cuvier's system of classification, the fourth grand branch of the animal kingdom, containing "the radiated animals or zoöphytes." It was divided into five classes: (1) *Echinodermata*; (2) *Entozoa*, or intestinal worms; (3) *Acalepha*, or sea-nettles; (4) *Polypi*; (5) *Infusoria*: thus a mere waste-basket for animals not elsewhere located to Cuvier's satisfaction. It was accepted and advocated by L. Agassiz after its restriction to the echinoderms, acalephs, and polyps, in which sense it was very generally adopted for many years. But the group has now been abolished, and its components are widely distributed in other phyla and classes of the animal kingdom, as *Protozoa*, *Cœlentera*, *Echinodermata*, and *Vermes*.

The lower groups of which he [Cuvier] knew least, and which he threw into one great heterogeneous assemblage, the *Radiata*, have been altogether remodelled and rearranged. . . . Whatever form the classification of the Animal Kingdom may eventually take, the Cuvierian *Radiata* is, in my judgment, effectually abolished.
Huxley, Classification (1869), p. 86.

2. In later classifications, with various limitations and restrictions of sense 1. (*a*) The old *Radiata* without the *Infusoria*. (*b*) Same as *Echinodermata* proper; *Ambulacraria* (which see) without the genus *Balanoglossus*. *Metschnikoff*. (*c*) In Owen's system (1855), one of four provinces of the animal kingdom, divided into *Radiaria*, *Entozoa* (cœlelminths and sterelminths), and *Infusoria* (the latter containing *Rotifera* and *Polygastria*).

radiate (rā′di-āt), *v.*; pret. and pp. *radiated*, ppr. *radiating*. [< L. *radiatus*, pp. of *radiare*, furnish with spokes, give out rays, radiate, shine (> It. *radiare, raggiare* = Sp. Pg. *radiar* = F. *radier*, radiate, shine), < *radius*, a spoke, ray: see *radius, ray*[1].] I. *intrans.* 1. To issue and proceed in rays or straight lines from a point; spread directly outward from a center or nucleus, as the spokes of a wheel, heat and light, etc.

Light . . . *radiates* from luminous bodies directly to our eyes. *Locke*, Elem. of Nat. Phil., xi.

But it [the wood] is traversed by plates of parenchyma, or cellular tissue of the same nature as the pith, which *radiate* from that to the bark.
A. Gray, Structural Botany, p. 74.

When the light diminishes, as in twilight, the circular fibers relax, the previously stretched *radiating* fibers contract by elasticity, and enlarge the pupil.
Le Conte, Sight, p. 39.

2. To emit rays; be radiant: as, a *radiating* body.—3. To spread in all directions from a central source or cause; proceed outward as from a focus to all accessible points.

The moral law lies at the center of nature, and *radiates* to the circumference. *Emerson*, Nature, p. 51.

Enjoyment *radiates*. It is of no use to try and take care of all the world, that is being taken care of when you feel delight in art or in anything else.
George Eliot, Middlemarch, xxii.

II. *trans.* 1. To emit or send out in direct lines, as from a point or focus; hence, to cause to proceed or diverge in all directions, as from a source or cause; communicate by direct emanation: as, the sun *radiates* heat and light.

Donatello . . . seemed to *radiate* jollity out of his whole nimble person. *Hawthorne*, Marble Faun, x.

The Wonder . . . looked full enough of life to *radiate* vitality into a statue of ice.
O. W. Holmes, A Mortal Antipathy, vi.

Mountain tops gather clouds around them for the same reason: they cool themselves by *radiating* their heat, through the dry superincumbent air, into space.
R. J. Mann, in Modern Meteorology, p. 23.

2. To furnish with rays; cause to have or to consist of rays; make radial.

Elsewhere, a brilliant *radiated* formation was conspicuous, spreading, at four opposite points, into four vast luminous expansions, compared to feather-plumes, or aigrettes. *A. M. Clerke*, Astron. in 19th Cent., p. 83.

Radiating keyboard or pedals, in *organ-building*, a pedal keyboard in which the pedals are placed closer together in front than behind, so as to enable the player to reach them with equal ease.—**Radiating point.** Same as *radiant point* (which see, under *radiant*).—**Radiating power.** Same as *radiative power* (which see, under *radiative*).

radiate (rā′di-āt), *a.* and *n.* [< L. *radiatus*, having rays, radiating, pp. of *radiare*, radiate, furnish with spokes: see *radiate*, *v.*] I. *a.* 1. Having a ray, rays, or ray-like parts; having lines or projections proceeding from a common center or surface; rayed: as, a *radiate* animal (a member of the *Radiata*); a *radiate* mineral (one with rayed crystals or fibers); a *radiate* flower-head. Specifically—(*a*) In *zoöl.*: (1) Characterized by or exhibiting radial symmetry, or radiation; having the whole structure, or some parts of it, radiating from a common center; radiatory; rayed; actinomeric. (2) Of or pertaining to the Cuvierian *Radiata*: as, "the *radiate* mob," *Huxley*. (*b*) In *bot.*, bearing ray-flowers: said chiefly of a head among the *Compositæ*, in which a disk of tubular florets is encircled by one or more rows of radially spreading ligulate florets, as in the daisy and sunflower; or in which all the florets are ligulate, as in the dandelion and chicory.

Radiate Structure.—Wavellite.

2. Constituting a ray or rays; proceeding or extending outward from a center or focus; radiating: as, the *radiate* fibers of some minerals and plants; the *radiate* petals of a flower or florets of a head.

A school-house plant on every hill,
Stretching in *radiate* nerve-lines thence
The quick wires of intelligence.
Whittier, Snow-Bound.

3. In numismatic and similar descriptions, represented with rays proceeding from it, as a head or bust: as, the head of the Emperor Caracalla, *radiate*; the head of Helios (the sun-god), *radiate*.

Radiate Head of Gallienus.—From an aureus in the British Museum. (Four times the size of the original.)

The sun god Helios rising from the sea, showing radiate head. (Metope from New Ilium in the Troad.)

II. *n.* 1. A ray-like projection; a ray.

The tin salt crystallised out in transparent, shining needles, arranged in clusters of *radiates* about nuclei.
Amer. Chem. Jour., XI. 82.

2. A member of the *Radiata*, in any sense.

radiated (rā′di-ā-ted), *p. a.* [< *radiate* + *-ed*[2].] Same as *radiate*.—**Radiated animals.** See *Radiata*.—**Radiated falcon.** See *falcon*.—**Radiated wing-cells**, in *entom.*, wing-cells formed principally by diverging nervures, as in the earwig.

radiately (rā′di-āt-li), *adv.* In a radiate manner; with radiation from a common center; radially.—**Radiately veined or nerved**, in *bot.*, same as *palmately veined or nerved*. See *nervation*.

radiateness (rā′di-āt-nes), *n.* Same as *radiality*.

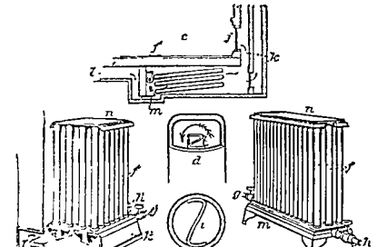
radiate-veined (rā′di-āt-vānd), *a.* In *bot.*, palmately veined. See *nervation*.

radiatiform (rā-di-ā′ti-fôrm), *a.* [< L. *radiatus*, radiate, + *forma*, form.] In *bot.*, having the appearance of being radiate: said of heads, as in some species of *Centaurea*, having some of the marginal flowers enlarged, but not truly ligulate.

radiatingly (rā′di-ā-ting-li), *adv.* Same as *radiately*.

radiation (rā-di-ā′shon), *n.* [< F. *radiation* = Sp. *radiacion* = Pg. *radiação* = It. *radiazione*, < L. *radiatio(n-)*, shining, radiation, < *radiare*, shine, radiate: see *radiate*.] 1. The act of radiating, or the state of being radiated; specifically, emission and diffusion of rays of light and the so-called rays of heat. Physically speaking, radiation is the transformation of the molecular energy of a hot body—that is, any body above the absolute zero (−273° C.)—into the wave-motion of the surrounding ether, and the propagation of these ether waves through space. Hence, every body is the source of radiation, but the character of the radiation varies, depending

chiefly upon the temperature of the body; it is called *luminous* or *obscure*, according as it is or is not capable of exciting the sensation of light. See further *radiant energy* (under *energy*), also *heat*, *light*1, *spectrum*.



Radiation is the communication of vibratory motion to the ether, and when a body is said to be chilled by *radiation*, as for example the grass of a meadow on a starlight night, the meaning is that the molecules of the grass have lost a portion of their motion, by imparting it to the medium in which they vibrate. *Tyndall*, Radiation, § 2.

Any substance . . . will become heated by *radiation* to the greatest degree when its surface is made rough and completely black, so that it can absorb all the rays falling upon it. *Lommel*, Light (trans.), p. 192.

2. The divergence or shooting forth of rays from a point or focus.—3. In *zoöl.*, the structural character of a radiate; the radiate condition, quality, or type; the radiate arrangement of parts. Also *radiism*.—**Direct radiation** and **indirect radiation**, phrases used in describing the method of heating by steam-radiators, according as the radiator is actually in the room heated or is inclosed in a space beneath, from which the hot air is distributed by tin pipes, as in simple heating by a hot-air furnace. In both cases the heat is communicated by convection, and in the case of indirect radiation not at all by radiation. —**Dynamic radiation**, a phrase introduced by Tyndall to describe the radiation of a gas when the heat is not due to an outside source, but is developed by the molecular motion as the gas passes rapidly into an exhausted vessel.—**Solar radiation**, the radiation of the sun as measured by the heat which the earth receives from it. —**Terrestrial radiation**, the communication of heat by the earth to the surrounding ether, by means of radiation.

radiative (rā′di-ā-tiv), *a.* [< *radiate* + *-ive.*] Having a tendency to radiate; possessing the quality of radiation.—**Radiative** or **radiating power**, the ability of a body to radiate heat—that is, physically, to transform its own heat-energy into the wave-motion of the surrounding ether. It depends, other things being equal, upon the nature of the surface of the body, being a maximum for lampblack and a minimum for polished metallic surfaces: thus, a mass of hot water will cool more rapidly in a vessel with a dull-black surface than in one which is polished and bright, like silver. The radiative and absorbing powers of a substance are identical, and are the opposite of the reflecting power. Also called *emissive power*.

radiator (rā′di-ā-tor), *n.* [< *radiate* + *-or*1.] 1. Anything which radiates; a body or substance from which rays of heat emanate or radiate.—2. A part of a heating apparatus designed to communicate heat to a room, chiefly by convection, but partly, in some cases, by radiation.

a, a direct radiator with cast iron base *m* and cap *n*; *f*, vertical tubes of wrought iron screwed into the base; *g*, inlet; *h*, outlet; *d* and *e*, detail sections of tube; *i*, diaphragm used in one kind of vertical tube steam radiators, steam passing through it, as indicated by arrows. *b*, indirect radiator, air entering at *l*, and circulating upward through passages in base *k*. *c*, an indirect steam-radiator: *m*, base. *f*, tubes. Cold air from without is admitted at *l*, and passes over radiator as indicated by arrows; *k*, flues up which warm air passes to register *f*

A common form of radiator is a sheet-iron drum or cylinder containing deflectors or baffle-plates, placed over a fireplace to cause the volatile products of combustion to give up their heat as they pass: a heating-drum. A steam-radiator consists of a mass of coiled or flexed pipes to which steam for heating is conveyed through a continuous pipe from a boiler, and which is provided with suitable valves for the control of the steam.

radiatory (rā′di-ā-tō-ri), *a.* [< *radiate* + *-ory.*] Radiating; having parts arranged like rays around a center or axis; rayed; actinomeric.

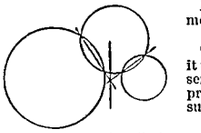
radical (rad′i-kal), *a.* and *n.* [< F. *radical* = Pr. Sp. Pg. *radical* = It. *radicale* = D. *radikaal* = G. Sw. Dan. *radikal*, < LL. *radicalis*, of or pertaining to the root, having roots, radical, < L. *radix* (*radic-*), root: see *radix*.] I. *a.* 1. Pertaining or relating to a root or to roots.

The cause of a thynne and watery *radycall* moyster to suche thynges as drawe theyr nuryshement therof. *R. Eden*, tr. of Gonzalus Oviedus (First Books on America, [ed. Arber, p. 227).

Specifically—(*a*) In *bot.*, belonging to the root: opposed to *cauline*. See *radical leaves* and *radical peduncle*, below. (*b*) In *philol.*, of the nature of or pertaining to a root, or a primary or underived word or main part of a word: as, a *radical* word; a *radical* letter or syllable; *radical* accentuation. (c) In *math.*, consisting of or indicating one of the roots of a number: as, a *radical* expression; the *radical* sign. (*d*) In *chem.*, noting any atom or group of atoms which is, for the moment, regarded as a chief constituent of the molecules of a given compound, and which does not lose its integrity in the ordinary chemical reactions to which the substance is liable. *Cooke*, Chem. Philos., p. 106.

2. Making part of the essential nature of the subject or thing concerned; existing inherently; intrinsic; organic: as, *radical* defects of character; a *radical* fault of construction; the *radical* principles of an art or of religion. The Latin word first occurs, about the beginning of the thirteenth century, in the phrase *humidum radicale*, or radical moisture, that moisture in an animal or a plant which cannot be expelled without killing the organism which was supposed to remain unchanged throughout life, and to be the chief principle of vitality. The word seems to translate the pseudo-Aristotelian ὡς ἂν εἴποι τις ῥίζαν, 'as one may say, roots'—an expression applied to moisture and certain other conditions as being essential to the life of plants.

Radicall moisture, or first or naturall moisture, spred like a dew thorow all the parts of the bodie, wherewith such parts are nourished: which moisture, being once wasted, can neuer be restored. *Minsheu.*



Whilst thus my sorrow-wasting soul was feeding
Upon the *radical* humour of her thought.
Quarles, Emblems, iv. 12.

This *radical* error . . . has contributed more than any other cause to prevent the formation of popular constitutional governments. *Calhoun*, Works, I. 30.

3. Of or pertaining to the root or foundation of the subject: concerned with or based upon fundamental principles; hence, thoroughgoing; extreme: as, a *radical* truth; a *radical* difference of opinion; *radical* views or measures; the *Radical* party in British politics.

His works . . . are more *radical* in spirit and tendency than any others, for they strike at all cant whatever, whether it be the cant of monarchy or the cant of democracy. *Whipple*, Ess. and Rev., I. 147.

4. [*cap.*] Of or pertaining to a political party or body of persons known as Radicals (see II., 4, below): as, a *Radical* candidate; the *Radical* program.—**Radical axis of two circles.** See *axis*1.—**Radical bass**, in *music*, same as *fundamental bass* (which see, under *fundamental*).—**Radical cadence**, in *music*, a cadence consisting of chords in their original position.—**Radical center of three circles in a plane**, the intersection of the three radical axes of the three pairs of the three circles.—**Radical curve.** See *curve*.—**Radical expression**, an expression containing radical signs, especially a quantity expressed as a root of another. Sometimes loosely called a *radical quantity*.—**Radical function.** See *function*.—**Radical leaves**, leaves springing from the root, or, properly, from a part of the stem near to and resembling the root. In many herbs (primrose, dandelion, etc.) all or nearly all the leaves are thus clustered at the base of the stem. See cuts under *Hieracium* and *Ornithogalum*.—**Radical moisture**†. See above, def. 2. —**Radical peduncle**, a peduncle that proceeds from the axil of a radical leaf, as in the primrose and cowslip.—**Radical pitch**, the pitch or tone with which the utterance of a syllable begins.—**Radical plane**, the plane of intersection of two spheres other than the plane at infinity, whether the circle of intersection be real or not.—**Radical sign** the sign √ (a modified form of the letter *r*, the initial of Latin *radix*, root), placed before any quantity, denoting that its root is to be extracted: thus, $\sqrt{a}$ or $\sqrt{a+b}$. To distinguish the particular root, a number is written over the sign: thus, $\sqrt[3]{\ }$, $\sqrt[4]{\ }$, $\sqrt[5]{\ }$, etc., denote respectively the square root, cube root, fourth root, etc. In the case of the square root, however, the number is usually omitted, and merely the sign written. The same sign is much used to mark a so-called root or radical element of words.—**Radical stress**, in *elocution*, the force of utterance falling on the initial part of a syllable or word.

Radical Axes and Radical Center.

= Syn. 3. There may be a distinction between a *radical* reform, change, cure, or the like, and one that is *thorough*, *entire*, *complete*, or *thoroughgoing*, *radical* emphasizing only the fact of going to the root, whether there is thoroughness or entireness or not. Yet that which is *radical* is likely to be *thorough*, etc.

II. *n.* 1. In *philol.*: (*a*) A radical word or part of a word; especially, a primitive word or verbal element serving as a root of inflected or derivative words. (*b*) A radical letter; a letter forming an essential part of the primitive form or root of a word. Also *radicle*.—2. In *chem.*, an element or group of combined elements which remains after one or more elements have been removed from a compound. (See the quotation.) The term is chiefly applied to compound radicals, which are assumed to exist in compound bodies and to remain intact in many of the chemical changes which these bodies undergo. Thus the compound radical ethyl, C_2H_5, appears in alcohol ($C_2H_5.OH$), in ether ($(C_2H_5)_2O$), in ethylamine ($C_2H_5.NH_2$), etc., and may be transferred without change, like an element, from one of these compounds to the other. Also *radicle*.

The word *radical* stands for any atom or group of atoms which is, for the moment, regarded as a chief constituent of the molecules of a given compound, and which does not lose its integrity in the ordinary chemical reactions to which the substance is liable. . . . As a general rule the metallic atoms are basic *radicals*, while the non-metallic atoms are acid *radicals*. . . . Among compound *radicals* those consisting of carbon and hydrogen alone are usually basic, and those containing oxygen also are usually acid. *Cooke*, Chem. Philos., p. 106.

3. In *music*, same as *root.*—4. A person who holds or acts according to radical principles; one who pursues a theory to its furthest apparent limit; an extremist, especially in politics. In the political sense, in which the word has been most used, a Radical is one who aims at thorough reform in government from a liberal or democratic point of view, or desires the establishment of what he regards as abstract principles of right and justice, by the most direct and uncompromising methods. The political Radicals of a country generally constitute the extreme faction or wing of the more liberal of the two leading parties, or act as a separate party when their numbers are sufficient for the exertion of any considerable influence. The name *Radical* is often applied as one of reproach to the members of a party by their opponents. In the United States it has been so applied at times to Democrats, and to Republicans especially in the South about the period of reconstruction. The French Radicals are often called the *Extreme Left*. The British Radicals form an important section of the Liberal party.

In politics they [the Independents] were, to use the phrase of their own time, "Root-and-Branch men," or, to use the kindred phrase of our own, *Radicals*. *Macaulay.*

He [President Johnson] did not receive a single Southern vote, and was detested through every Southern State with a cordiality unknown in the case of any Northern *Radical*. *The Nation*, III. 141.

5. In *alg.*, a quantity expressed as a root of another quantity.—**Negative**, **organic**, etc., **radical.** See the adjectives.

radicalise, *v.* See *radicalize*.

radicalism (rad′i-kal-izm), *n.* [= F. *radicalisme* = Sp. Pg. It. *radicalismo*; as *radical* + *-ism.*] The state or character of being radical; the holding or carrying out of extreme principles on any subject; specifically, extreme political liberalism; the doctrine or principle of uncompromising reform in government; the system or methods advocated by the political Radicals of a country.

Radicalism endeavours to realize a state more in harmony with the character of the ideal man. *H. Spencer*, Social Statics, p. 511.

The year 1769 is very memorable in political history, for it witnessed the birth of English *Radicalism*, and the first serious attempts to reform and control Parliament by a pressure from without, making its members habitually subservient to their constituents. *Lecky*, Eng. in 18th Cent., xi.

radicality (rad-i-kal′i-ti), *n.* [< *radical* + *-ity.*] 1. The state or character of being radical, in any sense. [Rare.]—2†. Origination.

There may be equivocal seeds and hermaphroditical principles which contain the *radicality* and power of different forms. *Sir T. Browne*, Vulg. Err., iii. 17.

radicalize (rad′i-kal-īz), *v.*; pret. and pp. *radicalized*, ppr. *radicalizing*. [< *radical* + *-ize.*] I. *trans.* To make radical; cause to conform to radical ideas, or to political radicalism. [Recent.]

It is inferred . . . that Lord Salisbury means to *radicalize* his land programme for England. *New York Tribune*, Feb. 18, 1887.

II. *intrans.* To become radical; adopt or carry out radical principles, or the doctrines of political radicalism. [Recent.]

Indeed, it is hard to say which is the more surprising—the goodwill shown by the Russians, and even by the Russian Government, for a *radicalizing* Republic, or the fatuous admiration of certain French Republicans for the most autocratic State in Europe. *Contemporary Rev.*, LIII. 303.

Also spelled *radicalise*.

radically (rad′i-kal-i), *adv.* 1. By root or origin; primitively; originally; naturally.

Tho' the Word [*bless*] be *radically* derived from the Dutch Word, yet it would bear good Sense, and be very pertinent to this Purpose, if we would fetch it from the French Word "blesser," which is to hurt. *Howell*, Letters, I. vi. 55.

These great Orbs thus *radically* bright. *Prior*, Solomon, i.

2. In a radical manner; at the origin or root; fundamentally; essentially: as, a scheme or system *radically* wrong or defective.

The window tax, long condemned by universal consent as a *radically* bad tax. *S. Dowell*, Taxes in England, II. 313.

radicalness (rad′i-kal-nes), *n.* The state of being radical, in any sense.

radicand (rad-i-kand′), *n.* [< L. *radicandus*, ger. of *radicari*, take root: see *radicate*.] In *math.*, an expression of which a root is to be extracted.

radicant (rad′i-kant), *a.* [< F. *radicant*, < L. *radican(t-)s*, ppr. of *radicari*, take root: see *radicate*.] In *bot.*, rooting; specifically, producing roots from some part other than the descending axis, as for the purpose of climbing. Also *radicating*.

radicarian (rad-i-kā′ri-an), *a.* [< L. *radix* (*radic-*), root, + *-arian.*] Of or relating to roots.

The strength of the *radicarian* theory is that it accords with all that we have learned as to the nature of language. *Whitney,* Amer. Jour. Philol., Nov., 1880, p. 338.

Radicata (rad-i-kā′tä), *n. pl.* [NL., neut. pl. of L. *radicatus,* rooted: see *radicate.*] A division of polyzoans: same as *Articulata* (*d*): opposed to *Incrustata.*

radicate (rad′i-kāt), *v.*; pret. and pp. *radicated,* ppr. *radicating.* [< L. *radicatus,* pp. of *radicari* (> It. *radicare* = Sp. Pg. Pr. *radicar*), take or strike root, < *radix* (*radic-*), root: see *radix.*] **I.** *intrans.* To take root.

For evergreens, especially such as are tender, prune them not after planting till they do *radicate.* *Evelyn,* Sylva.

II. *trans.* To cause to take root; root; plant deeply and firmly.

Often remembrance to them [noblemen] of their astate may happen to *radycate* in theyr hartes intollerable pride. *Sir T. Elyot,* The Governour, i. 4.

This medical feature in the Essenes is not only found in the Christians, but is found *radicated* in the very constitution of that body. *De Quincey,* Essenes, iii.

radicate (rad′i-kāt), *a.* [< L. *radicatus,* pp. of *radicari,* take root: see *radicate, v.*] 1. In *zoöl.*: (*a*) Rooted; fixed at the bottom as if rooted; growing from a fixed root or root-like part. (*b*) Specifically, in *conch.*: (1) Byssiferous; fixed by a byssus. (2) Adherent by the base to some other body, as a limpet to a rock. (*c*) Rooted and of a plant-like habit, as a polyzoan; not incrusting like a lichen; belonging to the *Radicata.*—2. In *bot.*, rooted.

radicated (rad′i-kā-ted), *p. a.* [< *radicate, v.*, + *-ed*2.] Rooted, or having taken root: same as *radicate:* as, a *radicated* stem.

If, therefore, you would not cheat yourselves, as multitudes in this age have done, about your love to the brethren, try not by the bare act, but by the *radicated,* prevalent degree of your love. *Baxter,* Saints' Rest, iii. 11.

radicating (rad′i-kā-ting), *p. a.* In *bot.*, same as *radicant.*

radication (rad-i-kā′shọn), *n.* [< F. *radication* = Sp. *radicacion* = Pg. *radicação* = It. *radicazione,* < ML. *radicatio(n-),* < L. *radicari,* pp. *radicatus,* take root: see *radicate.*] 1. The process of taking root, or the state of being rooted.

Pride is a sin of so deep *radication,* and so powerful in the hearts of carnal men, that it will take advantage of any condition. *Baxter,* Life of Faith, iii. 15.

2. In *bot.*, the manner in which roots grow or are arranged.—3. In *zoöl.*, fixation at the base, as if rooted; the state of being radicate or radicated.

radicet, *n.* An obsolete form of *radish.*

radicel (rad′i-sel), *n.* [< F. *radicelle* = It. *radicella,* < NL. **radicella,* little root, dim. of L. *radix* (*radic-*), root.] 1. In *bot.*, a minute root; a rootlet. Also *radicle. A. Gray.*—2. In *zoöl.*, a rootlet or radicle.

radices, *n.* Plural of *radix.*

radicicolous (rad-i-sik′ọ-lus), *a.* [< L. *radix* (*radic-*), root, + *colere,* inhabit.] Living upon or infesting roots: specifically noting the root-form of the phylloxera or vine-pest: contrasted with *gallicolous.* See *Phylloxera,* 2.

radiciflorous (rā-dis-i-flō′rus), *n.* [< L. *radix* (*radic-*), root, + *flos* (*flor-*), flower, + *-ous.*] Flowering (apparently) from the root. *A. Gray.*

radiciform (rā-dis′i-fôrm), *a.* [= F. It. *radiciforme,* < L. *radix* (*radic-*), root, + *forma,* form: see *form.*] 1. In *bot.*, of the nature or appearance of a root. *A. Gray.*—2. In *zoöl.*, root-like in aspect or function.

radicle (rad′i-kl), *n.* [= F. *radicule* = Sp. *radícula,* < L. *radicula,* rootlet, small root, also radish, soapwort, dim. of *radix* (*radic-*), root: see *radix.* Cf. *radicel.*] 1. In *bot.*: (*a*) A rootlet: same as *radicel.* (*b*) Specifically, same as *caulicle:* by late writers appropriately restricted to the rudimentary root at the lower extremity of the caulicle.—2. In *anat.* and *zoöl.*, a little root or root-like part; a radix: as, the *radicles* of a vein (the minute vessels which unite to form a vein); the *radicle* of a nerve.—3. In *philol.*, same as *radical,* 1. [Unusual.]

Radicles are elementary relational parts of words. They are generally single sounds—oftenest a consonant sound. *F. A. March,* Anglo-Saxon Grammar (1869), p. 33.

4. In *chem.*, same as *radical,* 2.

A *radicle* may consist of a single elementary atom, and it then forms a simple *radicle;* or it may consist of a group of atoms, in which case it constitutes a compound *radicle.* *W. A. Miller,* Elem. of Chemistry, § 1061.

Adverse, centrifugal, centripetal radicle. See the adjectives.

radicolous (rā-dik′ọ-lus), *a.* A contracted form of *radicicolous.*

radicose (rad′i-kōs), *a.* [= Sp. Pg. *radicoso,* < L. *radicosus,* full of roots, < *radix* (*radic-*), a root: see *radix.*] In *bot.*, having a large root.

radicula (rā-dik′ū-lä), *n.*; pl. *radiculæ* (-lē). [L.: see *radicle.*] In *entom.*, a radicle.

radicular (rā-dik′ū-lär), *a.* [< *radicule* + *-ar*3.] Characterized by the presence of a radicle or radicles.—**Radicular odontome,** an odontome formed on the neck or root of a tooth.

radicule (rad′i-kūl), *n.* [< F. *radicule,* < L. *radicula,* little root: see *radicle.*] In *bot.*, same as *radicle,* 1.

radiculose (rā-dik′ū-lōs), *a.* [< NL. **radiculosus,* < L. *radicula,* rootlet: see *radicle.*] In *bot.*, covered with radicles or rootlets.

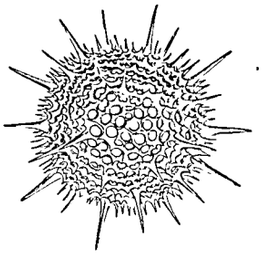
radii, *n.* Plural of *radius.*

radiism (rā′di-izm), *n.* [< L. *radius,* ray, + *-ism.*] In *zoöl.*, same as *radiation,* 3. *Forbes,* Brit. Sea Urchins.

radiocarpal (rā″di-ō-kär′pal), *a.* [< L. *radius,* radius, + NL. *carpus,* the wrist: see *carpal.*] 1. Pertaining to the radius and the carpus or wrist: as, the *radiocarpal* articulation; *radiocarpal* ligaments.—2. Situated on the radial side of the wrist: as, the *radiocarpal* bone. See *radiale.*—**Radiocarpal arteries,** the anterior and posterior carpal arteries; small branches given off from the radial at the wrist and passing to the front and back to help form the anterior and posterior carpal arches.—**Radiocarpal articulation,** the wrist-joint proper; the jointing of the manus or third segment of the forelimb of any vertebrate with the second or preceding segment. In animals whose ulna is shorter than the radius this joint is formed wholly by the radius in articulation with some or all of the proximal row of carpal bones, constituting a radiocarpal articulation in literal strictness; but the ulna often enters into this joint without altering its name. In man, whose pronation and supination are perfect, the ulna reaches the wrist, but is cut off from direct articulation with any carpal by a button of cartilage interposed between itself and the cuneiform, and the radius articulates with both the scaphoid and the semilunar, so that the human wrist-joint is properly radiocarpal.—**Radiocarpal ligament,** the external lateral ligament of the radiocarpal articulation. It extends from the summit of the styloid process of the radius to the outer side of the scaphoid.

Radioflagellata (rā″di-ō-flaj-e-lā′tä), *n. pl.* [NL.: see *radioflagellate.*] An order of animalcules emitting numerous ray-like pseudopodia, after the manner of the *Radiolaria,* and provided at the same time with one or more flagellate appendages, but having no distinct oral aperture. They are mostly marine. In Kent's system they consist of two families, *Actinomonadidæ* and *Euchitonidæ.*

radioflagellate (rā″di-ō-flaj′e-lāt), *a.* [< L. *radius,* ray, + *flagellum,* a whip: see *flagellate*1.] Having radiating pseudopodia and flagella; of or pertaining to the *Radioflagellata.*



radiograph (rā′di-ō-gräf), *n.* [< L. *radius,* ray, + Gr. *γράφειν,* write.] 1. An instrument for measuring and recording the intensity of solar radiation.—2. An impression produced on a sensitive photographic plate by the Röntgen rays. See *ray.*

radiography (rā-di-og′ra-fi), *n.* The production of images on sensitized plates by means of the X-rays.

radiohumeral (rā″di-ō-hū′mẹ-ral), *a.* [< L. *radius,* ray, + *humerus,* prop. *umerus,* a shoulder: see *humeral.*] Relating to the radius and the humerus: as, the *radiohumeral* articulation or ligament.

Radiola (rā-dī′ọ-lä), *n.* [NL. (J. F. Gmelin, 1791), so named in reference to the many branches; < L. *radiolus,* a little ray, also a plant resembling a fern, dim. of *radius,* a ray: see *radius, ray*1.] A genus of polypetalous plants of the order *Lineæ,* or flax family, and tribe *Eulineæ,* distinguished from the nearly related genus *Linum* (flax) by its complete numerical symmetry in fours (instead of fives), having four toothed sepals, four twisted petals, four distinct stamens, a four-celled ovary, four styles, and an eight-celled, eight-seeded capsule. The only species, *R. Millegrana,* native of the temperate and subtropical parts of the Old World, is a little annual with forking stem, opposite leaves, and minute white corymbose flowers. See *allseed* (*d*) and *flaxseed,* 2.

Radiolaria (rā″di-ọ-lā′ri-ä), *n. pl.* [NL., neut. pl. of **radiolaris,* < L. *radiolus,* a little ray: see *Radiola.*] A class of filose non-corticate *Protozoa:* a name applied by Haeckel (in 1862) to the protozoans called by Ehrenberg *Polycystina.* The radiolarians are marine gymnomyxine protozoans in which no contractile vacuoles are observed, having an amœboiform body of spherical or conical figure with radiant filose pseudopods, inclosing a similarly shaped perforated test of membranous texture called the central capsule. The intracapsular protoplasm is continuous through the perforations with that which is extracapsular, and has a large specialized nucleus or several such nuclei. There is usually a skeleton of silicious spicules or of the substance called acanthin, and embedded in the protoplasm may be oil-globules, pigment-granules, and crystals. Most radiolarians contain peculiar nucleated yellow corpuscles regarded as parasitic algals. Reproduction both by fission and by sporulation has been observed. The *Radiolaria* have been divided into the subclasses *Siliceskeleta* and *Acanthometridea,* according to the chemical composition of the skeleton, the former subclass into *Peripylæa, Monopylæa,* and *Tripylæa* (or *Phæodaria*); into *Monocyttaria,* with one central capsule, and *Polycyttaria,* with several such; and in various other ways. The latest monographer arranges them under four subclasses or "legions": (1) *Peripylea* or *Spumellaria,* with 32 families; (2) *Actipylea* or *Acantharia,* with 12 families; (3) *Monopylea* or *Nassellaria,* with 26 families; and (4) *Cannopylea* or *Phæodaria,* with 15 families. The term *Radiolaria* appears to have been first used by Johannes Müller, in 1858, for the organisms known as *Polycystina, Thalassicolla,* and *Acanthometra.* The marine radiolarians all inhabit the superficial stratum of the sea, and fabricate their skeletons of the infinitesimally small proportion of silex which is dissolved in sea-water. When they die these skeletons sink to the bottom, forming geological strata. Extensive masses of Tertiary rock, such as that which is found at Oran in Algeria, and that which occurs at Bissex Hill in Barbados, are very largely made up of exquisitely preserved skeletons of *Radiolaria,* which are erroneously named "fossil *Infusoria.*" But, though there can be little doubt that *Radiolaria* abounded in the Cretaceous sea, none are found in the Chalk, their silicious skeletons having probably been dissolved and redeposited as flint. Recent remains of radiolarians enter largely into the composition of the so-called radiolarian ooze.

A Radiolarian (*Heliosphæra pectinata*), 160 times natural size.

radiolarian (rā″di-ō-lā′ri-an), *a.* and *n.* [< *Radiolaria* + *-an.*] **I.** *a.* Of or pertaining to the *Radiolaria;* containing or consisting of radiolarians.—**Radiolarian ooze,** the ooze or sediment at the bottom of the sea, composed in part of the shells of radiolarians. See *globigerina-mud.*

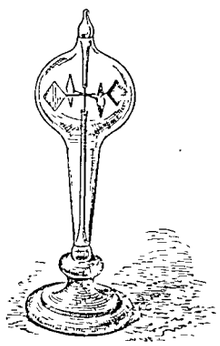
Their siliceous skeletons accumulate in some localities . . . to such an extent as to form a *Radiolarian ooze.* *W. B. Carpenter,* Micros., § 507.

II. *n.* Any member of the *Radiolaria.*

radioli, *n.* Plural of *radiolus.*

radiolite (rā′di-ō-līt), *n.* [< NL. *radiolites,* < *radiolus,* dim. of L. *radius,* ray: see *radius.*] 1. A member of the genus *Radiolites.*—2. A variety of natrolite, occurring in radiated forms in the zircon-syenite of southern Norway.

Radiolites (rā″di-ō-lī′tēz), *n.* [NL.: see *radiolite.*] A genus of *Rudistæ,* typical of the family *Radiolitidæ.* The typical species have at maturity valves elevated in a coniform manner in opposite directions, and sculptured with radiating grooves and ridges.



Radiolitidæ (rā″di-ō-lit′i-dē), *n. pl.* [NL., < *Radiolites* + *-idæ.*] A family of *Rudistæ,* typified by the genus *Radiolites.* The shell is very inequivalve and fixed by one valve; the hinge has one cardinal tooth and two fosse in the fixed valve, and two cardinal teeth in the free; the external layer of the shell is thick and the internal thin; the summit of the free valve is nearly central in the adult, but submarginal in the young. The family is characteristic of the Cretaceous period.

radiolus (rā-dī′ọ-lus), *n.*; pl. *radioli* (-lī). [NL., dim. of L. *radius,* a ray: see *radius.*] In *ornith.*, one of the barbules, or rays of the second order, of the main shaft of a feather.—**Radioli accessorii,** the barbules of the aftershaft or hypoptilum of a feather.

radiometer (rā-di-om′e-tèr), *n.* [= F. *radiomètre* = Sp. *radiómetro,* < L. *radius,* a ray, + Gr. *μέτρον,* measure.] 1. An old instrument for measuring angles; the cross-staff. The end of the staff was held to the eye, and the crosspiece was shifted until it just covered the angle to be measured, when the latter was read off on the longitudinal staff.

Radiometer or Cross staff.

2. An instrument which serves to transform radiant energy into mechanical work. It consists of four crossed arms of very fine glass, supported in the center by a needle-point, and having at the extreme ends thin vertical disks or squares of pith, blackened on one side. When placed in a glass vessel nearly exhausted of air, and exposed to rays of light or heat, the blackened surfaces absorb the radiant energy and become heated, the molecules of the air remaining in the vessel striking against them gain from them greater velocity, and there results an increased pressure, causing a more or less rapid revolution of the arms. By varying the conditions as to degree of exhaustion, size of bulb, etc., a number of experiments are performed with the radiometer which serve to illustrate the mechanical effects of the rapidly moving molecules of a gas.

Crookes's Radiometer.

radiometric (rā″di-ō-met′rik), *a.* Pertaining to the radiometer, or to the experiments performed by it.

radiomicrometer (rā″di-ō-mī-krom′e-tėr), *n.* [< L. *radius*, ray, + E. *micrometer*.] An instrument serving as a very delicate means of measuring small amounts of heat. It consists essentially of an antimony-bismuth thermo-electric couple of very small dimensions, with the ends joined by a hoop of copper wire, and suspended by a slender thread in a powerful magnetic field. It is claimed for it that it can be made even more sensitive than Langley's bolometer.

radiomuscular (rā″di-ō-mus′kū-lär), *a.* [< L. *radius*, radius, + *musculus*, muscle: see *muscle*[1], *muscular*.] In *anat.*, pertaining to the radius and to muscles: specifically noting muscular branches of the radial artery and of the radial nerve. *Cones.*

radiophone (rā′di-ō-fōn), *n.* [< L. *radius*, ray, + Gr. *φωνή*, voice, sound: see *phone*[1].] An instrument in which a sound is produced by the successive expansions and contractions of a body under the action of an intermittent beam of radiant heat thrown upon and absorbed by it.

radiophonic (rā″di-ō-fon′ik), *a.* [< *radiophone* + *-ic*.] Pertaining to radiophony, or the production of sound by the action of a beam of light and heat; relating to the radiophone, or produced by it.

radiophonics (rā″di-ō-fon′iks), *n.* [Pl. of *radiophonic* (see *-ics*).] Same as *radiophony*.

radiophony (rā′di-ō-fō-ni), *n.* [< L. *radius*, ray, + Gr. *φωνή*, voice, sound: see *phone*[1].] The production of sound by the action of an intermittent beam of radiant heat; that branch of acoustics which considers sound so produced. For example, if the beam from a lime-light is thrown upon a rotating disk perforated with a series of holes, and, after thus being rendered intermittent, is made to fall upon a confined mass of a liquid or gas capable of absorbing radiant heat, a musical note is obtained from the latter whose pitch depends upon the rapidity of the rotation. Similar results are obtained with a plate of an appropriate solid, as hard rubber. Radiophony also includes the more complex case where an intermittent beam of light, falling upon a substance like selenium (also in a less degree sulphur), serves to vary its electrical resistance, and hence the strength of current passing through it, so as to produce a corresponding sound in a telephone-receiver placed in the circuit. This is illustrated in the photophone.

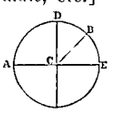
radio-ulnar (rā″di-ō-ul′när), *a.* [< L. *radius*, radius, + *ulna*, ulna: see *ulna*, *ulnar*.] Of or belonging to the radius and the ulna: as, the *radio-ulnar* articulation.—**Radio-ulnar fibrocartilage.** See *fibrocartilage*.

radious (rā′di-us), *a.* [< ME. *radious*, *radyous*, *radius*, < OF. *radios*, F. *radieux* = Sp. Pg. It. *radioso*, < L. *radiosus*, radiant, beaming, < *radius*, a ray: see *radius*.] 1†. Consisting of rays, as light. *Berkeley.*—2†. Radiating; radiant.

> His *radious* head with shameful thorns they tear.
> *G. Fletcher*, Christ's Triumph over Death, st. 35.

3. In *bot.*, same as *radiant*. [Rare.]

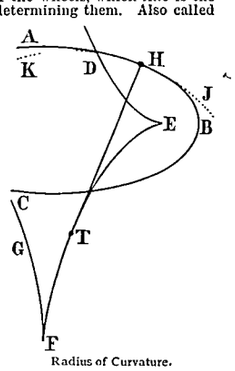
radish (rad′ish), *n.* [Formerly also *raddish* (also dial. *redish*, *reddish*, appar. simulating *reddish*, of a red color); early mod. E. *radice*, *radyce;* < ME. *radish* = D. *radijs* = LG. *radys* = G. *radies* = Dan. *radis* = Sw. *rädisa*, *radis*, *radisa*, < OF. *radis*, F. *radis*, a radish, < Pr. *raditz*, a root, a radish, = OF. *rais*, *raiz* (also *radice*), a root, = It. *radice*, a root, radish, = AS. *rādic*, *rādic*, erroneously *hrādic*, ME. *radik* = MLG. *rēdik*, *redek*, *redich* = OHG. *rātih*, *rātich*, MHG. *rætich*, *rätich*, *retich*, G. *rettich*, *rettig* = Dan. *räddike* = Sw. *rättika*, a radish, < L. *radix* (*radic-*), a root, in particular an edible root, esp. a radish: see *radix*.] 1. A plant, *Raphanus sativus*, cultivated for its edible root; also other species of the same genus. (See phrases below.) The radish of cultivation is unknown in a wild state, but is thought by many to be derived from the wild radish, *R. Raphanistrum*. It has been highly prized from the days of ancient Egypt for its crisp fleshy root, which is little nutritious, but pleasantly pungent and antiscorbutic, and is mostly eaten raw as a relish or in salads. The radish commonly must be young and fresh, but some varieties are grown for winter use. The root varies greatly in size (but is ordinarily eaten when small), in form (being long and tapering, turnip-shaped, olive-shaped, etc.), and also in color (being white, scarlet, pink, reddish-purple, yellowish, or brown). The leaves were formerly boiled and eaten, and the green pods make a pickle somewhat resembling capers.



2. A root of this plant.

> When a' was naked, he was, for all the world, like a forked *radish*, with a head fantastically carved upon it with a knife. *Shak.*, 2 Hen. IV., iii. 2. 334.

3. Same as *water-radish*.—**Horse radish.** See *horse-radish*.—**Rat-tail radish,** a species (*Raphanus caudatus*) or perhaps a variety of the common radish, a curiosity from the East Indies, with narrow pods a foot or more long, which are boiled or pickled for the table.—**Sea-radish,** or **seaside radish,** a variety of the wild radish, sometimes regarded as a species (*Raphanus maritimus*) found on European coasts.—**Wild radish,** a noxious field-weed, *Raphanus Raphanistrum*, resembling charlock, but having necklace-formed pods, and hence sometimes called *jointed charlock*. It has rough lyrate leaves, and yellowish petals turning whitish or purplish. It is adventive in the eastern United States.



radish-fly (rad′ish-flī), *n.* An American dipterous insect, *Anthomyia raphani*, injurious to the radish.

radius (rā′di-us), *n.*; pl. *radii* (-ī). [< L. *radius*, a staff, rod, spoke of a wheel, a measuring-rod, a semidiameter of a circle (as it were a spoke of the wheel), a shuttle, spur of a bird, sting of a fish, the radius of the arm; by transfer, a beam of light, a ray. Cf. *ray*[1] (a doublet of *radius*) and the derived *radiant*, *radiate*, *irradiate*, etc.] 1. In *math.*, one of a number of lines proceeding from a center; a ray; especially, a line drawn from the center to the periphery of a circle or sphere; also, the measure of the semidiameter.—2. In *anat.* and *zoöl.*, the outer one of the two bones of the forearm, or corresponding part of the fore leg; the bone on the thumb side of the forearm, extending from the humerus to the carpus, and bearing upon its distal end the manus or hand: so called from its revolving, somewhat like a spoke, about the ulna, as in man and other mammals whose fore limb exhibits the motions called *pronation* and *supination*. In most animals, however, the radius is motionless, being fixed in a state of pronation, when it appears as the inner rather than the outer of the two bones, or as by far the larger bone, of the forearm, the ulna being often much reduced. In man the radius is as long as the ulna without the olecranon, and somewhat stouter, especially in its distal parts. It presents a small, circular, cupped and button-like head, for articulation with the capitulum of the humerus and lesser sigmoid cavity of the ulna, following which is a constriction termed the *neck*, and next to this a tubercle for the insertion of the biceps muscle. The shaft enlarges from above downward, and is of somewhat prismatic form, with the sharpest edge of the prism presenting toward the ulna. The lower end has two large articular facets for articulation with the scaphoid and lunar bones (forming the radiocarpal articulation, or wrist-joint), a lateral facet for the radio-ulnar articulation, and a stout projection called the *styloid process*, for the insertion of the supinator longus muscle. The radius is pronated by the pronator radii teres and pronator quadratus, and supinated by the supinator longus and supinator brevis, assisted by the biceps. Quite a similar form and disposition of the radius characterize various mammals which use their fore paws like hands, as monkeys, mice, squirrels, opossums, etc. The radius of others, as the horse and ox, is more different, and associated with a much reduced and ankylosed ulna. In birds the radius is so peculiarly articulated with the humerus that it slides lengthwise back and forth upon the ulna in the opening and closing of the wing, pronation and supination being absent in this class of animals. See *pronation* and *supination*, and cuts under *carpus*, *Catarrhina*, *Equidæ*, *forearm*, *ox*, *pinion*, *Plesiosaurus*, and *solidungulate*.

3. In *ichth.*, a bone of the pectoral arch, wrongly identified by some naturalists with the radius of higher vertebrates. The one so called by Cuvier is the hypercoracoid, and that of Owen is the hypocoracoid.—4. In *entom.*, a vein of the wing of some insects, extending from the pterostigma to the tip of the wing.—5. [*cap.*] In *conch.*, a genus of *Ovulidæ*. *R. volva* is the shuttle-shell or weaver-shell.—6. *pl.* In *ornith.*, the barbs of the main shaft of a feather; the rays of the first order of the rachis.—7. In *arachnology*, one of the radiating lines of a geometrical spider's web, which are connected by a single spiral line.—8. In echinoderms, one of the five radial pieces of the dentary apparatus of a sea-urchin, being an arched rod-like piece articulated at its base with the inner extremity of each rotula, running more or less nearly parallel with the rotula, and ending in a free bifurcated extremity. Also called the *compass of the lantern of Aristotle* (which see, under *lantern*). See also cut B under *lantern*.—9. *pl.* Specifically, in *Cirripedia*, the lateral parts of the shell, as distinguished from the paries, when they overlap: when overlapped by others, they are called *alæ*.—10. In *bot.*, a ray, as of a composite flower, etc.—11. The movable limb or arm of a sextant; also, a similar feature in any other instrument for measuring angles.—12. In *fort.*, a line drawn from the center of the polygon to the end of the outer side.—**Auricular radii.** See *auricular*.—**Geometrical radius** of a cog-wheel, the radius of the pitch-circle of the wheel, in contradistinction to its real radius, which is that of the circle formed by the crests of the teeth.—**Oblique line of the radius.** See *oblique*.—**Pronator radii quadratus.** See *pronator quadratus*, under *pronator*.—**Pronator radii teres.** See *pronator*.—**Proportional radii,** in a system of gears, or in a set of gears of the same pitch, radii proportioned in length to the number of teeth in the respective wheels. The proportional radii of any two geared wheels, when taken together, are equal to the line connecting the centers of the wheels, which line is the basis of computation in determining them. Also called *primitive radii*.—**Radii accessorii,** the barbs of the aftershaft or hyporachis of a feather.—**Radius astronomicus.** Same as *radiometer*, 1.—**Radius of concavity.** Same as *radius of curvature*.—**Radius of curvature,** the radius of the circle of curvature—that is, of the osculating circle at any point of a curve. In the cut, AHBC is the primitive curve (in this case an ellipse); KHJ, the circle of curvature, osculating the primitive curve at H; T, the center of curvature; TH, the radius of curvature; GFTED, the locus of centers of curvature, or the evolute. The radius of curvature wrapping itself upon the evolute gives the primitive curve.—**Radius of dissipation.** See *dissipation*.—**Radius of explosion.** See *mine*[2], 2 (*b*).—**Radius of gyration,** in *mech.*, the distance from the axis to a point such that, if the whole mass of a body were concentrated into it, the moment of inertia would remain unchanged. If the axis is a principal axis, this radius becomes a *principal radius of gyration*.—**Radius of rupture.** See *mine*[2], 2 (*b*).—**Radius of the evolute.** Same as *radius of curvature*.—**Radius of torsion,** the element of the arc of a curve divided by the angle of torsion.—**Radius vector** (pl. *radii vectores*), the length of the line joining a variable point to a fixed origin: in astronomy the origin is taken at the sun or other central body. See *vector*.—**Real radius.** See *geometrical radius*.

Radius of Curvature.

radius-bar (rā′di-us-bär), *n.* In a steam-engine, one of a pair of rods pivoted at one end and connected at the other with some concentrically moving part which it is necessary to keep at a definite distance from the pivot or center. Also called *radius-rod* and *bridle-rod*. See cuts under *grasshopper-beam* and *paddle-wheel*.

radius-saw (rā′di-us-sâ), *n.* A circular saw journaled at the end of a swinging frame or radial shaft, used in cross-cutting timber.

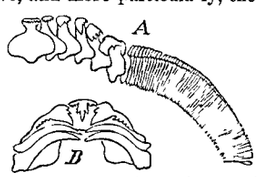
radix (rā′diks), *n.*; pl. *radices* (rā-dī′sēz). [< L. *radix* (*radic-*), a root, = Gr. *ῥάδιξ*, a branch, rod. Hence ult. E. *race*[4] and *radish* (doublets of *radix*), *radical*, *radicel*, *radicle*, *radicule*, *radicate*, *cradicate*, *aracc*[1], etc.] 1. The root of a plant: used chiefly with reference to the roots of medicinal plants or preparations from them. Hence—2. The primary source or origin; that from which anything springs, or in which it originates. [Rare.]

> Her wit is all spirit, that spirit fire, that fire flies from her tongue, able to burne the *radix* of the best invention; in this element she is the abstract and briefe of all the eloquence since the incarnation of Tully.
> *Heywood*, Fair Maid of the Exchange (Works, 1874, II. 54).

> Judaism is the *radix* of Christianity — Christianity the integration of Judaism. *De Quincey*, Essenes, iii.

3. In *etym.*, a primitive word or form from which spring other words; a radical; a root.—4. In *math.*, a root. (*a*) Any number which is arbitrarily made the fundamental number or base of any system of numbers, to be raised to different powers. Thus, 10 is the radix of the decimal system of numeration (Briggs's). In the common system of logarithms, the radix is also 10; in the Napierian it is 2.7182818284; every other number is considered as some power of the radix, the exponent of which power constitutes the logarithm of that number. (*b*) The root of a finite expression from which a series is derived.

5. In *zoöl.* and *anat.*, a root; a rooted or root-like part; a radicle: as, the *radix* or root of a tooth; the *radix* of a nerve.—**Radix cerebelli**, the posterior peduncle of the cerebellum.—**Radix motoria**, the smaller motor root of the trigeminal nerve.—**Radix sensoria**, the larger sensory root of the trigeminal nerve.



radly†, *adv.* See *rathly*.

radness† (rad'nes), *n.* [ME., < *rad*[1] + *-ness*.] Fear; fright; terror.

> The Romaynes for *radnesse* ruschte to the erthe,
> Fforde feirdnesse of hys face, as they fey were.
> *Morte Arthure* (E. E. T. S.), l. 120.

radoub (ra-döb'), *n.* [F., repairs made on a vessel, < *radouber*, formerly also *redouber*, mend, repair: see *redub*.] In *mercantile law*, the repairing and refitting of a ship for a voyage. *Wharton.*

radula (rad'ū-lą), *n.*; pl. *radulæ* (-lē). [NL., < L. *radula*, a scraper, scraping-iron, < *radere*, scrape: see *rase*[1], *raze*[1].] In *conch.*, the tongue or lingual ribbon of a mollusk, specifically called *odontophore*, and more particularly, the rasping surface or set of teeth of the odontophore, which bites like a file. This structure is highly characteristic of the cephalophorous classes, among which it presents great diversity in detail. It bears the numerous small chitinous processes or teeth of these mollusks, which serve to triturate food with a kind of filing or rasping action. According to the disposition of the teeth in any one of the many cross-rows which beset the length of the radula, mollusks are called *rachiglossate*, *tanioglossate*, *rhipidoglossate*, *toxoglossate*, *ptenoglossate*, and *docoglossate*. See these words, and *odontophore*.

A, median tooth and teeth of one row of right half of radula of *Trochus cinerarius*. *B*, one row of radular teeth of *Cypræa europæa*. *A* is rhipidoglossate, and *B* is tænioglossate.

radular (rad'ū-lą̈r), *a.* [< *radula* + *-ar*[3].] Pertaining to the radula: as, *radular* teeth.

radulate (rad'ū-lāt), *a.* [< *radula* + *-ate*[1].] Provided with a radula, as a cephalophorous mollusk; raduliferous.

raduliferous (rad-ū-lif'e-rus), *a.* [< NL. *radula* + L. *ferre* = E. *bear*[1].] Bearing a radula; radulate.

raduliform (rad'ū-li-fôrm), *a.* [< L. *radula*, a scraper, + *forma*, form.] Rasp-like; having the character or appearance of the teeth of a file; cardiform: specifically noting, in ichthyology, the conical, sharp-pointed, and close-set teeth of some fishes, resembling villiform teeth, but larger and stronger.

rae (rā), *n.* A Scotch form of *roe*.

rafet. A Middle English preterit of *reave*.

raff† (råf), *v. t.* [< OF. *raffer*, *rafer*, catch, snatch, slip away, = It. **raffare*, in comp. *arraffare*, snatch, seize, = MHG. *raffen*, *reffen*, G. *raffen*, snatch, sweep away, carry off suddenly, = MLG. LG. *rapen*, snatch, = Sw. *rappa*, snatch, seize, = Dan. *rappe*, hasten: see *rap*[2], from the Scand. form cognate with the G. Hence ult. *raffle*[1].] To sweep; snatch, draw, or huddle together; take by a promiscuous sweep.

> Their causes and effects . . . I thus *raffe* vp together.
> *R. Carew*, Survey of Cornwall, fol. 69.

raff (råf), *n.* and *a.* [< ME. *raffe*, *raf*, esp. in the phrase *rif and raf* (now *riffraff*), < OF. *rif et raf*, every bit, in which *raf* is due to the verb *raffer*, snatch: see *raff*, *v.* Cf. *riffraff*. Cf. It. *raffola*, a crowd, press.] **I.** *n.* 1. A promiscuous heap or collection; a jumble; a medley. [Obsolete or archaic.]

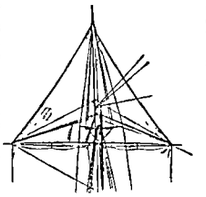
> The synod of Trent was convened to settle a *raff* of errors and superstitions. *Barrow*, Unity of the Church.

2. Trashy material; lumber; rubbish; refuse. [Old and prov. Eng.]

> And maken of the rym and *raf*
> Suche gylours for pompe and pride.
> *Appendix to W. Mapes*, p. 340. (*Halliwell.*)
>
> Let *raffs* be rife in prose and rhyme,
> We lack not rhymes and reasons,
> As on this whirligig of Time
> We circle with the seasons.
> *Tennyson*, Will Waterproof.

3. Abundance; affluence. *Halliwell.* [Prov. Eng. and Scotch.]—4. A worthless or disorderly person; a rowdy; a scapegrace: now applied to students of Oxford by the townspeople. *Halliwell.*

> Myself and this great peer
> Of these rude *raffs* became the jeer.
> *W. Combe*, Dr. Syntax, i. 20. (*Davies.*)
>
> One of the *raffs* we shrink from in the street,
> Wore an old hat, and went with naked feet.
> *Leigh Hunt*, High and Low. (*Davies.*)



5. Collectively, worthless persons; the scum or sweepings of society; the rabble. Compare *riffraff*.

> "People, you see," he said, "won't buy their 'accounts' of *raff*; they won't have them of any but respectable."
> *Mayhew*, London Labour and London Poor, I. 325.

II. *a.* Idle; dissolute. *Halliwell.* [Prov. Eng.]

Raffaelesque, *a.* See *Raphaelesque*.

raffe, raffle (raf, raf'i), *n.* [Origin obscure.] *Naut.*, a three-cornered sail set on schooners when before the wind or nearly so. The head hoists up to the foretopmast-head and the clues haul out to the square-sail yard-arms. It is rarely used except on the Great Lakes of North America. Sometimes it is in two pieces, one for each side of the mast.

Raffe.

raffia, roffia (raf'i-ą, rof'-i-ą), *n.* [Malagasy.] 1. A palm, *Raphia Ruffia*, growing in Madagascar. It bears pinnate leaves 20 or 30 feet long upon a moderate trunk. The cuticle is peeled from both sides of the leaf-stalk, for use as a fiber, being largely made into matting, and also applied by the natives to finer textile purposes. (See *rabanna*.) It is now somewhat largely used for agricultural tie-bands, as is also a similar product of the jupati-palm, *R. tædigera*, included under the same name. Also spelled *raphia*.

2. The fiber of this plant.

raffish (råf'ish), *a.* [< *raff* + *-ish*[1].] Resembling or having the character of the raff or rabble; scampish; worthless; rowdy. Compare *raff*, *n.*, 5.

> Five or six *raffish*-looking men had surrounded a fair, delicate girl, and were preparing to besiege her in form.
> *Lawrence*, Guy Livingstone, xxiii.
>
> The *raffish* young gentleman in gloves must measure his scholarship with the plain, clownish laddie from the parish school. *R. L. Stevenson*, The Foreigner at Home.

raffle[1] (raf'l), *n.* [< ME. *rafle*, a game at dice (= Sw. *raffel*, a raffle); < OF. *rafle*, *raffle*, F. *rafle*, a pair royal at dice (*faire rafle*, sweep the stakes), also a grape-stalk, < *rafler*, snatch, seize, carry off, < G. *raffeln*, snatch up, freq. of *raffen*, snatch, snatch away, carry off hastily: see *raff*, *v.* Cf. *raffle*[2].] 1†. A game with dice.

> Now comth hasardrie with hise apurtenaunces, as tables and *rafles*, of which comth deceite, false othes, chidynges, and alle ravynes, blasphemynge and reneyinge of God.
> *Chaucer*, Parson's Tale.

2. A method of sale by chance or lottery, in which the price of the thing to be disposed of is divided into equal shares, and the persons taking the shares cast lots for its possession by throwing dice or otherwise.

raffle[1] (raf'l), *v.*; pret. and pp. *raffled*, ppr. *raffling*. [= Sw. *raffla* = Dan. *rafle*, raffle; from the noun.] **I.** *intrans.* To try the chance of a raffle; engage in a raffle: as, to *raffle* for a watch.

> They were *raffling* for his cont.
> *S. Butler*, Satire upon Gaming.
>
> The great Rendezvous is at night, after the Play and Opera are done; and *Raffling* for all Things Vendible is the great Diversion. *Lister*, Journey to Paris, p. 176.

II. *trans.* To dispose of by means of a raffle: often with *off*: as, to *raffle* or *raffle off* a watch.

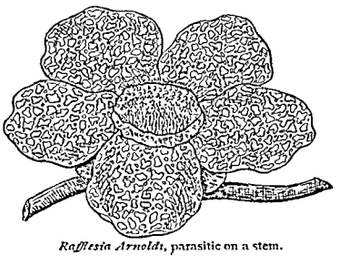
raffle[2] (raf'l), *v.*; pret. and pp. *raffled*, ppr. *raffling*. [Perhaps < Icel. *hrafla*, scrape together (a slang term); cf. *hrapa*, hurry, hasten: see *raff*, *v.* Cf. *raffle*[1].] **I.** *intrans.* 1. To move or fidget about. *Halliwell.* [Prov. Eng.]—2. To live in a disorderly way. *Halliwell.* [Prov. Eng.]

II. *trans.* 1. To stir (a fire).—2. To brush off (walnuts). *Halliwell.* [Prov. Eng.]

raffle[2] (raf'l), *n.* [< *raffle*[2], *v.* Cf. *raff*, *n.*] *Naut.*, raff; lumber; rubbish.

> Her decks were heavily encumbered with what sailors call *raffle*—that is, the muddle of ropes, torn canvas, staves of boats and casks, . . . with which the ocean illustrates her violence. *W. C. Russell*, Death Ship, xxx.

raffle[3] (raf'l), *n.* [Origin obscure.] Same as *raffle-net*.



raffled (raf'ld), *a.* [Origin obscure.] Having the edge finely divided or serrated.

> A peculiar small cut or *raffled* leaf resembling an ivy, or more nearly a vine leaf.
> *Soulages Catalogue*, p. 116, note to No. 365.

raffle-net (raf'l-net), *n.* A kind of fishing-net.

raffler (raf'lėr), *n.* [< *raffle*[2] + *-er*[1].] One who raffles.

Rafflesia (raf-lē'zi-ą), *n.* [NL. (R. Brown, 1821), named after Sir Stamford *Raffles*, British governor in Sumatra, and companion to the botanist Dr. Joseph Arnold, who discovered there the first known species, *R. Arnoldi*, in 1818.] A genus of apetalous parasitic plants of the order *Cytinaceæ* and type of the tribe *Rafflesieæ*, characterized by a perianth of five large entire and fleshy imbricated lobes, numerous stigmas, and globose many-chambered anthers, each opening by a single pore, which form a ring at the revolute top of a column rising in the center of the flower. The flowers are dicœcious, and the pistillate ones contain an ovary with a labyrinth of small cells and numerous ovules. The 4 species are natives of hot and damp jungles in the Malay archipelago. The whole plant consists of a single flower, without leaves or proper stem, growing out from the porous root or stem of species of *Vitis* (*Cissus*), at a time when the leaves and flowers of the foster-plant have withered. The flower of the parasite protrudes as a knob from the bark at first, and enlarges for some months, resembling before opening a close cabbage, and remaining fully expanded only a few days. It exhales an odor of tainted meat, securing cross-fertilization by aid of the flies thus attracted to it. The flower reaches 3 inches or more in diameter in *R. Rochussenii* (valued by the Javanese for astringent and styptic properties), 6 inches in others, and 2 feet in *R. Patma*. *R. Arnoldi* has long been famed for its size, greatly exceeding the Victoria lily (23 inches), and even exceeding the *Aristolochia Goldieana* (a specimen of which at Kew, March, 1890, was 28 inches long and 16 broad). The first flower

Rafflesia Arnoldi, parasitic on a stem.

of *R. Arnoldi* found measured 3 feet across its flat circular top, and weighed about 15 pounds; the roundish calyx-lobes were each a foot long, and in places an inch thick; and the globular central cup was a foot across and held about 6 quarts. The fruit ripens into a chestnut-brown and truncated nut, about 5 inches thick, with irregularly furrowed and broken surface, and containing thousands of hard, curiously appendaged and lacunose seeds. The flower is flesh-colored and mottled pink and yellow within, and with brown or bluish scales beneath. It is called *ambun-ambun* or *wonder-wonder* by the Malays, and *krubut*, a name which they also give to another gigantic plant which grows with it, the ovoid *Amorphophallus Titanum*.

Rafflesiaceæ (raf-lē-zi-ā'sē-ē), *n. pl.* [NL. (Schott and Endlicher, 1832), < *Rafflesia* + *-aceæ*.] Same as *Rafflesieæ*, but formerly regarded as a separate order.

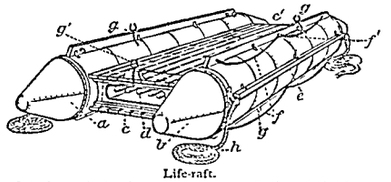
Rafflesieæ (raf-lē-zī'ē-ē), *n. pl.* [NL. (Robert Brown, 1844), < *Rafflesia* + *-eæ*.] A tribe of apetalous parasitic plants, constituting with the smaller tribe *Hydnoreæ* the order *Cytinaceæ*. It is characterized by the presence of scattered or imbricated scales in place of leaves, and flowers with from four to ten usually imbricated calyx-lobes, the anthers forming one, two, or three circles about a column in the center of the staminate flower, and the one or many stigmas terminating a similar column in the pistillate flower. It includes about 21 species in 5 genera, scattered through warm climates, and extending into the Mediterranean region, South Africa, and Mexico. All are indwelling parasites, issuing out of the roots or branches of various trees and shrubs. They vary in habit, having in *Cytinus* a colored fleshy and distinct stem and many-flowered spike, while in the other genera the whole plant consists of a single flower sessile on its embedded rhizome. They range from a minute size in *Apodanthes* and large in other genera to the monster flower of *Rafflesia*, the type. The plants are called *patma-worts* by some botanists.

raffling-net (raf'ling-net), *n.* Same as *raffle-net*.

raffman† (råf'man), *n.* [< *raff* + *man*.] A dealer in miscellaneous stuff; a chandler.

> Grocers and *raffemen*. *Norwich Records.* (*Nares.*)

raff-merchant (råf'mėr"chant), *n.* A dealer in lumber or old articles. Also *raft-merchant*. [Prov. Eng.]



raft[1] (råft), *n.* [< ME. *raft*, *ræft*, *rafte*, a rafter, spar, beam, < Icel. *raptr* (*raftr*), a rafter, beam (*r* final being sign of nom. case); = Sw. Dan. *rafter*, rafter; with formative *-t*, perhaps < Icel. *rāf*, *ræfr*, a roof, = OHG. *rāfo*, MHG. *rāvo*, G. dial. *raff*, a spar, rafter; cf. Gr. ὄροφος, a roof, ἐρέφειν, cover. 2. A sort of float or framework formed of logs, planks, or other pieces of timber fastened or lashed together side by side, for the convenience of transporting the constituent materials down rivers, across harbors, etc. Rafts of logs

to be floated to a distant point are often very large, strongly constructed, and carry huts for the numerous men required to manage them. Those of the Rhine are sometimes 400 or 500 feet long, with 200 or more hands. A cigar-shaped raft of large logs, 560 feet long, 50 feet wide, and 35 feet deep, was lost in December, 1887, under towage by sea from Nova Scotia to New York; but other large rafts have been successfully transported.

3. A structure similarly formed of any materials for the floating or transportation of persons or things. In cases of shipwreck, planks, spars,

barrels, etc., are often hastily lashed together to form a raft for escape. In passenger-vessels life-rafts frequently form part of the permanent equipment. See *life-raft*.

Where is that son
That floated with thee on the fatal *raft*?
Shak., C. of L., v. 1. 348.

4. An accumulation of driftwood from fallen trees in a river, lodged and compacted so as to form a permanent obstruction. Rafts of this kind exist or have existed in the Mississippi and other rivers of the western United States, the largest ever formed being that of the Red River, which during many years completely blocked the channel for 45 miles.

5. A conglomeration of eggs of some animals, as certain insects and mollusks, fastened together and forming a mass; a float. See cut under *Ianthina*.

A great many eggs [of the common cockroach] are laid at one time, the whole number being surrounded by a stiff chitinous coat, forming the so-called *raft*.

rafte†. An obsolete preterit and past participle of *reave*. *Chaucer.*

rafter[1] (rȧf'tėr), *n.* [< ME. *rafter*, *refter*, < AS. *ræfter*, pl. *ræftras*, *reftres* (= MD. *rafter* = MLG. *rafter*, *raffert*), a beam, rafter; with formative *-er*, from **ræft* = Icel. *raptr* (*raftr*) = Sw. Dan. *raft*, a rafter, beam: see *raft*.] 1. In *building*, one of the beams which give the slope of a roof, and to which is secured the lath or other framework upon which the slate or other outer covering is nailed. The rafters extend from the eaves to the ridge of the roof, abutting at their upper ends on corresponding rafters rising from the opposite side of the roof, or resting against a crown-plate or ridge-plate as the case may be. For the different kinds of rafters in a structure, see *roof*, and cuts under *curb-roof*, *jack-rafter*, and *pontoon*.

Shepherd, I take thy word,
And trust thy honest offer'd courtesy,
Which oft is sooner found in lowly sheds
With smoky *rafters* than in tap'stry halls.
Milton, Comus, l. 324.

2. Same as *carline*[4], 2.—3. In *anat.*, a trabecule or trabeculum: as, the *rafters* of the embryonic skull.—**Binding-rafter.** See *binding*.—**Intermediate rafter**, a rafter placed between the ordinary rafters, or between principal rafters, to strengthen a roof.—**Principal rafter**, a main timber in an assemblage of carpentry; especially, one of those rafters which are larger than the common rafters, and are framed at their lower ends into the tie-beam, and either abut at their upper ends against the king-post or receive the ends of the straining-beams when queen-posts are used. The principal rafters support the purlins, which again carry the common rafters: thus the whole weight of the roof is sustained by the principal rafters.

rafter[1] (rȧf'tėr), *v. t.* [< *rafter*[1], *n.*] 1. To form into or like rafters: as, to *rafter* timber.—2. To furnish or build with rafters: as, to *rafter* a house.

ments, except that the lines make oblique angles with one another: said of one of the lines in heraldry, which is used to separate the divisions of the field or to form the boundary of any ordinary.

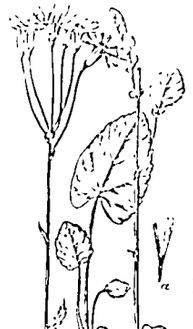
A Cross Raguly.

Ragusan (ra-gö'san), *a.* and *n.* [< *Ragusa* (see def.) + *-an*. Cf. *argosy*.] I. *a.* Of or pertaining to Ragusa in Dalmatia, on the Adriatic, a city belonging to Austria, but for many centuries prior to the time of Napoleon I. an independent republic.

II. *n.* A native or an inhabitant of Ragusa.

ragweed (rag'wēd), *n.* 1. Any plant of the composite genus *Ambrosia;* especially, the common North American species *A. trifida*, the great ragweed or horse-cane, and *A. artemisiæfolia*, the Roman wormwood or hogweed. Both are sometimes called *bitterweed*. The former is commonly found on river-banks, has three-lobed leaves, and is sometimes 12 feet high. The latter, a much-branching plant from 1 to 3 feet high, with dissected leaves, grows everywhere in waste places, along roads, etc., and is troublesome in fields. Its pollen is regarded as a cause of hay-fever. The plants of this genus are monœcious, the flowers of the two sexes borne in separate heads, the female heads producing a single flower with the ovoid involucre closed over it. The flowers are greenish and inconspicuous. See *Ambrosia*, 2.

2. The ragwort or St.-James-wort, *Senecio Jacobæa*. [Prov. Eng.]



rag-wheel (rag'hwēl), *n.* 1. In *mach.*, a wheel having a notched or serrated margin.—2. A cutlers' polishing-wheel or soft disk made by clamping together a number of disks cut from some fabric.—**Rag-wheel and chain**, a contrivance for use instead of a band or belt when great resistance is to be overcome, consisting of a wheel with pins or cogs on the rim, and a chain in the links of which the pins catch. See cut under *chain-wheel*.

Rahu (ra'hö), *n.* [Skt. *Rāhu;* derivation obscure.] In *Hindu myth.*, the demon that is supposed to be the cause of the eclipses of the sun and moon.

Raia (rā'ia), *n.* [NL., also *Raja*, < L. *raia*, a ray: see *ray*[2].] A genus of batoid selachians: used with various limits. (*a*) By the old authors it was extended to all the species of the order or suborder *Raiæ*. (*b*) By modern authors it is restricted to those *Raiidæ* (in the narrowest sense) which have the pectorals separated by the snout, the caudal rudimentary, and the ventrals distinct and notched. It comprises nearly 40 species, generally called *skates* or *rays*. See cuts under *skate* and *ray*[1].

Raiæ (rā'ē), *n. pl.* [NL., pl. of L. *raia*, a ray: see *Raia*.] An order or suborder of selachians, comprising the rays or skates, and distinguished by the position of the branchial apertures on the lower surface of the body, and the depressed and disk-like trunk in combination with the outspread pectorals. Also called *Batoidei*.

raian (rā'an), *a.* and *n.* [< NL. *Raia(a)* + *-an*.] Same as *raioid*.

raible (rā'bl), *v.* A Scotch form of *rabble*[1].

Wee Miller neist the guard relieves,
And orthodoxy *raibles*. *Burns*, Holy Fair.

raid (rād), *n.* [Also *rade;* < ME. *rade*, Northern form of *rode*, < AS. *rād*, a riding, = Icel. *reidh*, a riding, a raid: see *road*, of which *raid* is a variant, prob. in part from the cognate Icel. form.] 1. A hostile or predatory incursion; especially, an inroad or incursion of mounted men; a swooping assault for injury or plunder; a foray.

Then he a proclamation maid,
All men to meet at Inverness,
Throw Murray land to mak a *raid*.
Battle of Harlaw (Child's Ballads, VII. 184).

So the ruffians growl'd,
Fearing to lose, and all for a dead man,
Their chance of booty from the morning's *raid*.
Tennyson, Geraint.

Hence—2. A sudden onset in general; an irruption for or as if for assault or seizure; a descent made in an unexpected or undesired manner: as, a police *raid* upon a gambling-house. [Chiefly colloq.]

raid (rād), *v.* [< *raid*, *n.*] I. *intrans.* To go upon a raid; engage in a sudden hostile or disturbing incursion, foray, or descent.

The Saxons were perpetually *raiding* along the confines of Gaul. *The Atlantic*, LXV. 153.

II. *trans.* 1. To make a raid or hostile attack upon; encroach upon by foray or incursion. Hence—2. To attack in any way; affect injuriously by sudden or covert assault or invasion of any kind: as, to *raid* a gambling-house. [Colloq.]—**To raid the market**, to derange prices or the course of trade, as on the stock-exchange, by exciting distrust or uncertainty with regard to values; disturb or depress prices by creating a temporary panic. [Colloq.]

raider (rā'dėr), *n.* [< *raid* + *-er*[1].] One who makes a raid; one engaged in a hostile or predatory incursion.

raign[1]†, *v. t.* [ME. *reynen;* by apheresis for *arraign*[1] (ME. *araynen*, etc.).] To arraign.

And many other extorcioners and promoters in dyuers contreys within the reame was broght to London, and put in to prysons, and *reyned* at the Gyld Halle with Empson and Dudley. *Arnold's Chronicle*, p. xliv.

raign[2]†, *n.* and *v.* An obsolete spelling of *reign*.

Raiidæ (rā'i-dē), *n. pl.* [NL., < *Raia* + *-idæ*.] A family of hypotreme selachians, or *Raiæ*, typified by the genus *Raia;* the skates and rays proper. The species have a moderately broad rhombic disk, a more or less acute snout, the tail slender but not whip-like, and surmounted by two small dorsals without spines, and no electrical apparatus. The females are oviparous, eggs inclosed in quadrate corneous capsules being cast. In this respect the *Raiidæ* differ from all the other ray-like selachians. The species are quite numerous, and every sea has representatives. Formerly the family was taken in a much more extended sense, embracing all the representatives of the suborder except the saw-fishes. Also *Rajida*.

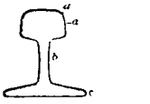
Raiinæ (rā-ī'nē), *n. pl.* [NL., < *Raia* + *-inæ*.] A subfamily of rays, coextensive with the family *Raiidæ* in its most restricted sense.

raikt, *v. i.* See *rake*[2].

rail[1] (rāl), *n.* [< ME. *rail, raile, rayl, *regel, *regol* (in comp. *regolsticke*, a ruler), partly < AS. *regol* (not found in sense of 'bar' or 'rail' except as in *regolsticca* (> ME. *regolsticke*), a ruler, a straight bar, but common in the derived sense 'a rule of action,' = MD. *reghel, rijghel, rijchel, richel*, a bar, rail, bolt, later *richel*, a bar, shelf, D. *rigchel*, a bar, = MLG. *regel*, LG. *regel*, a rail, cross-bar, = OHG. *rigil*, MHG. *rugel*, G. *riegel*, a bar, bolt, rail, = Sw. *regel* = Dan. *rigel*, a bar, bolt; partly < OF. *reille, raille, roille, roile, reilhe, relle, rele*, a bar, rail, bolt, board, plank, ladder, plow-handle, furrow, row, etc., F. dial. *reille*, ladder, *reille, raille*, plowshare (< LG.); < L. *regula*, a straight piece of wood, a stick, bar, staff, rod, rule, ruler, hence a rule, pattern, model: see *rule*[1]. *Rail*[1] is thus a doublet of *rule*[1], derived through AS., while *rule*[1] is derived through OF., from the same L. word. Cf. *rail*[2].] 1. A bar of wood or other material passing from one post or other support to another. Rails, variously secured, as by being mortised to or passing through slots in their supports, etc., are used to form fences and barriers and for many other purposes. In many parts of the United States rail fences are commonly made of rails roughly split from logs and laid zigzag with their ends resting upon one another, every intersection so formed being often supported by a pair of crossstakes driven into the ground, upon which the top rails rest.

2. A structure consisting of rails and their sustaining posts, balusters, or pillars, and constituting an inclosure or line of division: often used in the plural, and also called a *railing*. The rails of massive stone, elaborately sculptured, which form the ceremonial inclosures of ancient Buddhist topes, temples, sacred trees, etc., in India, are among the most characteristic and important features of Buddhist architecture, and are the most remarkable works of this class known.

The Grownd within the *Rayles* must bee coveryd with blake Cloth.
Booke of Precedence (E. E. T. S., extra ser.), i. 33.



There lyeth a white marble in form of a graves-stone, environed with a *rale* of brasse. *Sandys*, Travailes, p. 127.

The Bharhut *rail*, according to the inscription on it, was erected by a Prince Vâdha Pala. . . . The Buddh Gaya *rail* is a rectangle, measuring 131 ft. by 98 ft.
J. Fergusson, Hist. Indian Arch., p. 85.

3. In *joinery*, a horizontal timber in a piece of framing or paneling. Specifically—(*a*) In a door, sash, or any paneled work, one of the horizontal pieces between which the panels lie, the vertical pieces being called *stiles*. See cut under *door*. (*b*) The course of pieces into which the upper ends of the balusters of a stair are mortised. (*c*) In furniture-making and fine joinery, any piece of the construction passing between two posts or other members of the frame: as, the head-*rail* or foot-*rail* in a bedstead. Hence—(*d*) A corresponding member in construction in other materials than wood, as a tie in brass or iron furniture.

4. *Naut.*, one of several bars or timbers in a ship, serving for inclosure or support. The *rail*, specifically so called, is the fence or upper part of the bulwarks, consisting of a course of molded planks or small timbers mortised to the stanchions, or sometimes to the timber-heads. The part passing round the stern is the *taffrail*. The *forecastle-rail, poop-rail*, and *top-rail* are bars extended on stanchions across the after part of the forecastle-deck, the fore part of the poop, and the after part of each of the tops, respectively. A *pin-rail* is part of a rail with holes in it for belaying-pins; and a *jife-rail* is a rail around the lower part of a mast, above the deck, with similar holes. The *rails of the head* are curved pieces of timber extending from the bows on each side to the hull of the head, for its support.

5. One of the iron or (now generally) steel bars or beams used on the permanent way of a railway to support and guide the wheels of cars and motors. The general form now most in use for steam-railways is that known as the *T-rail*. But, though these rails all have a section vaguely resembling the letter T, the proportions of the different parts and the weights of the rails are nearly as various as the railways themselves. In the accompanying diagram is shown a section of a rail weighing 75 pounds per yard in length, the weight of the length of one yard being the common mode of stating the weights of rails. These weights are in modern rails sometimes as great as 100 or more pounds per yard, the more recent tendency having been toward heavier locomotives and heavier rails. The cut shows the comparative dimensions of the various parts. (Compare *fish-joint, fish-plate*, and *fish*[1], v. t., 8.) The curved junctions of the web with the head and the base are called the *fillets*.

Section of Rail.
a, head; *b*, web; *c*, base; the part *d* is at the inner side of the head, and made to correspond with the throat of the car-wheel.

6. The railway or railroad as a means of transport: as, to travel or send goods by *rail*. [Colloq.]

French and English made rapid way among the dragomanish officials of the *rail*.
W. H. Russell, Diary in India, I. 24.

The tourists find the steamer waiting for them at the end of the *rail*. *C. D. Warner*, Their Pilgrimage, p. 270.

7. In *cotton-spinning*, a bar having an up-and-down motion, by which yarn passing through is guided upon the bar and is distributed upon the bobbins.—**Adhesion of wheels to rails**. See *adhesion*.—**Capped rail**. See *cap*[1].—**Compound rail**, a railway-rail made in two longitudinal counterparts bolted together in such manner that opposite ends of each project beyond the other part to produce a lapping joint when the rails are spiked to the ties or sleepers. Also called *continuous rail*.—**Double-headed rail**, a railway-rail without flanges, with two opposite heads united by a web. It is always used with chairs, and by turning it upside down it can be used after the upper head has become so worn as to be useless.—**False rail**, in *ship-carp.*, a thin piece of timber attached inside of a curved head-rail in order to strengthen it.—**Fish-bellied rail**, a cast-iron railway-rail having a convex or downwardly arching under surface to strengthen its middle part, after the manner of some cast-iron beams and girders. It was introduced in 1805.—**Flat rail**, a railway-rail of cast-iron or wrought-iron fastened by spikes to longitudinal sleepers. The cast-iron flat rail was first used in 1776.—**Middle rail**, in *carp.*, that rail of a door which is on a level with the hand, and on which the lock is usually fixed, whence it is sometimes called the *lock-rail*. See cut under *door*.—**Pipe rail**, a rail of iron pipe joined by fittings as in pipe-fitting. Such rails, of iron or brass, are now much used in engine-rooms of ships, at the sides of locomotives, on iron bridges, elevated railways, etc.—**Pipe-rail fittings**, the screw-threaded fittings, including couplings, elbows, crosses, tees, flanges, etc., used in putting together pipe-railings, and usually of an ornamental pattern.—**Point-rail**, a pointed rail used in the construction of a railway-switch.—**Rail-drilling machine**, a machine for drilling holes in the web of steel rails for the insertion of fish-plate bolts.—**Rail-**

straightening machine, a portable screw-press for straightening bent or crooked rails or iron bars.—**Rail under** (*naut.*), with the lee rail submerged: as, the vessel sailed *rail under*.—**Rolled rail**, a rail made of wrought-iron or steel by rolling.—**Steel-headed rail**, a railway-rail having a wrought-iron base and web and a steel head. Such rails were too expensive for general use, and have given place to the Bessemer-steel rails. Also called *steel-topped rail*.—**Steel rail**, a rolled-steel railway-rail. The first steel rails were manufactured in England by Mushet in 1857. The development of the use of steel rails, stimulated by the invention of the celebrated Bessemer process for making cheap mild steel from which rails of far greater durability than those of wrought-iron can be manufactured, has been rapid, and has resulted in the substitution of steel rails for wrought-iron rails on nearly all important railways in the world.—**To ride on a rail.** See *ride*.—**Virginia rail fence.** Same as *snake fence* (which see, under *fence*).

rail[1] (rāl), *v.* [< ME. *railen*, *raylen* (= OHG. *rigilōn*, MHG. *rigelen*, G. *riegeln*), rail; cf. OF. *reillier*, *roillier*, *raillier*, inclose with rails, bar; from the noun. Cf. *rail*[2], *v.*] **I.** *trans.* 1. To inclose with rails: often with *in* or *off*.

Cf. also D. *rallen*, *rellen*, make a noise, Sw. *ralla*, chatter (*rallfågel*, a rail), Dan. *ralle*, rattle.] A bird of the subfamily *Rallinæ*, and especially of the genus *Rallus*; a water-rail, land-rail, marsh-hen, or crake. Rails are small marsh-loving wading birds, related to coots and gallinules. They abound in the marshes and swamps of most parts of the world, where they thread their way in the mazes of the reeds with great ease and celerity, the body being thin and compressed, and the legs stout and strong with long toes. They nest on the ground, and lay numerous spotted eggs; the young run about as soon as hatched. The common rail of Europe is *Rallus aquaticus*; the clapper-rail or salt-water marsh-hen of the United States is *R. crepitans*; the king-rail or fresh-water marsh-hen is *R. elegans*; the Virginia rail is *R. virginianus*, also called *red rail*, *little red-breasted rail*, *lesser clapper-rail*, *small mud-hen*, etc. Very generally, in the United States, the word *rail* used absolutely means the sora or soree, *Porzana carolina*, more fully called *rail-bird*, *chicken-billed rail*, *English rail*, *Carolina rail*, *American rail*, *common rail*, *sora-rail*, *ortolan*, *Carolina crake*, *crake-gallinule*, etc. See *Crex*, *Porzana*, and cut under *Rallus*.—**Golden rail**, a snipe of the genus *Rhynchæa*; a painted-snipe or rail-snipe.—**Spotted rail**, the spotted crake, *Porzana maruetta*, also called *spotted skitty* and *spotted water-hen*.—**Weka rail.** See *Ocydromus*.

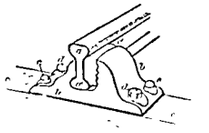
rail[5] (rāl), *v.* [Early mod. rail-bender (rāl'ben"dėr), *n.* A screw-press or hydraulic press for straightening rails, or for bending them in the construction of railway-curves and -switches. The rail is supported upon two bearers, between which the pressure is applied. Also called *rail-bending machine*.

rail-bird (rāl'bėrd), *n.* The Carolina rail or sora, *Porzana carolina*. [U. S.]



rail-bittern (rāl'bit"ėrn), *n.* One of the small bitterns of the genus *Ardetta*, as *A. neoxena*, which in some respects resemble rails. *Coues.*

rail-board (rāl'bōrd), *n.* A board nailed to the rail of a vessel engaged in fishing for mackerel with hand-lines.

rail-borer (rāl'bōr"ėr), *n.* A hand-drill for making holes in the web of rails for the fish-plate bolts.

rail-brace (rāl'brās), *n.* A brace used to prevent the turning over of rails or the spreading of tracks at curves, switches, etc., on railways.

rail-chair (rāl'chār), *n.* An iron block, used especially in Great Britain, by means of which railway-rails are secured to the sleepers. With the flat-bottomed rail common in the United States, chairs are not required, the rails being attached to the sleepers by spikes.

Double-headed Rail and Rail-chair, as used on the London and North-Western Railway, England.

a, upper head of rail; *a'*, lower head of rail; *b*, chair; *c*, sleeper; *c'*, wedge of wood; *d*, wood-screws; *e*, spikes.

rail-clamp (rāl'klamp), *n.* A wedge or tightening-key for clamping a rail firmly in a rail-chair, so as to prevent lateral play.

rail-coupling (rāl'kup"ling), *n.* A bar or rod connecting the opposite rails of a railway together at critical points, as curves or switches, where a firmer connection than is afforded by the sleepers is needed.

railer[1] (rā'lėr), *n.* [< *rail*[1] + *-er*[1].] One who makes or furnishes rails.

railer[2] (rā'lėr), *n.* [Early mod. E. *rayler*, < F. *railleur*, railer, jester, < *railler*, rail, jest, mock: see *rail*[5].] One who rails, scoffs, insults, censures, or reproaches with opprobrious language.

> I am so far off from deserving you,
> My beauty so unfit for your affection,
> That I am grown the scorn of common *railers*
> *Fletcher*, Wildgoose Chase, iii. 1.
>
> Junius is never more than a *railer*, and very often he is third-rate even as a *railer*. *John Morley*, Burke, p. 47.

rail-guard (rāl'gärd), *n.* 1. In English locomotives, one of two stout rods, reaching down to about two inches from the track, before a front wheel. In America the cow-catcher or pilot serves the same purpose.—2. A guard-rail.

railing (rā'ling), *n.* [< ME. *raylynge*; verbal n. of *rail*[1], *v.*] 1. Rails collectively; a combination of rails; a construction in which rails form an important part. Hence—2. Any openwork construction used as a barrier, parapet, or the like, primarily of wood, but also of iron bars, wire, etc.—**Post and railing.** See *post*[1].

railingly (rā'ling-li), *adv.* In a railing manner; with scoffing or opprobrious language.

railing-post (rā'ling-pōst), *n.* Same as *rail-post*.

railipotent (rā-lip'ō-tent), *a.* [Irreg. < *rail*[1] + *potent*, as in *omnipotent*.] Powerful in railing or vituperation, or as incentive to railing; extremely abusive. [Rare.]

> The most preposterous principles have, in requital, shown themselves, as an old author phrases it, valiantly *railipotent*. *F. Hall*, Mod. Eng., Pref.

rail-key (rāl'kē), *n.* A wedge-piece used to clamp a rail to a chair by driving it in between the rail and the chair. Compare *rail-clamp*.

raillery (rāl'- or ral'ėr-i), *n.* [Early mod. E. *raillerie*, *ralliery*, *rallery*; < F. *raillerie*, jesting, mockery, < *railler*, jest: see *rail*[5] and *rally*[2].] 1. Good-humored pleasantry or ridicule; satirical merriment; jesting language; banter.

> Let *raillery* be without malice or heat. *B. Jonson.*
>
> When you have been Abroad, Nephew, you'll understand *Rallery* better. *Congreve*, Way of the World, iii. 16.
>
> That conversation where the spirit of *raillery* is suppressed will ever appear tedious and insipid.
> *Sheridan*, School for Scandal, i. 1.

2†. A jest. [Rare.]

> They take a pleasing *raillery* for a serious truth.
> *Gentleman Instructed*, p. 13. (*Davies.*)

railleur (ra-lyėr'), *n.* [F. *railleur*, railer, jester, mocker: see *railer*[2].] One who turns what is serious into ridicule; a jester; a banterer; a mocker.

> The family of the *railleurs* is derived from the same original with the philosophers. The founder of philosophy is confessed by all to be Socrates; and he was also the famous author of all irony.
> *Bp. Sprat*, Hist. Royal Soc.

railly (rā'li), *n.*; pl. *raillies* (-liz). [Dim. of *rail*[3].] Same as *rail*[3]. [Scotch.]

rail-post (rāl'pōst), *n.* In *carp.*: (*a*) A baluster for a stair-rail, hand-rail, or a balustrade. (*b*) A newel. Also called *railing-post*.

rail-punch (rāl'punch), *n.* A machine for punching holes in the webs of rails, and for analogous uses.

railroad (rāl'rōd), *n.* [< *rail*[1] + *road*.] A road upon which are laid one or more lines of rails to guide and facilitate the movement of vehicles designed to transport passengers or freight, or both. [In this sense the words *railroad* and *railway* (which are of about equal age) are synonymous; but the former is more commonly (and preferably) used in the United States, the latter now universally in England. In both countries steam-railroads are called *roads*, seldom *ways*. For convenience, the subject of railroads, and the various compound words, are treated in this dictionary under *railway*.]

> The London "Courier," in detailing the advantages of *rail-roads* upon the locomotive steam engine principle, contains a remark relative to Mr. Rush, our present minister in London . . . : "Whatever parliament may do, they cannot stop the course of knowledge and improvement! The American government has possessed itself, through its minister, of the improved mode of constructing and making *rail-roads*, and there can be no doubt of their immediate adoption throughout that country."
> *Niles's Register*, April 2, 1825.
>
> Alas! even the giddiness attendant on a journey on this Manchester *rail-road* is not so perilous to the nerves as that too frequent exercise in the merry-go-round of the ideal world. *Scott*, Count Robert of Paris, Int., p. xi. (Oct. 15, 1831).
>
> On Monday I shall set off for Liverpool by the *railroad*, which will then be opened the whole way.
> *Macaulay*, in Trevelyan, II. 20.
>
> Lady Buchan of Athlone writes thus in 1833: "I have a letter from Sir John, who strongly recommends my going by the *railroad*." *N. and Q.*, 7th ser., VIII. 379.

Commissioner of Railroads. See *commissioner*.—**Elevated railroad.** See *railway*.—**Railroad euchre.** See *euchre*.—**Underground railroad.** (*a*) See *underground railway*, under *railway*. (*b*) In the United States before the abolition of slavery, a secret arrangement for enabling slaves to escape into free territory, by passing them along from one point of concealment to another till they reached Canada or some other place of safety.

railroad (rāl'rōd), *v. t.* [< *railroad*, *n.*] To hasten or push forward with railroad speed; expedite rushingly; rush: as, to *railroad* a bill through a legislature. [Slang, U. S.]

> A New York daily some time ago reported that a common thief . . . was *railroaded* through court in a few days *Pop. Sci. Mo.*, XXXII. 758.
>
> The Alien act, that was *railroaded* through at the close of the last session. *Sci. Amer.*, N. S., LVII. 37.

railroader (rāl′rō-dėr), *n.* A person engaged in the management or operation of a railroad or railroads; one employed in or about the running of railroad-trains or the general business of a railroad. [U. S.]

The Inter-State Commerce Commission is endeavoring to harmonise the interests of shippers and *railroaders*.
The Engineer, LXVI. 18.

railroading (rāl′rō-ding), *n.* [< *railroad* + *-ing*[1].] The management of or work upon a railroad or railroads; the business of constructing or operating railroads. [U. S.]

Wonders in the science of *railroading* that the tourist will go far to see.
Harper's Weekly, XXXIII., Supp., p. 60.

railroad-worm (rāl′rōd-wėrm), *n.* The apple-maggot (larva of *Trypeta pomonella*): so called because it has spread along the lines of the railroads. [New Eng.]

rail-saw (rāl′sâ), *n.* A portable machine for sawing off railway-rails in track-laying and -repairing. The most approved form clamps to the rail to be sawn, its frame carrying a reciprocating segmental saw working on a rock-shaft, which is operated by laterally extending detachable rock-levers. It has mechanism which slowly moves the saw toward the rail. A rail can be cut off by it in fifteen minutes.

rail-snipe (rāl′snip), *n.* A bird of the genus *Rhynchæa* (or *Rostratula*), as *R. capensis*, the Cape rail-snipe, also called *painted Cape snipe* and *golden rail*.

rail-splitter (rāl′split ėr), *n.* One who splits logs into rails for making a rail fence. Abraham Lincoln, President of the United States from 1861 to 1865, who in his youth had occasionally split rails was sometimes popularly called *the rail-splitter*, and clubs of his partizans assumed the name *Rail-splitters*. [U. S.]

Yes he had lived to shame me from my sneer,
To lame my pencil, and confute my pen,
To make me own this hind of princes peer,
This *rail-splitter* a true born king of men.
Tom Taylor, Abraham Lincoln.

railway (rāl′wā), *n.* [< *rail*[1] + *way*.] 1. In *mech. engin.*, broadly, a way composed of one or more rails, or lines of rails, for the support, and commonly also for the direction of the motion, of a body carried on wheels adapted to roll on the rail or rails, or lines of rails. The wheels of railway-cars are now more usually flanged, but in railways forming parts of machines they are sometimes grooved, or they may run in grooves formed in the rails.

2. A way for the transportation of freight or passengers, or both, in which vehicles with flanged or grooved wheels are drawn or propelled on one or more lines of rails that support the wheels of the vehicles, and guide their course by the lateral pressure of the rails against the wheels; a railroad. (See *railroad*.) The parts of an ordinary passenger- and freight-railway proper are the road-bed, ballast, sleepers, rails, rail-chairs, splices, spikes, switches, and switch-mechanism, collectively called *permanent way*, and the signals, but in common and accepted usage the meaning of the terms *railway* and *railroad* has been extended to include not only the permanent way but everything necessary to its operation, as the rolling-stock and buildings including stations, ware-houses, round-houses, locomotive-shops, car-shops, and repair-shops and also all other property of the operating company as stocks, bonds, and other securities. Most existing railways employ steam locomotives, but systems of propulsion by endless wire ropes or cables, by electric locomotives, and by electromotors placed on individual cars to which electricity generated by dynamos at suitable stations is supplied from electrical conductors extending along the line, or from storage batteries carried by the cars, have recently made notable progress. Horse railways or tramways, in which the cars are drawn by horses or mules, are also extensively used for local passenger and freight traffic, but in many places such railways are now being supplanted by electric or cable systems.

Railway. — A new iron *railway* has been invented in Bavaria. On an exactly horizontal surface, on this improvement, a woman, or even a child, may, with apparent ease, draw a cart loaded with more than six quintals. . . . It is proved that those iron railings are two thirds better than the English, and only cost half as much.
Niles's Register, Jan. 26, 1822.

Abandonment of railway. See *abandonment*. — **Aërial, Archimedean, atmospheric, centripetal, electric railway.** See the adjectives. — **Elevated railway,** or *elevated railroad*, in contradistinction to *surface railway*, an elevated structure, in form analogous to a bridge, used in New York and elsewhere for railway purposes, to avoid obstruction of surface roadways. The elevated structures are usually made of a good quality of steel and iron, and cars are moved on them either by steam locomotives or by cable-traction, more commonly the former. Electricity has also been applied to the propulsion of cars on elevated railways. — **Inclined railway,** a railway having such a steep grade that special means other than ordinary locomotive driving-wheels are necessary for drawing or propelling cars on it. The use of locomotives with gripping-wheels engaging a rail extending midway between the ordinary rails, or having a pinion engaging the teeth of a rack-rail similarly placed, is a feature of many such rail ways. Cables operated by a stationary engine are also used. — **Marine railway.** See *marine*. — **Military railway,** a railway equipped for military service. Armored locomotives, and armor-plated cars having port-holes for rifles and some of them carrying swivel-guns, are prominent features of a military railway outfit. — **Pneumatic railway.** (*a*) A railway in which cars are propelled by air-pressure behind them. In one form of pneumatic railway the cars were pushed like pistons through a tunnel by pressure of air on the rear. The system failed of practical success from the difficulties met with in the attempt to carry it out on a large scale. Also called *atmospheric railway* (which see, under *atmospheric*). (*b*) A railway in which cars are drawn by pneumatic locomotives. Scarcely more success has been reached in this method than in that described above. — **Portable railway,** or *portable railroad*, a light railway-track made in detachable sections, or otherwise constructed so that it may be easily taken up, carried about, and transported to a distance, for use in military operations, in constructing roads, in building operations, in making excavations, etc. The rails are frequently of wood, or of wood plated with iron. — **Prismoidal railway,** a railway consisting of a single continuous beam or truss supported on posts or columns. The engine and cars run astride of the beam, the former being provided with grip-wheels to obtain the hold on the track requisite for draft. — **Railway brain,** a term applied to certain cases developed by railway accident, in which a traumatic neurosis is believed to be of cerebral origin. — **Railway Clauses Consolidation Act,** an English statute of 1845 (8 and 9 Vict., c. 20) consolidating the usual statutory provisions applicable to railway corporations, enabling them to take private property, and giving them special rights or special duties. — **Railway cut-off saw.** See *saw*[1]. — **Railway post-office.** See *post-office*. — **Railway scrip.** See *scrip*. — **Railway spine,** an affection of the spine resulting from concussion produced by a railway accident. See under *spine*.

The *railway spine* has taken its place in medical nomenclature.
Sci. Amer., N. S., LX. 22.

Underground railway, a railway running through a continuous tunnel, as under the streets or other parts of a city; a subterranean railway.

railway-car (rāl′wā-kär), *n.* Any vehicle in general (the locomotive or other motor and its tender excepted) that runs on a railway, whether for the transportation of freight or of passengers.

railway-carriage (rāl′wā-kar′āj), *n.* A railway-car for passenger-traffic. [Eng.]

railway-chair (rāl′wā-chār), *n.* Same as *rail-chair*.

railway-company (rāl′wā-kum′pą-ni), *n.* A stock company, usually organized under a charter granted by special legislative enactment, for the purpose of constructing and operating a railway, and invested with certain special powers, as well as subject to special restrictions, by the terms of its charter.

railway-crossing (rāl′wā-krós′ing), *n.* 1. An intersection of railway-tracks. — 2. The intersection of a common roadway or highway with the track of a railway.

railway-frog (rāl′wa-frog), *n.* See *frog*[2], 2.

railway-slide (rāl′wā-slid), *n.* A turn-table. [Eng.]

railway-stitch (rāl′wā-stich), *n.* 1. In *crochet*, same as *tricot-stitch*. — 2. In *embroidery*, a simple stitch usually employed in white embroidery, or with floss or filoselle. — 3. In worsted-work or Berlin-wool work, a kind of stitch used on leviathan canvas, large and loose, and covering the surface quickly.

railway-switch (ral′wa-swich), *n.* See *switch*.

railway-tie (ral′wā-ti), *n.* See *tie*.

railway-train (ral′wā-trān), *n.* See *train*.

raim (ram), *r. t.* Same as *ream*[2].

raiment (rā′ment), *n.* [Early mod. E. *rayment*, < ME. *rayment*, *rayment*, short for *arayment*, later *arrayment*, mod. *arrayment*: see *arrayment*. Cf. *ray*, by aphæresis for *array*.] That in which one is arrayed or clad; clothing; vesture; formerly sometimes, in the plural, garments. [Now only poetical or archaic.]

On my knees I beg
That you'll vouchsafe me *raiment*, bed, and food.
Shak., Lear, II. 4. 158.

Truth's Angel on horseback, his *raiment* of white silk powdered with stars of gold
Middleton, Triumphs of Truth.

=Syn. Clothes, dress, attire, habiliments, garb, costume, array. The se words are all in current use, while *raiment* and *vesture* have a poetic or antique sound.

raimondite (rā′mon-dit), *n.* [Named after A. *Raimondi*, an Italian scientist who spent many years in exploring Peru.] A basic sulphate of iron, occurring in hexagonal tabular crystals of a yellow color.

rain[1] (rān), *n.* [Early mod. E. *rayne*, < ME. *rein*, *reyn*, *reyne*, *reane*, *reȝn*, *rien*, *ren*, *ran*, < AS. *regn* (often contr. *rēn*) = OS. *regan*, *regin* = OFries. *rein* = D. *regen* = MLG. *regen* = OHG. *regan*, MHG. *regen*, G. *regen* = Icel. Sw. Dan. *regn* = Goth. *rign*, rain; cf. L. *rigare*, moisten (see *irrigation*), Gr. *βρέχειν*, wet (see *embrocation*).] 1. The descent of water in drops through the atmosphere, or the water thus falling. In general, clouds constitute the reservoir from which rain descends, but the fall of rain in very small quantities from a cloudless sky is occasionally observed. The aqueous vapor of the atmosphere, which condenses into cloud, and falls as rain, is derived from the evaporation of water, partly from land, but chiefly from the vast expanse of the ocean. At a given temperature, only a certain amount of aqueous vapor can be contained in a given volume, and when this amount is present the air is said to be saturated. If the air is then cooled below this temperature, a part of the vapor will be condensed into small drops, which, when suspended in the atmosphere, constitute clouds. Under continued cooling and condensation, the number and size of the drops increase until they begin to descend by their own weight. The largest of these, falling fastest, unite with smaller ones that they overtake, and thus drops of rain are formed whose size depends on the thickness and density of the cloud and on the distribution of electrical stress therein. Sometimes the rate of condensation is so great that the water appears to fall in sheets rather than in drops, and then the storm is popularly called a *cloud-burst*. It is now generally held that dynamic cooling (that is, the cooling of air by expansion, when raised in altitude, and thereby brought under diminished pressure), if not the sole cause of rain, is the only cause of any importance, and that other causes popularly appealed to — such as the intermingling of warm and cold air, contact with cold mountain-slopes, etc. — are either inoperative or relatively insignificant. The requisite ascent of air may be occasioned either by convection currents, a cyclonic circulation, or the upward deflection of horizontal currents by hills or mountains; and rain may be classified as *convective*, *cyclonic*, or *orographic*, according as the first, second, or third of these methods is brought into operation to produce it. The productiveness of the soil and the maintenance of life in most parts of the earth depend largely upon an adequate fall of rain. In some regions it is more or less evenly distributed throughout the year, in others it is confined to a part of the year (the rainy season), and in others still it is entirely absent, or too slight for need, according to variation of local atmospheric conditions. Ancren Riwle, p. 216.

Also a man that was born in thys yle told vs that they had no *Rayne* by the space of x months; they sow ther whete with owt *Rayne*.
Torkington, Diarie of Eng. Travell, p. 61.

2. Figuratively — (*a*) A fall of any substance through the atmosphere in the manner of rain, as of blossoms or of the pyrotechnic stars from rockets and other fireworks. *Blood-rain* is a fall of fragments of red algæ or the like, raised in large quantities by the wind and afterward precipitated. *Sulphur-rain* or *yellow rain* is a similar precipitation of the pollen of fir-trees, etc. (*b*) A shower, downpour, or abundant outpouring of anything.

Whilst Wealth it self doth roll
In to her bosom in a golden *Rain*.
J. Beaumont, Psyche, i. 38.

The former and the latter rain, in Palestine, the rains of autumn and of spring; hence, rain in its due season. — **The Rains!,** a tract of the Atlantic ocean formerly so called. See the quotation.

Crossing toward the west, from Africa, it is now known that between about five and fifteen north latitude is a space of ocean, nearly triangular, the other limit being about twenty (long.) and ten (lat.), which used to be called by the earlier navigators *the Rains*, on account of the calms and almost incessant rain always found there.
Fitz Roy, Weather Book, p. 115.

=Syn. 1. *Rain*, *Haze*, *Fog*, *Mist*, *Cloud*. A *cloud* resting upon the earth is called *mist* or *fog*. In *mist* the globules are very fine, but are separately distinguishable, and have a visible motion. In *fog* the particles are separately indistinguishable, and there is no perceptible motion. A *dry fog* is composed largely of dust-particles on which the condensed vapor is too slight to occasion any sense of moisture. *Haze* differs from *fog* and *cloud* in the greater microscopic minuteness of its particles. It is visible only as a want of transparency of the atmosphere, and in general exhibits neither form, boundary, nor locus. Thus, among *haze*, *fog*, *mist*, and *rain*, the size of the constituent particles or globules is a discriminating characteristic, though frequently cloud merges into fog or mist, and mist into rain, by insensible gradations.

rain[1] (rān), *v.* [< ME. *raynen*, *reinen*, *reynen*, *reȝnen*, *rinen*, *rynen* (pret. *rainde*, *reinde*, *rinde*; sometimes strong, *ron*, *roon*), < AS. *regnan*, rarely *regnian*, usually contracted *rēnan*, *rēnian* (pret. *rinde*; rarely strong, *rān*), = D. *regenen* = MLG. *regenen* = OHG. *reganōn*, *reganōn*, MHG. *regenen*, G. *regnen* = Icel. *regna*, *rigna* = Sw. *regna* = Dan. *regne* = Goth. *rignjan*, rain; from the noun: see *rain*[1], *n.*] I. *intrans.* 1. To fall in drops through the air, as water: generally used impersonally.

There *it reyneth* not but litylle in that Contree; and for that Cause they have no Watre, but zif it be of that Flood of that Ryvere.
Mandeville, Travels, p. 45.

Evermore so sternliche *it ron*,

Shak., T. N., v. 1. 401.

2. To fall or drop like rain: as, tears *rained* from their eyes.

The Spaniards presented a fatal mark to the Moorish missiles, which *rained* on them with pitiless fury.
Prescott, Ferd. and Isa., ii. 7.

Down *rained* the blows upon the unyielding oak.
William Morris, Earthly Paradise, III. 252.

II. *trans.* To pour or shower down, like rain from the clouds; pour or send down abundantly.

Behold, I will *rain* bread from heaven for you.
Ex. xvi. 4.

Does he *rain* gold, and precious promises,

To rain cats and dogs. See *cat*[1].

rain[2] (rān), *n.* [Origin obscure.] 1. A ridge. *Halliwell.*—2. A furrow. [Prov. Eng. in both senses.]

They reaped the corne that grew in the *raine* to serve that turne, as the corne in the ridge was not readie.
Wynne, History of the Gwedir Family, p. 87. (*Encyc. Dict.*)

rain[3]†, *n.* An obsolete spelling of *rein*[1].

rainball (rān'bâl), *n.* One of the festoons of the mammato-cumulus, or pocky cloud: so called because considered to be a sign of rain. [Prov. Eng.]

rainband (rān'band), *n.* A dark band in the solar spectrum, situated on the red side of the D line, and caused by the absorption of that part of the spectrum by the aqueous vapor of the atmosphere. The intensity of the rainband varies with the amount of vapor in the air, and is thus of some importance as an indication of rain. Direct-vision spectroscopes of moderate dispersion are best adapted for observing it. Pocket instruments of this kind, designed for the purpose, are called *rainband-spectroscopes*.

At every hour, when there is sufficient light, the intensity of the *rainband* is observed and recorded.
Nature, XXXV. 589.

rain-bird (rān'bėrd), *n.* [< ME. *reyne-bryde*; < *rain*[1] + *bird*[1].] A bird supposed to foretell rain by its cries or actions, as the rain-crow. Many birds become noisy or uneasy before rain, the popular belief having thus considerable foundation in fact. (*a*) The green woodpecker, *Gecinus viridis*. Also *rain-fowl*, *rain-pie*. [Eng.] (*b*) The large ground-cuckoo of Jamaica, *Saurothera vetula*; also, a related cuckoo, *Piaya pluvialis*.

rainbow (rān'bō), *n.* [< ME. *reinbowe*, *reinboge*, *renboge*, < AS. *regn-boga*, *rēnboga* (= OFries. *reinboga* = D. *regenboog* = MLG. *regenboge*, *regensboge* (cf. LG. *water-boog*) = OHG. *reganbogo*, MHG. *regenboge*, G. *regenbogen* = Icel. *regnbogi* = Sw. *regnbåge* = Dan. *regnbue*), < *regn*, rain, + *boga*, bow: see *rain*[1] and *bow*[3], *n.*] 1. A bow, or an arc of a circle, consisting of the prismatic colors, formed by the refraction and reflection of rays of light from drops of rain or vapor, appearing in the part of the heavens opposite to the sun. When large and strongly illuminated, the rainbow presents the appearance of two concentric arches, the inner being called the *primary* and the outer the *secondary* rainbow. Each is formed of the colors of the solar spectrum, but the colors are arranged in reversed order, the red forming the exterior ring of the primary bow and the interior of the secondary. The primary bow is formed by rays of the sun that enter the upper part of falling drops of rain, and undergo two refractions and one reflection; the secondary, by rays that enter the under part of rain-drops, and undergo two refractions and two reflections. Hence, the colors of the secondary bow are fainter than those of the primary. The rainbow is regarded as a symbol of divine beneficence toward man, from its being made the token of the covenant that the earth should never again be destroyed by a flood (Gen. ix. 13–17). Smaller bows, sometimes circular and very brilliant, are often seen through masses of mist or spray, as from a waterfall or from waves about a ship. (See *fog-bow*.) The moon sometimes forms a bow or arch of light, more faint than that formed by the sun, and called a *lunar rainbow*.

Sylvester, tr. of Du Bartas's Weeks, i. 2.

Intersecting *rainbows* are not uncommon. They require, of course, for their production, two sources of parallel rays; and they are seen when, behind the spectator, there is a large sheet of calm water. *Tait*, Light, § 165.

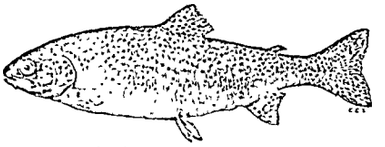
2. In *her.*, the representation of a half-ring divided into seven concentric narrow rings and arched upward, each end resting on a clump of clouds. To avoid the difficulty of finding seven different tinctures, the number of concentric rings is sometimes diminished to three, usually *azure*, *or*, and *gules*—that is, blue, gold, and red.

3. In *ornith.*, a humming-bird of the genus *Diphlogena*, containing two most brilliantly plumaged species, *D. iris* of Bolivia, and *D. hesperus* of Ecuador.—4. The rainbow-fish.—**Rainbow style**, a method of calico-printing in which the colors are blended with one another at the edges.—**Spurious or supernumerary rainbow**, a bow always seen in connection with a fine rainbow, lying close inside the violet of the primary bow, or outside that of the secondary one. Its colors are fainter and less pure, as they proceed from the principal bow, and finally merge in the diffused white light of the primary bow, and outside the secondary.

rainbow-agate (rān'bō-ag″āt), *n.* An iridescent variety of agate.

rainbow-darter (rān'bō-där″tėr), *n.* The soldier-fish or blue darter, *Pœcilichthys cæruleus*, of gorgeous and varied colors, about 2½ inches long, found in the waters of the Mississippi basin; as a book-name, any species of this genus.

rainbowed (rān'bōd), *a.* [< *rainbow* + *-ed*[2].] 1. Formed by or like a rainbow.—2. Encircled with a rainbow or halo. *Davies.*



See him stand
Before the altar, like a *rainbowed* saint.
Kingsley, Saint's Tragedy, i. 3.

rainbow-fish (rān'bō-fish), *n.* One of several different fishes of bright or varied coloration. (*a*) The blue darter, *Pœcilichthys cæruleus*. [U. S.] (*b*) A sparoid fish, *Scarus* or *Pseudoscarus quadrispinosus*. [Bermuda.]

rainbow-hued, rainbow-tinted (rān'bō-hūd, -tin″ted), *a.* Having hues or tints like those of a rainbow.

rainbow-quartz (rān'bō-kwârts), *n.* An iridescent variety of quartz.

rainbow-trout (rān'bō-trout), *n.* A variety or subspecies of the Californian *Salmo gairdneri*, specifically called *S. irideus*. It is closely related

Rainbow-trout (*Salmo irideus*).

to the brook-trout of Europe, but not to that of the United States. It has been quite widely distributed by pisciculturists. In the breeding season its colors are resplendent, giving rise to the popular name.

rainbow-worm (rān'bō-wėrm), *n.* A species of tetter, the *herpes iris* of Bateman.

rainbow-wrasse (rān'bō-ras), *n.* A labroid fish, *Coris julis*, the only British species of that genus: so called from its bright and varied colors.

rain-box (rān'boks), *n.* A device in a theater for producing an imitation of the sound of falling rain.

rain-chamber (rān'chām″bėr), *n.* An attachment to a furnace, hearth, or smelting-works in which the fumes of any metal, as lead, are partly or entirely condensed by the aid of water.

rain-chart (rān'chärt), *n.* A chart or map giving information in regard to the fall and distribution of rain in any part or all parts of the world. Also called *rain-map*.

rain-cloud (rān'kloud), *n.* Any cloud from which rain falls: in meteorology called *nimbus*. Two general classes may be distinguished—(*a*) cumulo-nimbus, where rain falls from cumulus clouds, generally in squalls or showers, and (*b*) strato-nimbus, where rain falls from stratus clouds. The name is sometimes especially given, in a more restricted sense, to the ragged, detached masses of cumulus (called by Poey *fracto-cumulus*), or to the low, torn fragments of cloud called *scud*, which are characteristic associates of rain-storms. See cut under *cloud*.

rain-crow (rān'krō), *n.* A tree-cuckoo of the genus *Coccygus*, either *C. americanus* or *C. erythrophthalmus*: so named from its cries, often heard in lowering weather, and supposed to predict rain. [Local, U. S.]

raindeer†, *n.* See *reindeer*.

rain-doctor (rān'dok″tọr), *n.* Same as *rain-maker*.

rain-door (rān'dōr), *n.* In Japanese houses, one of the external sliding doors or panels in a veranda which are closed in stormy weather and at night.

raindrop (rān'drop), *n.* [< ME. *raindrope* (also *reines drope*), < AS. *regndropa* (= D. dim. *regendroppel*, *regendruppel* = OHG. *regentropfo*, MHG. G. *regentropfen* = Sw. *regndroppe* = Dan. *regndraabe*, raindrop), < *regn*, rain, + *dropa*, drop: see *rain*[1] and *drop*, *n.*] A drop of rain.—**Raindrop glaze**, in *ceram.*, a glaze with very slight drop-like bosses, used for porcelain.

rainet, *n.* An obsolete spelling of *reign*.

raines[1]†, *n. pl.* An obsolete spelling of *reins*.

raines[2]†, *n.* [Also *raynes*, *reins*; < *Rennes* (see def.).] A kind of linen or lawn, manufactured at Rennes in France.

She should be apparelled beautifully with pure white silk, or with most fine *raines*.
Bale, Select Works, p. 512. (*Davies.*)

rainfall (rān'fâl), *n.* 1. A falling of rain; a shower.—2. The precipitation of water from clouds; the water, or the amount of water, coming down as rain. The rainfall is measured by means of the pluviometer or rain-gage. The average rainfall of a district includes the snow, if any, reduced to its equivalent in water.—**Rainfall chart**, an isohyetal chart. See *isohyetal*.

rain-fowl (rān'foul), *n.* [< ME. *reyn fowle*; < *rain*[1] + *fowl*[1].] 1. Same as *rain-bird* (*a*). [Eng.]—2. The Australian *Scythrops novæhollandiæ*.

rain-gage (rān'gāj), *n.* An instrument for collecting and measuring the amount of rainfall at a given place. Many forms have been used; their size has been a few square inches or square feet in area, and their material has been sheet-metal, porcelain, wood, or glass. The form adopted by the United States Signal Service consists of three parts—(*a*) a funnel-shaped receiver, having a turned brass rim 8 inches in diameter; (*b*) a collecting tube, made of seamless brass tubing of 2.53 inches inside diameter, making its area one tenth that of the receiving surface; and (*c*) a galvanized iron overflow-cylinder, which in time of snow is used alone as a snow-gage. A cedar measuring-stick is used to measure the depth of water collected in the gage. By reason of the ratio between the area of the collecting tube and that of the receiving surface, the depth of rain is one tenth that measured on the stick. See cut under *pluviometer*.

rain-goose (rān'gös), *n.* The red-throated diver or loon, *Urinator* or *Colymbus septentrionalis*, supposed to foretell rain by its cry. [Local, British.]

rain-hound† (rān'hound), *n.* A variety of the hound. See the quotation.

Mastiffs are often mentioned in the proceedings at the Forest Courts [in England], in company with other breeds which it is not easy now to identify, such as the *rain-hound*, which keeps watch by itself in rainy weather.
The Academy, Feb. 4, 1888, p. 71.

raininess (rā'ni-nes), *n.* [< *rainy* + *-ness*.] The state of being rainy.

rainless (rān'les), *a.* [< *rain*[1] + *-less*.] Without rain: as, a *rainless* region; a *rainless* zone.

rain-maker (rān'mā″kėr), *n.* Among superstitious races, as those of Africa, a sorcerer who pretends to have the power of producing a fall of rain by incantation or supernatural means. Also called *rain-doctor*.

The African chief, with his *rain-makers* and magicians.
The Century, XL. 303.

rain-map (rān'map), *n.* Same as *rain-chart*.

rainment† (rān'ment), *n.* An aphetic form of *arraignment*.

rain-paddock (rān'pad″ọk), *n.* The batrachian *Breviceps gibbosus*, of South Africa, which lives in holes in the ground and comes out in wet weather.

rain-pie (rān'pī), *n.* Same as *rain-bird* (*a*). [Eng.]

rainpour (rān'pōr), *n.* A downpour of rain; a heavy rainfall. [Colloq.]

The red light of flitting lanterns blotched the steady *rainpour*. *Harper's Mag.*, LXXVI. 572.

rain-print (rān'print), *n.* In *geol.*, the print of raindrops in some aqueous rocks, formed when they were in a soft state, such as may be seen on a muddy or sandy sea-beach after a heavy shower. It is possible for the geologist to tell by inspection of the prints from what direction the wind was blowing at the time of their formation.

rain-proof (rān'prōf), *n.* Proof against rain; not admitting the entrance of rain or penetration by it; rain-tight; water-proof in a shower.

Their old temples, . . . which for long have not been *rain-proof*, crumble down. *Carlyle*, Sartor Resartus, ii. 7.

rain-quail (rān'kwāl), *n.* The quail *Coturnix coromandelicus*, of Africa and India, whose migrations are related in some way to rainy seasons.

rain-storm (rān'stôrm), *n.* A storm of rain; a rain.

The fells sweep skyward with a fine breadth, freshened by strong breezes; clouds and sunshine, ragged *rainstorms*, thunder and lightning, chase across them forever.
The Atlantic, LXV. 824.

rain-tight (rān'tīt), *a.* So tight as to exclude rain.

rain-tree (rān'trē), *n.* The genisaro or guango, *Pithecolobium Saman*. It is said to be so called because occasionally in South America, through the agency of cicadas which suck its juices, it sheds moisture to such an extent as to wet the ground. Another explanation is that its foliage shuts up at night, so that the rain and dew are not retained by it. See *genisaro*.

rain-wash (rān'wosh), *n.* See *wash*.

rain-water (rān'wâ″tėr), *n.* [< ME. *reyne water*, *reinwater*, < AS. **regnwæter*, *rēnwæter* (= OHG. *reganwazar*), < *regn*, *rēn*, rain, + *wæter*, water: see *rain*[1] and *water*.] Water that has fallen from the clouds in rain, and has not sunk into the earth.

No one has a right to build his house so as to cause the *rain water* to fall over his neighbour's land, . . . unless he has acquired a right by a grant or prescription.
Bouvier, Law Dict., II. 419.

rainy (rā′ni), *a.* [< late ME. *rayne*, < AS. **regnig*, *rēnig*, rainy, < *regn*, *rēn*, rain: see *rain*[1].] Abounding with or giving out rain; dropping with or as if with rain; showery: as, *rainy* weather; a *rainy* day or season; a *rainy* sky.

A continual dropping in a very *rainy* day. Prov. xxvii. 15.

Both mine eyes were *rainy* like to his. *Shak.*, Tit. And., v. 1. 117.

A rainy day, figuratively, a time of greater need or of clouded fortunes; a possible time of want or misfortune in the future: as, to lay by something for *a rainy day*.

The man whose honest industry just gives him a competence exerts himself that he may have something against *a rainy day* *Everett*, Orations, I. 235.

raioid (rā′oid), *a.* and *n.* [< L. *raia*, ray, + Gr. *εἶδος*, form.] **I.** *a.* Resembling or related to the ray or skate.

II. *n.* A selachian of the family *Raiidæ* or suborder *Raiæ*.

Raioidea (rā-oi′dē-ä), *n. pl.* [NL.: see *raioid*.] A superfamily of rays represented by the family *Raiidæ*.

raip (rāp), *n.* A dialectal form of *rope*.

rair (rār), *v.* and *n.* A dialectal form of *roar*.

rais (rā′is), *n.* Same as *reis*[1].

raisable (rā′za-bl), *a.* [< *rais(e)*[1] + *-able*.] Capable of being raised or produced; that may be lifted up. [Rare.]

They take their sip of coffee at our expense, and celebrate us in song, a chorus is *raisable* at the shortest possible notice, and a chorus is not easily cut off in the middle. *C. W. Stoddard*, Mashallah, xviii.

raise[1] (rāz), *v.*; pret. and pp. *raised*, ppr. *raising*. [Early mod. E. also *rayse*, < ME. *raisen*, *rayseu*, *reisen*, *reysen*, < Icel. *reisa* (= Sw. *resa* = Dan. *reise* = Goth. *raisjan* = AS. *rǣran*, E. *rear*[1]), raise, cause to rise, causal of *risa*, rise, = AS. *risan*, E. *rise*: see *rise*[1]. Cf. *rear*[1], the native (AS.) form of *raise*.] **I.** *trans.* **1.** To lift or bring up bodily in space; move to a higher place; carry or cause to be carried upward or aloft; hoist: as, to *raise* one's hand or head; to *raise* ore from a mine; to *raise* a flag to the masthead.

When the morning sun shall *raise* his car
Above the border of this horizon,
We'll forward towards Warwick. *Shak.*, 3 Hen. VI., iv. 7. 80.

The oxen *raise* the water by a bucket and rope without a wheel, and so by driving them from the well the bucket is drawn up *Pococke*, Description of the East, II. i. 61.

The high octagon summer house you see yonder is *raised* on the mast of a ship, given me by an East-India captain *Colman and Garrick*, Clandestine Marriage, ii.

2. To make upright or erect; cause to stand by lifting; elevate on a base or support; stand or set up: as, to *raise* a mast or pole; to *raise* the frame of a building; to *raise* a fallen man.

He wept tenderly, and *raised* the kynge be the hande. *Merlin* (E. E. T. S.), ii. 334.

The elders of his house arose, and went to him, to *raise* him up from the earth 2 Sam. xii. 17.

3. To elevate in position or upward reach; increase the height of; build up, fill, or embank: make higher: as, to *raise* a building by adding a garret or loft; to *raise* the bed of a road; the flood *raised* the river above its banks. —**4.** To make higher or more elevated in state, condition, estimation, amount, or degree; cause to rise in grade, rank, or value; heighten, exalt, advance, enhance, increase, or intensify; as, to *raise* a man to higher office; to *raise* one's reputation; to *raise* the temperature; to *raise* prices; to *raise* the tariff.

Merrick said only this: The Earl of Essex *raised* me, and he hath overturned me *Baker*, Chronicles, p. 392.

Those who have Carnal Minds may have some *raised* and spiritual Thoughts, but they are too cold and speculative *Stillingfleet*, Sermons, III. viii.

I was both weary and hungry, and I think my appetite was *raised* by seeing so much food *Dampier*, Voyages, II. i. 93.

The duty [on salt] was *raised* by North, in the war of American Independence, to 5*s.* the bushel *S. Dowell*, Taxes in England, IV. 4.

Steam greens after printing are frequently brightened or *raised* as it is technically called by passing through a weak bath of bichrome *W. Crookes*, Dyeing and Calico-printing, p. 407.

5. To estimate as of importance; cry up; hence, to applaud; extol.

Like Cato, give his little Senate laws
And sit attentive to his own applause;
While wits and templars every sentence *raise*,
And wonder with a foolish face of praise.
Pope, Epistle to Dr. Arbuthnot, l. 211.

6. To form as a piled-up mass, or by upward accretion; erect above a base or foundation; build or heap up: as, to *raise* a cathedral, a monument, or a mound; an island in the sea *raised* by volcanic action.

I will *raise* forts against thee. Isa. xxix. 3.

All these great structures were doubtless *raised* under the bishops of Damascus, when Christianity was the established religion here. *Pococke*, Description of the East, II. i. 121.

7. To lift off or away; remove by or as if by lifting; take off, as something put on or imposed: as, to *raise* a blockade.

Once already have you prisoned me,
To my great charge, almost my overthrow,
And somewhat *raisde* the debt by that advantage.
Heywood, Fair Maid of the Exchange (Works, ed. Pearson, [1874, II. 28).

The Sorbonne *raised* the prohibition it had so long laid upon the works of the Grecian philosopher [Aristotle]. *Mind*, XII. 257.

8. To cause to rise in sound; lift up the voice in; especially, to utter in high or loud tones.

When I *raised* the psalm, how did my voice quaver for fear! *Swift*, Mem. of P. P.

In sounds now lowly, and now strong,
To *raise* the desultory song. *Scott*, Marmion, Int., iii.

They both, as with one accord, *raised* a dismal cry. *Dickens*, Haunted Man.

9. To cause to rise in air or water; cause to move in an upward direction: as, to *raise* a kite; to *raise* a wreck.

The dust
Should have ascended to the roof of heaven,
Raised by your populous troops. *Shak.*, A. and C., iii. 6. 50.

10. To cause to rise from an inert or lifeless condition; specifically, to cause to rise from death or the grave; reanimate: as, to *raise* the dead.

Also in ye myddes of that chapell is a rounde marble stone, where the very hooly crosse was prouyd by *reusinge* of a deed woman, whanne they were in doubte whiche it was of the thre. *Sir R. Guylforde*, Pylgrymage, p. 25.

We have testified of God that he *raised* up Christ: whom he *raised* not up, if so be that the dead rise not. 1 Cor. xv. 15.

Thou must restore him flesh again and life,
And *raise* his dry bones to revenge this scandal.
Beau. and Fl., Maid's Tragedy, iv. 1.

11. To cause to rise above the visible horizon, or to the level of observation; bring into view; sight, as by approach: chiefly a nautical use: as, to *raise* the land by sailing toward it.

To *reysen up* a rente
That longeth to my lordes duetee
Chaucer, Friar's Tale, l. 99.

=Syn. 1 and 2. *Raise, Lift, Erect, Elevate, Exalt, Heighten, Rear, Hoist.* *Raise* is the most general and the most freely figurative of these words, and in its various uses represents all the rest, and also many others, as shown in the definitions. *Lift* is peculiar in implying the exercise of physical or mechanical force, moving the object generally a comparatively short distance upward, but breaking completely its physical contact with the place where it was. To *lift* a ladder is to take it wholly off the ground, if only an inch; to *raise* a ladder, we may *lift* one end and carry it up till it is supported in some way. To *lift* one's hat or arm is a more definite and energetic act than to *raise* it. We *lift* a child over a place; we *raise* one that has fallen. To *erect* is to set up perpendicularly, as, to *erect* a flagstaff. To *elevate* is to raise relatively, generally by an amount not large; the word is often no more than a dignified synonym for *raise*. To *exalt* is to raise to dignity; the word is thus used in a physical sense in Isa. xl. 4, "Every valley shall be *exalted*," and elsewhere in the Bible; but the figurative or moral sense has now become the principal one, so that the other seems antique. To *heighten* is to increase in height, either physically or morally: he whom we esteem already is *heightened* in our esteem by an especially honorable act. To *heave* is to raise slowly and with effort, and sometimes to throw in like fashion. To *hoist* is to raise a thing of some weight with some degree of slowness or effort, generally with mechanical help, to a place: as, to *hoist* a rock, or a flag.—**14.** *Rear, bring up, raise.* To *rear* offspring through their tenderer years till they can take care of themselves; to *bring up* a child in the way he should go; to *raise* oats and other products of the soil; to *raise* horses and cattle. Where were you *brought up*? not, where were you *raised*? The use of *raise* in application to persons is a vulgarism. *Rear* applies only to physical care; *bring up* applies more to training or education in mind and manners.

II. *intrans.* To bring up phlegm, bile, or blood from the throat, lungs, or stomach. [Colloq.]

raise[1] (rāz), *n.* [< *raise*[1], *v.*] **1.** Something raised, elevated, or built up; an ascent; a rise; a pile; a cairn. [Prov. Eng.]

There are yet some considerable remains of stones which still go by the name of *raises*.
Hutchinson, Hist. Cumberland. (*Halliwell.*)

That exquisite drive through Ambleside, and . . . up Dunmail *Raise* by the little Wythburn church.
Congregationalist, July 14, 1887.

2. A raising or lifting; removal by lifting or taking away, as of obstructions. [Colloq.]

No further difficulty is anticipated in making permanent the *raise* of the freight blockade in this city [St. Louis].
Philadelphia Times, April 6, 1880.

3. A raising or enlarging in amount; an increase or advance: as, a *raise* of wages; a *raise* of the stakes in gaming. [Colloq.]—**4.** An acquisition; a getting or procuring by special effort, as of money or chattels: as, to make a *raise* of a hundred dollars. [Colloq.]

raise[2] (rāz). A dialectal (Scotch) preterit of *rise*.

raiser (rā′zėr), *n.* [< *raise*[1] + *-er*[1].] **1.** A person who raises or is occupied in raising anything, as buildings, plants, animals, etc.

A *raiser* of huge melons and of pine.
Tennyson, Princess, Conclusion.

The head of the Victor Verdier type [of roses] originated with the greatest of all the *raisers*, Lacharme, of Lyons.
The Century, XXVI. 351.

2. That which raises; a device of any kind used for raising, lifting, or elevating anything: as, a water-*raiser*. Specifically—(*a*) In *carp.*, same as *riser*. (*b*) In a vehicle, a support or stay of wood or metal under the front seat, or some material placed under the trimmings to give them greater thickness. (*c*) In *whale-fishing*, a contrivance for raising or buoying up a dead whale.

raisin (rā′zn), *n.* [< ME. *raisin, reisin, reysyn, reysone, reysynge*, a cluster of grapes, also a dried grape, raisin, = D. *razijn, rozijn* = MLG. *rosin* = MHG. *rasin, rosine*, G. *rosine* = Dan. *rosin* = Sw. *russin* (ML. *rosina*), raisin; < OF. *raisin, reisin*, a cluster of grapes, a grape, a dried grape (*raisins de cabas*, dried grapes, raisins), F. *raisin*, dial. *rusin, roisin, rosin*, grapes (*un gram de raisin*, a grape; *raisins de caisse*, raisins), = Pr. *razim, rozim, ruzam* = Cat. *rahim* = Sp. *racimo* = Pg. *racimo* = It. *racemo* (dim. *racimolo*), a cluster of grapes, < L. *racemus*, a cluster of grapes: see *raceme*, a doublet of *raisin*.] **1**†. A cluster of grapes; also, a grape.

Nether in the vyneyerd thou schalt gadere *reysyns* and greynes fallynge doun, but thou schalt leeve to be gaderid of pore men and pilgrymes.
Wyclif, Lev. xix. 10. (*Trench.*)

2. A dried grape of the common Old World species, *Vitis vinifera*. Only certain saccharine varieties of the grape, however, thriving in special localities, are available for raisins. The larger part of ordinary large raisins are produced on a narrow tract in Mediterranean Spain. These are all sometimes classed as *Malaga raisins*, but this name belongs more properly to the "dessert-raisins" grown about Malaga: they are also called *muscatels* from the variety of grape, *bloom* from retaining a glaucous surface, and, in part at least, *raisins of the sun* or *sun-raisins* because dried on the vine, the leaves being removed, and sometimes the cluster-stem half-severed. When packed between sheets of paper, these are known as *layer raisins*. Raisins suitable for cookery, or "pudding-raisins," sometimes called *lexias*, are produced especially at Valencia. These are cured, after cutting from the vine, in the sun, or in bad weather in heated chambers, the quality in the latter case being inferior. The clusters are often dipped in potash lye to soften the skin, favor drying, and impart a gloss. Excluding the "Corinthian raisin" (see below), the next most important source of raisins is the vicinity of Smyrna, including Chesme, near Chios. Here are produced nearly all the sultanas, small seedless raisins with a golden-yellow delicate skin and sweet aromatic flavor. Raisins are also a product of Persia, of Greece Italy, and southern France, of the Cape of Good Hope, Australia, and California. No variety of native American grape has yet been developed suitable for the preparation of raisins. See *raisin-wine*.

Then Abigail made haste, and took . . . an hundred clusters of *raisins*. 1 Sam. xxv. 18.

I must have saffron to colour the warden pies; . . . four pounds of prunes, and as many of *raisins* o' the sun.
Shak., W. T., iv. 3. 51.

Black Smyrna raisin, a small black variety of raisin with large seeds.—**Corinthian raisin,** the currant, or Zante currant, the dried fruit of the variety *Corinthiaca* of the grape. The cluster is about three inches long, and the berry is not larger than a pea. It is produced in very large quantities in the Morea and the neighboring islands, and is consumed in baking and cookery.—**Eleme raisin,** a Smyrna raisin of good size and quality, hand-picked from the stem, used chiefly for ships' stores or sent to distant markets.

raising (rā′zing), *n.* [< ME. *reysynge;* verbal n. of *raise*[1], *v.*] **1.** The act of lifting, elevating, etc. (in any sense of the verb). Specifically—(*a*) An occasion on which the frame of a new building, the pieces of which have been previously prepared, but require many hands to put into place, is raised with the help of neighbors. See *house-raising* and *raising-bee*. [Rural, U. S.] (*b*) In *metal-work*, the embossing or ornamentation of sheet-metal by hammering spinning, or stamping. (*c*) A method of treating hides with acids to cause them to swell and to open the pores in order to hasten the process of tanning. (*d*) In *dyeing*, the process or method of intensifying colors.

2. Same as *raising-piece*.

Franke-posts, *raisins*, beames . . . and such principals.
W. Harrison, Descrip. of England, ii. 12.

3. That with which bread is raised; yeast or yeast-cake; leaven. *Gayton*, Festivous Notes on Don Quixote (cited by Lowell, Biglow Papers, 2d ser., Int.). [Old or prov. Eng. and U. S.]—**4.** In *printing*, the overlays in a press for woodcut-printing.

raising-bee (rā′zing-bē), *n.* A gathering of neighbors to help in putting together and raising the framework of a new building. Such gatherings are nearly obsolete. Compare *husking-bee, quilting-bee*. [U. S.]

Raising-bees . . . were frequent, where houses sprung up at the wagging of the fiddle-sticks, as the walls of Thebes sprang up of yore to the sound of the lyre of Amphion.
Irving, Knickerbocker, p. 405.

raising-board (rā′zing-bōrd), *n.* In *leather-manuf.*, a corrugated board used to rub the surface of tanned leather to raise the grain; a crippler. *E. H. Knight.*

raising-gig (rā′zing-gig), *n.* In *cloth-manuf.*, a machine for raising a nap on cloth; a gig-machine. *E. H. Knight.*

raising-hammer (rā′zing-ham″ėr), *n.* A hammer with a long head and a rounded face, used by silversmiths and coppersmiths to form a sheet of metal into a cup or bowl shape.

raising-knife (rā′zing-nīf), *n.* A coopers' knife used to set up staves in form for a cask.

raising-piece (rā′zing-pēs), *n.* In *carp.*, a piece of timber laid on a brick wall, or on the top of the posts or puncheons of a timber-framed house, to carry a beam or beams; a templet.

raising-plate (rā′zing-plāt), *n.* In *carp.*, a horizontal timber resting on a wall, or upon vertical timbers of a frame, and supporting the heels of rafters or other framework; a wall-plate.

raisin-tree (rā′zn-trē), *n.* The common currant-shrub, *Ribes rubrum*, the fruit of which is often confounded with the Corinthian raisin, or currant. [Prov. Eng.]—**Japanese raisin-tree,** a small rhamnaceous tree, *Hovenia dulcis*. The peduncle of its fruit is edible.

raisin-wine (rā′zn-wīn), *n.* Wine manufactured from dried grapes. Malaga wine is mostly of this kind, and the Tokay of Hungary is made from partly dried fruit. Raisin-wine was known to the ancients.

raison d'être (rā-zôṅ′ dā′tr). [F.: *raison*, reason; *d'* for *de*, of, for; *être*, being, < *étre*, be.] Reason or excuse for being; rational cause or ground for existence.

raisonné (rā-zo-nā′), *a.* [< F. *raisonné*, pp. of *raisonner*, reason, prove or support by reasoning, arguments, etc.: see *reason*[1], *v.*] Reasoned out; systematic; logical: occurring in English use chiefly in the phrase *catalogue raisonné* (which see, under *catalogue*).

raivel (rāvl), *n.* A Scotch form of *ravel*[1], 3.

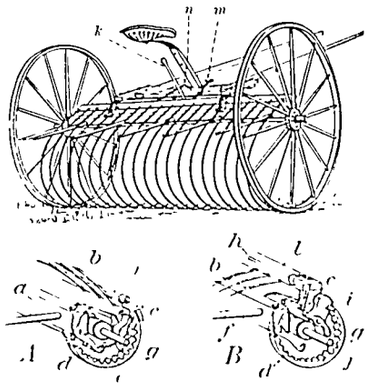
raj (rūj), *n.* [Hind. *rāj*, rule, < Skt. √ *rāj*, rule. Cf. *raja*[2].] Rule; dominion. [India.]

But Delhi had fallen when these gentlemen threw their strength into the tide of revolt, and they were too late for a decisive superiority over the British *rāj*.
Capt. M. Thomson, Story of Cawnpore, xvi.

Raja[1], *n.* Same as *Rait*.

raja[2], **rajah** (rä′jä), *n.* [Hind. *rāja*, < Skt. *rāja*, the form in comp. of *rājan*, a king, as in *mahā-rāja*, great king; akin to L. *rex*, king (see *rex*); < √ *rāj*, rule: see *regent*.] In India, a prince of Hindu race ruling a territory, either independently or as a feudatory; a king; a chief: used also as a title of distinction for Hindus in some cases, without reference to sovereignty, as *nabob* is for Mohammedans. The power of nearly all the rajas is now subordinate to that of British officials resident at their courts. Those who retain some degree of actual sovereignty are commonly distinguished by the title *maharaja* (great raja).

Rajania (rā-jā′ni-ä), *n.* [NL. (Linnæus, 1737), an adapted form of *Jan-Raja* (Plumier, 1703), so called after John *Ray* (Latinized *Rajus*), 1628–1705, a celebrated English naturalist, founder of a natural system of classification.] A genus of monocotyledonous plants of the order *Dioscoraceæ*, the yam family. It is characterized by dioecious bell-shaped or flattened six-lobed flowers, with six stamens and a three-celled ovary, ripening into a flattened broad winged and one-celled samara. The 6 species are all natives of the West Indies. They are twining vines resembling the yam, and bear alternate leaves, either halberd- or heart-shaped or linear, and small flowers in racemes. Several species are occasionally cultivated under glass. *R. pleioneura*, common in woods of the larger West Indies, is there called *wild yam* and *waw-waw*.



rajaship, rajahship (rä′jä-ship), *n.* [< *raja*[2] + *-ship*.] The dignity or principality of a raja.

Rajidæ, *n. pl.* Same as *Raiidæ*.

Rajput, Rajpoot (raj-pöt′), *n.* [< Hind. *rajpūt*, a prince, son of a raja, < Skt. *rājaputra*, a king's son, a prince, < *rājan*, a king, + *putra*, son.] A member of a Hindu race, divided into numerous clans, who regard themselves as descendants of the ancient Kshatriya or warrior caste. They are the ruling (though not the most numerous) race of the great region named from them Rajputana, consisting of several different states. Their hereditary profession is that of arms, and no race in India has furnished so large a number of princely families. The Rajputs are not strict adherents of Brahmanism.

rake[1] (rāk), *n.* [< ME. *rake*, < AS. *raca, racu, ræce* = MD. *rake, raecke*, D. *rake*, dim. *rakel* = MLG. *rake*, LG. *rake*, a rake, = Sw. *raka*, an oven-rake, = Dan. *rage*, a poker; in another form, MD. *reke*, D. *reek* = LG. *reek* = OHG. *recho, rehho*, MHG. *reche*, G. *rechen*, a rake, = Icel. *reka*, a shovel; from the verb represented by MD. *reken*, OHG. *rechan, rehhan*, MHG. *rechen*, scrape together, = Goth. *rikan* (pret. *rak*), collect, heap up (cf. *rake*[1], *v.*, which depends on the noun).] **1.** An implement of wood or iron, or partly of both, with teeth or tines for drawing

or scraping things together, evening a surface of loose materials, etc. In its simplest form, for use by hand, it consists of a bar in which the teeth are set, and which is fixed firmly at right angles to a handle. Rakes are made in many ways for a great variety of purposes, and the

teeth are inserted either perpendicularly or at a greater or less inclination, according to requirement. Their most prominent uses are in agriculture and gardening for drawing together hay or grain in the field, leveling beds, etc. For farm work on a large scale horse-rakes of many forms are used, the above figures representing the so-called *sulky rake*.

2. An instrument of similar form and use with a blade instead of teeth, either entire, as a gamblers' or a maltsters' rake, or notched so as to form teeth, as a furriers' rake. See the quotations.

The *rake* (for malt) . . . is an iron blade about 20 inches long and perhaps 2 inches broad fixed at each end by hobbers to a massive wood head to which is attached a strong wood shaft, with a cross-head handle.
Ure, Dict., III. 188.

The skin is first carded with a *rake*, which is the blade of an old shear or piece of saw, the with large teeth notched into its edge. *Ure*, Dict., IV. 50.

Clam-rake, an instrument used for collecting the bivalves, *Mactra* or *Isocama*. — **Under-rake**, a kind of oyster-rake used mostly through holes in the ice, with handle 15 to 20 feet long, head 4 to 5 feet wide, and from teeth 6 to 10 inches long. [Rhode Island.]

rake[1] (rāk), *v.*; pret. and pp. *raked*, ppr. *raking*. [< ME. *raken*, scrape, < AS. **racian* = MD. *raken* = MLG. *raken* = Icel. Sw. *raka* = Dan. *rage*, rake; from the noun: see *rake*[1], *n.* Cf. MD. *reken*, OHG. *rechan*, *rehhan*, MHG. *rechen*, scrape together, G. *rechen*, rake, Goth. *rikan* (pret. *rakja*), collect, heap up: see *ralel*, *n.*] I. *trans.* 1. To gather, clear, smooth, or stir with or as if with a rake; treat with a rake, or something that serves the same purpose: as, to *rake* up hay; to *rake* a bed in a garden; to *rake* the fire with a poker or raker.

They *rake* these coales round in the forme of a cockpit, and in the midst they cast the offenders to broyle to death.
Capt. John Smith, Works, I. 111.

Rake well the cinders, sweep the floor
And sift the dust behind the door.
Cowper, Epistle to Robert Lloyd.

2. To collect as if by the use of a rake; gather assiduously or laboriously; draw or scrape together, up, or in.

All was *rak'd* up for me your thankful brother,
That will dance mertily upon your grave.
Fletcher, Spanish Curate, I. 1.

Who had hence *raked* some objections against the Christians, for these things which had not authority of Scripture. *Purchas*, Pilgrimage, p. 68.

Times when chimney-corners had benches in them where old people sat poking into the ashes of the past, and *raking* out traditions like live coals.
Hawthorne, Seven Gables, xviii.

3. To make minute search in, as if with a rake; look over or through carefully; ransack: as, to *rake* all history for examples.

The statesman *rakes* the town to find a plot.
Swift, On Dreams.

4. To pass along with or as if with a scraping motion; impinge lightly upon in moving; hence, to pass over swiftly; scour.

Thy thunders roaring *rake* the skies,
Thy fatal lightning swiftly flies.
Sandys, Paraphrase of Ps. lxxvii.

Every mast, as it passed,
Seemed to *rake* the passing clouds.
Longfellow, Sir Humphrey Gilbert.

5. *Milit.*, to fire upon, as a ship, so that the shot will pass lengthwise along the deck; fire in the direction of the length of, as a file of soldiers or a parapet; enfilade.

They made divers shot through her (being but inch board), and so *raked* her fore and aft as they must needs kill or hurt some of the Indians.
Winthrop, Hist. New England, I. 226.

Raking a ship is the act of cannonading a ship on the stern or head, so as that the balls shall scour the whole length of her decks; which is one of the most dangerous incidents that can happen in a naval action.
Falconer, Marine Dict. (ed. 1778).

†6. To cover with earth raked together; bury. See *to rake up*, below.

Whanne thi soule is went out, & thi bodi in erthe *rakid*,
Than thi bodi that was rank & vndeuout, Of alle men is blihtid. *Hymns to Virgin*, etc. (E. E. T. S.), p. 89.

To rake hell, to search, as it were, among the damned, implying that the person or thing referred to in the context is so bad or so extreme that an equal could scarcely be found even in hell.

This man I brought to the general, assuring his excellency that if I had *raked hell* I could not find his match for his skill in mimicking the covenanters.
Swift, Mem. of Capt. Creichton.

To rake up. (*a*) To cover with material raked or scraped together; bury by overlaying with loose matter: as, to *rake up* a fire (to cover it with ashes, as in a fireplace).

Here, in the sands,
Thee (a corpse) I'll *rake up*, the post unsanctified
Of murderous lechers. *Shak.*, Lear, iv. 6. 281.

The Bellowes wh nce they blowe the fire
Of raging Lust (be fore) whose wanton flashes
A tender brest *rak'd up* in shamefac't ashes.
Sylvester, tr. of Du Bartas's Weeks, I. 2.

(*b*) To draw from oblivion or obscurity, as something forgotten or abandoned; bring to renewed attention; resuscitate; revive: used in a more or less opprobrious sense: as, to *rake up* a forgotten quarrel.

Nobody thinks any more of the late King than if he had been dead fifty years, unless it be to abuse him and to *rake up* all his vices and misdeeds.
Greville, Memoirs, July 16, 1830.

To *rake up* old claims based on a forgotten state of things, after treaty or long use had buried them, is profligate.
Wheaton, Introd. to Inter. Law, App. iii., p. 775.

II. *intrans.* 1. To use a rake; work with a rake, especially in drawing together hay or grain.—2. To make search with or as if with a rake; seek diligently for something; pry; peer here and there.

Those who take pleasure to be all their life time *raking* in the foundations of Old Abbies and Cathedrals.
Milton, Hist. Eng., iv.

But what pleasure is it to *rake* into the sores or to reprove the vices of a degenerate age?
Stillingfleet, Sermons, II. iii.

rake[2]† (rāk), *n.* [< ME. *rake* (also *raike*), < AS. *racu*, a path (= *ea-racu*, a river-path), from the root of *racan*[1]: see *reck*[2]. Cf. *rake*[2], *v.*] A course, way, road, or path.

Eydes one a rawsbame, and his *rayke* holdes.
Morte Arthure (E. E. T. S.), l. 2386.

Out of the rake of it; twynes renne suld he neuire.
Kyng Alexander, p. 115.

rake[2] (rāk), *v.*; pret. and pp. *raked*, ppr. *raking*. [Early mod. E. (Sc.) also *rauk*; < ME. *raken*, < AS. *racian*, run, take a course, = Sw. *raka*, run hastily; mixed with ME. *raken*, *rayken*, *reyken*, < Icel. *reka*, wander: see *reak*[2], *n.*] 1. To take a course; move; go; proceed. [Obsolete or prov. Eng. and Scotch.]

Then Paris apon hyt the Perclans hym with,
Rydit on the right syde *rakit* he forth,
And bownit into battell with a brym will.
Destruction of Troy (E. E. T. S.), l. 6704.

Now pass we to the bold beggar
That *raked* over the hill.
Robin Hood and the Beggar (Child's Ballads, V. 196).

2. In *hunting*: (*a*) Of a hawk, to range wildly; fly wide of the game.

Their talk was all of training, terms of art,
Dict and reclaiming jesses, lesh and lure.
"She is too noble," he said, "to check at pies,
Nor will she *rake*; there is no baseness in her."
Tennyson, Merlin and Vivien.

(*b*) Of a dog, to follow a wrong course. See the quotation.

All young dogs are apt to *rake*: that is, to hunt with their noses close to the ground, following their birds by the track rather than by the wind.
Sportsman's Gazetteer, p. 466.

To rake about, to gad or wander about. [Scotch.]

rake[3] (rāk), *v.*; pret. and pp. *raked*, ppr. *raking*. [< OSw. *raka*, project, reach (*raka fram*, reach over, project), = Dan. *rage*, project, protrude, jut out; allied to AS. *reccan*, stretch: see *rack*[1], *retch*[1].] I. *intrans.* To incline from the perpendicular or the horizontal, as the mast, stem, or stern of a ship, the rafters of a roof, the end of a tool, etc. See the noun.

The stern, when viewed in the sheer plan, *rakes* aft, the bounding line being straight, and making an obtuse angle with the line forming the boundary of the buttock.
Thearle, Naval Arch., § 107.

II. *trans.* To give a rake to; cause to incline or slope. [Rare.]

Every face in it [the theater] commanding the stage, and the whole so admirably *raked* and turned to that centre that a hand can scarcely move in the great assemblage without the movement being seen from thence.
Dickens, Uncommercial Traveller, Journey iii.

rake[3] (rāk), *n.* [< *rake*[3], *v.*] 1. Inclination or slope away from a perpendicular or a horizontal line. The rake of a ship's mast is its inclination backward, or rarely (in some peculiar rigs) forward; that of its stem or its stern (the fore rake and the rake aft of the ship) is the slope inward from the upper works to the keel: also called *hang*. (See cut under *patamar*.) The rake of a roof is its pitch or slope from the ridge to the eaves. The rake of a saw-tooth is the angle of inclination which a straight line drawn through the middle of the base of the tooth and its point forms with a radius also drawn through the middle of the base of the tooth; of a cutting-tool, the slope backward and downward from the edge on either side or both sides. Rake in a grinding-mill is a sloping or want of balance of the runner, producing undue pressure at one edge.

2. In *coal-mining*, a series of thin layers of ironstone lying so near each other that they can all be worked together. [Derbyshire, Eng.]

rake[4] (rāk), *n.* [Abbr. of *rakehell*, ult. of *rakel*.] An idle, dissolute person; one who goes about in search of vicious pleasure; a libertine; an idle person of fashion.

We have now and then *rakes* in the habit of Roman senators, and grave politicians in the dress of *rakes*.
Steele, Spectator, No. 14.

I am in a fair Way to be easy, were it not for a Club of Female *Rakes* who, under pretence of taking their innocent rambles, forsooth, and diverting the Spleen, seldom fail to plague me twice or thrice a day to Cheapen Tea, or buy a Skreen. . . . These *Rakes* are your idle Ladies of Fashion, who, having nothing to do, employ themselves in tumbling over my Ware. *Steele*, Spectator, No. 356.

These *Rakes* are your idle Ladies of Fashion, who, having nothing to do, employ themselves in tumbling over my Ware. *Steele*, Spectator, No. 356.

rake[4] (rāk), *v. i.*; pret. and pp. *raked*, ppr. *raking*. [< *rake*[4], *n.*] To play the part of a rake; lead a dissolute, debauched life; practise lewdness.

'Tis his own fault, that will *rake* and drink when he is but just crawled out of his grave.
Swift, Journal to Stella, xx.

Women hid their necks, and veil'd their faces,
Nor romp'd, nor *rak'd*, nor star'd at public places.
Shenstone, Epil. to Dodsley's Cleone.

rake-dredge (rāk'drej), *n.* A combined rake and dredge used for collecting specimens in natural history. It is a heavy A-shaped iron frame, to the arms of which bars of iron armed with long, thin, sharp teeth, arranged like those of a rake, are bolted back to back. A rectangular frame of round iron, supporting a deep and fine dredge net, is placed behind the rake, to receive and retain the animals raked from the mud or sand.

rakee, *n.* See *raki*.

rake-head (rāk'hed), *n.* In *her.*, a bearing representing the head of a rake, or, more usually, four or five hooks or curved teeth inserted in a short rod.

rakehell (rāk'hel), *a.* and *n.* [A corruption of *rakel*, simulating *rake*[1], *v.*, + obj. *hell*, as if one so bad as to be found only by raking hell, or one so reckless as to rake hell (in double allusion to the "harrowing of hell": see *harrow*[2] and *harrow*[1]): see *rakel*, and cf. *to rake hell*, under *rake*[1], *v.*] I. *a.* Dissolute; base; profligate.

And farre away, amidd their *rakehell* bands,
They spide a Lady left all succourlesse.
Spenser, F. Q., V. xi. 44.

II. *n.* An abandoned fellow; a wicked wretch; especially, a dissolute fellow; a rake.

I thought it good, necessary, and my bounden duty to acquaint your goodnesswith the abominable, wicked, and detestable behaviour of all these rowsey, ragged rabblement of *rake-hells*, that under the pretence of great misery, diseases, and other innumerable calamities, which they feign through great hypocrisy, do win and gain great alms in all places where they wily wander, to the utter deluding of the good givers.
Harman, Caveat for Cursetors, p. ii.

A sort of lewd *rake-hells*, that care neither for God nor the devil. *B. Jonson*, Every Man in his Humour, iv. 1.

A *rakehell* of the town, whose character is set off with no other accomplishment but excessive prodigality, profaneness, intemperance, and lust, is rewarded with a lady of great fortune to repair his own, which his vices had almost ruined. *Swift*, Against Abolishing Christianity.

rakehellonian† (rāk-he-lō'ni-an), *n.* [< *rakehell* + *-onian*, as in *Babylonian*, etc.] A wild, dissolute fellow; a rakehell. [Rare.]

I have been a man of the town, or rather a man of wit, and have been confess'd a beau, and admitted into the family of the *rakehellonians*.
Tom Brown, Works, II. 313. (*Davies.*)

rakehelly (rāk'hel-i), *a.* [< *rakehell* + *-y*[1]. Cf. *rakely*.] Like or characteristic of a rakehell.

Hakluyt's Voyages, II. 134.

Finding that he could do no good by *ramming* with logs of timber, he set one of the gates on fire.
Bacon, Hist. Hen. VII.

With all the watchfulness and all the skill in the world, it would be futile to attempt to pass through the real ice-pack without a ship built for *ramming*.
Schley and Soley, Rescue of Greely, p. 160.

ram[3] (ram), *a.* [< Icel. *ramr*, strong (*ramliga*, strongly), = Sw. *ram*, strong, perfect, mere (*en ram bonde*, 'a perfect boor'), = Dan. *ram*, sharp, acrid, rank, mere (*ram jydsk*, 'pure Jutish').] 1. Strong; as a prefix, very: used as a prefix in *ramshackle*, *rambustious*, etc.—2. Strong-scented; stinking: as, *ram* as a fox. *Latham.*

Ramadan, Ramadhan (ram-a-dan'), *n.* [Also *Ramazan*, *Ramadzan*, and *Khamazan*; = F. *ramazan*, *ramadan* = Sp. *ramadan* = Pg. *ramadan*, *romadão* = Turk. Pers. *ramazān*, < Ar. *ramadān*, the name of the 9th month of the Moslem year, < *ramad* (*ramad*), be heated or hot.] The ninth month of the Mohammedan year, and the period of the annual thirty days' fast or Mohammedan Lent, rigidly observed daily from dawn until sunset, when all restrictions are removed. The lunar reckoning of the Mohammedan calendar brings its recurrence about eleven days earlier each year, so that it passes through all the seasons successively in a cycle of about thirty-three years; but it is supposed that when it was named it was regularly one of the hot months, through lunisolar reckoning. The close of the fast is followed by the three days' feast called the *Lesser Bairam*.

ramage[1]† (ram'āj), *a.* and *n.* [I. *a.* < ME. *ramage*, < OF. *ramage*, of or belonging to branches, wild, rude, < LL. **ramaticus*, of branches, < *ramus*, a branch: see *ramus*. Ramalina (ram-a-lī'nä), *n.* [NL. (Acharius), < L. *ramale*, twigs, shoots, < *ramus*, a branch: see *ramus*.] A genus of crustaceous lichens of the tribe *Parmeliacei* and family *Usnei*. The thallus is fruticulose or finally pendulous, mostly compressed or at length subfoliaceous; the apothecia are scutelliform; the spores are ellipsoid or oblong, bilocular, and colorless. *R. scopulorum* furnishes a dye comparable with archil.

ramasst (ra-mas'), *v. t.* [< F. *ramasser*, bring together, gather, < *re-*, again, + *amasser*, heap up: see *amass*.] To bring together; gather up; unite.

And when they have *ramast* many of several kindes and tastes, according to the appetite of those they treat, they open one vessel, and then another.
Conical Hist. of the World in the Moon (1659). (*Halliwell.*)

ramastrum† (ra-mas'trum), *n.*; pl. *ramastra* (-trä). [NL., < L. *ramus*, a branch, + dim. *-aster*.] In *bot.*, one of the secondary petioles, or petiolules, of compound leaves. *Lindley.*

Ramayana (rä-mä'ya-nä), *n.* [Skt. *Rāmāyana*, < *Rama* (see def.) + *ayana*, a going, course, progress, expedition, < *i*, go: see *go*.] The name of one of the two great epic poems of ancient India, the other being the Mahabharata. It gives the history of Rama, especially of his expedition through the Deccan to Ceylon, to recover, by the aid of the monkey-god Hanuman, his wife Sita, carried away thither by Ravana.

rambade (ram'bād), *n.* [< F. *rambade*, "the bend or wale of a gally" (Cotgrave), also *rambate*; cf. Pg. *ar-rombada*, a platform of a galley.] *Naut.*, the elevated platform built across the prow of a galley for boarding, etc.

rambeh (ram'be), *n.* [Said to be connected with Malay *rambūtan*, < *rambut*, hair: see *rambutan*.] The fruit of a middle-sized tree, *Baccaurea sapida*, of the *Euphorbiaceæ*, found in Malacca, Burma, etc. The fruit is globose, half an inch long, yellowish in color, several-celled, with a pleasant subacid pulp.

ramberge† (ram'bėrj), *n.* [Also *remberge*; < OF. *ramberge*; origin obscure.] A long, narrow war-ship, swift and easily managed, formerly used on the Mediterranean.

By virtue thereof, through the retention of some aerial gusts, are the huge *ramberges*, mighty gallions, &c., launched from their stations.
Ozell, tr. of Rabelais, iii. 51. (*Nares.*)

ramble (ram'bl), *v. i.*; pret. and pp. *rambled*, ppr. *rambling*. [An altered form (with dissimilation of *mm* to *mb*) of dial. *rammle*, < ME. **ramelen*, freq. of *ramen*, E. dial. *rame*, roam, ramble: see *roam*.] 1. To roam or wander about in a leisurely manner; go from point to point carelessly or irregularly; rove: as, to *ramble* about the city or over the country.

Bold Robin Hood he would *ramble* away.
Robin Hood and the Ranger (Child's Ballads, V. 207).

My first Entrance upon this *Rambling* kind of Life.
Dampier, Voyages, II., Pref.

2. To take a wavering or wandering course; proceed with irregular turns, windings, or transitions; show a lack of definite direction or arrangement: as, a *rambling* path or house;

a *rambling* discourse; the vine *rambles* every way; he *rambled* on in his incoherent speech.

But wisdom does not lie in the *rambling* imaginations of men's minds. *Stillingfleet*, Sermons, I. ii.

O'er his ample sides the *rambling* sprays
Luxuriant shoot. *Thomson*, Spring, l. 794.

Our home is a *rambling* old place, on the outskirts of a country town. *The Century*, XL. 278.

3. To reel; stagger. *Halliwell.* [Prov. Eng.]

=Syn. 1. *Ramble, Stroll, Saunter, Rove, Roam, Wander, Range, Stray.* *Ramble*, by derivation, also *stroll* and *saunter*, and *stray* when used in this sense, express a less extended course than the others. To *ramble* or *stroll* is to go about, as fancy leads, for the pleasure of being abroad. To *saunter* is to go along idly, and therefore slowly. One may *saunter* or *stroll*, *stray* or *wander*, along one street as far as it goes. To *ramble*, *rove*, or *roam* is to pursue a course that is not very straight. One may *rove*, *roam*, or *wander* with some briskness or for some object, as in search of a lost child. One may *wander* about or *stray* about because he has lost his way. The wild beast *ranges*, *roves*, or *roams* in search of prey. *Roam* expresses most of definite purpose: as, to *roam* over Europe.

ramble (ram'bl), *n.* [< *ramble*, *v.*] 1. A roving or wandering movement; a going or turning about irregularly or indefinitely; especially, a leisurely or sauntering walk in varying directions.

Coming home after a short Christmas *ramble*, I found a letter upon my table. *Swift.*

In the middle of a brook, whose silver *ramble*
Down twenty little falls, through reeds and bramble,
Tracing along, it brought me to a cave.
Keats, Endymion, i.

On returning from our *ramble*, we passed the house of the Governor. *B. Taylor*, Lands of the Saracen, p. 87.

2. A place to ramble in; a mazy walk or tract. —3. In *coal-mining*, thin shaly beds of stone, taken down with the coal, above which a good roof may be met with. *Greeley.*

rambler (ram'blėr), *n.* [< *ramble*, *v.*, + *-er*[1].] One who rambles; a rover; a wanderer.

There is a pair of Stocks by every Watch house, to secure night *ramblers* in. *Dampier*, Voyages, II. i. 77.

rambling (ram'bling), *n.* [Verbal n. of *ramble*, *v.*] 1. The act of wandering about, or from place to place.

Rambling makes little alteration in the mind, unless proper care be taken to improve it by the observations that are made. *Pococke*, Description of the East, II. ii. 277.

2. A roving excursion or course; an indefinite or whimsical turning back and forth.

Thy money she will waste
In the vain *ramblings* of a vulgar taste.
Crabbe, Works, I. 73.

And as for that black-whiskered alligator, . . . let me first get out of those *rambustious* unchristian filbert-shaped claws of his. *Bulwer*, My Novel, xi. 19.

rambutan, rambootan (ram-bö'tan), *n.* [Also *rambostan*; < Malay *rambūtan*, so called in allusion to the villose covering of the fruit, < *rambut*, hair.] The fruit of *Nephelium lappaceum*, a lofty tree of the Malay archipelago. It is of an oval form, somewhat flattened, 2 inches long, of a reddish color, and covered with soft spines or hairs. The edible part is an aril, and is of a pleasant subacid taste. The tree is related to the lichi and longan, and is cultivated in numerous varieties.

rambyt, *a.* [ME.; cf. *ramp.*] Spirited; prancing; ramping (?).

I salle be at journee with gentille knyghtes,
On a *ramby* stede fulle jolyly graythide.
Morte Arthure (E. E. T. S.), l. 373.

ram-cat (ram'kat), *n.* A tom-cat.

Egad! old maids will presently be found
Clapping their dead *ram-cats* in holy ground,
And writing verses on each mousing devil.
Wolcot (P. Pindar), Peter's Pension.

Ram-cat is older than Peter. Smollett uses the word in his translation of Gil Blas: "They brought me a ragout made of *ram-cat*" (vol. i. ch. vii.). *N. and Q.*, 7th ser., V. 351.

ramie (ram'ē), *n.* [Also *ramee*; Malay.] A plant, the so-called China grass, *Bœhmeria nivea*, or its fiber. The plant is a perennial shrub with herbaceous shoots, native in the Malay islands, China, and Japan. It has long been cultivated in parts of the East Indies to supply fiber for fish-nets and cloths, and in China and Japan textiles of great beauty are made from this material. (See *grass-cloth.*) In length, thickness, and woodiness the stems most nearly resemble hemp. The fiber is unsurpassed in strength, is in an exceptional degree unaffected by moisture, in fineness rivals flax, and has a silky luster shared only by jute. The plant can be grown in any moderate climate—in the southern United States and as far north as New Jersey, as demonstrated by experiment. Also called *cambric-grass, silk-grass*, and *ramie-hemp*; in India, *rhea.* See cut under *Bœhmeria.*

ramie-fiber (ram'ē-fī'bėr), *n.* See *ramie.*

ramie-plant (ram'ē-plant), *n.* See *ramie.*

ramification (ram"i-fi-kā'shọn), *n.* [= F. *ramification* = Sp. *ramificacion* = Pg. *ramificação* = It. *ramificazione*, < ML. **ramificatio(n-)*, < *ramificare*, ramify: see *ramify.*] 1. The act or process of ramifying, or the state of being ramified; a branching out; division into branches, or into divergent lines, courses, or parts, as of trees or plants, blood-vessels, a mountain-chain, a topic or subject, etc.—2. The manner or result of ramifying or branching; that which is ramified or divided into branches; a set of branches: as, the *ramification* of a coral; the *ramifications* of an artery or a nerve; the *ramifications* of the capillaries, or of nerves in an insect's wing. See cuts under *Dendrocœla* and *embryo.*

Infinite vascular *ramifications*, . . . revealed only by the aid of the highest powers of the microscope. *Is. Taylor.*

3. In *bot.*, the branching, or the manner of branching, of stems and roots.—4. One of the branches or divergent lines or parts into which anything is divided; a division or subdivision springing or derived from a main stem or source: as, the *ramifications* of a conspiracy; to pursue a subject in all its *ramifications.*

When the radical idea branches out into parallel *ramifications*, how can a consecutive series be formed of senses in their nature collateral? *Johnson*, Eng. Dict., Pref.

5. The production of figures resembling branches.—**Point of ramification**, in the *integral calculus*, a point on the plane of imaginary quantity where two or more values of the function become equal. Also called *critical point.*

ramify (ram'i-fī), *v.*; pret. and pp. *ramified*, ppr. *ramifying.* [< F. *ramifier* = Pr. Sp. Pg. *ramificar* = It. *ramificare*, < ML. **ramificare* (in pp. *ramificatus*), branch, ramify, < L. *ramus*, a branch (see *ramus*), + *-ficare*, < *facere*, make.] I. *intrans.* 1. To form branches; shoot into branches, as the stem of a plant, or anything analogous to it; branch out.

When they [asparagus-plants] are older, and begin to *ramify*, they lose this quality. *Arbuthnot*, Aliments, p. 61.

The "test" has a single round orifice, from which, when the animal is in a state of activity, the sarcodic substance streams forth, speedily giving off *ramifying* extensions. *W. B. Carpenter*, Micros., § 397.

2. To diverge in various ways or to different points; stretch out in different lines or courses; radiate.

The establishments of our large carriers *ramify* throughout the whole kingdom. *H. Spencer*, Social Statics, p. 441.

II. *trans.* To divide into branches or parts; extend in different lines or directions.

Whoever considers the few radical positions which the Scriptures afforded him will wonder by what energetic operations he expanded them to such an extent, and *ramified* them to so much variety. *Johnson*, Milton.

It is also infinitely *ramified*, diversified, extending everywhere, and touching everything. *D. Webster*, Speech, March 18, 1834.

Ramilie (ram'i-lē), *n.* [< *Ramillies*: see def.] A name given to various articles or modes of dress, in commemoration of Marlborough's victory at Ramillies in Belgium over the French

under Villeroi, in 1706: chiefly used attributively. The Ramillie hat was a form of cocked hat worn in the time of George I. Its peculiarity consisted in the adjustment of the hat-brim—apparently the one in which the three cocks are nearly equal in length and similar in arrangement. The Ramillie wig, worn as late as the time of George III., had a long, gradually diminishing plait, called the Ramillie plait or tail, with a very large bow at the top and a smaller one at the bottom.

A peculiar-shaped hat was known as the "*Ramillie* cock."
N. and Q., 6th ser., XII. 35.

While in this country, the natural hair tied in a pig-tail and powdered passed for as good as the *Ramillie* wig and *Ramillie* tail. *S. Dowell*, Taxes in England, III. 290.

ramiparous (rā-mip'a-rus), *a.* [< L. *ramus*, a branch, + *parere*, produce.] Producing branches.

ramish, *a.* [A corruption of *ramage*[1].] Same as *ramage*[1].

The plaintiff had declared for a *ramish* hawk, which is a hawk living inter ramos (amongst the boughs), and by consequence fere nature.
Nelson, Laws Conc. Game, p. 151. (*Encyc. Dict.*)

Ramism (rā'mizm), *n.* [< *Ramus* (see def.) + *-ism*.] The logical doctrine of Petrus Ramus, or Pierre de la Ramée (born in Picardy, 1515; massacred on St. Bartholomew's day, 1572). The doctrine was that of Aristotle, with the omission of the more difficult and metaphysical parts, and with a few additions drawn from rhetoric and from Platonic sources (such as the doctrine of dichotomy). It was characterized by simplicity and good sense, and was set forth with some literary skill. It attracted considerable attention, owing to the unbounded hostility to Aristotle professed by Ramus, and was taught for many years in the Scottish universities and at Cambridge. John Milton wrote a Ramist logic.

In England, Cambridge alone, always disposed to reject the authority of Aristotle, and generally more open to new ideas than the sister university, was a stronghold of *Ramism*. *R. Adamson*, Encyc. Brit., XIV. 801

Ramist (rā'mist), *n.* and *a.* [< F. *ramiste*, a Ramist, pertaining to Ramus, < *Ramus* (see *Ramism*).] I. *n.* A follower of Peter Ramus. See *Ramism*.

The main position of Ramus was that "everything that Aristotle taught was false," but there was nothing original in his writings. He introduced into logic the dilemma, which had always been taught as a part of rhetoric, to which he greatly inclined.

II. *a* Pertaining to Ramus or Ramism; characterized by or characteristic of Ramism.—**Ramist consonants** (French *consonnes ramistes*), the letters *j* and *v*: so called by French writers, because Ramus was the first, in his grammatical writings, to distinguish them as consonants from the vowels *i* and *u*.

ram-line (ram'lin), *n.* [< *ram* (?) (see *rammed*) + *line*[2].] 1. In *ship-building*, a small rope or line used for setting the frames fair, assisting in forming the sheer of the ship, or for other similar purposes.—2. In *spar making*, a line used to make a straight middle line on a spar.

rammelsbergite (ram'elz-bėrg-īt), *n.* [After K. F. *Rammelsberg* (born 1813), a German chemist.] An arsenide of nickel, like chloanthite in composition, but crystallizing in the orthorhombic system.

rammel-wood† (ram'el-wụd), *n.* Natural copsewood.

There growth many allers and other *rammell wood*, which serve the muche for the buyldinge of suche small houses.
MS. Cotton. Calig. B viii. (*Halliwell.*)

Rammers.
a, wooden rammer, with iron band or hoop; *b*, *c*, paving rammers. A being used to compact sand, and *c* for cobblestones, etc.

rammer (ram'ėr), *n.* [= G. *rammer*; as *ram*[2], *v.*, + *-er*[1].] An instrument for ramming, or driving by impact. The pavers' rammer, used in setting stones or compacting earth, is a heavy mass of iron-bound wood, of tapering form, with handles at the top and on one or both sides. (See *beetle*, 1.) Founders' rammers are made in different ways, for various purposes, as forcing the sand into the pattern, solidifying it in the flask, etc. A gunners' rammer is a staff with a cylindrical head, for driving home the charge in a cannon, usually having for field-artillery a swab (called a *sponge*) at the other end for cleaning out the gun after firing. Ramods, and some kinds of ram, as that of a ship of war, are also sometimes called *rammers*. See *ram*[2], 2, and *ramrod*; see also cut in preceding column, and cut under *gun carriage*.

The earth is to bee wel driven and beaten downe close with a *rammer*, that it may be fast about the roots.
Holland, tr. of Pliny, xvii. 11.

rammish[1] (ram'ish), *a.* [< ME. *rammish*; < *ram*[1] + *-ish*[1].] Resembling or characteristic of a ram; rammy; strong-scented; hence, coarse; lewd; lascivious: used like *goatish* in the same sense. Compare *hircine*.

For al the world, they stinken as a goot:
Her savour is so *rammish* and so hoot,
That though a man from hem a myle be,
The savour wol infecte him, trusteth me.

3. A hank of line or twine; a strip of leather. *Halliwell.* [Local, Eng.]—4. Rushes on the borders and edges of land near a river. *Halliwell.* [Prov. Eng.]—5. In *shoemaking*: (*a*†) The edge of the upper-leather; a seam of a shoe. *Bailey.* (*b*†) A thin inner shoe-sole, as of cork. *Simmonds.* (*c*) One of the slips beneath the heel of a sole to bring the rounding surface to a level ready to receive the lifts of the heel: distinctively called *heel-rand*. See cut under *boot*.

rand[2]† (rand), *v. i.* [A var. of *rant*.] To storm; rant.

He was born to fill thy mouth, . . . he will teach thee to tear and *rand*. *B. Jonson*, Poetaster, iii. 1.

randall-grass (ran'dal-gras), *n.* The meadow-fescue. See *Festuca*. [Virginia.]

Randallite (ran'dal-īt), *n.* [After Benjamin *Randall* (1749–1808), founder of the body of Freewill Baptists at New Durham, New Hampshire, in 1780.] A Freewill Baptist. [Rare.]

randan (ran'dan), *n.* [Cf. *rand*[2]; perhaps in part due to *random*, random: see *random*. In the 3d and 4th senses uncertain; perhaps with ref. to quick movement; but in def. 3 possibly a corrupt form, connected with *range*, *v.*, 6.] 1. A noise or uproar. *Halliwell.* [Prov. Eng.]—2. A spree: used only in the phrase *on the randan* (also *on the randy*), on a spree. [Prov. Eng.]—3. The finest part of the bran of wheat; the product of the second sifting of meal. [Prov. Eng.]—4. A boat impelled by three rowers, the one amidships using a pair of sculls, and the bowman and strokesman one oar each. Also called *randan-gig*. [Eng.]

randan-gig (ran'dan-gig), *n.* Same as *randan*, 4.

> A sort of boat, . . . a *randan-gig* built for us by Searle of Putney, where . . . we used to keep her.
> *Yates*, Fifty Years of London Life.

randanite (ran'dan-īt), *n.* [< *Randan*, Puy de Dôme, Auvergne, France, where it is found, + *-ite*[2].] The name given in France to infusorial silica, or kieselguhr, found under the soil in peat-bogs in the department of Puy de Dôme, at Randan and in other localities in the neighborhood of Clermont.

Randia (ran'di-ä), *n.* [NL. (A. A. Houston, 1737, in Linnæus's "Genera Plantarum"), named after Isaac *Rand*, a London botanist of the 18th century.] A genus of gamopetalous plants of the order *Rubiaceæ* and tribe *Gardenieæ*. It is characterized by hermaphrodite and axillary flowers, united style-branches bearing a club-shaped or fusiform stigma, a two-celled ovary with many ovules, seeds with membranaceous coats, and short intrapetiolar stipules which are almost connate. There are about 100 species, natives of tropical regions, especially in Asia and Africa. They are trees and shrubs, erect or climbing, with or without thorns, and bearing opposite leaves which are obovate or narrower, and either small or large flowers, which are solitary or in clusters, and white or yellow, rarely red. The fruit is a many-seeded, two-celled roundish berry, yielding a blue dye in the West Indian species, as *R. aculeata*, known as *indigo-berry* and *inkberry*. These species also furnish a valuable wood, used for cask-staves, ladders, etc. *R. dumetorum*, a small thorny tree, widely distributed from Africa to Java, is used as a hedge-plant in India, while its fruit, called *emetic nut*, is there a current drug, said also, like *Cocculus Indicus*, to have the property of stupefying fish.

randie, *a.* and *n.* See *randy*.

randing-machine (ran'ding-ma-shēn'), *n.* In *shoe-manuf.*, a machine for fitting rands to heel-blanks for shoes, after the rands have been formed from rand-strips in a rand-forming machine.

randing-tool (ran'ding-tōl), *n.* In *shoe-manuf.*, a hand-tool for cutting out strips of leather for rands.

randle-balk (ran'dl-bâk), *n.* Same as *randle-bar*.

randle-bar (ran'dl-bär), *n.* The horizontal bar built into the walls of an open chimney, from which to hang hooks for supporting cooking-vessels. See *back-bar*.

randle-tree, *n.* See *rantle-tree*.

random (ran'dum), *n.*[1] [An altered form (assimilated to *whilom*, *seldom*, *ransom*, the latter also with orig. *n*) of the early mod. E. *randon*, < ME. *randon*, *randun*, *randoun*, force, impetuosity, < OF. *randon*, force, impetuosity, impetuous course, as of a torrent (*grands randons de pluie*, great torrents of rain); esp. in the phrases *à randon*, *à grand randon*, with force or fury, very fast, with great force (*courir du grant randon*, run with great fury); cf. It. dim. *randello*, *a randello*, at random; *a randa*, near, with difficulty, exactly; cf. Sp. *de rendon*, *de rondon*, rashly, intrepidly, abruptly (nearly like E. *at random*); perhaps < OHG. MHG. *rant*, G. *rand*, edge, brim, rim, margin: see *rand*[1].]

1†. A rushing, as of a torrent; an impetuous course; impetuosity; violence; force: especially with *great*, as in the phrase *a great random*, with great speed or force.

> And thei rennen to gidre *a gret randoun*.
> *Mandeville*, Travels, p. 238.

> The two kynges were derce and hardy, and mette with so *grete raundon* with speres that were grete and shorte.
> *Merlin* (E. E. T. S.), iii. 628.

> But of hym thought he to faill in no wise,
> With *gret raundon* cam to hym in his gise.
> *Rom. of Partenay* (E. E. T. S.), l. 5866.

> Coragiously the two kynges newely fought with *great random* and force. *Hall*, Hen. VIII., an. 12.

2†. A rush; spurt; gush.

> Whan thei saugh come the dragon that Merlin bar, that caste oute of his throte so grete *raundon* of fiere in to the aire, that was full of duste and powder, so that it semed all reade . . . *Merlin* (E. E. T. S.), ii. 219.

3†. A continuous flow of words; a harangue.

> *Randone*, or longe renge of wurdys, or other thyngys, haringga, etc. *Prompt. Parv.*, p. 423.

4. An indeterminate course or proceeding; hence, lack of direction, rule, or method; haphazard; chance: used only in the phrase *at random*—that is, in a haphazard, aimless, and purely fortuitous manner.

> You flee with winges of often change *at random* where you please. *Turberville*, The Lover to a Gentlewoman.

> Sith late mischaunce had her compeld to chaunge
> The land for sea, *at randon* there to raunge.
> *Spenser*, F. Q., III. viii. 20.

> Come not too neere me, I *at random* strike,
> For gods and men I now hate both alike.
> *Heywood*, Dialogues (Works, ed. Pearson, 1874, VI. 178).

> Like orient pearls *at random* strung.
> *Sir W. Jones*, Song of Hafiz.

5. The distance traversed by a missile; range; reach.

> The angle which the missive is to mount by, if we will have it go to its furthest *random*, must be the half of a right one. *Sir K. Digby.*

random (ran'dum), *a.* and *n.*[2] [By ellipsis from *at random*.] I. *a.* Proceeding, taken, done, or existing at random; aimless; fortuitous; haphazard; casual.

> In common things that round us lie
> Some *random* truths he can impart.
> *Wordsworth*, A Poet's Epitaph.

> I would shoot, howe'er in vain,
> A *random* arrow from the brain.
> *Tennyson*, Two Voices.

> You feel that the whole of him [Dryden] was better than any *random* specimen, though of his best, seems to prove.
> *Lowell*, Among my Books, 1st ser., p. 8.

Random choice, the selection of objects, subject to the condition that they shall belong to a given class or collection, but not voluntarily subject to any other condition. The assumption is that objects so selected will in the long run occur as objects of the same kind occur in general experience. This assumption is natural, it leads to no difficulty, and no serious doubt has ever been thrown upon it. It is the fundamental postulate of the theory of probability. See *probability*.—**Random courses**, in *masonry* and *paving*, courses of stones in horizontal beds, the stones being of unequal thickness, but exactly fitted together.—**Random line.** (*a*) In local probability, an infinite straight line supposed to be chosen in such a manner that the infinitesimal probability of its cutting any limited straight line is proportional to the length of the latter. (*b*) In United States public land-surveying, a trial line on which temporary mile and half-mile stakes are set, for the purpose of getting the data for rerunning the same line and setting permanent stakes at the corners.—**Random point**, in local probability, a point supposed to be so chosen that the infinitesimal probability of its lying within any closed surface is proportional to the solid contents of that surface.—**Random-range ashlar, random-tooled ashlar.** See *ashlar*, 3.—**Random shot**, a shot not intentionally directed to any point; also, a shot with the muzzle of the gun elevated above the horizontal line.—**Random stonework**, in *masonry*, a construction formed of squared stones varying in thickness and not laid in courses. See cut under *ashlar*.—**Random tooling**, the act of bringing the face of a stone to a nearly smooth surface by hewing it over with a broad-pointed chisel, which produces a series of minute waves at right angles to its path. It is called *droving* in Scotland.—**Random work**, random stonework.—**Random yarn**, in *dyeing*, yarn dipped into a bath of water with a layer of color at the top, so as to produce a clouded effect; clouded yarn.

> On the large scale the *random yarns* are coloured in machines. *W. Crookes*, Dyeing and Calico-Printing, p. 102.

II. *n.* Something done or produced without definite method, or with irregular or haphazard effect. (*a*) In *masonry*, one of a number of dressed stones of irregular or unmatched sizes. See *random stonework*, under I.

> 50 tons squares, 250 tons dressed *randoms*, and 1000 tons 2 in. ringsmall. *Engineer*, LXVII. 117.

(*b*) In *dyeing*, clouded yarn. See *random yarn*, under I.

randomly (ran'dum-li), *adv.* [< *random* + *-ly*[2].] In a random manner; at random, or without aim, purpose, or guidance.

> An infusorium swims *randomly* about.
> *H. Spencer*, Data of Ethics, § 4.

randont, *n.* An obsolete form of *random*.

randont (ran'don), *v. i.* [< OF. *randonner*, run swiftly, < *randon*, a swift course: see *random*.] To stray in a wild manner or at random.

> Shall leave them free to *randon* of their will.
> *Norton and Sackville*, Ferrex and Porrex, i. 2.

randy (ran'di), *a.* and *n.* [Also *randie*, *ranty*; < *rand*[2], *rant*, + *-y*[1]. Cf. *randan*.] I. *a.* Disorderly; boisterous; obstreperous; riotous; also, noisily wanton. [Scotch and North. Eng.]

> A merry core
> O' *randie*, gangrel bodies.
> *Burns*, Jolly Beggars.

II. *n.*; pl. *randies* (-diz). 1. A sturdy beggar or vagrant; one who exacts alms by threatenings and abusive language. Also called *randy-beggar*. [Scotch.]—2. A romping girl; a noisy hoyden; a scold; a violent and vulgar quarrelsome woman. *Jamieson.* [Scotch and North. Eng.]

> That scandalous *randy* of a girl.
> *Carlyle*, in Froude (Life in London, xviii.).

3. A spree: as, to be on the *randy*. *Halliwell.* [Prov. Eng.]

ranedeer†, *n.* An obsolete form of *reindeer*.

ranee, *n.* See *rani*.

Ranelagh mob†, **Ranelagh cap**†. A cap worn by women in the eighteenth century, apparently a form of the mob-cap: the name is taken from Ranelagh, a place of fashionable resort near Dublin.

ranforce†, *v. t.* Same as *reinforce*. *Bailey.*

rang[1] (rang). Preterit of *ring*[2].

rang[2]†, *n.* and *v.* An old form of *rank*[2].

range (rānj), *v.*; pret. and pp. *ranged*, ppr. *ranging*. [Early mod. E. also *raunge*; < ME. *rengen*, < OF. *renger*, F. *ranger* (= Pr. *rengar*), range, rank, order, array, < *rang*, a rank, row: see *rank*[2]. Cf. *arrange*, *derange*.] I. *trans.* 1. To make a row or rows of; place in a line or lines; hence, to fix or set in any definite order; dispose with regularity; array; arrange.

> Than two of hem *renged* hem, and priked after the messagers as faste as the horse myght hem bere.
> *Merlin* (E. E. T. S.), i. 127.

> They had *raunged* their ships broad in a front ranke.
> *Holland*, tr. of Livy, p. 957.

> For all the Etruscan armies
> Were *ranged* beneath his eye.
> *Macaulay*, Horatius.

2. To rank or class; place or reckon as being of or belonging to some class, category, party, etc.; fix the relative place or standing of; classify; collocate.

> The late Emperour Augustus all the world *raungeth* in this ranke of men fortunate. *Holland*, tr. of Pliny, vii. 45.

> So they *ranged* all their youth under some family, and set upon such a course, which had good success, for it made all hands very industrious.
> *N. Morton*, New England's Memorial, p. 93.

> The great majority of the Indians, if they took part in the war, *ranged* themselves on the side of the Crown.
> *Lecky*, Eng. in 18th Cent., xiv.

> Among those inhabitants of the Roman dominion who were personally free, there were four classes, *ranged* in an ascending scale—provincials, Italians, Latins, Romans.
> *E. A. Freeman*, Amer. Lects., p. 320.

3†. To rank or reckon; consider; count.

> The Æthiops were as fair
> As other dames; now black with black despair:
> And in respect of their complexions changed,
> Are eachwhere since for luckless creatures *ranged*.
> *B. Jonson*, Masque of Blackness.

4†. To engage; occupy.

> That, of all other, was the most fatal and dangerous exploit that ever I was *ranged* in.
> *B. Jonson*, Every Man in his Humour, iii. 1.

5. To pass over or through the line, course, or extent of; go along or about, especially for some definite purpose; rove over or along: as, to *range* the forest for game or for poachers; to *range* a river or the coast in a boat.

> I found this credit,
> That he did *range* the town to seek me out.
> *Shak.*, T. N., iv. 3. 7.

> As they *ranged* the coast at a place they named Whitson Bay, they were kindly vsed by the Natiues.
> Quoted in *Capt. John Smith's* Works, I. 108.

> To *range* the woods, to roam the park.
> *Tennyson*, In Memoriam, Conclusion.

6. To sift; pass through a range or bolting-sieve. [Obsolete or local.]

> They made a decree, and tooke order that no corne maisters that bought and sold grain should beat this mule away from their *raunging* sives.
> *Holland*, tr. of Pliny, viii. 44.

II. *intrans.* 1. To constitute or be parallel to a line or row; have linear course or direction; be in or form a line: as, a boundary *ranging* east and west; houses *ranging* evenly with the street.

> Than thei rode forth and *renged* close that wey where as the childeren foughten full sore, ffor the Saisnes were mo than vij[m] in a flote. *Merlin* (E. E. T. S.), ii. 198.

> Direct my course so right as with thy hand to show
> Which way thy forests *range*.
> *Drayton*, Polyolbion, i. 14.

> The stones are of the same thickness as the walls, and the pilasters have no capitals; there is a cornish below that *ranges* round, which might belong to a basement.
> *Pococke*, Description of the East, II. i. 135.

2. To be on a level; agree in class or position; have equal rank or place; rank correspondingly.

> 'Tis better to be lowly born,
> And *range* with humble livers in content,
> Than to be perk'd up in a glistering grief,
> And wear a golden sorrow.
> *Shak.*, Hen. VIII., ii. 3. 20.

> This was cast upon the board,
> When all the full-faced presence of the Gods
> *Ranged* in the halls of Peleus. *Tennyson*, Œnone.

3. To go in a line or course; hence, to rove freely; pass from point to point; make a course or tour; roam; wander.

Let reason *range* beyonde his creede.
Puttenham, Partheniades, xiii.

The Gaules from the Albane Glimes . . . *ranged* all over the champion and the sea coaste, and wasted the countrie. *Holland*, tr. of Livy, p. 265.

How wild his [man's] thoughts! how apt to *range!*
How apt to vary! apt to change!
Quarles, Emblems, iv. 5.

Watch him, for he *ranges* swift and far.
M. Arnold, Empedocles on Etna.

4. To move in a definite manner, as for starting game; beat about; of dogs, to run within the proper range.

All shrank — like boys who, unaware,
Ranging the woods to start a hare,
Come to the mouth of the dark lair
Where, growling low, a fierce old bear
Lies amidst bones and blood.
Macaulay, Horatius.

Next comes the teaching to *range*, which is about the most difficult part of breaking.
Dogs of Great Britain and America, p. 226.

Down goes old Sport, *ranging* a bit wildly.
The Field (London), March 27, 1886. (*Encyc. Dict.*)

5. To have course or direction; extend in movement or location; pass; vary; stretch; spread: as, prices *range* between wide limits; the plant *ranges* from Canada to Mexico.

Man *ranges* over the whole earth, and exists under the most varied conditions.
A. R. Wallace, Nat. Select., p. 226.

In temperate climates, toward the higher latitudes, the quicksilver *ranges*, or rises and falls, nearly three inches.
Fitz Roy, Weather Book, p. 13.

The Cyprinoids also afford an instance of an Indian species *ranging* into Africa. *Encyc. Brit.*, XII. 673.

6. In *gun.*, to have range: said of a missile, and denoting length of range and also direction: as, that shot *ranged* too far, or too much to the right: rarely, of the gun itself.—**To range by,** to sail by; pass ahead of, as a vessel.=**Syn. 3.** *Roam, Rove*, etc. See *ramble*, v.

range (rānj), *n.* [Early mod. E. also *raunge*; < late ME. *range, reenge*, order, range, row (cf. OF. *rangie*, F. *rangée*, range, row, etc.); < *range*, *v.* The noun prob. in part involves ME. *reng*, pl. *renges, ringes*, rank, series, row: see *rank*[2]. Cf. also (in def. 10) *rung*[2].] **1.** A line or row (usually straight or nearly straight); a linear series; a regular sequence; a rank; a chain: used especially of large objects permanently fixed or lying in direct succession to one another, as mountains, trees, buildings, columns, etc.

Ther be iiij rowes or *Ranges* of pylers thorow the Chirche.
Torkington, Diarie of Eng. Travell, p 17.

There is a long row or *range* of buildings.
Cornat, Crudities, I. 192.

Altogether this arcade only makes us wish for more, for a longer *range* from the same hand.
E. A. Freeman, Venice, p. 217.

A row of Corinthian columns, standing on brackets, once supported the archivolts of a *range* of niches.
J. Fergusson, Hist. Arch., I. 367.

Specifically — (*a*) A line or chain of mountains, a cordillera: as, to skirt the *range;* to cross the *ranges*. [In mountainous regions, as parts of Australia and America, this specific use is common.] (*b*) In United States surveys of public land one of a series of divisions numbered east or west from the prime meridian of the survey, consisting of townships which are numbered north or south in every division from a base-line. See *township*. (*c*) In *geom.*, a series of points lying in one straight line.

2. A rank, class, or order; a series of beings or things belonging to the same grade or having like characteristics. [Rare.]

The next *range* of beings above him are the immaterial intelligences. *Sir M. Hale.*

3. The extent of any aggregate, congeries, or complex, material or immaterial; array of things or sequences of a specific kind; scope; compass: as, the *range* of industries in a country; the whole *range* of events or of history; the *range* of prices or of operations; the *range* of one's thoughts or learning.

The *range* and compass of his [Hammond's] knowledge filled the whole circle of the arts.
Bp. Fell, Hammond, p. 99.

A man has not enough *range* of thought to look out for any good which does not relate to his own interest.
Addison.

When I briefly speak of the Greek school of art with reference to questions of delineation, I mean the entire *range* of the schools from Homer's days to our own.
Ruskin, Aratra Pentelici, p. 157.

In the *range* of historical geography, the most curious feature is the way in which certain political names have kept on an abiding life in this region, though with singular changes of meaning. *E. A. Freeman*, Venice, p. 4.

4. Extent of operating force or activity; scope or compass of efficient action; space or distance over or through which energy can be exerted; limit of effect or of capability; extent of reach: as, the *range* of a gun or a shot; the *range* of a thermometer or a barometer (the extent of its variation in any period, or of its capacity for marking degrees of change); the *range* of a singer or of a musical instrument. Range in shooting is the horizontal distance to which a projectile is or may be thrown by a gun or other arm under existing conditions: distinguished from *trajectory*, or the curvilinear distance traversed by the projectile when the arm is elevated out of a horizontal line. The effective range depends upon the amount or the absence of elevation and the consequent trajectory. (Compare *point-blank.*) To get the range of a point to be fired at is to ascertain, either by calculation or by experiment, or by both, the degree of elevation for the muzzle of the piece necessary to bring the shot to bear upon it.

Far as creation's ample *range* extends,
The scale of sensual, mental powers ascends.
Pope, Essay on Man, i. 207.

Her warbling voice, a lyre of widest *range*,
Struck by all passion, did fall down and glance
From tone to tone. *Tennyson*, Fair Women.

No obstacle was encountered until the gunboats and transports were within *range* of the fort.
U. S. Grant, Personal Memoirs, I. 489.

The proposal [advocating cremation] was not to be regarded as coming within the *range* of a practical policy.
Nineteenth Century, XXIII. 2.

5. Unobstructed distance or interval from one point or object to another; length of course for free direct ranging through the air, as of a missile or of sight; a right line of aim or of observation, absolute or relative: as, the *range* is too great for effective firing; the *range* of vision.— **6.** The act of ranging; a wandering or roving; movement from point to point in space.

He may take a *range* all the world over. *South.*

7. An area or course of ranging, either in space or in time: an expanse for movement or existence; the region, sphere, or space over which any being or thing ranges or is distributed: as, the *range* of an animal or a plant within geographical limits or during geological time, or of a marine animal in depth; the *range* of Gothic architecture; the *range* of a man's influence.

The free bison's amplitude of *range*.
Whittier, The Panorama.

Specifically — (*a*) A tract or district of land within which domestic animals in large numbers range for subsistence; an extensive grazing-ground: used on the great plains of the United States for a tract commonly of many square miles, occupied by one or by different proprietors, and distinctively called a *cattle-, stock-,* or *sheep-range*. The animals on a range are usually left to take care of themselves during the whole year without shelter, excepting when periodically gathered in a "round-up" for counting and selection and for branding when the herds of several proprietors run together. In severe winters many are lost by such exposure.

Cowboys from neighboring ranches will ride over, looking for lost horses, or seeing if their cattle have strayed off the *range*. *T. Roosevelt*, The Century, XXXV. 600.

(*b*) A course for shooting at marks or targets; a space of ground appropriated or laid out for practice in the use of firearms: distinctively called a *rifle-range* or *shooting-range*.

8. A fire-grate.

He was bid at his first coming to take off the *range*, and let down the cinders. *Sir R. L'Estrange* (*Latham.*)

9. A cooking-stove built into a fireplace, or sometimes portable but of a similar shape, having a row or rows of openings on the top for carrying on several operations at once. Fixed ranges usually have two ovens, either on each side of the fire-chamber or above it at the back, and in houses supplied with running water a hot-water reservoir or permanent boiler. The origin of the modern cooking-range may be sought in the furnaces of masonry of the ancient Romans, arranged to receive cooking-utensils on the top. Throughout the middle ages only open-chimney fires were used, until in France, in the course of the fourteenth century, built furnaces with openings above for pots began to be added in great kitchens, for convenience in preparing the soups and sauces then in greater favor than before. The range in the modern sense, involving the application of heat conducted by and reflected from iron plates, was first advanced and practically improved by Count Rumford.

It [the kitchen] was a vaut ybuilt for great dispence,
With many *raunges* reard along the wall,
And one great chimney, whose long tonnell thence
The smoke forth threw. *Spenser*, F. Q., II. ix. 29.

Every thing whereupon any part of their carcase falleth shall be unclean; whether it be oven, or *ranges* for pots, they shall be broken down. Lev. xi. 35.

And so home, where I found all clean, and the hearth and *range*, as it is now enlarged, both up.
Pepys, Diary, May 25, 1661.

10. A step of a ladder; a round; a rung. [Obsolete or local.]

The first *range* of that ladder which should serve to mount over all their customs. *Clarendon*, Great Rebellion.

11. *Naut.*: (*a*†) A large cleat with two arms or branches, bolted in the waist of ships to belay the tacks and sheets to. (*b*) A certain quantity of cable hauled up on deck from the chain-locker, or of a length slightly greater than the depth of water, in order that the anchor, when let go, may reach the bottom without being checked. — **12.** In *shoemaking*, a strip cut from a butt or side of sole-leather.

The butt is first cut into long strips known as *ranges*, of varying width according to the purposes for which required. *Ure*, Dict., IV. 110.

13. A bolting-sieve for meal. *Cotgrave; Halliwell.* [Old and prov. Eng.]—**Battle-range.** See *battle*[1].—**Broken-range stonework,** range stonework in which thicker or thinner stones are occasionally inserted, thus breaking the uniformity. Compare *random stonework*, under *random*.—**Constituent of a range.** See *constituent*.—**Double-oven range,** a range which has two ovens, one on each side of the fire-pot.—**Point-blank range.** See *point-blank*.—**Random-range ashlar.** See *ashlar*[3].—**Range curve.** See *curve*.—**Range stonework,** masonry laid in courses. The courses may vary in height, but in each a level joint is preserved.—**Single-oven range,** a range having but one oven, usually at one side of the fire-pot: in contradistinction to *double-oven range*.—**To get the range** of anything, to find by experiment and calculation the exact angle of elevation of the gun, the amount of charge, etc., necessary to throw projectiles so as to strike the object aimed at.=**Syn. 1.** Line, tier, file.—**4.** Sweep, reach.

rangé (roṅ-zhā′), *n.* [F., pp. of *ranger*, range, order: see *range*, *v.*] In *her.*, arranged in order: said of small bearings set in a row fesse-wise, or the like. The epithet is not often needed: thus, "six mullets in bend or bendwise" is sufficient without the use of the expression "*rangé* in bend."

range-finder (rānj′fīn″dėr), *n.* An instrument for measuring the range or distance of an object. The range-finder used in the United States navy is the invention of Lieutenant Fiske, U. S. N. Two telescopes, at the ends of the ship, are fitted with contacts, which move along arcs of resistance wire as the telescopes are directed at any object. The wires are connected as a Wheatstone bridge, the galvanometer of which is placed in a secure place below the water-line of the ship. The act of directing the telescopes toward any object disturbs the "balance of the bridge," and makes the galvanometer needle deflect by an amount proportional to the conveyance of the telescopes and inversely proportional to the distance. The scale of the galvanometer is divided into yards; so that the needle automatically points to the graduation representing the distance of the object.

range-heads (rānj′hedz), *n. pl. Naut.*, the windlass-bitts.

range-lights (rānj′lits), *n. pl.* **1.** Two or more lights, generally in lighthouses, so placed that when kept in line a fair course can be made through a channel: where two channels meet, the bringing of two range-lights into line serves to mark the turning-point into the new channel. —**2.** Lights placed aboard ship at a considerable horizontal distance from each other, and in the same vertical plane with the keel. They are used to give a better indication of changes of course to approaching vessels than is afforded by the ordinary side and steaming lights.

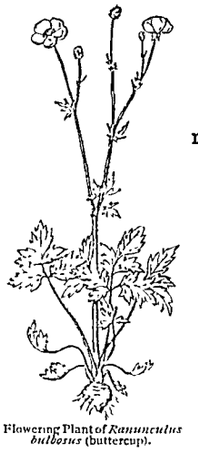
The term has been applied, however, with considerable looseness, to other tumors in or near this place presenting some resemblance to true ranulæ.



ranular (ran'ū-lėr), *a.* [= F. *ranulaire*; as *ranula* + *-ar*[3].] Of or pertaining to a ranula; of the character of a ranula.

Ranunculaceæ (rą-nung-kū-lā'sē-ē), *n. pl.* [NL. (A. L. de Jussieu, 1789), < *Ranunculus* + *-aceæ*.] An order of polypetalous plants of the cohort *Ranales*, characterized by the numerous stamens inserted on the receptacle, five deciduous and commonly colored sepals, not more than one complete circle of petals, and seeds with a minute embryo in fleshy albumen, and without an aril. They have usually many separate pistils which mature into distinct dry fruits, either achenes or follicles, or coalesce into berries. The species, estimated by some at 1,200, by Durand at 680, are included in 5 tribes and 30 genera. They occur throughout the world, but in the tropics more rarely and chiefly on mountains, elsewhere forming a conspicuous part of the flora of almost every region, especially in Europe, which contains one fifth, and in North America, which has one seventeenth, of all the species. Their wide distribution is aided by the long-continued vitality of the seeds, many of which are also remarkably slow to germinate after planting, those of several species requiring two years. They are annual or perennial herbs—rarely undershrubs, as *Xanthorhiza*. Many have dissected alternate or radical leaves, the petiole with an expanded sheathing base, but without stipules; *Clematis* is exceptional in its opposite leaves and climbing stem. The order is often known as the buttercup or crowfoot family, from the type, and contains an unusually large proportion of other characteristic plants, as the hepatica of America, the Christmas rose of Germany, and the lesser celandine of England. It includes also many of the most beautiful flowers of garden cultivation. Most of the species contain in their colorless juice an acrid and caustic principle, which sometimes becomes a dangerous narcotic poison, is often of great medicinal value (see *hellebore*, *aconite*, *Hydrastis*, *Actæa*, *Cimicifuga*), is usually most concentrated in the roots, but very volatile in the foliage and stems, and is dissipated by drying or in water, but intensified by the action of acids, alcohol, etc. The order was one of the earliest to be defined by botanists with substantially its present limits (as *Multisiliquæ* by Linnæus, 1751), and has long been placed at the head of the polypetalous families of dicotyledons standing as the first order of plants in the most widely accepted classifications, from De Candolle in 1819 to Durand in 1888.

ranunculaceous (rą-nung-kū-lā'shius), *a.* [< NL. *ranunculaceus*, < *Ranunculus*, q. v. Cf. *Ranunculaceæ*.] Of or pertaining to the *Ranunculaceæ*; resembling the ranunculus.

Ranunculeæ (rą-nung-kū'lē-ē), *n. pl.* [NL. (A. P. de Candolle, 1818), < *Ranunculus* + *-eæ*.] A tribe of plants of the order *Ranunculaceæ*. It is characterized by carpels with one ascending ovule, becoming achenes in fruit, by numerous radical leaves, and (excepting in the two species of *Oxygraphis*) by the additional presence of alternate stem-leaves. It includes the type genus *Ranunculus*, and 3 other genera embracing 8 species.

Ranunculus (rą-nung'kū-lus), *n.* [NL. (Kaspard Bauhin, 1623), < L. *ranunculus*, a medicinal plant, also called *batrachion*, perhaps crowfoot (> It. *ranuncolo*, Sp. *ranúnculo*, Pg. *ranunculo*, D. *ranonkel*, G. Dan. Sw. *ranunkel*, crowfoot), dim. of *rana*, a frog: see *Rana*[1].] 1. A large genus of polypetalous plants, type of the order *Ranunculaceæ* and of the tribe *Ranunculeæ*. It is characterized by the perfect flowers with from three to five caducous sepals, three to five or even fifteen conspicuous petals, each marked at the base by a nectar-bearing scale or pit, and by the many achenes in a head or spike, each beaked with a short persistent style. There are about 200 species, scattered throughout the world, abundant in temperate and cold regions, with a few on mountain tops in the tropics; 16 species are British, and about 47 occur in the United States, besides at least 9 others in Alaska; 23 are found in the Atlantic States. The genus is remarkable for its development northward, extending to the Aleutian Islands and Point Barrow, and even to Port Conger, 81° 44′ north. Others extend well to the south, as the Fuegian *R. biternatus*. The species have usually a perennial base or rootstock, and bear deeply divided leaves, entire in a few species, and yellow or white terminal flowers (pink in *R. Andersoni* of Nevada), which are generally bright and showy, and have numerous and conspicuous short yellow stamens and a smaller central mass of yellow or greenish pistils. The more common species, with bright-yellow flowers and palmately divided leaves, are known as *buttercup* and *crowfoot*, especially *R. acris* and *R. bulbosus*, which have also the old local names of *butter-flower*, *butter-daisy*, *blister-plant*, *crow-flower*, and in Scotland *yellow gowan*. (See also *goldcup*, and cut under *ovary*[1].) A number of yellow species are cultivated under the name *garden ranunculus*, as *R. speciosus*, a favorite source of cut flowers, and especially the Persian *R. Asiaticus*, with three-parted leaves, parent of a hundred varieties, mostly double, and including scarlet and other colors. *R. aconitifolius*, a tall European species with five-parted leaves, is cultivated in white double-flowered varieties under the names *bachelor's-buttons* and *fair-maids-of-France* or *-of-Kent*. The bright-yellow flowers of *R. insignis*, a densely woolly New Zealand species, are nearly 2 inches across. Several white-flowered species are remarkable for their growth in rock-crevices amid perpetual snow, especially *R. glacialis* of the Alps, and also the yellow-flowered *R. Thora*, the mountain wolf's-bane. A few weedy species have prickly fruit, as *R. arvensis* of England (for which see *hungerweed*, *hedgehog*, 3, and *joy*, 4). Many species are so acrid as to raise blisters when freshly gathered, but are sometimes eaten, when dried, by cattle. *R. sceleratus*, said to be the most acrid species, is eaten boiled as a salad in Wallachia, as are also the roots of *R. bulbosus*, the acridity disappearing on boiling. *R. auricomus* (see *goldilocks*) is exceptional in the absence of this acrid principle, as also *R. aquatilis*, which sometimes forms almost the entire food of cattle. This and several other species, the water-crowfoots, are immersed aquatics with finely dissected foliage, forming deep-green feathery masses which bear white emersed flowers; among them is *R. Lyallii* of New Zealand, one of the most ornamental species, there known as *water-lily*. The yellow water-crowfoot, *R. multifidus*, found from North Carolina to Point Barrow, has kidney-shaped and cut floating leaves. Several species with long and mainly undivided leaves are known as *spearwort*. For *R. Ficaria*, celebrated as one of the earliest English flowers, and as *Wordsworth's flower*, see *celandine*, 2, *pilewort*, and *figwort*, 2. See also cut under *achenium*.

Ranzania (ran-zā'ni-ą), *n.* [NL., named (in def. 1 by Nardo, 1840) after C. *Ranzani*, an Italian naturalist.] 1. In *ichth.*, a genus of gymnodont fishes of the family *Molidæ*.—2. In *entom.*, a genus of coleopterous insects.

ranz des vaches (roⁿs dā vâsh). [Swiss F. (see def.), explained as lit. (*a*) 'the lowing of the cows': Swiss dial. *ranz*, connected, in this view, with G. *ranzen*, make a noise, drum with the fingers (cf. *ranken*, bray as an ass); *des*, comp. of *de*, of, and *les*, pl. of def. art.; *vaches*, pl. of *vache*, < L. *vacca*, a cow (see *vaccine*); (*b*) in another view, 'the line of cows,' *ranz* being taken as a var. of *rangs*, pl. of *rang*, row, line (because the cows fall into line when they hear the alpenhorn): see *rank*[2].] One of the melodies or signals of the Swiss herdsmen, commonly played on the alpenhorn. It consists of irregular phrases made up of the harmonic tones of the horn, which are singularly effective in the open air and combined with mountain echoes. The melodies vary in the different cantons. They are sometimes sung.

Raoulia (rą-ō'li-ą), *n.* [NL. (Sir J. D. Hooker, 1867), named after E. *Raoul*, a French naval surgeon, who wrote on New Zealand plants in 1846.] A genus of composite plants of the tribe *Inuloideæ* and subtribe *Gnaphalieæ*. It is characterized by the solitary, sessile, and terminal heads of many flowers, which are mostly perfect and fertile, the outer circles of pistillate flowers being only one or two, or less than in the related genus *Gnaphalium* (the everlasting), but more than in the other next-allied genus, *Helichrysum*. All the flowers bear a bifid style and a pappus which is not plumose. The 14 species are mostly natives of New Zealand, and are small densely tufted plants of rocky mountainous places, resembling mosses, with numerous branches thickly clothed with minute leaves. They bear white starry flower-heads, one at the end of each short twig, closely surrounded with leaves, and in *R. grandiflora* and others ornamented by an involucre with white bracts. *R. eximia* and *R. mammillaris* are known in New Zealand as *sheep-plants*, from their growth in sheep-pastures in large white woolly tufts, readily mistaken for sheep even at a short distance.

rap[1] (rap), *v.*; pret. and pp. *rapped* or *rapt*, ppr. *rapping*. [< ME. *rappen*, < Sw. *rappa*, strike, beat, rap; cf. *rap*[1], *n.* Cf. MHG. freq. *raffeln*, G. *rappeln*, intr., rattle. Perhaps connected with *rap*[2].] I. *trans.* 1. To beat upon; strike heavily or smartly; give a quick, sharp blow to, as with the fist, a door-knocker, a stick, or the like; knock upon.

His hote newe chosen love he chaunged into hate,
And sodainly with mighty mace gan *rap* hir on the pate.
Gascoigne, In Praise of Lady Sandes.

With one great Peal they *rap* the Door,
Like Footmen on a Visiting Day.
Prior, The Dove, st. 9.

Now, by this time the tears were *rapping* down
Upon her milk-white breast, aneth her gown.
Ross, Helenore, p. 70. (*Jamieson.*)

3. To strike a quick, sharp blow; make a sound by knocking, as on a door: as, to *rap* for admittance.

Villain, I say, knock me at this gate,
And *rap* me well. *Shak.*, T. of the S., i. 2. 12.

Whan she cam to the king's court,
She *rappit* wi' a ring.
Earl Richard (Child's Ballads, III. 397).

Comes a dun in the morning and *raps* at my door.
Shenstone, Poet and Dun.

4. To take an oath; swear; especially, to swear falsely: compare *to rap out* (*a*), above. [Thieves' cant.]

It was his constant maxim that he was a pitiful fellow who would stick at a little *rapping* for his friend.
Fielding, Jonathan Wild, i. 13. (*Davies.*)

rap[1] (rap), *n.* [< ME. *rap*, *rappe* = Sw. Norw. *rapp* = Dan. *rap*, a rap, tap, smart blow; cf. *rap*[1], *v.*] 1. A heavy or quick, smart blow; a sharp or resounding knock; concussion from striking.

The right arme with a *rappe* reft fro the shuldurs.
Destruction of Troy (E. E. T. S.), l. 7689.

And therewith (as in great anger) he clapped his fyste on the borde a great *rappe*. *Hall*, Edw. V.

Bolus arriv'd, and gave a doubtful tap,
Between a single and a double *rap*.
Colman the Younger, Broad Grins, The Newcastle Apothecary.

2. A sound produced by knocking, as at a door, or by any sharp concussion; specifically, in modern spiritualism, a ticking or knocking noise produced by no apparent physical means, and ascribed to the agency of disembodied spirits.

We may first take the *raps* and the "astral bells," which Mr. Sinnett seems to regard as constituting important test phenomena.
R. Hodgson, Proc. Soc. Psych. Research, III. 201.

rap[2] (rap), *v. t.*: pret. and pp. *rapped* or *rapt*, ppr. *rapping*. [<ME. *rappen*, <Sw. *rappa*, snatch, seize, carry off, = MHG. G. *raffen*, snatch; dial. (LG.) *rappen*, snatch up, take up (> ult. E. *raff*). Cf. *rape*[1] and *rape*[2]. The pp. *rapped*, *rapt*, became confused with *rapt*, < L. *raptus*, pp. of *rapere*, snatch, which is not connected with the Teut. word: see *rapt*[1], *rapt*[2].] 1†. To snatch or hurry away; seize by violence; carry off; transport; ravish.

Some shall be *rapt* and taken alive, as St. Paul saith.
Latimer, 2d Sermon bef. Edw. VI., 1550.

Think ye that . . . they will not pluck from you whatsoever they can *rap* or reave?
Apostolic Benediction of Adrian VI., Nov. 25, 1522 [(Foxe's Martyrs, II. 59).

He ever hastens to the end, and so
(As if he knew it) *raps* his hearer to
The middle of his matter.
B. Jonson, tr. of Horace's Art of Poetry.

But when these people grew niggardly in their offerings, it [the room] was *rapt* from thence.
Sandys, Travailes, p. 160.

Rapt in a chariot drawn by fiery steeds.
Milton, P. L., iii. 522.

2. To transport out of one's self; affect with ecstasy or rapture; carry away; absorb; engross.

What, dear sir,
Thus *raps* you? Are you well?
Shak., Cymbeline, i. 6. 51.

I found thee weeping, and . . .
Am *rapt* with joy to see my Marcia's tears.
Addison, Cato, iv. 3.

Rapt into future times, the bard begun.
Pope, Messiah, l. 7.

To rap and rend (originally *to rape and ren*: see *rape*[2]), to seize and strip; fall on and plunder; snatch by violence.

All they could *rap, and rend*, and pilfer,
To scraps and ends of gold and silver.
S. Butler, Hudibras, II. ii. 789.

From foe and from friend
He'd *rap and* he'd *rend*, . . .
That Holy Church might have more to spend.
Barham, Ingoldsby Legends, II. 206.

rap[3] (rap), *v. t.*; pret. and pp. *rapped*, ppr. *rapping*. [Also *rape*; prob. due in part to *rap*[1], but in part representing ME. *repen*, < AS. *hrepian*, touch, treat, = OFries. *reppa*, touch, move, = MD. *reppen*, move, = LG. *reppen*, touch, move, > G. *rappen*, scrape, = Icel. *hreppa*, catch, obtain, = Sw. *repa*, scratch. Cf. *rape*[6].] To scratch. *Halliwell.* [Prov. Eng.]

rap[4] (rap), *n.* [Perhaps a particular use of *rap*[1]. There is nothing to connect the word with MHG. G. *rappe*, a coin so called: see *rappe*[2].] A counterfeit coin of bad metal which passed current in Ireland for a halfpenny in the reign of George I., before the issue of Wood's halfpence. Its intrinsic value was half a farthing. Hence the phrases *not worth a rap, to care not a rap*, implying something of no value.

It having been many years since copper halfpence or farthings were last coined in this Kingdom, they have been for some time very scarce, and many counterfeits passed about under the name of *raps*.
Swift, Drapier's Letters, letter i.

They [his pockets] was turned out afore, and the devil a *rap*'s left. *Barham*, Ingoldsby Legends, I. 76.

I don't care a *rap* where I go.
C. D. Warner, Their Pilgrimage, p. 301.

Rap halfpenny, a rap.

It is not of very great moment to me that I am now and then imposed on by a *rap halfpenny*.
Blackwood's Mag., XCVI. 392.

Rapaces (rā-pā'sēz), *n. pl.* [NL., pl. of L. *rapax*, rapacious: see *rapacious*.] 1. In *mammal.*, the beasts of prey; carnivorous quadrupeds; the *Carnivora*, now called *Feræ*. Also *Rapacia*.—2. In *ornith.*, the birds of prey; rapacious birds; the *Accipitres* or *Raptores*.

Rapacia (rā-pā'shi-ą), *n. pl.* [NL., neut. pl. of L. *rapax*: see *Rapaces*.] Rapacious mammals; beasts of prey: synonymous with *Rapaces*, 1.

rapacious (rā-pā'shus), *a.* [= F. *rapace* = Pr. *rapatz* = Sp. *rapaz* = It. *rapace*, < L. *rapax* (*rapac-*), rapacious, < *rapere*, seize: see *rape*[2].] 1. Of a grasping habit or disposition; given to seizing for plunder or the satisfaction of greed, or obtaining wrongfully or by extortion; predatory; extortionate: as, a *rapacious* usurer; specifically, of animals, subsisting by capture of living prey; raptorial; predaceous: as, *rapacious* birds or fishes.

What trench can intercept, what fort withstand
The brutal soldier's rude *rapacious* hand.
Rowe, tr. of Lucan's Pharsalia, vii.

A *rapacious* man he [Warren Hastings] certainly was not. Had he been so, he would infallibly have returned to his country the richest subject in Europe.
Macaulay, Warren Hastings.

2. Of a grasping nature or character; characterized by rapacity; immoderately exacting; extortionate: as, a *rapacious* disposition; *rapacious* demands.

Well may then thy Lord, appeased,
Redeem thee quite from Death's *rapacious* claim.
Milton, P. L., xi. 258.

There are two sorts of avarice; the one is but of a bastard kind, and that is the *rapacious* appetite of gain.
Cowley, Avarice.

=Syn. 1. *Rapacious*, *Ravenous*, *Voracious*. *Rapacious*, literally disposed to seize, may note, as the others do not, a distinctive characteristic of certain classes of animals; the tiger is a *rapacious* animal, but often not *ravenous* or *voracious*. *Ravenous* implies hunger of an extreme sort, shown in eagerness to eat. *Voracious* means that one eats or is disposed to eat a great deal, without reference to the degree of hunger: a glutton is *voracious*. Samuel Johnson tended to be a *voracious* eater, because in his early life he had often gone hungry till he was *ravenous*.

rapaciously (rā-pā'shus-li), *adv.* In a rapacious manner; by rapine; by violent seizure.

rapaciousness (rā-pā'shus-nes), *n.* The character of being rapacious; inclination to seize violently or unjustly.

rapacity (rā-pas'i-ti), *n.* [< F. *rapacité* = Pr. *rapacitat* = Sp. *rapacidad* = Pg. *rapacidade* = It. *rapacità*, < L. *rapacita(t-)s*, rapacity, < *rapax* (*rapac-*), rapacious: see *rapacious*.] The character of being rapacious; the exercise of a rapacious or predaceous disposition; the act or practice of seizing by force, as plunder or prey, or of obtaining by extortion or chicanery, as unjust gains: as, the *rapacity* of pirates, of usurers, or of wild beasts.

Our wild profusion, the source of insatiable *rapacity*.
Bolingbroke, To Pope.

In the East the *rapacity* of monarchs has sometimes gone to the extent of taking from cultivators so much of their produce as to have afterwards to return part for seed.
H. Spencer, Prin. of Sociol., § 443.

rapadura (rap-a-dö'rą), *n.* [Also *rappadura*; < Sp. Pg. *rapadura*, shavings or scrapings, < *rapar*, shave, scrape, = F. *râper*, OF. *rasper*, scrape: see *rasp*[1], *v.*] A coarse unclarified sugar, made in Mexico and some parts of South America, and cast in molds.

raparee, *n.* See *rapparee*.

Rapatea (rą-pā'tē-ą), *n.* [NL. (Aublet, 1775), from a native name in Guiana.] A genus of monocotyledonous plants, the type of the order *Rapateaceæ*. It is characterized by an ovary with three cells and three ovules, six anthers each with a spiral appendage, and numerous flowers in a globose head with an involucre of two long leaf-like bracts dilated at the base, and each flower provided with many closely imbricated obtuse appressed bractlets. There are 5 or 6 species, natives of Guiana and northern Brazil. They bear long and narrow radical leaves from a low or robust rootstock, and flowers on a leafless scape, each with three rigid and chaff-like erect sepals, and three broad and spreading petals united below into a hyaline tube.

Rapateaceæ (rā-pā-tē-ā'sē-ē), *n. pl.* [NL. (Koernicke, 1871), < *Rapatea* + *-aceæ*.] An order of monocotyledonous plants of the series *Coronariæ*, typified by the genus *Rapatea*. It is characterized by regular flowers with three greenish sepals and three petals, six stamens with long anthers opening by a pore, a three-celled ovary with few or solitary anatropous ovules, and a lenticular embryo in farinaceous albumen. It includes about 22 species, of 6 genera, once classed among the rushes, and now placed between them and the spiderworts. They are perennial herbs, natives of Brazil, Guiana, and Venezuela, and are mostly robust marsh-plants, with long radical tapering leaves, sessile or petioled, and flowers on a naked scape, commonly in dense involucrate heads resembling those of the *Compositæ*.

rape[1]† (rāp), *v. i.* [< ME. *rapen*, < Icel. *hrapa*, fall, rush headlong, hurry, hasten, = Norw. *rapa*, slip, fall, = Dan. *rappe*, make haste; cf. MLG. *reppen*, hasten, hurry, G. refl. *rappeln*, hasten, hurry. Cf. *rape*[1], *a.* and *n.*, also *rape*[2], *rap*[2], of which *rape*[1] is in part a doublet.] To make haste; hasten; hurry: often used reflexively.

Pas fro my presens on poyne of thi lyffe,
And *rape* of [from] my rewme in a rad haste,
Or thou shall lelly be lost and thou leng ogliter.
Destruction of Troy (E. E. T. S.), l. 1893.

"For I may nought lette," quod that leode, and lyarde he bistrydeth,
And *raped hym* to-Iherusalem-ward the rigte waye to ryde.

rape[1]† (rāp), *n.* [ME., < *rape*[1], *v.*] Haste; precipitancy; a precipitate course.

Row forthe in a *rape* right to the banke,
Tit vnto Troy, tary no lengur.
Destruction of Troy (E. E. T. S.), l. 5633.

So oft a day I mote thy werke renewe,
It to correct and eke to rubbe and scrape;
And al is thorgh thy necligence and *rape*.
Chaucer, Scrivener, l. 7.

rape[1]† (rāp), *a.* [< ME. *rape* = D. *rap*, < Sw. Norw. *rapp* = Dan. *rap*, quick, brisk: see *rape*[1], *v.*] Quick; hasty.

Than byspak his brother, that *rape* was of rees.
Tale of Gamelyn, l. 101.

rape[1]† (rāp), *adv.* [ME., < *rape*[1], *a.*] Quickly; hastily.

I sey and swere hym ful *rape*.
Rom. of the Rose, l. 6516.

rape[2] (rāp), *v.*; pret. and pp. *raped*, ppr. *raping*. [< ME. *rapen* (= MD. *rapen*, *raepen*, D. *rapen*, gather, = MLG. LG. *rapen*, snatch, seize, = Norw. *rapa*, tear off), a var. of *rappen*, seize: see *rap*[2]. This verb has been partly confused with L. *rapere*, seize, whence ult. E. *rapid*, *rapine*, *rapacious*, *rapt*[2], etc.: see *rap*[2], *rapt*[1], *rapt*[2], etc.] I. *intrans.* 1†. To seize and carry off; snatch up; seize; steal.

Ravenows fiches han sum mesure; whanne thei hungren thei *rapyn*; whanne thei ben ful they sparyn.
Wimbelton's Sermon, 1388, MS. Hatton 57, p. 10. (*Halliwell.*)

2. To commit the crime of rape.

There's nothing new, Menippus; as before,
They *rape*, extort, forswear.
Heywood, Hierarchy of Angels (1635), p. 349. (*Latham.*)

II. *trans.* 1. To carry off violently; hence, figuratively, to enrapture; ravish.

To *rape* the fields with touches of her string.
Drayton, Eclogues, v.

My son, I hope, hath met within my threshold
None of these household precedents, which are strong,
And swift to *rape* youth to their precipice.
B. Jonson, Every Man in his Humour, ii. 3.

2. To commit rape upon; ravish.—**To rape and rent**, to seize and plunder. Compare *to rap and rend*, under *rap*[2].

For, though ye loke never so brode and stare,
Ye shul nat winne a myte in that chaffare,
But wasten al that ye may *rape and renne*.
Chaucer, Canon's Yeoman's Tale, l. 411.

rape[2] (rāp), *n.* [< *rape*[2], *v.*] 1. The act of snatching by force; a seizing and carrying away by force or violence, whether of persons or things; violent seizure and carrying away: as, the *rape* of Proserpine; the *rape* of the Sabine women; Pope's "*Rape* of the Lock."

Death is cruell, suffering none escape;
Olde, young, rich, poore, of all he makes his *rape*.
Times' Whistle (E. E. T. S.), p. 128.

Pear grew after pear,
Fig after fig came; time made never *rape*
Of any dainty there. *Chapman*, Odyssey.

2. In *law*, the violation or carnal knowledge of a woman forcibly and against her will. *Forcibly* is usually understood not necessarily to mean violence, but to include negative consent. Statutes in various jurisdictions modify the definition, some by extending it to include carnal knowledge of a girl under 10 either with or without her consent. Rape is regarded as one of the worst felonies. The penalty for it was formerly death, as it is still in some jurisdictions, but is now generally imprisonment for life or for a long term of years. It is now often called *criminal assault*.

3. Something taken or seized and carried away; a captured person or thing. [Rare.]

Where now are all my hopes? oh, never more
Shall they revive, nor Death her *raps* restore!
Sandys.

Rape of the forest, in *Eng. law*, trespass committed in the forest by violence.

rape[3] (rāp), *n.* [< Icel. *hreppr*, a district, prob. orig. 'share' or 'allotment,' < Icel. *hreppa*, catch, obtain, = AS. *hrepian*, *hreppan*, touch: see *rap*[3].] A division of the county of Sussex, in England, intermediate between a hundred and the shire. The county is divided into six rapes.

The *Rape* . . . is . . . a mere geographical expression, the judicial organisation remaining in the hundred.
Stubbs, Const. Hist., § 15.

rape[1] (rāp), *n.* [< ME. *rape*, also *rave*, < OF. *rape*, also *rabe*, later *rave*, F. dial. *reuve*, *reve*, *rabi*, *rova* = Pr. Sp. *raba*, rape, turnip (cf. Pg. *rabão*, horse-radish), = D. *raap* = OHG. *raba*, MHG. *rabe*, *rape*, *rappe*, rape, turnip, G. *rapps*, rape-seed, = LG. *raap*, rape; akin to OHG. *ruoba*, *ruoppa*, MHG. *ruobe*, *rüebe*, G. *rübe*, rape, turnip, etc. = LG. *rove*, *rowe* = Dan. *roe* = Sw. *rofva*, turnip; cf. Gr. *ῥαφανίς*, *ῥαφάνη*, a radish; *ῥαφανος*, a cabbage; root unknown.] 1†. A turnip. *Halliwell.*—2. The colza, coleseed, or rape-seed, a cruciferous plant including the *Brassica campestris* and *B. Napus* of Linnæus, the latter form now considered to be a variety, together with the common turnip, of *B. campestris*, which occurs in a wild state as a weed throughout Europe and Asiatic Russia. Of the two forms named, the former, sometimes called *summer rape*, has rough leaves, and the latter, called *winter rape*, smooth leaves. Rape is extensively grown in Europe and in India for its oleaginous seeds, the source of rape-oil. It is also sown for its leaves, which are used as food for sheep, and are produced in gardens for use as a salad.

rape[5] (rāp), *n.* [< ME. *rape* = MHG. *rappe*, *rape*, G. *rapp*, a stalk of grapes, < OF. *rape*, F. *râpe* = Pr. *raspa* = It. *raspo*, a stem or stalk of grapes.] 1. The stem or stalk of grapes.

Til grapes to the presse beo set
Ther renneth no red wyn in *rape*.
Holy Rood (E. E. T. S.), p. 135.

2. *pl.* The stalks and skins of grapes from which the must has been expressed. *E. H. Knight.*—3. Loose or refuse grapes used in wine-making.

The juice of grapes is drawn as well from the *rape*, or whole grapes plucked from the cluster, and wine poured upon them in a vessel, as from a vat, where they are bruised. *Ray.*

4. A filter used in a vinegar-manufactory to separate the mucilaginous matter from the vinegar. It derives its name from being charged with rapes. *E. H. Knight.*

rape[6] (rāp), *v. t.*; pret. and pp. *raped*, ppr. *raping*. [Prob. a var. of *rap*[3], perhaps affected by F. *râper* (= Sp. Pg. *rapar*), rasp: see *rasp*[1].] To scratch; abrade; scarify. [Prov. Eng.]

Interesting reading; wasn't it? I wish they'd *rape* the character of some other innocent—ha!
The Money-makers, p. 78.

rape[7] (rāp), *n.* An obsolete or dialectal form of *rope*.

rape-butterfly (rāp'but″ėr-flī), *n.* A pierian, *Pieris rapæ*, known in the United States as the *imported cabbage-butterfly*, to distinguish it from several similar native species. See cut under *cabbage-butterfly*, and compare figures under *Pieris*. [Eng.]

rape-cake (rāp'kāk), *n.* A hard cake formed of the residue of the seed and husks of rape (see *rape*[4]) after the oil has been expressed. It is used for feeding oxen and sheep, but is inferior to linseed-cake and some other kinds of oil-cakes; it is also used in considerable quantity as a rich manure.

rapeful† (rāp'fûl), *a.* [< *rape*[2] + *-ful*.] Given to rape or violence. [Rare.]

To teach the *rapeful* Hyeans marriage.
Chapman, Byron's Tragedy, iv. 1. (*Nares.*)

rapely† (rāp'li), *adv.* [ME., also *raply*, *rapliche*, etc.; < *rape*[1], *a.*, + *-ly*[2].] Hastily; hurriedly; quickly; rapidly.

Then seih we a Samaritan cam syttynge on a mule,
Rydynge full *raply* the way that we wente.
Piers Plowman (C), xx. 48.

Raphaneæ (rā-fā'nē-ē), *n. pl.* [NL. (A. P. de Candolle, 1821), < *Raphanus* + *-eæ*.] A tribe of polypetalous plants of the order *Cruciferæ*. It is characterized by an elongated unjointed indehiscent pod, which is a cylindrical or moniliform one-celled and many-seeded silique, or is divided into many small one-seeded cells (in one or two rows), which at length fall apart. It includes 9 genera, of which *Raphanus* is the type, all of them plants of the Old World, and chiefly Asiatic.

Raphanus (raf'a-nus), *n.* [NL. (Tournefort, 1700), < L. *raphanus*, < Gr. *ῥάφανος*, cabbage, radish, *ῥαφανίς*, radish, akin to *ῥάπυς*, *ῥάφυς*, turnip, L. *rapa*, *rapum*, turnip: see *rape*[4].] A genus of cruciferous plants, including the radish, type of the tribe *Raphaneæ*. It is characterized by globose seeds, solitary in the single row of cells formed by constrictions of the pods, which are closed by a pithy substance or sometimes remain continuous throughout. The 6 species are natives of Europe and temperate parts of Asia, and are branching annuals or biennials, with fleshy roots, lyrate lower leaves, and elongated bractless racemes of slender-pedicelled white or yellow purplish-veined flowers, followed by erect spreading, thick, and corky or spongy pods. Some species (genus *Raphanistrum*, Tournefort, 1700) have a short seedless joint below, forming a stalk to the long inflated necklace-like cell which composes the rest of the pod, as *R. Landra*, a yellow-flowered Italian weed with large radical leaves, eaten as a salad, and *R. Raphanistrum*, a coarse weed, the wild or field radish. See *radish*.

raphe (rā'fē), *n.* [NL., prop. *rhaphe*; < Gr. *ῥαφή*, a seam, suture, < *ῥάπτειν*, sew: see *rhapsode*.] 1. In *bot.*: (*a*) In an anatropous or amphitropous (hemitropous) ovule or seed, the adnate cord which connects the hilum with the chalaza, commonly appearing as a more or less salient ridge, sometimes completely embedded in a fleshy testa of the seed. See cuts under *anatropous* and *hemitropous*. (*b*) A longitudinal line or rib on the valves of many diatoms, connecting the three nodules when present. (See *nodule*.) The usual primary classification of genera depends upon its presence or absence.—2. In *anat.*, a seam-like union of two lateral halves, usually in the mesial plane, and constituting either a median septum of connective tissue or a longitudinal ridge or furrow; specifically, in the brain, the median lamina of decussating fibers which extends in the tegmental region from the oblongata up to the third ventricle.—**Raphe of the corpus callosum**, a longitudinal furrow on the median line of its dorsal surface, bounded by the mesial longitudinal striæ.—**Raphe of the medulla oblongata**, the median septum, composed of fibers which run in part dorsoventrally, in part longitudinally, and in part across the septum more or less obliquely, together with nerve-cells.—**Raphe of the palate**, a linear median ridge extending from a small papilla in front, corresponding with the inferior opening of the anterior palatine foramen, back to the uvula.—**Raphe of the penis**, the extension of the raphe of the scrotum forward on the under side of the penis.—**Raphe of the perineum**, the extension of the raphe of the scrotum backward on the perineum.—**Raphe of the pharynx**, the median seam on the posterior wall of the pharynx.—**Raphe of the scrotum**, a slight median ridge extending forward to the under side of the penis, and backward along the perineum to the margin of the anus.—**Raphe of the tongue**, a slight furrow along the middle of the dorsal surface, terminating posteriorly in the foramen cæcum.

Raphia (rā'fi-ä), *n.* [NL. (Palisot de Beauvois, 1804), < *raffia*, the native name of the Madagascar species.] A genus of palms of the tribe *Lepidocaryeæ*, type of the subtribe *Raphieæ* (which is distinguished from the true ratan-palms, *Calameæ*, by a completely three-celled ovary). It is characterized by pinnately divided leaves crowning an erect and robust trunk, and by a fruit which becomes one-celled, is beaked with the three terminal stigmas, and has a thick pericarp tessellated with overlapping scales, spongy within and containing a single oblong furrowed seed with very hard osseous albumen. There are 5 species, natives of tropical Africa and Madagascar, with one, *R. tædigera*, the jupati-palm (which see), native in America from the mouths of the Amazon to Nicaragua. All inhabit low swampy lands and banks near tide-water. Their trunks are unarmed and of little height, but their leaves are spiny and often over 50 feet in length, the entire tree becoming thus 60 or 70 feet in height to their erect tips. The large pendulous flower-spikes reach 6 feet in length, contain flowers of both sexes, and have their numerous branches set in two opposite rows, their flower-bearing branchlets resembling flattened catkins. In fruit the spike sometimes becomes 15 feet long, and weighs 200 or even 300 pounds, bearing numerous egg-like brown and hard fruits often used as ornaments. *R. Raffia*, which produces the largest spadices, is known as the *raffia-palm*. (See *raffia*.) *R. vinifera* supplies the toddy of western tropical Africa, and its leafstalks are used in various ways.

Raphia vinifera.

raphides, *n.* Plural of *raphis*.

Raphidia (rā-fid'i-ä), *n.* [NL. (Linnæus, 1748), < Gr. *ῥαφίς* (*ῥαφιδ-*), a needle, a pin: see *raphis*.] A notable genus of neuropterous insects, of the family *Sialidæ* or giving name to the family *Raphidiidæ*. The prothorax is cylindrical, and the wings are furnished with a pterostigma. The larvæ differ from all other *Sialidæ* in not being aquatic; they live under bark. The genus is represented in North America only on the Pacific coast, although common in Europe.

raphidian (rā-fid'i-an), *a.* 1. In *bot.*, of the nature of or containing raphides: as, *raphidian* cells in a plant.—2. In *zoöl.*, of or pertaining to the genus *Raphidia*.

An extraordinary *rapt* and act of prophesying.
Ep. Morton, Discharge of Imput. (1633), p. 174.

Raptatores (rap-ta-tō'rēz), *n. pl.* [NL., pl. of *raptator*, < L. *raptare*, seize and carry off, waste, ravage, plunder: see *rapt*[2], *rapt*[3].] In *ornith.*, same as *Raptores*. *Illiger*, 1811.

Raptatoria (rap-ta-tō'ri-ä), *n. pl.* [NL.: see *Raptatores*.] In *entom.*, same as *Raptoria*.

raptatorial (rap-ta-tō'ri-al), *a.* [< *raptatory* + *-al*.] Same as *raptorial*.

raptatory (rap'ta-tō-ri), *a.* [< NL. **raptatorius*, < *raptator*, a robber, plunderer: see *Raptatores*.] In *entom.*, formed for seizing prey; raptorial.

rapter† (rap'tėr), *n.* Same as *raptor*, 1.

raptor (rap'tor), *n.* [= Sp. Pg. *raptor* = It. *rattore*, < L. *raptor*, robber, plunderer, abductor, < *rapere*, pp. *raptus*, seize, carry off: see *rapt*[2], *rapt*[3].] 1†. A ravisher; a plunderer.

To have her harmless life by the lewd *raptor* spilt.
Drayton, Polyolbion, x. 140.

2. [*cap.*] [NL.] A genus of coleopterous insects.

Raptores (rap-tō'rēz), *n. pl.* [NL., pl. of L. *raptor*, robber, plunderer: see *raptor*.] An order of *Aves*, the *Accipitres* of Linnæus, the *Raptatores*, *Rapaces*, or *Dictamorphæ* of some authors; the raptorial or rapacious birds; the birds of prey. They have an epignathous cered beak, and talons generally fitted for grasping live prey. The bill is hooked and often also toothed. The toes are four, three in front and one behind, with large crooked claws; the outer toe is sometimes versatile. The plumage is aftershafted or not; the oil-gland is present and usually tufted. The carotids are two; the syrinx has not more than one pair of intrinsic muscles. Cæca are present (except in *Cathartidæ*). The maxillopalatines are united to an ossified septum; the angle of the mandible is not recurved. The *Raptores* are found in every part of the world. There are upward of 500 species, mostly belonging to the two families *Falconidæ* and *Strigidæ*. The *Raptores* are divided into 4 suborders or superfamilies: (1) the African *Gypogeranides*; (2) the American *Cathartides*; (3) the cosmopolitan diurnal birds of prey, *Accipitres*; and (4) the cosmopolitan nocturnal birds of prey, the owls, *Striges*.

Raptores.
1, head and foot of golden eagle (*Aquila chrysaëtos*); 2, head and foot of gerfalcon (*Falco gyrfalco*).

Raptoria (rap-tō'ri-ä), *n. pl.* [NL., < L. *raptor*, robber: see *Raptores*.] In *entom.*, in Westwood's system (1839), a division of orthopterous insects; the *Mantidæ* (which see). Westwood's *Raptoria* were a part of Latreille's *Cursoria*, the rest of which Westwood called *Ambulatoria* and *Cursoria*. Also *Raptatoria*.

raptorial (rap-tō'ri-al), *a.* and *n.* [< *raptori-ous* + *-al*.] I. *a.* 1. Rapacious; predatory; preying upon animals; of or pertaining to the *Raptores* or *Raptoria*.—2. Fitted for seizing and holding; prehensile: as, the *raptorial* beak or claws of birds; the *raptorial* palps of insects.—**Raptorial legs**, in *entom.*, legs in which the tibiæ and tarsi turn back on the femur, often fitting into it like the blade of a pocket-knife into a handle, the tibiæ may also be armed with teeth or spines, thus forming very powerful seizing-organs. This type is found only in the front legs, and it is most fully developed in the *Mantidæ*. See cut under *Mantis*.

II. *n.* A bird of prey; a member of the *Raptores*.

raptorious (rap-tō'ri-us), *a.* [< NL. **raptorius*, < L. *raptor*, a robber, plunderer: see *raptor*.] In *entom.*, same as *raptorial*. *Kirby*. [Rare.]

rapture (rap'tūr), *n.* [< *rapt*[1] + *-ure*.] 1†. A violent taking and carrying away; seizure; forcible removal.

Spite of all the *rapture* of the sea,
This jewel holds his building on my arm.
Shak., Pericles, ii. 1. 161.

When St. Paul had his *rapture* into heaven, he saw fine things. *Jer. Taylor*, Works (ed. 1835), II. 131.

2. Violent transporting movement; a rapid carrying or going along; moving energy.

Wave rolling after wave, where way they found;
If steep, with torrent *rapture*; if through plain,
Soft ebbing. *Milton*, P. L., vii. 299

With the *rapture* of great winds to blow
About earth's shaken cognes.
Lowell, Agassiz, vi. 1.

3. A state of mental transport or exaltation; ecstasy. (*a*) Ecstatic pleasure; rapt delight or enjoyment; extreme joy over or gladness on account of something.

I have never heard
Praise of love or wine
That panted forth a flood of *rapture* so divine.
Shelley, To a Skylark.

To exercise a devilish ingenuity in inventions of mutual torture became not only a duty but a *rapture*.
Motley, Dutch Republic, II. 426.

(*b*) Ecstatic elevation of thought or feeling; lofty or soaring enthusiasm; exalted or absorbing earnestness.

This man, beyond a Stoick apathy, sees truth as in a *rapture*, and cleaves to it. *Milton*, Apology for Smectymnuus

You grow correct that once with *rapture* writ.
Pope, Epil. to the Satires, i. 3.

There is a *rapture* on the lonely shore . . .
By the deep sea, and music in its roar.
Byron, Childe Harold, iv. 178.

4. A manifestation of mental transport; an ecstatic utterance or action; an expression of exalted or passionate feeling of any kind; a rhapsody.

Her [Cassandra's] brain-sick *raptures*
Cannot distaste the goodness of a quarrel
Which hath our several honours all engaged
To make it gracious. *Shak.*, T. and C., ii. 2. 122.

Are not groans and tears
Harmonious *raptures* in th' Almighty's ears?
Quarles, Emblems, iv. 15.

5†. An ecstasy of passionate excitement; a paroxysm or fit from excessive emotion. [Rare.]

Your prattling nurse
Into a *rapture* lets her baby cry.
Shak., Cor., ii. 1. 223.

=Syn. 3. Transport, bliss, exaltation.

raptured (rap'tūrd), *a.* [< *rapture* + *-ed*[2].] In a state of rapture: characterized by rapture or ecstasy; enraptured.

'Raptur'd I stood, and as this hour amaz'd,
With rev'rence at the lofty wonder gaz'd.
Pope, Odyssey, vi. 199.

The latent Damon drew
Such maddening draughts of beauty to his soul,
As for a while o'erwhelm'd his *raptured* thought
With luxury too-daring. *Thomson*, Summer, l. 1333.

That favored strain was Surrey's *raptured* line.
Scott, L. of L. M., vi. 19.

rapturist (rap'tūr-ist), *n.* [< *rapture* + *-ist*.] One who habitually manifests rapture; an enthusiast. [Rare.]

Such swarms of prophets and *rapturists* have flown out of those hives in some ages.
J. Spencer, Vanity of Vulgar Prophecies (1665), p. 43.

rapturous (rap'tūr-us), *a.* [< *rapture* + *-ous*.] Of the character of rapture; marked by rapture; exciting or manifesting rapture; ecstatically joyous or exalted: as, *rapturous* exultation; a *rapturous* look; a *rapturous* scene.

His welcome, before enthusiastic, was now *rapturous*.
Everett, Orations, I. 480.

rapturously (rap'tūr-us-li), *adv.* In a rapturous manner: with rapture; ecstatically.

raptus melancholicus (rap'tus mel-an-kol'i-kus). [NL.: L. *raptus*, a seizure; *melancholicus*, melancholic: see *rapt*[2], *n.*, and *melancholic*.] A motor crisis or outbreak of uncontrollable violence developed in a melancholic person from the intensity of his mental anguish.

raquet, *n.* See *racket*[2].

raquette (ra-ket'), *n.* [F.] A racket.—**Raquette head-dress**, a kind of head-dress in use toward the close of the sixteenth century, in which the hair is drawn back from the forehead and temples, and raised in a sort of crest; a kind of chignon was arranged at the back of the head and covered by a cap of fine linen, darned net embroidery, or some similar material.

rara (rā'rä), *n.* [S. Amer.; imitative of its cry.] A bird, the South American plant-cutter, *Phytotoma rara*. Also called *rarita*. See cut under *Phytotoma*.

rara avis (rā'rā ā'vis), pl. *raræ aves* (rā'rē ā'vēz). [L., in full *rara avis in terris*, 'a rare bird on earth'—a phrase applied by Horace (Sat. ii. 2, 26) to the peacock: *rara*, fem. of *rarus*, rare, uncommon; *avis*, bird: see *rare*[1] and *Aves*.] A rare bird; hence, a person or an object of a rare kind or character; a prodigy.

rare[1] (rār), *a.* [< ME. *rare* = D. *raar* = MLG. *rār*, LG. *raar* = G. Dan. Sw. *rar*, < OF. *rare*, *rere*, F. *rare*, dial. *raire*, *rale*, *rasc* = Sp. Pg. It. *raro*, < L. *rarus*, thin, not dense, thinly scattered, few, rare, uncommon; root unknown.] 1. Thin; porous; not dense; of slight consistence; rarefied; having relatively little matter in a given volume: as, a *rare* substance; the *rare* atmosphere of high mountains.

The fiend
O'er log or steep, through strait, rough, dense, or *rare*,
With head, hands, wings, or feet pursues his way.
Milton, P. L., ii. 948.

Water is nineteen times lighter, and by consequence nineteen times, *rarer* than gold. *Newton*, Opticks, II. iii. 8.

2. Thinly scattered; coming or occurring at wide intervals; sparse; dispersed.

Cucumber in this moone is sowen *rare*.
Palladius, Husbondrie (E. E. T. S.), p. 110.

The cattle in the fields and meadows green:
Those *rare* and solitary, these in flocks
Pasturing at once, and in broad herds upsprung.
Milton, P. L., vii. 461.

He left the barren-beaten thoroughfare,
Chose the green path that show'd the *rarer* foot.
Tennyson, Lancelot and Elaine.

3. Very uncommon or infrequent; seldom occurring or to be found; hardly ever met with.

She calls me proud, and that she could not love me
Were man as *rare* as phœnix.
Shak., As you Like it, iv. 3. 17.

It is the *rarest* thing that ever I saw in any place, neyther do I thinke that any citie of Christendome hath the like. *Coryat*, Crudities, I. 192.

When so many have written too much, we shall the more readily pardon the *rare* man who has written too little or just enough. *Lowell*, New Princeton Rev., I. 161.

Hence—4. Remarkable from uncommonness; especially, uncommonly good, excellent, valuable, fine, or the like; of an excellence seldom met with.

Good discent, *rare* features, vertuous partes.
Times' Whistle (E. E. T. S.), p. 43.

I think my love as *rare*
As any she belied with false compare.
Shak., Sonnets, cxxx.

They write to me from England of *rare* News in France.
Howell, Letters, I. vi. 37.

Ha! ha! ha! yes, yes, I think it a *rare* joke.
Sheridan, School for Scandal, iii. 3.

She 's a *rare* hand at sausages; there 's noane like her in a' the three Ridings. *Mrs. Gaskell*, Sylvia's Lovers, viii.

=Syn. 3. *Rare, Scarce*, infrequent, unusual. *Rare* implies that only few of the kind exist: as, perfect diamonds are *rare*. *Scarce* properly implies a previous or usual condition of greater abundance. *Rare* means that there are much fewer of a kind to be found than may be found where *scarce* would apply.

A perfect union of wit and judgment is one of the *rarest* things in the world. *Burke.*

Where words are *scarce*, they are seldom spent in vain.
Shak., Rich. II., ii. 1. 7.

Then touch'd upon the game, how *scarce* it was
This season. *Tennyson*, Audley Court.

4. Singular, extraordinary, incomparable, choice.

rare[2] (rãr), *a.* [A dial. form of *rear*[2], q. v.] Not thoroughly cooked; partly cooked; underdone: applied to meat: as, *rare* beef; a *rare* chop. [In common use in the United States, but now only dialectal in Great Britain.]

New-laid eggs, which Bauds' busy care
Turned by a gentle fire, and roasted *rare*.
Dryden, tr. of Ovid's Metamorph., viii. 98

Scanty mutton scrags on Fridays, and rather more savoury, but grudging, portions of the same flesh, rotten-roasted or *rare*, on the Tuesdays *Lamb*, Christ's Hospital.

The word *rare*, applied to meat not cooked enough, did sound really strange to me; but an eminent citizen of yours presently showed me that it had for it the authority of Dryden. *E. A. Freeman*, Amer. Lects., p. 69.

rare[3] (rãr), *adv.* [Also *rear;* prob. a reduction of *rather* (with sense of the positive *rath*): see *rather, rath*[1], *adv.* Cf. *rareripe* for *rathripe*.] Early. [Prov. Eng.]

rare[4] (rãr), *v.* A dialectal form of *rear*[1]. [U. S.]

rare[5]†, *v.* An obsolete form of *roar*.

rarebit (rãr'bit), *n.* [An altered form of *rabbit*[1] in the phrase *Welsh rabbit*, simulating an absurd derivation from *rare*[1] + *bit*, as if 'a rare delicacy.'] See *Welsh rabbit*, under *rabbit*[1].

raree-show (rar'ē-shō), *n.* [Appar. contracted from **rarity-show*, < *rarity* + *show*, *n.* (cf. G. *raritäten-kabinet*, a 'cabinet of curiosities or rarities,' *raritätenkasten*, peep-show, D. *rarekijkkas*, a 'rare show,' show-box).] A peep-show; a show carried about in a box.

Thou didst look into it with as much innocency of heart as ever child look'd into a *raree show* box.
Sterne, Tristram Shandy, viii. 21.

rarefaction (rar-ē-fak'shon), *n.* [< F. *rarefaction* = Pr. *rarefaccio* = Sp. *rarefaccion* = Pg. *rarefacção* = It. *rarefazione*, < L. as if **rarefactio(n-)*, < *rarefacere*, pp. *rarefactus*, rarefy: see *rarefy*.] The act or process of rarefying or making rare, or of expanding or distending a body or mass of matter, whereby the bulk is increased, or a smaller number of its particles occupy the same space; also, the state or condition so produced: opposed to *condensation*. The term is used chiefly in speaking of gases, the terms *dilatation* and *expansion* being applied in speaking of solids and liquids. There was formerly a dispute as to whether rarefaction consisted merely of an increase in the mean distance of the particles (as it is now held to do), or in an enlargement of the particles themselves, or finally in an intrusion of foreign particles. In the strictest sense, the word was understood to signify the second action.

Either we must say . . . that the selfsame body does not only obtain a greater space in *rarefaction*, . . . but adequately and exactly filled it, and so when rarefied acquires larger dimensions without either leaving any vacuities betwixt its component corpuscles or admitting between them any new or extraneous substance whatsoever. Now it is to this last (and, as some call it, rigorous) way of *rarefaction* that our adversary has recourse.
Boyle, Spring of the Air, I. iii.

When the *rarefaction* of a gas is extreme (one-millionth) its matter becomes radiant.
A. Daniell, Prin. of Physics, p. 584.

rarefactive (rar-ē-fak'tiv), *a.* [= F. *rarefactif* = Pr. *rarefactiu* = Sp. Pg. *rarefactivo;* as *rarefaction*) + *-ive*.] Causing rarefaction; making rarer or less dense. [Rare.]

The condition of the bone was not a tumour, but a *rarefactive* disease of the whole bone accompanied by new growth. *Lancet*, No. 3123, p. 684.

rarefiable (rar'ē-fī-ą-bl), *a.* [< *rarefy* + *-able*.] Capable of being rarefied.

rarefy (rar'ē-fī), *v.*; pret. and pp. *rarefied*, ppr. *rarefying*. [Also, incorrectly, *rarify:* < F. *raréfier* = Pr. *rarefiar* = Sp. *rarificar* = It. *rarificare*, < ML. as if **rarificare*, < L. *rarefacere* (> Pg. *rarefazer*), make thin or rare, < *rarus*, thin, rare, + *facere*, make.] **I.** *trans.* To make rare, thin, porous, or less dense; expand or enlarge without adding any new matter; figuratively, to spread or stretch out; distend: opposed to *condense*.

Presently the water, very much *rarified* like a mist, began to rise. *Court and Times of Charles I.*, I. 113.

For plain truths lose much of their weight when they are *rarify'd* into subtillities. *Stillingfleet*, Sermons, I. iv.

A body is commonly said to be *rarefied* or dilated (for I take the word in a larger sense than I know many others do) . . . when it acquires greater dimensions than the same body had before. *Boyle*, Works, I. 144.

Rarefying osteitis, an osteitis in which the Haversian canals become enlarged and the bone rarefied. Also called *osteoporosis*.

II. *intrans.* To become rare; pass into a thinner or less dense condition.

Earth *rarefies* to dew; expanded more,
The subtil dew in air begins to soar. *Dryden.*

rarely[1] (rãr'li), *adv.* [< *rare*[1], *a.*, + *-ly*[2].] **1.** Seldom; not often: as, things *rarely* seen.

His friend alwayes shall doe best, and you shall *rarely* heare good of his enemy.
Bp. Earle, Micro-cosmographie, A Partiall Man.

The good we never miss we *rarely* prize.
Cowper, Retirement, l. 406.

2. Finely; excellently; remarkably well; with a rare excellence.

I could play Ercles *rarely*, or a part to tear a cat in, to make all split. *Shak.*, M. N. D., i. 2. 31.

Argyll has raised an hunder men,
An hunder harness'd *rarely*.
Bonnie House of Airly (Child's Ballads, VI. 186).

You can write *rarely* now, after all your schooling, I should think. *George Eliot*, Mill on the Floss, iii. 3.

3. In excellent health: in quasi-adjective use. Compare *purely* in like use. [Prov. Eng. and U. S.]

rarely[2] (rãr'li), *adv.* [< *rare*[2], *a.*, + *-ly*[2].] So as to be underdone or only partially cooked: said of meats: as, a roast of beef *rarely* cooked.

rareness[1] (rãr'nes), *n.* [< *rare*[1], *a.*, + *-ness*.] **1.** Thinness; tenuity; rarity: as, the *rareness* of air or vapor.—**2.** The state of being scarce, or of happening seldom; uncommonness; infrequency.

If that the follye of men hadde not sette it [gold] in higher estimation for the *rareness* sake.
Sir T. More, Utopia (tr. by Robinson), ii. 6.

Rareness and difficulty give estimation
To all things are i' th' world.
Webster, Devil's Law-Case, v. 6.

3. Uncommon character or quality; especially, unusual excellence, fineness, or the like. [Rare.]

Roses set in the midst of a pool, being supported by some stay; which is matter of *rareness* and pleasure, though of small use *Bacon*, Nat. Hist., § 407.

His providences toward us are to be admired for the *rareness* and graciousness of them. *Sharp*, Sermons, II. i.

rareness[2] (rãr'nes), *n.* [< *rare*[2], *a.*, + *-ness*.] The state of being rare or underdone in cooking.

rareripe (rãr'rip), *a.* and *n.* [A reduction of *rathripe*, q. v.] **I.** *a.* Early ripe; ripe before others, or before the usual season: as, *rareripe* peaches.

II. *n.* An early fruit, particularly a kind of peach which ripens early.

rarify (rar'i-fī), *v.*; pret. and pp. *rarified*, ppr. *rarifying*. A common but incorrect spelling of *rarefy*.

rarita (rä-rē'tä), *n.* [S. Amer.] Same as *rara*.

rarity (rar'i-ti), *n.*; pl. *rarities* (-tiz). [= OF. *rarité, rareté*, F. *rareté* = Pr. *raritat, raretat* = Sp. *rarudad* = Pg. *raridade* = It. *rarità* = D. *rariteit* = G. *rarität* = Dan. Sw. *rarite t*, < L. *rarita(t-)s*, the state of being thin or not dense, looseness of texture, tenuity, also fewness, rarity, a rare or curious thing, esp. in pl., < *rarus*, thin, rare: see *rare*[1].] **1.** The condition of being rare, or not dense, or of occupying, as a corporeal substance, much space with little matter; thinness; tenuity: opposed to *density:* as, the *rarity* of a gas.

This I do . . . only that I may better demonstrate the great *rarity* and tenuity of their imaginary chaos
Bentley, Sermons

A few birds . . . seemed to swim in an atmosphere of more than usual *rarity*.
R. L. Stevenson, Treasure of Franchard.

2. The state of being uncommon or of infrequent occurrence; uncommonness; infrequency.

Alas, for the *rarity*
Of Christian charity
Under the sun!
Hood, Bridge of Sighs.

3. Something that is rare or uncommon; a thing valued for its scarcity or for its unusual excellence.

Gon. But the rarity of it is—which is indeed almost beyond credit.
Seb. As many vouched *rarities* are.
Shak., Tempest, ii. 1. 60.

How ignorant had we been of the beauty of Florence, of the monuments, urns, and *rarities* that yet remain.
I. Walton, Complete Angler, p. 34.

In climates where wine is a *rarity* intemperance abounds. *Macaulay*, Milton.

ras[1] (ras), *n.* [< Ar. *ras*, head; cf. *rais, reis*, head, chief: see *reis*[2].] **1.** A promontory; cape; peak: a term prefixed to the names of promontories or capes on the Arabian and African coasts, etc. —**2.** In Abyssinia, the title of the vizir or chief minister, and also of generals and governors. The ras of the empire was for a long period—down to the accession of the usurping King Theodore in 1855—the actual ruler, the nominal Negus being merely a puppet. The ras commonly owed his position to superior military strength as governor of some province.

ras[2] (rä), *n.* [F.: see *rash*[4].] A smooth material of wool, and also of silk: a French term used in English, especially in certain combinations.

rasamala (ras-ą-mä'lą), *n.* [Native name.] A tree of Java and parts of India, *Altingia excelsa*, of the *Hamamelideæ*, closely related to the liquidambars. It has a tall straight trunk, ascending 90 or 100 feet before branching.

'scrapings,' < OF. **rasquer*, scrape, = Sp. Pg. *rascar*, scratch, *rasgar*, tear, rend, scrape, = Olt. *rascare*, burnish, rub, furbish (see *rash*[5]), < LL. **rasicare*, freq. of L. *radere*, pp. *rasus*, scrape: see *rase*[1], *raze*[1].] **I.** *n.* **1†.** The commonalty of people; the vulgar herd; the general mass.

So rathely they rusche with roselde speris
That the *raskaille* was rade, and rane to the grefes.
Morte Arthure (E. E. T. S.), l. 2882.

Lo! here the fyn and guerdon for travaille,
Of Jove, Apollo, of Mars and swich *rascaille*.
Chaucer, Troilus, v. 1853.

The church is sometime taken for the common *rascal* of all that believe, whether with the mouth only, and carnally without spirit, neither loving the law in their hearts.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), [p. 114.

2. In *hunting*, a refuse or despicable beast or class of beasts; an animal, or animals collectively, unfit to chase or to kill, on account of ignoble quality or lean condition; especially, a lean deer.

I wondir not hyly thoug heed-dere thou ffallid;
ffor litill on zoure lyf the list ffor to rewe
On *rascaile* that rorid with ribbis so lene,
ffor ffaute of her ffode that ffatereris stelen.
Richard the Redeless, ii. 110.

Other bestys all,
Where so ye theym fynde, *rascall* ye shall them call.
Quoted in *Walton's* Complete Angler, p. 31.

Horns? Even so. Poor men alone? No, no; the noblest deer hath them as huge as the *rascal*.
Shak., As you Like it, iii. 3. 58.

3†. A low or vulgar person; one of the rabble; a boor or churl.

'Tis true, I have been a *rascal*, as you are,
A fellow of no mention, nor no mark,
Just such another piece of dirt, so fashion'd.
Fletcher (*and another?*), Prophetess, v. 2.

4. A low or mean fellow; a tricky, dishonest person; a rogue; a knave; a scamp: used in

objurgation with much latitude, and often, like *rogue*, with slight meaning. Compare *rascally*.

I have matter in my head . . . against your cony-catching *rascals*, Bardolph, Nym, and Pistol.
Shak., M. W. of W., i. 1. 128.

Shall a *rascal*, because he has read books, talk pertly to me? *Cibber.*

There were many men who wore green turbans, he said, that were very great *rascals;* but he was a Saint, which was better than a Sherriffe. *Bruce*, Source of the Nile, I. 76.

II. *a.* **1.** Paltry; worthless; unworthy of consideration; in a special use, unfit for the chase, as a lean deer: used of things or animals. [Obsolescent.]

Yet *rashness* is a better fault than fear.
Dryden, Tyrannic Love, Prol., l. 21.

2. A rash act; a reckless or foolhardy deed.

Why not set forth, if I should do
This *rashness*, that which might ensue
With this old soul in organs new?
Tennyson, Two Voices.

=Syn. 1. *Rashness*, *Temerity*. *Rashness* has the vigor of the Anglo-Saxon, *temerity* the seleetness and dignity of the Latin. *Temerity* implies personal danger, physical or other: as, the *temerity* of undertaking to contradict Samuel Johnson; *temerity* in going upon thin ice. *Rashness* is broader in this respect. *Rashness* goes by the feelings without the judgment; *temerity* rather disregards the judgment. *Temerity* refers rather to the disposition, *rashness* to the conduct. See *adventurous*.

For *rashness* is not courage. *Rashness* flings itself into danger without consideration or foresight. But courage counts the cost, and does not make any display of itself.
J. F. Clarke, Self-Culture, p. 336.

As the note of warlike preparation reached them [the Moors] in their fastnesses, they felt their *temerity* in thus bringing the whole weight of the Castilian monarchy on their heads. *Prescott*, Ferd. and Isa., ii. 7.

W. Browne, Britannia's Pastorals, i. 5.

2. The plant that produces this berry. The common garden raspberry, the first of the name, is *Rubus Idæus*, a native of Europe and Asiatic Russia—a shrub with perennial creeping rootstock, nearly erect, prickly, biennial stems, and a red pleasant fruit. It was cultivated by the Romans in the fourth century, and is the source of the best raspberries, affording many varieties, some of them yellow-fruited. The wild red raspberry, *R. strigosus*, of North America, is a very similar plant, but not quite so tall, the leaves being thinner, and the fruit not so firm, large, or well-flavored. It is common northward, especially on newly cleared grounds, and its fruit is much gathered; while under cultivation it has yielded several good varieties. The black raspberry, thimbleberry, or blackcap is the American *R. occidentalis*, a shrub with long recurved biennial stems, rooting at the tips, and a black fruit. It is very productive with little care, and affords good garden varieties.—**Dwarf raspberry**, an unimportant American species, *Rubus triflorus*, with herbaceous trailing or ascending stems, resembling a blackberry.—**Flowering raspberry**, a name of two American species, *Rubus odoratus*, the purple, and *R. Nutkanus*, the white flowering raspberry. The former is a rather ornamental shrub of the eastern United States, with ample three- to five-lobed leaves, and showy purple or pink flowers blooming all summer, the fruit of little worth. In England it is sometimes called *Virginian raspberry*. *R. Nutkanus* is a similar western species with white flowers; also, and better, called *salmon-berry*.—**Himalayan raspberry**, *Rubus roseifolius*, an East Indian species widely naturalized and cultivated in warm countries, and often grown as a greenhouse shrub, on account of its profusion of white, often double, flowers. The large fruit consists of many minute orange-red grains.—**Raspberry vinegar**, a drink made with sugar, vinegar, and the juice of raspberries.—**Virginian raspberry**. See *flowering raspberry*.

raspberry-borer (rāz'ber-i-bōr″ėr), *n.* The larva of one of the clear-winged sphinxes or hornet-moths, *Bembecia marginata*, common in the United States. It bores the roots of raspberries and blackberries. The larva of a beetle, *Oberea bimaculata*, which also bores into the same plants, is often called by this name.

Raspberry borer (*Bembecia marginata*)
a, male; *b*, female. (Natural size.)

raspberry-bush (rāz'ber-i-bŭsh), *n.* The shrub, bush, or bramble producing any of the kinds of raspberry.

raspberry-jam tree (raz'ber-i-jam trē). One of the Australian wattle-trees, *Acacia acuminata*. Its wood is used in cabinet-work, and has the odor of jam made from raspberries.

rasped (räspt), *a.* [Pp. of *rasp*[1], *v.*] 1. Affected as if by rasping; hoarse or raucous, as the voice; raspy; nervous or irritable, as from continued slight provocations.—2. In *bookbinding*, said of book-covers which have the sharp angles taken off, but are not beveled.

rasper (räs'pėr), *n.* [< *rasp*[1] + *-er*[1].] 1. One who or that which rasps; a cutting scraper. Specifically—(*a*) A coarse file for removing the burnt crust from over-baked bread. (*b*) A rasping-machine; an instrument for rasping sugar-cane, beet-root, or the like to shreds; a large grater.

The typical representative of the internal system of grating is Champonnois' *rasper*.
Spons' Encyc. Manuf., II. 1838.

2. In *hunting*, a difficult fence. [Colloq.]

Three fourths of our fences . . . average somewhat better than four feet in height, with an occasional *rasper* that will come well up to five. *The Century*, XXXII. 396.

3. A contrivance for taking fish, consisting of several bare hooks fastened back to back, to be jerked through the water with a line; a pull-devil. [Canada.]

rasp-house (räsp'hous), *n.* A place where wood is dressed or reduced to powder by rasping, for use in dyeing, etc.

We went to see the *Rasp-house*, where the lusty knaves are compell'd to worke, and the rasping of Brasill and Logwood is very hard labour.
Evelyn, Diary, Aug. 19, 1641.

raspicet, *n.* Same as *rasp*[2].

rasping (räs'ping), *n.* [Verbal n. of *rasp*[1], *v.*] A particle rasped off from a body or mass of matter. Compare *filing*[1], 2.

The wood itself, either reduced to shavings, *raspings*, or powder. *W. Crookes*, Dyeing and Calico-printing, p. 337.

rasping (räs'ping), *p. a.* [Ppr. of *rasp*[1], *v.*] 1. Characterized by grating or scraping; as, a *rasping* sound; hence, irritating; exasperating.—2. In *hunting*, said of a fence difficult to take.

You cannot . . . make him keep his seat over a *rasping* fence. *Dr. J. Brown*, Spare Hours, 3d ser., p. 60.

raspingly (räs'ping-li), *adv.* With a harsh, rasping sound or effect; in a coarse, harsh manner; gratingly; irritatingly; exasperatingly.

I told him to stay at home, quite *raspingly*, and he was very ready to admit that I had done him a good turn in doing so. *T. H. Burnett*, Pretty Polly Pemberton, vii.

rasping-machine (räs'ping-ma-shēn′), *n.* 1. A machine for rasping wood and bark for making dyes, tinctures, etc.; a bark-cutting machine.—2. A machine for grating beet-root, for making sugar. *E. H. Knight.*

rasping-mill (räs'ping-mil), *n.* A saw-like machine for reducing a substance to shreds or fine particles, as a bark-cutter or a grinding-mill for beet-roots; a rasping-machine; a rasper.

raspis†, *n.* Same as *rasp*[2].

The *raspis* is planted in gardens. *Gerard.*

Raspis are of the same vertue that common brier or bramble is of. It were good to keepe some of the juyce of *raspis*-berries in some wooden vessel, and to make it, as it were, *raspis* wine. *Langham*, Garden of Health, p. 522.

rasp-palm (räsp'päm), *n.* A common palm of the Amazon region, *Iriartea exorhiza*, notable in that its stem is supported by a cone of aërial roots, of sufficient height for a man to pass beneath. These roots are covered with hard tubercles, and are used by the natives as graters, whence the name.

rasp-pod (räsp'pod), *n.* An Australian tree, *Flindersia australis:* so named from its woody capsules, covered with tubercles and used as graters.

rasp-punch (räsp'punch), *n.* A tool, rather more like a cold-chisel than a punch, used for forming the teeth of rasps by cutting into, and turning upward above the surface, parts of the metal before it has been hardened and tempered.

raspy (räs'pi), *a.* [< *rasp*[1] + *-y*[1].] Grating; harsh; rough.

Such a *raspy*, untamed voice as that of his I have hardly heard. *Carlyle*, Misc., IV. 197. (*Davies.*)

rasse[1] (ras), *n.* [< Javanese *rasa*, smell, taste, < Skt. *rasa*, sap, taste, savor.] A kind of civet-cat; the lesser civet, a viverrine quadruped of the genus *Viverricula*, *V. malaccensis*, widely distributed in China, India, the Malay peninsula, Java, etc. It is about 20 inches long without the tail, and is sometimes called the *Malacca weasel*. Its perfume, called by the natives *dedes*, is secreted in a double pouch like that of the civet; it is much valued by the Javanese. For its sake the animal is often kept in captivity. It is savage and irritable, and can inflict a very severe bite.

rasse[2]†, *n.* [ME.] An eminence; a mound; a summit.

On a *rasse* of a rok hit reste at the laste,
On the mounte of Mararach of Armene hilles.
Alliterative Poems (ed. Morris), ii. 446.

rastral (ras'trąl), *n.* [< *rastrum* + *-al*.] Same as *rastrum*.

rastrite (ras'trīt), *n.* A zoöphyte of the genus *Rastrites;* a graptolite.

Rastrites (ras-trī'tēz), *n.* [NL., < L. *rastrum*, a rake, + *-ites*.] A genus of fossil Silurian zoöphytes: same as *Graptolithus*.

rastrum (ras'trum), *n.*; pl. *rastra* (-trą). [NL., < L. *rastrum*, a rake, hoe, mattock, < *radere*, scrape: see *rase*[1].] 1. A five-pointed pen for ruling staffs for music; a music-pen.—2. A herse.

rasure (rā'zūr), *n.* [Early mod. E. also *razure;* < F. *rasure* = Sp. Pg. It. *rasura*, a shaving, a blotting off, also the priest's tonsure, < L. *rasura*, a shaving, scraping, < *radere*, pp. *rasus*, scrape: see *rase*[1]. Cf. *erasure*.] 1. The act of scraping or shaving; a rasing or erasing; a scratch. [Rare.]

With the tooth of a small beast like a rat they race some their faces, some their bodies, after diuers formes, as if it were with the scratch of a pin, the print of which *rasure* can neuer be done away againe during life.
Hakluyt's Voyages III. 674.

A forted residence 'gainst the tooth of time
And *razure* of oblivion. *Shak.*, M. for M., v. 1. 13.

2†. Same as *erasure*.

There were many *razures* in the book of the treasury. *Bp. Burnet.*

rat[1] (rat), *n.* [Formerly also *ratt;* < ME. *ratte*, *rotte*, pl. *rattes*, < AS. *ræt* (*rætt-*) = MD. *ratte*, D. *rat* = OLG. *ratta*, MLG. *ratte*, LG. *ratte*, also *rat*, *rot* = OHG. *ratо*, m., *ratta*, f., MHG. *rat*, *rate*, m., *ratte*, *rate*, f., MHG. also *ratz*, *ratze*, G. *ratze*, m., = Icel. *rotta* = Sw. *råtta* = Dan. *rotte*, a rat; cf. F. Pr. *rat* = Sp. Pg. *rato* = It. *ratto* = ML. *ratus*, *rattus;* cf. also Ir. Gael. *radan*, Bret. *raz*, a rat. The relations of the Teut., Rom., and Celtic groups to one another, and the ult. source of the word, are unknown. Some refer the word to the root seen in L. *radere*, scratch, scrape (see *rase*[1], *raze*[1]), *rodere*, gnaw (see *rodent*). The forms of the word *cat* are equally wide-spread.] 1. A rodent of some of the larger species of the genus *Mus*, as *M. rattus*, the black rat, and *M. decumanus*, the gray, brown, or Norway rat: distinguished from *mouse*. The distinction between *rat* and *mouse*, in the application of the names to animals everywhere parasitic with man, is obvious and familiar. But these are simply larger and smaller species of the same genus, very closely related zoologically, and in the application of the two names to the many other species of the same genus all distinction between them is lost.

2. Any rodent of the family *Muridæ;* a murine; in the plural, the *Muridæ*. In this sense, *rat* includes *mouse*. American rats or mice are a particular section of the subfamily *Murinæ*, called *Sigmodontes*, confined to America, where no other *Murinæ* are indigenous. Field rats, water-rats, meadow-mice, or voles are *Muridæ* of the subfamily *Arvicolinæ*. See cuts under *Arvicola*, *Muridæ*, *muskrat*, *Neotoma*, *Nesokia*, and *Nesomys*.

3. Any rodent of the suborder *Myomorpha*. Different animals of several families, as *Dipodidæ*, *Zapodidæ*, *Saccomyidæ*, *Geomyidæ*, *Spalacidæ*, are often known as *rats* of some kind distinguished by qualifying words or compound names. See cut under *mole-rat*.

4. Some other rodent, or some insectivore, marsupial, or other animal like or likened to a rat. Thus, among hystricomorphic rodents, many species of *Octodontidæ* are called *rats:* as, the *spiny rats* of the subfamily *Echinomyinæ*. Some large aquatic shrews are known as *muskrats*. (See *Myogale*.) Some rat-like marsupials are known as *kangaroo-rats*. (See *bettong*, and cuts under *kangaroo-rat* and *Echimys*.)

5. A person who is considered to act in some respect in a manner characteristic of rats: so called in opprobrium. Specifically—(*a*) A man who deserts a party or an association of any kind for one opposed to it in order to gain some personal advantage or benefit; a self-seeking turncoat; a renegade. [Colloq.]

He [Wentworth] was the first of the *Rats*, the first of those statesmen whose patriotism had been only the coquetry of a political prostitution, and whose profligacy has taught governments to adopt the old maxim of the slave-market, that it is cheaper to buy than to breed, to import defenders from an Opposition than to rear them in a Ministry. *Macaulay*, Hallam's Const. Hist.

(*b*) A workman who accepts lower wages than those current at the time and place or required by an authorized scale, or one who takes a position vacated by a striker, or one who refuses to strike when others do. [Colloq.]

The men who agree to go into the strike are always the more united and determined class. The *rats* who refuse suffer accordingly. *The American*, III. 181.

(*c*†) A clergyman: so called in contempt. *Halliwell.*

6. Something suggesting the idea of a rat, as a curving roll of stuffed cloth or of crimped hair-work, with tapering ends, formerly (about 1860–70) and still occasionally used by women to puff out the hair, which was turned over it.

At one time even a small amount of natural hair easily served the purpose of covering the crescent-shaped pillows on which it was put up, the startling names of which were *rats* and mice. *The Century*, XXXVI. 769.

Alexandrian rat, a gray or rufous-backed and white-bellied variety of *Mus rattus*, to which the name *M. alexandrinus* has been applied, owing to its having been first discovered at Alexandria in Egypt, but which is not specifically distinct from the black rat.—**Bamboo-rat**, an Indian murine rodent mammal of the genus *Rhizomys*, as *R. sumatranus*. The bay bamboo rat is *R. badius*. The species are also called *canets*. See cut under *Rhizomys*.—**Bandicoot rat**. (*a*) The Anglo-Indian name of the large murine rodents of India, of the family *Muridæ*, subfamily *Phlæomyinæ*, and genus *Nesokia*, of which there are several species, all Indian. *N. griffithi* is an example. See cut under *Nesokia*. (*b*) Same as *bandicoot*, 2.—**Black rat**, *Mus rattus*, one of the most anciently known rats, now almost cosmopolitan, and typically of a blackish color, but very variable in this respect. It is rather smaller than the Norway gray rat. In one of its varieties it is known as *roof-rat* (*Mus tectorum*) and *white-bellied rat*. See cut under *Muridæ*.—**Hare-tailed rat**. See *lemming*.—**Maori rat**, the black rat, *Mus rattus*, introduced and naturalized in New Zealand.—**Mountain rat**, the large bushy-tailed wood-rat of the Rocky Mountain region, *Neotoma cinerea;* the pack-rat. [U. S.]—**Norway rat**, the common rat, *Mus decumanus*.—**Pack-rat**, the mountain rat, *Neotoma cinerea;* so called on account of its curious and inveterate habit of dragging off to its hole any object it can move. [Western U. S.]—**Pharaonic rat, Pharaoh's rat**, the ichneumon: a phrase traceable back at least to Belon (about 1555). See *Herpestes*. Also called *Pharaoh's mouse*.—**Pouched rat**. See *pouched*.—**To have a rat in the garret**, to be slightly crack-brained: same as *to have a bee in one's bonnet* (which see, under *bee*).—**To smell a rat**, to be suspicious that all is not right; have an inkling of some mischief, plot, or underhand proceeding.

Quoth Hudibras, "I *smell a rat:*
Ralpho, thou dost prevaricate."
S. Butler, Hudibras, I. i. 821.

rat[1] (rat), *v.*; pret. and pp. *ratted*, ppr. *ratting*. [< *rat*[1], *n.*] **I.** *intrans.* 1. To catch or kill rats; follow the business of a ratter or rat-catcher.—2. To go over from one party or cause to another, especially from a party or cause that is losing or likely to lose, as rats run from a falling house; desert one's party or associates for advantage or gain; become a renegade. [Colloq.]

His ci devant friends curse the hour that he *ratted*.
Barham, Ingoldsby Legends, II. 385.

I am fully resolved to oppose several of the clauses. But to declare my intention publicly, at a moment when the Government is in danger, would have the appearance of *ratting*. *Macaulay*, in Trevelyan, I. 275.

3. To work for less than current wages, to refuse to strike with fellow-workmen, or to take the place of one who has struck: often with indefinite *it*. See *rat*[1], *n.*, 5 (*b*). [Colloq.]

II. *trans.* 1. To puff out (the hair) by means of a rat. See *rat*[1], *n.*, 6. [Rare.]

Next morning, at breakfast, Sin Saxon was as beautifully ruffled, *ratted*, and crimped—as gay, as bewitching, and defiant—as ever. *Mrs. Whitney*, Leslie Goldthwaite, x.

2. To displace or supplant union workers in: as, to *rat* an office or a shop. [Colloq.]

rat[2]† (rat), *n.* [Usually in pl. *rats*, < ME. *rattes*, rags; either from the verb, ME. *ratten*, tear (see *rat*[2], *v.*), or < Icel. *hrat*, *hrati*, rubbish, trash, = Norw. *rat*, rubbish: cf. Sw. Norw. *rata*, reject, refuse (see *rate*[1]).] A rag; tatter. [Prov. Eng.]

I *rattes* and i clutes. *Old Eng. Homilies*, I. 227.

rat[2]† (rat), *v. t.* [< ME. *ratten* = MHG. *ratzen*, tear: cf. *rat*[2], *n.*] To tear.

How watz thou hardy this hous for thyn vnhap [to] nege,
In ou so *ratted* a robe & rent at the sydes?
Alliterative Poems (ed. Morris), ii. 144.

rat[3] (rat), *v. t.* [Prob. a var. of *rot;* cf. *drat*[2], in similar use.] A term of objurgation, used in the imperative.

rat[4]†. A Middle English contracted form of *redeth*, the third person singular present indicative of *read*[1]. *Piers Plowman.*

rata (rä'tạ), *n.* [New Zealand.] A tree of New Zealand, *Metrosideros robusta*, growing from 60 to 80 feet high, the wood of which is used in cabinet-work, and in civil and naval architecture. The name belongs also to *M. florida*, a stout-trunked climber ascending the highest trees; it is also more or less extended by settlers to other species of the genus. Besides in several cases yielding valuable wood, these trees are notable for their profusion of brilliant flowers, which are generally, as in *M. robusta*, scarlet. See *pre-tree* and *Metrosideros.*

ratability (rā-tạ-bil'i-ti), *n.* [< *ratable* + *-ity* (see *-bility*).] The quality of being ratable. *Athenæum*, No. 3261, p. 535.

ratable (rā'tạ-bl), *a.* [Also *rateable*; < *rate*[2] + *-able*.] 1. Capable of being rated, or set at a certain value.

I collect out of the abbay booke of Burton, that 20 Orre were *ratable* to two markes of silver.
Camden, Remains, Money.

2. Reckoned according to a certain rate; proportional.

In conscience and credit [poets were] bound, next after the divine praises of the immortall gods, to yeeld a like *ratable* honour to all such amongst men as most resembled the gods by excellencie of function.
Puttenham, Arte of Eng. Poesie, p. 28.

A *ratable* payment of all the debts of the deceased, in equal degree, is clearly the most equitable method.
Blackstone, Com., III. ii.

3. Liable or subjected by law to be rated or assessed for taxation.

ratableness (rā'tạ-bl-nes), *n.* Ratability.

ratably (rā'tạ-bli), *adv.* According to rating or valuation; at a proportionate rate; proportionally.

I will thus charge them all *ratablue*, according to theyr abilityes, towardes theyr maintenaunce.
Spenser, State of Ireland.

The shareholders of every national banking association shall be held individually responsible, equally and *ratably*.
National Bank Act, U. S. (ed. 1882), p. 14.

ratafia (rat-a-fē'ạ), *n.* [Formerly also *ratifia*, *ratifie*, *ratifice*, also *ratafiaz*; = D., etc., *ratafia*, < F. *ratafia*, formerly also *ratafiat* (cf. F. *tafia*, rum, arrack), = Sp. *ratafia* = Pg. *ratafia*, < Malay *araq*, a distilled spirit, arrack (< Ar. *'araq*, juice, distilled spirit: see *arrack*), + *tafia*, *taffia*, a spirit distilled from molasses.] 1. A sweet cordial flavored with fruits: sometimes limited to those the flavor of which is obtained from black currants, bitter almonds, or peach- and cherry-kernels.

It would make a Man smile to behold her Figure in a front Box, where her twinkling Eyes, by her Afternoon's Drams of *Ratifee* and cold Tea, sparkle more than her Pendants. Quoted in *Ashton's* Social Life in Reign of [Queen Anne, I. 201.

2. A kind of fancy cake or biscuit.

Give him three *ratafias*, soaked in a dessert-spoonful of cream. *George Eliot*, Mill on the Floss, vi. 1.

ratan, rattan[2] (ra-tan'), *n.* [Formerly also *rattoon*, *rotan*, *rotang*, *rottang*; = D. Sw. Dan. *rotting* (NL. *Rotang*), < F. *rotin*, *rotang* = Sp. *rota*, < Malay *rotan*, ratan. The E. accent, on the last syllable, is appar. in imitation of the F.; the Malay word is accented on the first syllable.] 1. A palm of one among numerous species, mostly of the genus *Calamus*, a few of the genus *Rhapis*; a ratan-palm. The species of *Calamus* are prevailingly climbing palms, attaining a length sometimes of 500 feet, with a thickness not exceeding an inch—ascending the tallest trees, falling in festoons, and again ascending. A few species are found in Africa and Australia, but they abound chiefly in the East Indies, on the mainland and islands. The species of *Rhapis* are erect slender canes growing in dense tufts, and are natives of China and Japan. Ratans of this habit are commercially distinguished from the climbing ones as *ground ratans.*

2. The stems of the ratan collectively as an economic material. Among its chief commercial sources are *Calamus Rotang*, *C. rudentum*, *C. verus*, *C. erectus*, and *C. Royleanus*. The most valuable ratan is produced in Borneo. On account of its length and light, tough, flexible, and fissile character, ratan is applied to very numerous uses. In native regions the product of *C. rudentum* and other species is split and twisted in vast quantities into all sizes of cordage from cables to fishing-lines. Basket-making is another common use. In some places the stems of climbing ratans are used for the suspension of foot-bridges of great length. In China whole houses are made of ratan, there afforded chiefly by *Rhapis flabelliformis*. Matting made of split ratan is exported thence to all parts of the world. The same fiber serves also to make hats, the bottoms of riee-sieves, thread for sewing palm-leaves, etc. In recent times ratan has become an important article in western commerce. It is now not only used for walking-sticks, but extensively made into chairs and chair-bottoms, bodies for fancy carriages, fine and coarse basket-work, etc. It has almost superseded willow in making the large baskets required in manufacturing and other industries.

3. A switch or stick of ratan, especially a walking-stick.

Mr. Humley did give me a little black *rattoon*, painted and gilt. *Pepys*, Diary, an. 1660.

ratan, rattan[2] (ra-tan'), *v. t.* [< *ratan, rattan*[2], *n.*] 1. To use ratan in making; cover or form with interlaced lengths of ratan.

The second class coach is finished in native ash with Moorish designed ceilings, *rattaned* sofa seats, and closet and toilet rooms. *Sci. Amer.*, N. S., LIX. 3.

2. To use a ratan upon; beat with or as with a ratan-cane. [Colloq.]

ratan-cane (ra-tan'kān), *n.* Same as *ratan*, 3.

ratanhine (rat'an-in), *n.* [< Braz. Pg. *ratanhia* (see *ratany*) + *-ine*[2].] An alkaloid ($C_{10}H_{13}NO_3$) occurring in small quantity in the extract of ratany-root.

ratany (rat'ạ-ni), *n.* [Also *rattany*, *ratanhy*, and *rhatany*; = F. *ratanhia*, < Braz. Pg. *ratanhia*, < Peruv. *ratana*, native name.] 1. A procumbent South American shrub, *Krameria triandra*, yielding a medicinal root. Its foliage is silver-gray with silky hairs, and it bears star-like lake-colored flowers singly in the upper axils. See *Krameria* and *ratany-root.*

Ratany (*Krameria triandra*).

2. A medicinal substance procured from this plant: same as *ratany-root.* — **Pará, Brazilian,** or **Ceara ratany,** a substitute for the true ratany, obtained from *Krameria argentea* of northeastern Brazil.

ratany-root (rat'ạ-ni-röt), *n.* The root-substance of the ratany, used in medicine for its astringent, diuretic, and detergent properties, and in the adulteration of port-wine.

rataplan (rat-a-plon'), *n.* [F.; imitative. Cf. *rattan*[3], *rat-a-tat.*] The sound or music of the military drum; a tattoo or "rub-a-dub."

rat-a-tat (rat'a-tat'), *n.* [Imitative. Cf. *rat-tat*, *rat-tat-too.*] A rattling sound or effect, as from the beating of a drum.

rat-catcher (rat'kach$^{\prime}$ėr), *n.* One whose business is the catching of rats; a ratter.

rat-catching (rat'kach$^{\prime}$ing), *n.* The catching of rats, now pursued as a business by ratcatchers, and formerly to a large extent in Great Britain, with dogs or ferrets, as a popular amusement.

ratch[1] (rach), *r.* [An assibilated form of *rack*[1], or in part a var. of *retch*[1] or *reach*[1]: see *rack*[1], *v.*] I. *trans.* 1. To stretch or pull asunder.—2. To spot or streak. *Halliwell.* [Prov. Eng. in both uses.]

II. *intrans. Naut.*, to make a stretch or varying stretches in sailing; sail by the wind or by tacks; stand off and on.

There was a fleet of smacks *ratching* to the eastward on our port bow. *W. C. Russell*, Jack's Courtship, xxiii.

ratch[1] (rach), *n.* [An assibilated form of *rack*[1]: see *rack*[1], *n.* In defs. 3 and 4, directly from the verb. Cf. dim. *ratchet.*] 1. In a machine, a bar having angular teeth, into which a pawl drops, to prevent the machine from being reversed in motion. A circular ratch is a *ratchet-wheel.*—2. In *clockwork*, a sort of wheel having fangs, which serve to lift the detents and thereby cause the clock to strike.—3. A straight line. [Prov. Eng.]—4. A white mark on the face of a horse. [Eng.]

ratch[2]† (rach), *n.* [Early mod. E. also *rach*, *rache*; < ME. *racche*, *rache*, < AS. *ræcc*, a dog, = Icel. *rakki*, a dog.] A dog that hunts by scent.

As they ryde talkynge,
A *rach* ther come flyngynge
Overtwert the way.
Thanne seyde old and yonge,
From her first gynnynge,
They ne sawe honde never so gay.
Lybeaus Disconus (Ritson's Metr. Rom., II.).

There are in England and Scotland two kinds of hunting dogs: the first is called a *rache*; and this is a footscenting creature, both of wild beasts, birds, and fishes also which lie hid among the rocks; the female hercof is called in England a brache. *Gentleman's Recreation*, p. 28.

ratch[3] (rach), *v. t.* Same as *rash*[3]. [Scotch.]

ratch[4] (rach), *n.* [Origin obscure. Cf. *ratchel.*] A subsoil of stone and gravel mixed with clay. *Halliwell.* [Prov. Eng.]

ratched (racht), *p. a.* [Pp. of *ratch*[3], *v.*] Ragged; in a ruinous state. *Jamieson.* [Scotch.]

ratchel (rach'el), *n.* [Also *ratchell*, *ratchil*; cf. *ratch*[4], *ratcher.* Perhaps < G. *rutschel*, the fragments from two masses of rock sliding one on the other, < *rutschen*, slide, slip.] Fragments of stone; gravelly stone; also, a hard, rocky crust below the soil. *Jamieson.* [Prov. Eng. and Scotch.]

ratcher (rach'ėr), *n.* [Cf. *ratch*[4], *ratchel.*] A rock. *Halliwell.* [Prov. Eng.]

ratchet (rach'et), *n.* [< *ratch*[1] + *-et.*] A detent or pivoted piece designed to fit into the teeth of a ratchet-wheel, permitting the wheel to rotate in one direction, but not in the other. A similar device so arranged as to move the wheel is termed a *pallet.* (See *ratchet-wheel*, *click*[1], 3, *paul*, and *detent.*) Combined with the ratchet-wheel as a means of converting a reciprocating into a rotary motion, the ratchet appears in a number of tools and gives its name to each: as, the *ratchet* bed-key, etc.

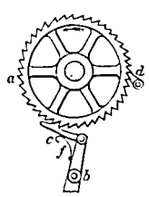
ratchet-brace (rach'et-brās), *n.* See *brace*[1].

ratchet-burner (rach'et-bėr$^{\prime}$nėr), *n.* A burner for a lamp in which the wick is moved up and down by means of a wheel with notched points.

ratchet-coupling (rach'et-kup$^{\prime}$ling), *n.* A device for uncoupling machinery in the event of a sudden stoppage of the motion of a driving-wheel, as by an obstruction. It consists of a ratchet-wheel inserted in a sleeve on the exterior shaft of a driving-wheel. The ratchet is efficient as long as it transmits the initial motion; but if the revolution of the driver is checked, the sleeve slips over the ratchet until the machinery loses its momentum, thus avoiding a shock.

ratchet-drill (rach'et-dril), *n.* A tool for drilling holes by means of a ratchet in a narrow plane where there is no room for the common brace.

ratchet-jack (rach'et-jak), *n.* A form of screw-jack in which the lever-socket is fitted with a pallet engaging a ratchet-wheel, so that the jack may be operated by oscillation of the lever.



ratchet-lever (rach'et-lev$^{\prime}$ėr), *n.* A lever with a collar fitted around a ratchet-wheel which engages a pallet on the lever, used for operating a drill or screw by oscillation of the lever.

ratchet-pedal (rach'et-ped$^{\prime}$al), *n.* See *pedal.*

ratchet-post (rach'et-pōst), *n.* *Milit.*, a metallic post fastened to the rear transom of the top-carriage of a heavy gun, to serve as a support or fulcrum for the elevating-bar.

ratchet-punch (rach'et-punch), *n.* A punch worked by a screw which is revolved by means of a ratchet-lever.

ratchet-wheel (rach'et-hwēl), *n.* A wheel with pointed and angular teeth, against which a ratchet abuts, used either for converting a reciprocating into a rotatory motion on the shaft to which it is fixed, or for admitting of its motion in one direction only. For both purposes an arrangement similar to that shown in the cut is employed. *a* is the ratchet-wheel, and *b* the reciprocating lever, to the end of which is jointed a small ratchet or pawl *c*, furnished with a catch of the same form as the teeth of the wheel, which, when the lever is moved in one direction, slides over the teeth, but in returning draws the wheel with it. The pawl *c* is forced into engagement with the teeth of the ratchet-wheel by the spring *f*. The other ratchet, *d*, which may be used either separately or in combination with the first, permits of the motion of the wheel in the direction of the arrow, but opposes its return in the opposite direction. Also called *click-wheel.* See also cut under *pawl.*

Ratchet-wheel.

ratchet-wrench (rach'et-rench), *n.* A ratchet bed-key wrench.

ratchety (rach'e-ti), *a.* [< *ratchet* + *-y*[1].] Like the movement of a ratchet; jerky; clicking.

Raikes . . . poured out a *ratchety* but vehement panegyric. *The Money-Makers*, p. 128.

ratchil, *n.* See *ratchel.*

ratchment (rach'ment), *n.* [< *ratch*[1] + *-ment.*] In *arch.*, a flying-buttress which springs from the principals of a herse and abuts against the central or chief principal. *Oxford Glossary.*

rate[1] (rāt), *v.*; pret. and pp. *rated*, ppr. *rating.* [< ME. *raten*, chide, scold, in comp., < Sw. *rata*, reject, refuse, slight, find fault with (cf. *ratgods*, refuse goods), = Norw. *rata*, reject, cast aside as rubbish; akin to Norw. *rat*, refuse, rubbish, trash, = Icel. *hrat*, *hrati*, rubbish, trash, skins, stones, etc., of berries; Norw. *rata*, bad, worthless: see *rat*[2].] I. *trans.* 1. Tennyson, Gareth and Lynette.

rate[2] (rāt), *n.* [< OF. *rate*, price, value, = Pr. Sp. Pg. It. *rata* = G. *rate*, < ML. *rata*, rate, proportion (L. *pro rata parte*, or *pro rata portione*, or simply *pro rata*, according to a certain part or portion (see *pro rata, pro-rate*)): fem. of L. *ratus*, determined, fixed, settled, pp. of *reri* (ind. *reor*), think, deem, judge, orig. reckon, calculate. From the same L. verb are ult. derived E. *rate*[3], *ratio, ration, reason, arcason, arraign*[1], etc., *ratify*, etc.] 1. A reckoning by comparative values or relations; proportional estimation according to some standard; relative amount, quantity, range, or degree: as, the *rate* of interest is 6 per cent. (that is, $6 for every $100 for every year); the *rate* per mile of railroad charges, expenses, or speed; a rapid *rate* of growth or of progress.

He lends out money gratis, and brings down
The *rate* of usance here with us in Venice.
Shak., M. of V., i. 3. 46.

One of the necessary properties of pure Motion is Velocity. It is not possible to think of Motion without thinking of a corresponding *Rate* of motion.
A. Daniell, Prin. of Physics, p. 52.

As regards travelling, the fastest *rate* along the high roads was ten miles an hour.
W. Besant, Fifty Years Ago, p. 5.

It was no longer practicable to levy the duties on the old plan of one *rate* for unrefined and another *rate* for refined sugars. *S. Dowell*, Taxes in England, IV. 31.

2. Charge or valuation according to a scale or standard; comparative price or amount of demand; a fixed measure of estimation.

A jewel that I have purchased at an infinite *rate*.
Shak., M. W. of W., ii. 2. 213.

I am not . . . content to part with my commodities at a cheaper *rate* than I accustomed; look not for it.

8. The order or class of a vessel, formerly regulated in the United States navy by the number of guns carried, but now by the tonnage displacement. Vessels of 5,000 tons displacement and over are of the first rate, of 3,000 and above but below 5,000 tons of the second rate, of 1,000 and above but below 3,000 tons of the third rate, of less than 1,000 tons of the fourth rate. In classifying the navies of England, France, and the other principal European powers the term *class* is used instead of *rate*, and relates not so much to the actual weight or power of the ships as to arbitrary divisions of types of vessels, and to their relative importance as battle-ships, cruisers, etc.

9. In the United States navy, the grade or position of any one of the crew: same as *rating*[2], 2.—10. In *horology*, the daily gain or loss of a chronometer or other timepiece. A losing rate is called by astronomers a positive rate, because it entails a positive correction to the difference of readings of the clock-face.—**At any rate**, in any manner, or by any means; in any case; at all events; positively; assuredly: as, I shall stay *at any rate*; *at any rate* the claim is a valid one.

I have no friend,
Project, design, or country but your favour,
Which I'll preserve *at any rate*.
Fletcher (*and another*), False One, i. 1.

At no rate, in no manner; by no means; not at all. [Rare.]

This day *at no rate*
Shalt thou performe thy worke, least thou doe draw
My heavy wrath vpon thee.

We have *ratified* to them the borders of Judea.
1 Mac. xi. 34.

Covenants will be *ratified* and confirmed, as it were by the Stygian oath. *Bacon*, Political Fables, ii., Expl.

Shaking hands with emphasis, . . . as if they were *ratifying* some solemn league and covenant.
Charlotte Brontë, Shirley, xvii.

2. To validate by some formal act of approval; accept and sanction, as something done by an agent or a representative; confirm as a valid act or procedure.

This Accord and final Peace signed by both Kings was *ratified* by their two eldest Sons.
Baker, Chronicles, p. 125.

A solemn compact let us *ratify*,
And witness ev'ry power that rules the sky.
Pope, Odyssey, xiv.

The unfortunate king, unable to make even a protest for the rights of his son, was prevailed on to *ratify* the agreement. *Stubbs*, Const. Hist., § 677.

Ratifying convention, a convention held for the purpose of ratifying certain measures, acts, etc.: specifically used in United States politics of the conventions held by the several States of the American Union for the purpose of ratifying the Federal Constitution of 1787.

ratihabition† (rat'i-hā-bish'ọn), *n.* [= Sp. *ratihabicion* = Pg. *ratihabição* = It. *ratiabizione,* < LL. *ratihabitio(n-),* ratification at law, < L. *ratus,* fixed, settled (see *rate*[2]), + *habere,* have: see *habit*.] Approval, as of something done or to be done; precedent or subsequent consent; sanction; confirmation of authority or of action.

In matters criminal, *ratihabition,* or approving of the act, does always make the approver guilty. *Jer. Taylor*.

To assume their full powers, they had letters of commission or of *ratihabition,* or powers of attorney, such as were usually furnished to proctors or representative officers.
Stubbs, Const. Hist., § 747.

rating[1] (rā'ting), *n.* [Verbal n. of *rate*[1], *v.*] A scolding.

rating[2] (rā'ting), *n.* [Verbal n. of *rate*[2], *v.*] 1. A fixing of rates; proportionate distribution as to charge or compensation; determination of relative values or rights.

The loss by any railway company of its whole share of this traffic, in consequence of being crippled in competition by regulations as to *rating*.
Contemporary Rev., LI. 78.

The following table of *ratings* and of the number pensioned at each rate shows how the allowance is distributed among invalid survivors. *The Century*, XXXVIII. 636.

2. Classification according to grade or rank; determination of relative standing; hence, rank or grade. The rating of men in the navy signifies the grade in which they are rated or entered in the ship's books. The rating of ships is the division into grades (see *rate*[2], *n.*, 8) by which the complement of officers and certain allowances are determined.

ratio (rā'shiō), *n.* [< L. *ratio,* a reckoning, account, calculation, relation, reference, reason, etc., < *reri,* pp. *ratus,* think, deem, estimate: see *rate*[2], and cf. *ration* and *reason*, from the same L. noun.] 1. The relation between two similar magnitudes in respect to quantity; the relation between two similar quantities in respect to how many times one makes so many times the other. There is no intelligible difference between a ratio and a quotient of similar quantities; they are simply two modes of expression connected with different associations. But it was contrary to the old usage to speak of a ratio as a quantity—a usage leading to intolerable complications. Thus, instead of saying that the momentum of a moving particle is the product of its mass into its velocity—a mode of expression both convenient and philosophical—the older writers say that the momenta of two particles are in the compound ratio of their masses and velocities. This language, which betrays several errors of logic, is now disused; although some writers still persist in making numbers the only subjects of addition and multiplication. By mathematicians *ratio* is now conceived and spoken of as synonymous with *quotient*.

The numbers which specify a strain are mere *ratios*, and are therefore independent of units.
J. D. Everett, Units and Physical Constants, p. 45.

2. Proportion of relations or conditions; coincident agreement or variation; correspondence in rate; equivalence of relative movement or change.

There has been a constant *ratio* kept between the stringency of mercantile restraints and the stringency of other restraints. *H. Spencer*, Social Statics, p. 327.

3. Reason; cause: often used as a Latin word in current Latin phrases.

In this consists the *ratio* and essential ground of the gospel doctrine. *Waterland*.

4. In *musical acoustics*, the relation between the vibration-numbers of two tones. It is the physical or mathematical representation of the interval between them.—5. In *civil law*, an account; a cause, or the giving of judgment therein.—**Alternate ratio,** the ratio of the first to the third or the second to the fourth term of a proportion.—**Anharmonic ratio.** See *anharmonic*.—**Arithmetical ratio.** See *arithmetical*.—**Change-ratio.** See *change*.—**Composition of ratios,** the uniting of two or more simple ratios into one, by taking the product of the antecedents and the product of the consequents.—**Compound ratio.** See *compound*[1].—**Consequent of a ratio.** See *consequent*.—**Direct ratio.** (*a*) A ratio not inverse. (*b*) Loosely, a direct and simple ratio: as, the weights of bodies are in the *direct ratio* of their masses—that is, the weight of one is to that of another as the mass of the former is to that of the latter. Also *direct proportion*.—**Direction ratio, duple ratio.** See the qualifying words.—**Dissimilar ratios,** unequal quotients.—**Division of a ratio.** See *division*.—**Duplicate ratio,** a ratio of squares. The old writers, instead of saying that the distance passed over by a falling body is proportional to the square of the time, say that the spaces are in the *duplicate ratios* of the times.—**Inverse or reciprocal ratio,** in *math.*, the ratio of the reciprocals of two quantities.—**Irrational ratio,** a ratio of surds.—**Measure of a ratio.** See *measure*.—**Mixed ratio.** See *mixed*[1].—**Modular ratio.** See *modular*.—**Multiplicate ratio,** a ratio of powers.—**Oxygen ratio,** in *mineral.*, the ratio between the number of oxygen

atoms belonging to the different groups of acidic or basic compounds in the composition of a mineral. The oxygen ratio of silica, sesquioxid, and protoxid in garnet is 2 : 1 : 1. —**Pedal ratio**, in *anc. pros.*, the proportion of the number of times in the arsis to that in the thesis, or vice versa. The pedal ratio (λόγος ποδικός) is usually either *equal* or *isorrhythmic ratio* (1 : 1), *diplasic* or *double ratio* (1 : 2), or *hemiolic ratio* (2 : 3 = 1 : 1½). Besides these three, the ordinary pedal ratios, two others were anciently recognized—the *triplasic* or *triple ratio* (1 : 3), and the *epitritic ratio* (3 : 4 = 1 : 1⅓). The dochmius, regarded as a single foot, had a pedal ratio different from all these (3 : 5; ⏑ – | – ⏑ ⏑ –). Isorrhythmic, diplasic, hemiolic, triplasic, epitritic, and dochmiac feet are feet having the pedal ratios just named. See *foot*, 11, *irrational*, *rhythm*.—**Prime and ultimate ratios**, phrases first introduced, at least in a system, by Newton, who preferred them to the terms suggested by his own method of fluxions. The method of prime and ultimate ratios is a method of calculation which may be considered as an extension of the ancient method of exhaustions. It may be thus explained: let there be two variable quantities constantly approaching each other in value, so that their ratio or quotient continually approaches to unity, and at last differs from unity by less than any assignable quantity; the ultimate ratio of these two quantities is said to be a ratio of equality. In general, when different variable quantities respectively and simultaneously approach other quantities, considered as invariable, so that the differences between the variable and the invariable quantities become at the same time less than any assignable quantity, the ultimate ratios of the variables are the ratios of the invariable quantities or limits to which they continually and simultaneously approach. They are called *prime ratios* or *ultimate ratios* according as the ratios of the variables are considered as receding from or approaching to the ratios of the limits. The first section of Newton's "Principia" contains the development of prime and ultimate ratios, with various propositions.—**Progression with** *n* **ratios.** See *progression*.—**Quadruple ratio**, the ratio of 4 to 1.—**Quadruplicate ratio**, a ratio of fourth powers.—**Quintuple ratio**, the ratio of 5 to 1.—**Ratio cognoscendi** (L.), a reason.—**Ratio decidendi** (L.), in *law* the ground or reason on which a judicial decision is conceived as proceeding. The effect of such a decision as a precedent or evidence of the law is largely dependent on the ratio decidendi, which is usually indicated in the opinions of the court, but often obscurely or with conflict; hence what was the ratio decidendi is often a question for commentators and text-writers.—**Ratio essendi** (L.), a cause.—**Rational ratio**, a ratio between rational quantities.—**Ratio of equality.** See *equality*.—**Ratio of exchange**, in *polit. econ.*, the proportion in which a given quantity of one commodity may be exchanged for a given quantity of another, especially when the commodities correspond in form and mode of measurement: as, the *ratio of exchange* between gold and silver, or between wheat and barley.

> When I proposed in the first edition of this book to use *Ratio of Exchange* instead of the word value, the expression had been so little if at all employed by English Economists that it amounted to an innovation. . . . Yet *ratio* is unquestionably the correct scientific term, and the only term which is strictly and entirely correct.
>
> *W. S. Jevons*, Theory of Polit. Econ., p. 89.

Ratio of greater (or lesser) inequality, the ratio of a greater quantity to a lesser one (or of a lesser to a greater).—**Ratio of similitude**, in *geom.*, the ratio between corresponding dimensions of similar figures. See *homothetic*.—**Ratio sufficiens** (L.). Same as *sufficient reason* (which see, under *reason*).—**Reciprocal ratio.** Same as *inverse ratio*.—**Simple ratio.** (*a*) A ratio between first powers. (*b*) A ratio not compound.—**Subduple ratio.** See *duple*.—**Subduplicate ratio**, an inverse ratio of squares (*sub* in all names of ratio indicating the inversion of the ratio): as, the gravity of two equal masses is in the *subduplicate ratio* of their distances from the gravitating center.—**Submultiple ratio**, the ratio which exists between an aliquot part of any number or quantity and the number or quantity itself: thus, the ratio of 3 to 21 is submultiple, 21 being a multiple of 3.—**To cut a line in extreme and mean ratio.** See *extreme*.—**Triple ratio**, the ratio of 3 to 1.

ratiocinant (rash-i-os'i-nant), *a.* [< L. *ratiocinan(t-)s*, ppr. of *ratiocinari*, reason: see *ratiocinate*.] Reasoning.—**Ratiocinant reason.** See *reason*.

ratiocinate (rash-i-os'i-nāt), *v. i.*; pret. and pp. *ratiocinated*, ppr. *ratiocinating*. [< L. *ratiocinatus*, pp. of *ratiocinari* (> It. *raziocinare* = Sp. Pg. *raciocinar* = F. *ratiociner*), reckon, compute, calculate, consider, deliberate, meditate, reason, argue (cf. *ratiocinium*, a reckoning, a computation, > It. *raziocinio* = Sp. Pg. *raciocinio*, reasoning), < *ratio(n-)*, reckoning, reason: see *ratio*, *reason*.] To reason; from two judgments to infer a third. The word usually implies an elaborate deductive operation.

ratiocinate (rash-i-os'i-nāt), *a.* [< L. *ratiocinatus*, pp. of *ratiocinari*, reason: see the verb.] Reasoned about.—**Ratiocinate reason.** See *reason*.

ratiocination (rash-i-os-i-nā'shon), *n.* [< F. *ratiocination* = Pr. *raciocinacio* = Sp. *raciocinacion* = Pg. *raciocinação* (cf. It. *raziocinamento*, *raziocinio*, reasoning), < L. *ratiocinatio(n-)*, reasoning, argumentation, a syllogism, < *ratiocinari*, pp. *ratiocinatus*, reason: see *ratiocinate*.]

1. The mental process of passing from the cognition of premises to the cognition of the conclusion; reasoning. Most writers make *ratiocination* synonymous with *reasoning*. J. S. Mill and others hold that the word is usually limited to necessary reasoning. The Latin word is especially applied by Cicero to probable reasoning.

> The great instrument that this work [spiritual meditation] is done by is *ratiocination*, reasoning the case with yourselves, discourse of mind, cogitation, or thinking; or, if you will, call it consideration.
>
> *Baxter*, Saints' Rest, iv. 8.

> The schoolmen make a third act of the mind, which they call *ratiocination*, and we may stile it the generation of a judgement from others actually in our understanding.
>
> *A. Tucker*, Light of Nature, I. i. 11.

> *Ratiocination* is the great principle of order in thinking; it reduces a chaos into harmony; it catalogues the accumulations of knowledge; it maps out for us the relations of its separate departments; it puts us in the way to correct its own mistakes.
>
> *J. H. Newman*, Gram. of Assent, p. 273.

2. A mental product and object consisting of premises and a conclusion drawn from them; inference; an argumentation.

> Can any kind of *ratiocination* allow Christ all the marks of the Messiah, and yet deny him to be the Messiah?
>
> *South.*

> *Ratiocination* denotes properly the process, but, improperly, also the product of reasoning.
>
> *Sir W. Hamilton*, Logic, xv.

= Syn. *Reasoning*, etc. See *inference*.

ratiocinative (rash-i-os'i-nā-tiv), *a.* [< F. *ratiocinatif*, < L. *ratiocinativus*, of or belonging to reasoning, syllogistic, argumentative, < *ratiocinari*, reason: see *ratiocinate*.] Of the nature of reasoning; pertaining to or connected with the act of reasoning. The word is misused by some modern writers. See *ratiocination*, 2.

> The conclusion is attained quasi per saltum, and without any thing of *ratiocinative* process.
>
> *Sir M. Hale*, Orig. of Mankind, p. 51.

> The *ratiocinative* meditativeness of his character.
>
> *Coleridge.*

> Again, it not unfrequently happens that, while the keenness of the *ratiocinative* faculty enables a man to see the ultimate result of a complicated problem in a moment, it takes years for him to embrace it as a truth, and to recognize it as an item in the circle of his knowledge.
>
> *J. H. Newman*, Gram. of Assent, p. 159.

ratiocinatory (rash-i-os'i-nā-tō-ri), *a.* [< *ratiocinate* + *-ory*.] Same as *ratiocinative*. [Rare.]

ration (rā'shon or rash'on), *n.* [< F. *ration* = Sp. *racion* = Pg. *ração*, *reção* = It. *razione*, a ration, a rate or allowance, < L. *ratio(n-)*, a calculation, reckoning, hence in ML. a computed share or allowance of food: see *ratio*, *reason* (which are doublets of *ration*), and cf. *rate*².]

1. An allowance of means of subsistence for a fixed period of time; specifically, in the army and navy, an allotment or apportionment of provisions for daily consumption to each officer and man, or of forage for each horse. Officers' rations are generally commuted for a money payment at a prescribed rate, and soldiers' and sailors' rations may be partly or wholly commuted under some circumstances.

2. Any stated or fixed amount or quantity dealt out; an allowance or allotment.

> At this rate [two years and a half for three vowels], to master the whole alphabet, consonants and all, would be a task fitter for the centurial adolescence of Methuselah than for our less liberal *ration* of years.
>
> *Lowell*, Harvard Anniversary.

ration (rā'shon or rash'on), *v. t.* [< *ration*, *n.*] 1. To supply with rations; provision.

> It had now become evident that the army could not be *rationed* by a wagon train over the single narrow and almost impassable road between Milliken's Bend and Perkins' plantation. *U. S. Grant*, Personal Memoirs, I. 471.

2. To divide into rations; distribute or apportion in rations. [Rare.]

> The presence of hunger began; they began to *ration* out the bread. *The Nation*, March 9, 1871, p. 160.

rationability (rash'on-a-bil'i-ti), *n.* [= Sp. *racionabilidad* = Pg. *racionabilidade* = It. *razionabilità*, < LL. *rationabilita(t-)s*, < *rationabilis*, reasonable: see *rationable*.] The possession of reason, as the distinctive attribute of man.

> *Rationability*, being but a faculty or specifical quality, is a substantial part of a man, because it is a part of his definition, or his essential difference.
>
> *Bramhall*, ii. 24. (*Davies.*)

rationable (rash'on-a-bl), *a.* [= OF. *rationable* = Sp. *racionable* = Pg. *racionavel* = It. *razionabile*, < LL. *rationabilis*, reasonable, rational, < L. *ratio(n-)*, reason: see *reason*.] Reasonable, as an agent or an act.

> She was, I take it, on this matter not quite *rationable*.
>
> *Miss Edgeworth*, Belinda, xxvi.

rational (rash'on-al), *a.* and *n.* [I. *a.* < OF. *rationel*, *rationil*, F. *rationnel* = Pr. Sp. Pg. *racional* = It. *razionale*, < L. *rationalis*, of or belonging to reason, rational, reasonable, < *ratio(n-)*, reason: see *ratio*, *ration*, *reason*. II. *n.* < OF. *rational*, < ML. *rationale*, a pontifical stole, a pallium, an ornament worn over the chasuble, neut. of L. *rationalis*, rational: see I.] I. *a.* 1. Of, pertaining to, or springing from the reason, in the sense of the highest faculty of cognition.

> He confesses a *rational* sovrantie of soule, and freedom of will in every man. *Milton*, Eikonoklastes, vi.

> Devout from constitution rather than from *rational* conviction. *Macaulay*, Essays, History, p. 391.

> Contradiction . . . must be absurd when it is regarded as fixed, and *rational* when it is regarded as superable.
>
> *Veitch*, Introd. to Descartes's Method, p. clxxviii.

2. Endowed with reason, in the sense of that faculty which distinguishes man from the brutes: as, man is a *rational* animal.

> It is our glory and happiness to have a *rational* nature. *Law.*

> Are these men *rational*, or are not the apes of Borneo more wise? *Goldsmith*, Citizen of the World, let. x.

> He [man] is *rational* and moral according to the organic internal conformation of his mind.
>
> *Swedenborg*, Christian Psychol (tr. by Gorman), p. 72.

> There has been an idea of good, suggested by the consciousness of unfulfilled possibilities of the *rational* nature common to all men.
>
> *T. H. Green*, Prolegomena to Ethics, § 207.

3. Conformable to the precepts of reason, especially of the practical reason; reasonable; wise.

> You are one
> Of the deepest politics I ever met,
> And the most subtly *rational*.
>
> *B. Jonson*, Magnetick Lady, iii. 4.

> He had his Humour as other Men, but certainly he was a solid *rational* Man. *Howell*, Letters, I. vi. 17.

> His bounties are more *rational* and moderate than before. *Goldsmith*, Vicar, iii.

4. In *arith.* and *alg.*: (*a*) Expressible in finite terms: applied to expressions in which no extraction of a root is left, or, at least, none such, indicated which cannot be actually performed by known processes. The contraries of these are called *surd* or *irrational* quantities. Thus 2, 12½, 9, are rational quantities, and $\sqrt{2}$, $\sqrt[3]{4}$, etc., are irrational or surd quantities, because their values can only be approximately and not accurately assigned. (*b*) In Euclid's "Elements" and commentaries, etc., on that work, commensurable with a given line. In senses (*a*) and (*b*) *rational* (Latin *rationalis*) translates Greek ῥητος, expressible. It may be remarked that some inconvenience arises from the fact that words derived from Latin *ratio*, originally signifying an account, are used to translate words connected with Greek λογος, whose original meaning (a word) is entirely different.

5. In *anc. pros.*, capable of measurement in terms of the metrical unit (semeion or mora). A *rational time* (χρονος ῥητος) is a time divisible by this unit without remainder. Thus, disemic times (times of two semeia) are rational, while irrational times (χρονοι ἄλογοι) can be expressed only by fractions (as ¾, 1½, 2½, 2⅔) of a semeion.—**Geometrically rational**, algebraic.—**Rational and integral function.** See *function*.—**Rational certainty, cognition, cosmology.** See the nouns.—**Rational class of functions**, a class which is relative to a group of operations produced by combinations of additions, subtractions, multiplications, and divisions.—**Rational composition**, in *logic*: (*a*) The composition of elements which only differ as viewed by the mind, and not as they exist, as the composition of essence and existence, of being and relation, etc. (*b*) The union of several objects so far as they are brought together into or under one concept.—**Rational derivative.** See *derivative*.—**Rational formula.** See *chemical formula*, under *chemical*.—**Rational fraction, function.** See the nouns.—**Rational horizon.** (*a*) The astronomical horizon. (*b*) The limits of rational knowledge.—**Rational inference**, a ratiocinative inference or syllogism.—**Rational instinct**, an innate idea, or natural belief.—**Rational knowledge.** (*a*) Knowledge of an object through its cause or causes.

> The knowledge why or how a thing is is termed the knowledge of the cause; philosophical, scientific, *rational knowledge*. *Sir W. Hamilton*, Metaph., iii.

(*b*) Knowledge springing directly or indirectly from reason, and not from experience.—**Rational mechanics**, the science which establishes and puts into shape the laws of motion.—**Rational number**, a number expressible as an ordinary fraction, in contradistinction to a continued fraction.—**Rational power, proposition, ratio**, etc. See the nouns.—**Rational psychology.** See *psychology*.—**Rational theology**, theology so far as drawn from a priori ideas.—**Rational transformation**, the transformation of a geometrical continuum into another, so as to make a one-to-one correspondence between the points of the two, except for a finite number of exceptional points.=Syn. *Rational*, *Reasonable*, sensible, enlightened, discreet, intelligent, sane, sound. The first two words are somewhat different, according as they refer to persons or things. As to persons, *rational* is the more speculative, *reasonable* the more practical term; *rational* means possessing the faculty of reason, while *reasonable* means exercising reason in its broader sense, in opposition to *unreasonable*—that is, guided by prejudice, fancy, etc. In fever the patient may become *irrational* and give *irrational* answers; when he is *rational* he may through weakness and fretfulness make *unreasonable* demands of his physician. As to things, the distinction continues between the narrower and the broader senses: a *rational* proposition is one that might proceed from a *rational* mind; a *reasonable* proposition is one that is marked by common sense and fairness. It is *irrational* to look for a coal-mine in a granite-ledge; it is *unreasonable* to expect good work for poor pay. See *absurd*.

II. *n.* 1. A quiddity; a universal; a nature. Thus, in the first quotation "the world of *rationals*" is the rational world, the system of general or possible entities. The conception is Platonic.

> He, the great Father, kindled at one flame
> The world of *rationals*. *Young*, Night Thoughts, iv.

This absolute end, prescribed by Reason necessarily and a priori, which is for all rational beings as such, can be nothing but Reason itself, or the Universe of *Rationals*.
H. Sidgwick, Methods of Ethics, p. 362.

2. *Eccles.*: (*a*) The breastplate of the Jewish high-priest. The name *rational* for the Jewish high-priest's breastplate (Hebrew *chōshen*, an 'ornament,' according to others a 'pouch' or 'receptacle') comes from the Latin *rationale*, a mistaken translation in the Vulgate of the word λογεῖον or λογεῖον in the Septuagint, etc., meaning an 'oracle' or 'oracular instrument,' with allusion to the consultation of the Urim and Thummim. Hence—(*b*) A square plate of gold, silver, or embroidery, either jeweled or enameled, formerly worn on the breast over the chasuble by bishops during the celebration of mass. Also *pectoral* and *rationale* in both senses.

But upon the English chasuble there was to be seen, more or less often, up to the fourteenth century, an appendage, the *rational*, as beautiful as becoming, which is never found adorning the same Anglo-Saxon vesture.
Rock, Church of our Fathers, i. 363.

rationale (rash-o-nā′lē), *n.* [L., neut. sing. of *rationalis*, of or belonging to reason, rational: see *rational*.] 1. The rational basis or motive of something; that which accounts for or explains the existence of something; reason for being.

The *rationale* of your scheme is just:
"Pay toll here, there pursue your pleasure free."
Browning, Ring and Book, II. 292.

Thoroughly to realize the truth that with the mind as with the body the ornamental precedes the useful, it is needful to glance at its *rationale*.
H. Spencer, Education, p. 25.

2. A rational explanation or statement of reasons; an argumentative or theoretical account; a reasoned exposition.

I admire that there is not a *rationale* to regulate such trifling accidents, which consume much time, and is a reproach to the gravity of so greate an assembly of sober men.
Evelyn, Diary, Nov. 24, 1666.

Since the religion of one seems madness unto another, to afford an account or *rationale* of old rites requires no rigid reader *Sir T. Browne*, Urn-burial, iv.

Theological dogma is nothing in the world but a *rationale* of the relations in which God places Himself towards us in the very act of revealing Himself
Contemporary Rev., XLIX. 345.

3. Same as *rational*, 2.

rationalisation, rationalise, etc. See *rationalization*, etc.

rationalism (rash′on-al-izm), *n.* [= F. *rationalisme* = Sp. Pg. *racionalismo* = It. *razionalismo* = G. *rationalismus*; as *rational* + *-ism*.] 1. In general, adherence to the supremacy of reason in matters of belief or conduct, in contradistinction to the submission of reason to authority; thinking for one's self.

From the infinite variability of opinion our great writers deduced the necessity of toleration in the place of persecution and of *rationalism* in place of obedience to authority *Leslie Stephen*, Eng. Thought, II. 4, 4.

2. In *theol.*: (*a*) In general, the subjection of religious doctrine and Scriptural interpretation to the test of human reason or understanding; the rejection of dogmatic authority as against reason or conscience; rational latitude of religious thought or belief.

What seemed most to protect the dogma of the Church from depravation really left it without defence against the scholastic *rationalism* *Caird*, Philos. of Kant, p. 25.

(*b*) More specifically, as used with reference to the modern school or party of rationalists, that system of doctrine which, in its extreme form, denies the existence of any authoritative and supernatural revelation, and maintains that the human reason is of itself, and unaided by special divine inspiration, adequate to ascertain all attainable religious truth. As a theological system rationalism regards the reason as the sole, final, and adequate arbiter of all religious questions, and is thus opposed to *mysticism*, which maintains the existence in man of a spiritual power transcending observation and the reasoning faculty. As a doctrinal system, it includes the doctrines founded upon rationalistic philosophy as a postulate, and embraces a denial of the authority of the Scripture and the supernatural origin of Christianity, but maintains as at least probable opinions the existence of a God and the immortality of the soul, and as indisputable facts the great principles of the moral law. As an interpretation of Scripture, it holds that the scriptures themselves, rightly interpreted, corroborate rationalism and thus it eliminates from them all supernatural elements. The term is, however, one of somewhat vague import and is used with various modified meanings in modern polemical theology

3. In *metaph.*, the doctrine of a priori cognitions; the doctrine that knowledge is not all produced by the action of outward things upon the senses, but partly arises from the natural adaptation of the mind to think things that are true.

The form of *Rationalism* which is now in the ascendant resembles the theory of natural evolution in this, that as the latter finds the race more real than the individual, and the individual to exist only in the race, so the former looks upon the individual reason as but a finite manifestation of the universal reason.
W. R. Sorley, Ethics of Naturalism, p. 18.

rationalist (rash′on-al-ist), *n.* [= F. *rationaliste* = Sp. Pg. *racionalista* = It. *razionalista* = D. G. Dan. Sw. *rationalist*; as *rational* + *-ist*.] 1. One who follows reason and not authority in thought or speculation; a believer in the supremacy of reason over prescription or precedent.

There is a new sect sprung up among them, and these are the *rationalists*; and what their reason dictates them in church or state stands for good, until they be convinced with better. *Clarendon*, State Papers, II. xi., Introd.

2. In *theol.*, one who applies rational criticism to the claims of supernatural authority or revelation; specifically, one of a school or party, originating in Germany in the eighteenth century, who maintain as an ultimate conclusion that the human reason is of itself, and unaided by special divine inspiration, adequate to ascertain all attainable truth, and who accordingly, in interpretation of the Scripture, regards it as only an illustration and affirmation, not as a divine revelation, of truth. See *rationalism*, 2 (*b*).—3. A believer in metaphysical rationalism.

rationalistic (rash′on-a-lis′tik), *a.* [< *rationalist* + *-ic*.] Of or pertaining to rationalists or rationalism; conformable to or characterized by rationalism: as, *rationalistic* opinions; a *rationalistic* interpretation.

From the publication of the essays of Montaigne we may date the influence of that gifted and ever enlarging *rationalistic* school who gradually effected the destruction of the belief in witchcraft. *Lecky*, Rationalism, I. 111.

Rationalistic Monarchians. See *Monarchian*.

rationalistical (rash′on-a-lis′ti-kal), *a.* [< *rationalistic* + *-al*.] Same as *rationalistic*.

rationalistically (rash′on-a-lis′ti-kal-i), *adv.* In a rationalistic manner.

rationality (rash-o-nal′i-ti), *n.* [< F. *rationalité* = Sp. *racionalidad* = Pg. *racionalidade* = It. *razionalità*, < LL. *rationalita(t-)s*, reasonableness, rationality, < L. *rationalis*, reasonable: see *rational*.] 1. The rational faculty; the power of reasoning; possession of reason; intelligence.

God has made *rationality* the common portion of mankind. *Dr H. More.*

Yet the highest and most improved parts of *rationality* are frequently caught in the entanglements of a tenacious imagination, and submit to its obstinate but delusory dictates. *Glanville*, Vanity of Dogmatizing, xi.

2. The character of being rational; accordance with reason; reasonableness; congruity; fitness.

Well directed intentions, whose *rationalities* will not bear a rigid examination. *Sir T. Browne.*

"It may do good, and it can do no harm," is the plea for many actions which have scarcely more *rationality* than worship of a painted stone.
H. Spencer, Prin. of Sociol., App. A.

3. The exercise, result, or manifestation of reason; rational principle, motive, or causation; basis in reason.

An essay on the "*Rationality* of History." . . . In which history is represented as a "struggle towards rational freedom. *H. Sidgwick*, Mind, XIII. 406.

The solid black vote, cast, we said, without *rationality* at the behest of a few scoundrels *The Century*, XXX. 676.

rationalization (rash′on-al-i-zā′shon), *n.* [< *rationalize* + *-ation*.] 1. The act of rationalizing; a making rational or intelligible; subjection to rational tests or principles.

Lysons argues very strongly in favour of the famous story of "Whittington and his Cat," and rejects the *rationalization* which explains the legend by supposing Whittington's fortunes to have been made in the voyages of a mediæval cat or merchant-vessel. *Encyc. Brit.*, XXIV. 556.

2. In *alg.*, the process of clearing an equation from radical signs.

Also spelled *rationalisation*.

rationalize (rash′on-al-iz), *v.*; pret. and pp. *rationalized*, ppr. *rationalizing*. [< F. *rationaliser*; as *rational* + *-ize*.] I. *trans.* 1. To make conformable to reason; give rationality to; cause to be or to appear reasonable or intelligible.

Eusebius tells us that religion was divided by the Romans into three parts the mythology, or legends that had descended from the poets; the interpretations or theories by which the philosophers endeavoured to *rationalize*, lighter, or explain away these legends; and the ritual or official religious observances. *Lecky*, European Morals, I. 429.

When life has been duly *rationalized* by science, it will be seen that among a man's duties care of the body is imperative. *H. Spencer*, in Pop. Sci. Mo., XXII. 357.

The faculties of the mind have been *rationalized* into functions of the mind; so many sorts of operations, classified as observation demands.
Hodgson, Phil. of Reflection, II. 247.

2. To subject to the test of reason; explain or interpret by rational principles; treat in the manner of a rationalist: as, to *rationalize* religion or the Scriptures.—3. In *alg.*, to free from radical signs.

II. *intrans.* To think for one's self; employ the reason as a supreme test; argue or speculate upon the basis of rationality or rationalism; act as a rationalist.

If they [certain theologians] *rationalise* as the remarkable school of Cambridge Platonists *rationalised*, it is with a sincere belief that they are only bringing out the full meaning of the doctrine which they expound.
Leslie Stephen, Eng. Thought, ii. ¶ 60.

To *rationalise* meant to apply the canons of our limited enlightenment to the unlimited ranges of actuality.
W. Wallace, Logic of Hegel, Prolegomena, vi.

In order to know, in any wide and large sense, we must *rationalize*.
Henry Calderwood, New Princeton Rev., III. 23.

Also spelled *rationalise*.

rationalizer (rash′on-al-ī-zėr), *n.* One who rationalizes, or practises the methods of the rationalists; one who tests doctrines, principles, etc., by the light of abstract reason, or who employs reason alone in interpretation or explanation. Also spelled *rationaliser*.

Like many other *rationalisers*, he [Thomas Burnet] fancied himself to be confirming instead of weakening Scriptural authority. *Leslie Stephen*, Eng. Thought, i. ¶ 8.

rationally (rash′on-al-i), *adv.* In a rational manner; in consistency with reason; reasonably: as, to speak *rationally*; to behave *rationally*.

rationalness (rash′on-al-nes), *n.* The state of being rational, or consistent with reason.

rationary (rash′on-ā-ri), *a.* [= F. *rationnaire*, one who receives rations, one who receives a salary, < ML. *rationarius*, relating to accounts, an accountant, < L. *ratio(n-)*, a reckoning, an account, ML. allowance: see *ration*.] Of or pertaining to accounts. [Rare.]

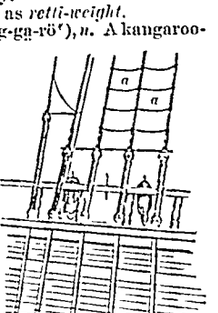
Ratitæ (rā-tī′tē), *n. pl.* [NL., fem. pl. (sc. *Aves*, birds) of *ratitus*: see *ratite*.] One of the prime divisions of birds, including the ostriches, cassowaries, emus, and kiwis; the group of struthious birds, as contrasted with *Carinatæ*, to which all other existing birds belong. The *Ratitæ* are flightless, with more or less rudimentary wings; the sternum is a flattened or concavo-convex buckler-like bone, without a keel, developing from paired lateral centers of ossification. Associated with this condition of the sternum is a special configuration of the scapular arch, the scapula and coracoid meeting at a very obtuse angle, or with nearly coincident axes, and clavicles being absent or defective. The bones of the palate are peculiarly arranged, the pterygoids articulating with the basisphenoid in a manner only paralleled in *Carinatæ* in the tinamous. The Cretaceous genus *Hesperornis* was ratite in sternal characters, but is excluded from *Ratitæ* by the possession of teeth. The families of living *Ratitæ* usually recognized are the *Struthionidæ*, *Rheidæ*, *Casuariidæ*, and *Apterygidæ*; the genera are *Struthio*, *Rhea*, *Casuarius* and *Dromæus*, and *Apteryx*; the species are few. The extinct New Zealand moas (*Dinornithidæ* and *Palapteryyidæ*) and the Madagascar *Æpyornithidæ* are also *Ratitæ*. The name was introduced by B. Merrem in 1813; it passed almost unnoticed for some years, but has lately come into almost universal use.

ratitate (rat′i-tāt), *a.* [< *ratite* + *-ate*[1].] Same as *ratite*. [Rare.]



ratite (rā′tīt), *a.* [< NL. *ratitus*, < L. *ratis*, a raft.] Raft-breasted, as a bird; having a flat breastbone or sternum with no keel; having no keel, as a breast-bone; ecarinate; of or pertaining to the *Ratitæ*.

ratoon (ra-tön'), *n.* [Also *rattoon*; = Sp. *retoño*, a new sprout or shoot (> *retoñar*, sprout anew, put forth shoots again), < Hind. *ratun*, a second crop of sugar-cane from the same roots.] 1. A sprout or shoot springing up from the root of a plant after it has been cropped; especially, a new shoot from the root of a sugar-cane that has been cut down. Compare *plant-cane*.

Plant canes generally take more lime than *ratoons* to cause the juices to granulate.
T. Roughley, Jamaica Planter's Guide (1823), p. 344.

Next year [second crop] the cane sprouts from the stubble, and is called first *ratoons*. . . . The second year it sprouts again, and is called second *ratoons*.
The Century, XXXV. 111.

2. The heart-leaves in a tobacco-plant. *Imp. Dict.*

ratoon (ra-tön'), *v. i.* [= Sp. *retoñar*, sprout or spring up anew; from the noun: see *ratoon*, *n.*] To sprout or send up new shoots from the root after being cropped or cut down: said of the sugar-cane and some other plants.

The cocos, cassavas, and sweet potatoes will *ratoon* in two or three years; the negro yams are a yearly crop, but the white yams will last in the ground for several years.
T. Roughley, Jamaica Planter's Guide, p. 317.

On the Upper Coast, above New Orleans, it is customary to let the stubble *ratoon* but once. In Cuba it often *ratoons* six successive years, but the cane becomes constantly more woody and poorer in saccharine matter.
The Century, XXXV. 111.

ratount, *n.* An obsolete form of *ratten*.

rat-pit (rat'pit), *n.* An inclosure in which rats are baited or killed. The object is to ascertain how many rats a dog can kill in a given time, or which of two or more dogs can kill them most rapidly.

rat-poison (rat'poi'zn), *n.* 1. Something used to poison rats with, as a preparation of arsenic. —2. A West African shrub, *Chailletia toxicaria*, whose seeds are used to destroy rats. The genus belongs to the *Chailletiaceæ*, a small order allied to the *Celastrineæ* and *Rhamnaceæ*. In the West Indies *Hamelia patens* is called *rat-poison*.

ratsbane (rats'bān), *n.* [< *rat's*, poss. of *rat*[1], + *bane*[1], as in *henbane*, etc.: see *bane*[1].] 1. Rat-poison. Arsenious acid is often so called.

Wherefore . . . you see by the example of the Romans that playes are *ratsbane* to government of common-weales.
Prynne, Histrio-Mastix, I., iv. 1.

We live like vermin here, and eat up your cheese—
Your mouldy cheese that none but rats would bite at,
Therefore 'tis just that *ratsbane* should reward us.
Fletcher, Sea Voyage, iv. 3.

2. A plant, *Chailletia toxicaria*. See *rat-poison*, 2.

ratsbane (rats'bān), *v. t.*; pret. and pp. *ratsbaned*, ppr. *ratsbaning*. [< *ratsbane*, *n.*] To poison with ratsbane.

rat-snake (rat'snāk), *n.* A colubrine serpent of the genus *Ptyas*, *P. mucosus*, a native of India, Ceylon, etc., attaining a length of 7 feet, frequently entering houses. Some similar snakes are also called by the same name.

ratteen (ra-tēn'), *n.* [Also *ratine*; = D. *ratijn* = G. Sw. Dan. *ratin*, < F. *ratine*, a kind of cloth, = Sp. Pg. *ratina* = It. *rattina*; origin uncertain; prob. (like F. *rate*, milt, spleen) so called from its loose cellular texture and likeness to a honeycomb, < LG. *rate*, honeycomb.] A kind of stuff, usually thick and resembling drugget or frieze: it is chiefly employed for linings.

ratten (rat'n), *n.* [Also *rattan*, *ratton*, *rattin*, *rotten*, *rottan*; < ME. *raton*, *ratoun*, *ratone*, < OF. (and F.) *raton*, a rat, = Sp. *raton*, a mouse, < ML. *rato(n-)*, a rat: see *rat*[1]. Cf. *kitten* as related to *cat*.] A rat. [Obsolete or prov. Eng. and Scotch.]

Thanne ran ther a route of *ratones*, as it were,
And smale mys with hem mo than a thousand.
Piers Plowman (C), i. 165.

I comawnde alle the *ratons* that are here aboute,
That non dwelle in this place with-inne ne with-owte.
Political Poems, etc. (ed. Furnivall), p. 23.

The bald *rattons*
Had eaten his yellow hair.
Young Bekie (Child's Ballads, IV. 11).

"A Yorkshire burr," he affirmed, "was as much better than a Cockney's lisp as a bull's bellow than a *rattan's* squeak." *Charlotte Brontë*, Shirley, p. 64.

ratten (rat'n), *v. t.* [< *ratten*, *n.* Cf. *rat*[1], *v.*] To play mischievous tricks upon, as an obnoxious person, for the purpose of coercion or intimidation. The members of a trades-union ratten a fellow-workman who refuses to join the union, to obey its behests, or to pay his dues, by secretly removing or breaking his tools or machinery, spoiling his materials, or the like, and ironically ascribing the mischief to rats. The practice was at one time prevalent in some of the manufacturing districts of Great Britain.

For enforcing payment of entrance-fees, contributions towards paying the fermes (dues), as well as of fines, the Craft-Gilds made use of the very means so much talked of in the case of the Sheffield Trade-Unions, namely *rattening*: that is, they took away the tools of their debtors.
English Gilds (E. E. T. S.), Int., p. cxxvii.

A piece of sulphate of copper put into an indigo-vat throws it out of order, by oxidising the white indigo and sending it—in an insoluble state—to the bottom. This is a method of *rattening* not unknown in dye-works.
W. Crookes, Dyeing and Calico printing, p. 518.

Rattening, as defined by the Report of the Royal Commission, is "the abstraction of the workman's tools, so as to prevent him from earning his livelihood until he has obeyed the arbitrary orders of the union." It is satisfactory to know that this system . . . was chiefly confined to Sheffield and Manchester.
George Howell, Conflicts of Capital and Labor, vii. § 13.

rattenert, **rattonert**, *n.* [< ME. *ratoner*, *ratonere*, rat-catcher, < OF. *raton*, a rat: see *ratten*.] A ratter or rat-catcher.

A rybidour and a *ratoner*, a rakere and hus knaue.
Piers Plowman (C), vii. 371.

ratter[1] (rat'ėr), *n.* [< *rat*[1], *v.*, + *-er*[1].] 1. One who catches rats; a rat-catcher.—2. An animal which catches rats, as a terrier.

ratter[2] (rat'ėr), *n.* [< *rat*[1], *v.*, 2, + *-er*[1].] One who rats, or becomes a renegade; also, a workman who renders himself obnoxious to a trades-union. See *ratting*, 2. [Colloq.]

The Essay on Faction is no less frank in its recognition of self-interest as a natural and prevailing motive, and almost cynical in its suppression of resentment against *ratters* and traitors. *E. A. Abbott*, Bacon, p. 84.

rat-terrier (rat'ter'i-ėr), *n.* A small active dog used to kill rats.

rattery (rat'ėr-i), *n.* [< *ratter*[2] + *-y* (see *-ery*).] The qualities or practices of a ratter; apostasy; tergiversation. [Rare.]

Such a spectacle refreshes me in the *rattery* and scoundrelism of public life.
Sydney Smith, Letters, 1822. (*Davies.*)

rattinet (rat-i-net'), *n.* [< F. *ratine*, a kind of cloth (see *ratteen*), + dim. *-et*.] A woolen stuff thinner than ratteen.

ratting (rat'ing), *n.* [Verbal n. of *rat*[1], *v.*, 2.] 1. The act of deserting one's principles, and going over to the opposite party.—2. In the trades, the act of working for less than established or demanded prices, or of refusing to strike, or of taking the place of a striker.—3. A low sport consisting in setting a dog upon a number of rats confined in a tub, cage, or pit, to see how many he will kill in a given time.

rattish (rat'ish), *a.* [< *rat*[1] + *-ish*[1].] Characteristic of rats; having a rat-like character; like a rat.

rattle[1] (rat'l), *v.*; pret. and pp. *rattled*, ppr. *rattling*. [< ME. *ratelen*, rattle, clatter, etc., < AS. **hrætelan* (cf. *hrætelwyrt*, 'rattlewort') = D. *ratelen*, rattle, = LG. *rateln*, *rötteln* = MHG. *razzeln*, rage, roar, G. *rasseln* (> Dan. *rasle* = Sw. *rasla*), rattle; freq. of a simple verb seen in MHG. *razzen*, *ratzen*, rattle; perhaps akin to Gr. *σφαδάζειν*, swing, wave, brandish, shake; perhaps in part imitative (cf. *rat-a-tat*, *rat-tat*, in imitation of a knock at a door, *rattan*[3], F. *rataplan*, in imitation of a drum, etc.), and in so far comparable with Gr. *κρότος*, a rattling noise, *κροτεῖν*, knock, rattle, *κρόταλον*, a rattle, *κροταλίζειν*, rattle (see *Crotalus*, rattlesnake). Cf. dial. *rackle*, a var. of *rattle*. Hence ult. *rail*[4], *Rallus*, *râle*.] I. *intrans.* 1. To give out a rapid succession of short, sharp, jarring or clattering sounds; clatter, as by continuous concussions.

The quiver *rattleth* against him. Job xxxix. 23.

To the dread *rattling* thunder
Have I given fire, and rifted Jove's stout oak
With his own bolt. *Shak.*, Tempest, v. 1. 44.

"Farewell!" she said, and vanished from the place;
The sheaf of arrows shook, and *rattled* in the case.
Dryden, Pal. and Arc., iii. 282.

Swift Astolpho to the *rattling* horn
His lips applies.
Hoole, tr. of Orlando Furioso, xxxiii.

One or two [rattlesnakes] coiled and *rattled* menacingly as I stepped near. *T. Roosevelt*, The Century, XXXVI. 201.

2. To move or be carried along with a continuous rapid clatter; go or proceed or bear one's self noisily: often used with reference to speed rather than to the accompanying noise.

And off my mourning-robes; grief, to the grave;
For I have gold, and therefore will be brave;
In silks I'll *rattle* it of every colour.
J. Cook, Green's Tu Quoque.

I'll take a good *rattling* gallop.
Sterne, Tristram Shandy, iv. 20.

Wagons . . . *rattling* along the hollow roads, and over the distant hills. *Irving*, Sketch-Book, p. 445.

We *rattled* away at a merry pace out of the town.
R. D. Blackmore, Lorna Doone, xiv.

3. To speak with noisy and rapid utterance; talk rapidly or in a chattering manner: as, to *rattle* on about trifles.

The *rattling* tongue
Of saucy and audacious eloquence.
Shak., M. N. D., v. 1. 102.

The girls are handsome, dashing women, without much information, but *rattling* talkers.
C. D. Warner, Their Pilgrimage, p. 183.

II. *trans.* 1. To cause to make a rattling sound or a rapid succession of hard, sharp, or jarring sounds.

Her chain she *rattles*, and her whip she shakes.
Dryden.

Rattle his bones over the stones!
He's only a pauper whom nobody owns!
T. Noel, The Pauper's Drive.

2. To utter in sharp, rapid tones; deliver in a smart, rapid manner: as, to *rattle* off a string of names.

He *rattles* it out against Popery and arbitrary power.
Swift, Against Abolishing Christianity.

The rolls were *rattled* off; the short, crisp commands went forth. *The Century*, XXXVII. 466.

3. To act upon or affect by rattling sounds; startle or stir up by any noisy means.

Sound but another, and another shall
As loud as thine *rattle* the welkin's ear.
Shak., K. John, v. 2. 172.

These places [woodlands] are generally strongholds for foxes, and should be regularly *rattled* throughout the season. *Encyc. Brit.*, XII. 395.

4. To scold, chide, or rail at noisily; berate clamorously.

If my time were not more precious
Than thus to lose it, I would *rattle* thee,
It may be beat thee.
Beau. and Fl., Honest Man's Fortune, v. 3.

I to Mrs. Ann, and, Mrs. Jem being gone out of the chamber, she and I had a very high bout. I *rattled* her up, she being in bed; but, she becoming more cool, we parted pretty good friends. *Pepys*, Diary, Feb. 6, 1660.

5. To shake up, unsettle, or disturb by censure, annoyance, or irritation; bring into an agitated or confused condition. [Colloq. or slang.]

The king hath so *rattled* my lord-keeper that he is now the most pliable man in England.
Cottington, To Strafford (1633), quoted in Hallam's Const. Hist., II. 89.

Unpleasant stories came into my head, and I remember repenting to myself more than once (candor is better than felicity of phrase), "Be careful, now; don't get *rattled!*"
Atlantic Monthly, LXIV. 110.

rattle[1] (rat'l), *n.* [< ME. *ratle*, a rattle, < AS. **hræteln*, in comp. *hræthelwyrt*, 'rattlewort,' a plant in whose pods the seeds rattle; = MD. *ratele*, D. *ratel* = G. *rassel*, a rattle; from the verb: see *rattle*[1], *v.* Cf. G. *ratsche*, a rattle, clapper; Sw. *rassel*, clank, clash, clatter, etc.]

1. A rapid succession of short, sharp, clattering sounds, as of intermitting collision or concussion.

I'll hold ten Pound my Dream is out;
I'd tell it to you but for the *Rattle*
Of those confounded Drums.
Prior, English Ballad on tr. of Bolleau's Taking of Namur, l. 10.

I aren't like a bird-clapper, forced to make a *rattle* when the wind blows on me *George Eliot*, Adam Bede, lii.

2. A rattling clamor of words; sharp, rapid talk of any kind; hence, sharp scolding or railing.

This *rattle* in the crystal hall
Would be enough to deaf them all.
Cotton (Arber's Eng. Garner, I. 218).

Receiving such a *rattle* for his former contempt by the Bishop of London that he came out blubbering.
Heylin Life of Laud, p. 257. (*Davies.*)

I chid the servants and made a *rattle*.
Swift, Journal to Stella, lv.

3. An instrument or toy contrived to make a rattling sound. The watchman's rattle, formerly used for giving an alarm, and the child's toy resembling it, consist of a vibrating tongue slipping over the teeth of a rotating ratchet-wheel, and producing much noise when rapidly twirled by the handle. Other toy rattles for children, and those used by some primitive races for various purposes, commonly consist of a box or casing, or even a hollow gourd or shell, with or without a handle, containing loose pebbles or other hard objects.

The *rattles* of Isis and the cymbals of Basilea nearly enough resemble each other *Raleigh*

They use *Rattles* of the shell of a certaine fruite in which they put Stones or Graines, and call them Maraca, of which they haue some superstitious conceit.
Purchas, Pilgrimage, p. 847.

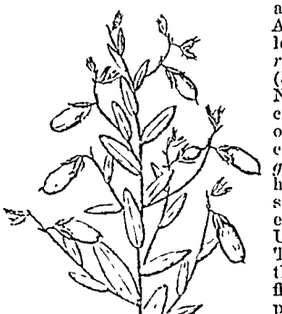
Behold the child, by Nature's kindly law,
Pleased with a *rattle*, tickled with a straw.
Pope, Essay on Man, ii. 276.

4. One who talks rapidly and without moderation or consideration; a noisy, impertinent talker; a jabberer.

She had not been brought up to understand the propensities of a *rattle*, nor to know to how many idle assertions and impudent falsehoods the excess of vanity will lead.
Jane Austen, Northanger Abbey, ix

They call me their agreeable *Rattle*.
Goldsmith, She Stoops to Conquer.

It may seem strange that a man who wrote with so much perspicuity, vivacity, and grace should have been, whenever he took a part in conversation, an empty, noisy, blundering *rattle*. *Macaulay*, Goldsmith.



5. The crepitaculum of the true rattlesnake, consisting of a series of horny epidermic cells of an undulated pyramidal shape, articulated one within the other at the extremity of the tail. See *rattlesnake*.—6. (*a*) An annual herb, *Rhinanthus Crista-galli*, of meadows and pastures in Europe and northern Asia. It attaches itself by its fibrous roots to the roots of living grasses, etc., thus doing much damage. Its calyx in fruit is orbicular, inflated but flattened, containing a capsule of similar form with a few large flat, generally winged seeds. This is the common or yellow rattle, also called locally *penny-grass*, *penny-rattle*, *rattlebags*, *rattlebox*, and *rattle-penny*. (*b*) One of the Old World louseworts, *Pedicularis palustris*, the red rattle.—**The rattles.** (*a*) Croup. (*b*) The death-rattle.

rattle[2] (rat'l), *v. t.*; pret. and pp. *rattled*, ppr. *rattling*. Puttenham, Arte of Eng. Poesie, ii. 13 [18].

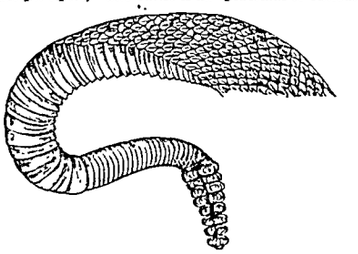
rattlepate (rat'l-pāt), *n.* A noisy, empty fellow; a trifling or impertinent chatterer.

rattle-pated (rat'l-pā^{t}ted), *a.* Same as *rattle-headed*.

rattler (rat'lėr), *n.* [< *rattle*[1] + *-er*[1].] 1. One who rattles, or talks away without reflection or consideration; a giddy, noisy person.—2. Anything which causes a person to become rattled, as a smart or stunning blow. [Slang or colloq.]

And once, when he did this in a manner that amounted to personal, I should have given him a *rattler* for himself if Mrs. Boffin had not thrown herself betwixt us.
Dickens, Our Mutual Friend.

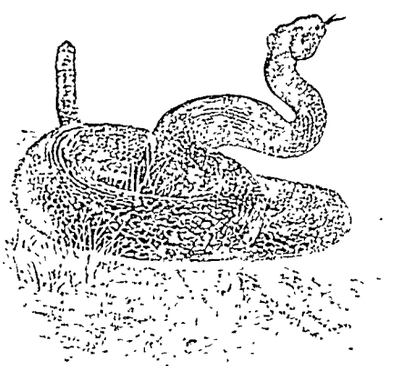
3. A rattlesnake. [U. S.]



We have had *rattlers* killed every year; copperheads less frequently. *Sci. Amer.*, N. S., LVI. 85.

4. A big or bold lie. [Colloq.]—5. Among cutlers, a special form of razor with a very thin blade, the faces of which are ground to an angle of fifteen degrees.—**Diamond rattler**, the diamond rattlesnake.

rattleran (rat'l-ran), *n.* The lower half of a fore quarter of beef; a plate-piece. [U. S.]



rattleskull (rat'l-skul), *n.* Same as *rattlepate*.

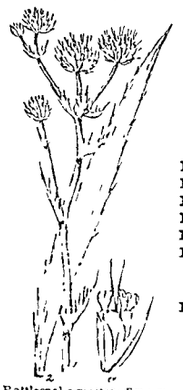
rattlesnake (rat'l-snāk), *n.* [< *rattle*[1] + *snake*.] A venomous serpent of the family *Crotalidæ*, whose tail ends in a rattle or crepitaculum; a crotaliform or solenoglyphic serpent, or pit-viper, of either of the genera *Crotalus* and *Crotalophorus*. These poisonous reptiles are confined to America, where there are many species. Those whose head is covered on top with scales like those of the back belong to the genus *Crotalus*; others, with the top of the head plated, belong to *Crotalophorus*, *Caudisona*, or *Sistrurus*. The former are the larger species; both are equally venomous, in proportion to their size, and both have the pit between the eyes and nose characteristic of all the pit-vipers. (See cut under *pit-viper*.) The rattle is an epidermal or cuticular

Hinder Part of a Rattlesnake, showing the rattle, with seven "rings" and a "button."

structure, representing the extreme of development of the horn or spine in which the tail of many other serpents ends. It consists of several hard horny pieces loosely articulated together, so that when rapidly vibrated they make a peculiar whirring or rattling noise. Rattlesnakes are sluggish and naturally inoffensive reptiles, only seeking to destroy their prey, like other animals. When alarmed or irritated they prepare to defend themselves by coiling in the attitude best adapted for striking with the fangs, at the same time sounding the warning rattle, during which process both the head and the tail are held erect. The

Rattlesnake (*Crotalus durissus*) coiled to strike.

snake can strike to a distance of about two thirds of its own length. The mechanism of the jaws is such that, when the mouth is wide open, the fangs are erected in position for piercing; and, when the mouth closes upon the wound the fangs have made in the flesh, a tiny stream of venom is spirted through each fang into the bitten part. (See cuts under *Crotalus* and *poison-fang*.) The poison, which is specially modified saliva, is secreted in a venom-gland near the angle of the jaw, and is conveyed by a venom-duct to the tooth. It is extremely dangerous, readily killing the small animals upon which the snake feeds, and is often fatal to man and other large animals. It has an acid reaction, neutralizable by an alkali, and is harmless when swallowed, if there is no lesion of the mucous membrane, though exceedingly poisonous when introduced into the circulation. The flesh of the rattlesnake is edible, and some animals, as hogs and peccaries, habitually feed upon these snakes. Among the best-known species are the banded and the diamond rattlesnakes, which inhabit eastern as well as other regions of the United States, and sometimes attain a length of 5 or 6 feet; many similarly large ones are found in the west, among them *Crotalus pyrrhus*, of a reddish color. The commonest species of the west is the Missouri rattlesnake, *C. confluentus*, very widely distributed from the British to the Mexican boundary. Among the smaller species are the massasauga, *Crotalophorus tergeminus* (*Sistrurus catenatus*), also known as the *sidewiper*, from its habit of wriggling obliquely. One species, *C. cerastes*, has a small horn over each eye.



rattlesnake-fern (rat'l-snāk-fėrn), *n.* One of the moonworts or grape-ferns, *Botrychium Virginianum*, found through a large part of North America and in the Old World. The sterile segment of the frond is broadly triangular, thin and finely divided, and of ample size or often reduced. The name is apparently from the resemblance of the fruit to the rattles of a rattlesnake.

rattlesnake-grass (rat'l-snāk-gràs), *n.* An American grass, *Glyceria Canadensis*, a handsome stout species with a large panicle of drooping spikelets, which are ovate, and flattish but turgid, like those of *Briza*, the quak-

ing-grass. It is a useful forage-grass in wet places. Sometimes called *tall quaking-grass*.

rattlesnake-herb (rat'l-snāk-ėrb), *n.* The baneberry or cohosh. See *Actæa*.

rattlesnake-master (rat'l-snāk-mās'tėr), *n.* One of several American plants at some time reputed to cure the bite of the rattlesnake. (*a*) The false aloe, *Agave Virginica*, said to be so called in South Carolina. A tincture of this plant is sometimes used for flatulent colic. (*b*) According to Pursh, *Liatris scariosa* and *L. squarrosa*, in Virginia, Kentucky, and the Carolinas. (*c*) A species of eringo, *Eryngium yuccæfolium*, also called, like *Liatris*, *button-snakeroot*; but the plants are quite unlike. See the generic names.

Rattlesnake-master (*Eryngium yuccæfolium*).
1, upper part of the stem, with the heads; 2, a leaf; *a*, a flower, with the bract *c*.

rattlesnake-plantain (rat'l-snāk-plan'tān), *n.* Any one of the three American species of *Goodyera*.

rattlesnake-root (rat'l-snāk-röt), *n.* A plant, *Prenanthes serpentaria*, also *P. alba* and *P. altissima*, the first at least

Rattlesnake-root (*Prenanthes alba*).
1, the inflorescence; 2, lower part of stem with root; *a*, a head after anthesis; *b*, the *a* henium with the pappus

having some repute in North Carolina, etc., as a remedy for snake-bites. See *Prenanthes* and *cancer-weed*.

rattlesnake-weed (rat'l-snāk-wēd), *n.* A hawkweed, *Hieracium venosum*, of the eastern half of the United States. It has a slender stem a foot or two high, forking above into a loose corymb of a few yellow heads. The leaves, which are marked with purple veins, are situated mostly at the base. These and the root are thought to possess an astringent virtue.

rattletrap (rat'l-trap), *n.* A shaky, rattling object; especially, a rattling, rickety vehicle; in the plural, objects clattering or rattling against each other. [Colloq.]

Hang me if I'd ha' been at the trouble of conveying her and her *rattle-traps* last year across the channel.
Mrs. Gore, Castles in the Air, xxxiv.

"He'd destroy himself, and me too, if I attempted to ride him at such a *rattletrap* as that." *A rattletrap!* The quintain that she had put up with so much anxious care
Trollope, Barchester Towers, viii.

rattleweed (rat'l-wēd), *n.* A plant of the genus *Astragalus*, in numerous species. It includes various loco-weeds, and is presumably extended to *Oxytropis* in the Rocky Mountain region.

rattlewing (rat'l-wing), *n.* The golden-eyed duck, or whistlewing, *Clangula glaucion*. Also called *whistler*. [Eng.]

rattlewort (rat'l-wėrt), *n.* [Not found in ME.; < AS. *hrætelwyrt*, rattlewort, < **hrætele*, a rattle, + *wyrt*, wort: see *rattle*[1], *wort*[1].] A plant of the genus *Crotalaria*. Compare *rattle-box*, 2 (*b*).

rattling[1] (rat'ling), *n.* [Verbal n. of *rattle*[1], *v.*] 1. The act of making a rattle, clatter, or continuous jarring noise.

The noise of a whip, and the noise of the *rattling* of the wheels, and of the prancing horses, and of the jumping chariots. Nahum iii. 2.

2. The act of berating or railing at or otherwise assailing or attacking: as, to give one a *rattling*.

rattling[1] (rat'ling), *p. a.* [Ppr. of *rattle*[1], *v.*] 1. Making or adapted for making a rattle; hence, smart; sharp; lively in action, movement, or manners: as, a *rattling* rider; a *rattling* pace; a *rattling* game; a *rattling* girl.

He ance tell'd me . . . that the Psalms of David were excellent poetry! as if the holy Psalmist thought o' *rattling* rhymes in a blether, like his ain silly clinkum-clankum things that he ca's verse. *Scott*, Rob Roy, xxi.

2. Bewilderingly large or conspicuous: as, *rattling* stakes or bets. [Colloq. or slang.]

rattling[2] (rat'ling), *n.* A corruption of *ratline*.

ratton, *n.* See *ratten*.

rattoner†, *n.* See *rattener*.

rattoon[1], *n.* See *ratoon*.

rattoon[2]†, *n.* Same as *ratan*.

rat-trap (rat'trap), *n.* A trap for catching rats; also, something resembling or suggesting such a trap.—**Rat-trap pedal.** See *pedal*.

rauchwacke (rāk'wak; G. pron. rouch'vä'ke), *n.* [G., < *rauch*, smoke (= E. *reek*), + *wacke*, a sort of stone consisting of quartz, sand, and mica: see *wacke*. Cf. *graywacke*.] Dolomite or dolomitic limestone, containing many small irregular cavities, frequently lined with crystals of brown-spar: a characteristic mode of occurrence of the Zechstein division of the Permian in various parts of Germany.

raucid (rā'sid), *a.* [< L. **raucidus*, LL. dim. *raucidulus*, hoarse, < *raucus*, hoarse: see *raucous*.] Same as *raucous*.

Methinks I hear the old boatman [Charon] paddling by the weedy wharf, with *raucid* voice, bawling "sculls."
Lamb, To the Shade of Elliston.

raucity (rā'si-ti), *n.* [< F. *raucité*, hoarseness, < L. *raucita(t-)s*, hoarseness, also snoring, < *raucus*, hoarse: see *raucous*.] Roughness or harshness of utterance; hoarseness.

The purling of a wreathed string, and the *raucity* of a trumpet. *Bacon*, Nat. Hist., § 700.

raucle (rā'kl), *a.* [A var. of *rackel*, *rackle*, rash, fearless, also stout, firm, strong: see *rackle*, *rakel*.] Coarse; harsh; strong; firm; bold. [Scotch.]

Auld Scotland has a *raucle* tongue.
Burns, Prayer to the Scotch Representatives.

raucous (rā'kus), *a.* [= F. *rauque* = Pr. *raue*, *rauch* = Cat. *ronc* = Sp. *ronco*, *rauco* = Pg. *rouco* = It. *rauco*, < L. *raucus*, hoarse; cf. Skt. √ *ru*, cry out.] Hoarse; harsh; croaking in sound: as, a *raucous* voice or cry.

raucously (rā'kus-li), *adv.* In a raucous manner; with a croaking sound; hoarsely.

Rausan (F. pron. rō-zon'), *n.* [F.: see def.] A wine of Bordeaux, of the commune of Margaux: its best variety is the wine of Château Rausan, often exported under the name of *Rausan-Margaux*.

Rauwolfia (rau-wol'fi-ä), *n.* [NL. (Plumier, 1703), named after Leonhard *Rauwolf*, a German botanist and traveler of the sixteenth century.] A genus of gamopetalous plants of the order *Apocynaceæ*, the dogbane family, tribe *Plumerieæ*, and type of the subtribe *Rauwolfieæ*. It is characterized by a salver-shaped corolla with included stamens, an annular or cup-shaped disk, and an ovary with two carpels, each with two ovules, in fruit becoming drupaceous and united, often beyond the middle. There are about 42 species, natives of the tropics in America, Asia, and Africa, also in South Africa. They are trees or shrubs, commonly with smooth whorled leaves which are three or four in a circle and finely and closely feather-veined. The small flowers and fruit are in cymose clusters which become lateral and commonly resemble umbels. Most species are actively poisonous; some, as *R. nitida*, are in repute as cathartics and emetics. Several medicinal species, with remarkably twisted roots and stems, were formerly separated as a genus *Ophioxylon* (Linnæus, 1767), on account of their producing both sterile flowers with two stamens and fertile flowers with five, as *R. serpentina*, the East Indian serpentwood, a climber with handsome leaves, the root of which is used in India and China as a febrifuge. *R. Sandwicensis*, the hao of the Hawaiians, a small milky tree with white scarred branches, is unlike all other species in its leafy sepals.

ravage (rav'äj), *n.* [< F. *ravage*, ravage, havoc, spoil, < *ravir*, bear away suddenly: see *ravish*.] Desolation or destruction wrought by the violent action of men or beasts, or by physical or moral causes; devastation; havoc; waste; ruin: as, the *ravage* of a lion; the *ravages* of fire or tempest; the *ravages* of an invading army; the *ravages* of passion or grief.

Would one think 'twere possible for love
To make such *ravage* in a noble soul? *Addison*.

And many another suppliant crying came
With noise of *ravage* wrought by beast and man.
Tennyson, Gareth and Lynette.

=Syn. Pillage, plunder, spoliation, despoilment. These words all apply not to the treatment of people directly, but to the destruction or appropriation of property.

ravage (rav'äj), *v. t.*; pret. and pp. *ravaged*, ppr. *ravaging*. [< F. *ravager*, ravage; from the noun.] To desolate violently; lay waste, as by force, storm, etc.; commit havoc on; devastate; pillage; despoil.

Cæsar
Has *ravaged* more than half the globe, and sees
Mankind grown thin by his destructive sword.
Addison, Cato i. 1.

While oft in whirls the mad tornado flies,
Mingling the *ravaged* landscape with the skies.
Goldsmith, Des. Vil., l. 358.

=Syn. To plunder, waste. See the noun.

ravager (rav'äj-ėr), *n.* [< F. *ravageur*, < *ravager*, ravage: see *ravage*.] One who ravages; a plunderer; a spoiler; one who or that which lays waste.

4. To disentangle; disengage the threads or fibers of (a woven or knitted fabric, a rope, a mass of tangled hair, etc.); draw apart thread by thread; unravel: commonly with *out*: in this sense (the exact contrary of the first sense), originally with *out*, *ravel out* being equivalent to *unravel*.

Must I *ravel out*
My weaved-up follies?
Shak., Rich. II., iv. 1. 225.

The fiction pleased their lovers long enough,
The night still *ravell'd* what the day renew'd
Denham, in Pope's Odyssey, xix.

A favorite gown had been woven by her maids of cotton striped with silk, procured by *raveling* the general's discarded stockings *The Century*, XXXVII. 841.

II. *intrans.* 1. To become entangled or snarled, as the ends of loose and dangling threads, or a mass of loose hair. Hence —2. To become involved or confused; fall into perplexity.

As you unwind her love from him,
Lest it should *ravel* and be good to none,
You must provide to bottom it on me
Shak., T. G. of V., III. 2. 52.

Till by their own perplexities involved
They *ravel* more, still less resolved
Milton, S. A., l. 206.

3. To curl up, as a hard-twisted thread. *Jamieson.* [Scotch.]—4. To become untwisted or disjoined, as the outer threads of a loosely made fabric or the strands of a rope; become disjoined thread by thread; fray, as a garment at the edges: commonly with *out*.

I *ravell out*, as sylke doth, je rivle *Palsgrave.*

Hence —5. To suffer gradual disintegration or decay.

Do's my lord *ravell out*? do's he fret?
Marston, The Fawne, II. 1.

And this vast Work all *ravel out* again
To its first Nothing. *Cowley*, Davideis, I.

6†. To make a minute and careful examination in order to straighten what is confused, unfold what is hidden, or clear up what is obscure; investigate; search; explore.

It can be little pleasure to us to *rave* [sic ed. 1620, 1671, *rake*, ed. 1651, 1658, read *ravel*] into the infirmities of God's servants, and bring them upon the stage
Bp. Sanderson, Works, I. 109.

It will be needless to *ravel* far into the records of elder times *Decay of Christian Piety.*

The humour of *ravelling* into all these mystical or entangled matters . . . produced infinite disputes.
Sir W. Temple.

ravel[1] (rav'el or rav'l), *n.* [Formerly or dial. also *revel*; < *ravel*[1], *v.*] 1. A raveled thread; a raveling. [Rare.]

The Century, XXXIX. 444.

ravelment (rav'el-ment), *n.* [< *ravel*[1] + *-ment*.] A pulling or drawing apart, as in raveling a fabric; hence, disunion of feeling; disagreement; embroilment.

raven[1] (rā'vn), *n.* and *a.* [< ME. *raven*, *reven*, *revn*; pl. *ravenes*, *refnes*, *remes*; < AS. *hræfn*, *hrefn*, *hræmn*, *hremn* = D. *raven*, *rave*, *raaf* = MLG. *raven*, *rave*, LG. *rave* = OHG. *rabo*, also *hraban*, *raban*, *hram*, *ram*, MHG. *rabe*, also *rappe*, *raben*, *ram*, *ramm* (forms remaining in the proper names *Rapp* and *Wolf-ram*) = Icel. *hrafn* = OSw. *rafn*, *ramn* = Dan. *ravn* (not recorded in Goth.), a raven; perhaps, like the crow and owl, named from its cry, namely from the root seen in L. *crepare*, rattle: see *crepitation*, *discrepant*. The alleged etymological connection with L. *corvus*, Gr. κόραξ, raven, L. *cornix*, Gr. κορώνη, crow, Pol. *kruk*, a raven, Skt. *karava*, a raven, is not made out.] **I.** *n.* 1. A bird of the larger species of the genus *Corvus*, having the feathers of the throat lanceolate and distinct from one another. The plumage is entirely black, with more or less lustrous or metallic sheen; the bill and feet are ebony-black; the wings are pointed, the tail is rounded, and the nostrils are concealed beneath large tufts of antrorse plumules. The voice is raucous. The common raven is *C. corax*, about

Raven (*Corvus corax*).

2 feet long and 50 inches in extent of wings. It inhabits Europe, Asia, and some other regions, and the American bird, though distinguished as *C. carnivorus*, is scarcely different. There are several similar though distinct species of various countries, among them *C. cryptoleucus* of western North America, which has the concealed bases of the feathers of the neck snowy-white. Ravens are easily tamed, and make very intelligent pets, but are thievish and troublesome. They may be taught to imitate speech to some extent. In the wild state the raven is omnivorous, like the crow; it nests on trees, rocks, and cliffs, preferring the most inaccessible places, and lays four or five greenish eggs heavily speckled with brown and blackish shades. The American raven is now almost unknown in the eastern parts of the United States, but is still abundant in the west. Ravens have from time immemorial been viewed with superstitious dread, being supposed to bring bad luck and forebode death.

The *raven* himself is hoarse

Ravenala (rav-e-nā'lā), *n.* [NL. (Adanson, 1763), from a native name in Madagascar.] A genus of monocotyledonous plants, of the order

Musaceæ, the banana family. It is characterized by a loculicidally three-valved and three-celled capsule with numerous seeds in six rows, and by separate long and narrow sepals and petals, three of each, all similar and unappendaged. There are but 2 species, natives one of Madagascar, the other of northern Brazil and Guiana. In both the stem is sometimes short, with the leaves almost all radical, at other times forming a tall woody trunk 1 foot to 30 feet high, ringed by leaf-scars. The handsome oblong and two-ranked leaves resemble those of the banana, and are of immense size, being considered the largest of bladed leaves known, with the exception perhaps of the Victoria lily. The long concave leafstalks are divided within into small cellular chambers, about a half-inch square, filled with a clear watery sap which forms a refreshing drink, whence the name *traveler's-tree*, used in botanic gardens for *R. Madagascariensis*. The leaves are also used as a thatch for the native huts. The large flowers are in a short many-flowered raceme within the spathe, and are followed by woody capsules and edible seeds with a bluish waxy pulpy blue aril which yields an essential oil. See *traveler's-tree*.

rawish (râ'ish), *a.* [< *raw*[1] + *-ish*[1].] Somewhat raw; rather raw, in any sense of that word.

The *rawish* dank of clumsy winter.
Marston, Prol. to Antonio's Revenge.

rawly (râ'li), *adv.* 1. In a raw, crude, unfinished, immature, or untempered manner; crudely; roughly.

Nothing is so provale as the *rawly* new
W. W. Story, Roba di Roma, I.

2†. In an unprepared or unprovided state.

Some crying for a surgeon, some upon their wives left poor behind them, some upon the debts they owe, some upon their children *rawly* left *Shak.*, Hen. V., iv. 1. 147.

rawness (râ'nes), *n.* [< ME. *rawenes*, *rawnesse*, *rownes*; < *raw*[1] + *-ness*.] 1. The state or quality of being raw, in any sense.

Of what Comodity such vse of arte wilbe in our tounge may partely be seene by the scholasticall *rawenesse* of some newly Commen from the vniuersities.
Book of Precedence (E. E. T. S., extra ser.), I. 2.

Much if not most of this *rawness* in the use of English must come, not merely from defective training in schools, but from defective training at home.
The Nation, XLVIII. 392.

2†. Unprepared or precipitate manner; want of provision or foresight.

Why in that *rawness* left you wife and child, . . .
Without leave taking? *Shak.*, Macbeth, iv. 3. 26.

rawnsake†, *v. t.* An old form of *ransack*.

raw-port (râ'pōrt), *n.* A port-hole in a small sailing vessel through which in a calm an oar can be worked.

raw-pot (râ'pot), *n.* A young crow. [Local, Irish.]

The crows . . . feeding the young *rawpots* that kicked up such a bobbery in their nests wid hunger.
Mrs. S. C. Hall, Sketches of Irish Char., p. 36.

rax (raks), *v.* [< ME. *raxen*, *roxen*, *rasken*, *rosken*, stretch oneself, < AS. **racsan*, *raxan*, stretch oneself after sleep; with formative *-s* (as in *cleanse*, *rinse*, etc.), from the root of *rack*[1], stretch: see *rack*[1].] **I.** *trans.* To stretch, or stretch out; reach out; reach or attain to; extend the hand to; hand: as, *rax* me ower the pitcher. [North. Eng. and Scotch.]

He raise, and *raxed* him where he stood,
And bade him match him with his marrows.
Raid of the Reidswire (Child's Ballads, VI. 134).

When ye gang to see a man that never did ye nae ill *raxing* a halter [that is, hanging].
Scott, Heart of Mid-Lothian, v.

So he *raxes* his hand across t' table, an' mutters summat as he grips mine. *Mrs. Gaskell*, Sylvia's Lovers, xliii.

II. *intrans.* To perform the act of reaching or stretching; stretch one's self; reach for or try to obtain something. [North. Eng. and Scotch.]

raxle†, *v. i.* [ME. *raxlen*, *roxlen*, *raselen*, a var. or freq. of *raxen*, stretch: see *rax*.] To stretch one's self; rouse up from sleep. Compare *rax*.

I *raxled* & fel in gret affray [after a dream].
Alliterative Poems (ed. Morris), i. 1173.

Benedicite he by-gan with a bolke and hus brest knokede,
Raseled and remed and routte at the laste.
Piers Plowman (C), viii. 7.

ray[1] (rā), *n.* [< ME. *raye*, < OF. *ray*, *rai*, *raid*, F. *rais*, a spoke, ray, = Pr. *rai*, *raig*, *rait*, spoke, ray, = Sp. *rayo*, a spoke, ray, thunderbolt, right line, radius, *radio*, radius, = Pg. *raio*, a spoke, ray, thunderbolt, *radio*, radius, = It. *razzo*, a spoke, ray, beam, *raggio*, a ray, beam, radius, *radio*, ray; also in fem., OF. *raie*, F. *raie*, a line, stroke, = Pr. Sp. *raya*, a line, streak, stroke, limit, boundary (see *ray*[2]); < L. *radius*, a staff, rod, a beam or ray, etc.: see *radius*.] 1. Light emitted in a given direction from a luminous body; a line of light, or, more generally, of radiant energy; technically, the straight line perpendicular to the wave-front in the propagation of a light- or heat-wave. For different waves the rays may have different wave-lengths. Thus, in a pencil or beam of light, which is conceived to be made up of an indefinite number of rays, the rays all have the same wave-length if the beam is monochromatic; but if it is of white light, the wave-lengths of the rays vary by insensible degrees from that of red to that of violet light. (See *radiant energy* (under *energy*), *spectrum*.) A collection of parallel rays constitutes a *beam*; a collection of diverging or converging rays a *pencil*.

Full many a gem of purest *ray* serene
The dark, unfathomed caves of ocean bear.
Gray, Elegy.

2. A beam of intellectual light.

A *ray* of reason stole
Half through the solid darkness of his soul.
Pope, Dunciad, iii. 225.

3. A stripe; streak; line.

Wrought with little *raies*, streames, or streaks.
Baret, Alvearie, 1580.

4. In *geom.*, an unlimited straight line. As it is desirable to give the line different names according as it is conceived (1) as a locus of points, (2) as an intersection of planes, or (3) as an element of a plane, in 1865 the practice was begun of calling the unlimited straight line considered as a locus of points a *ray*. But as it was found that the word did not readily suggest that idea, owing to other associations, the practice was changed, and the line so considered is now called a *range*, while the word *ray* is taken to mean an unlimited straight line as an element of a plane. In older geometrical writings *ray* is synonymous with *radius*, while a line considered as a radial emanation is called a *beam*.

5. In *bot.*: (*a*) One of the branches or pedicels in an umbel. (*b*) The marginal part as opposed to the central part or disk in a head, umbel, or other flower-cluster, when there is a difference of structure, as in many *Compositæ* and in wild hydrangeas. (*c*) A ray-flower. (*d*) A radius. See *medullary rays*, under *medullary*.—6. One of the ray-like processes or arms of the *Radiata*, as of a starfish; a radiated or radiating part or organ; an actinomere. See cuts under *Asterias* and *Asteriidæ*.—7. One of the hard spinous or soft jointed processes which support and serve to extend the fin of a fish; a part of the skeleton of the fin; specifically, one which is articulated, thus contradistinguished from a hard or inarticulated one called specifically a *spine;* a fin-ray.—8. In *entom.*, one of the longitudinal nervures or veins of an insect's wing.—9. *pl.* In *her.*: (*a*) Long indentations or dents by which a heraldic line is broken, whether dividing two parts of the escutcheon or bounding any ordinary. Compare *radiant*, 3 (*a*). (*b*) A representation of rays, whether issuing from the sun or from a corner of the escutcheon, a cloud, or an ordinary. They are sometimes straight, sometimes waving, and sometimes alternately straight and waving; it is in the last form that they are usually represented when surrounding the sun.—**Branchial ray, branchiostegal rays.** See the adjectives.—**Calorific rays,** heat-rays. See *heat* and *spectrum*.—**Cone of rays.** See *cone*.—**Deviation of a ray of light.** See *deviation*.—**Direct rays.** See *direct illumination*, under *direct*.—**Divergent rays.** See *divergent*.

—**Extraordinary ray.** See *refraction*.—**Herschelian rays of the spectrum.** See *Herschelian*.—**Medullary rays.** (*a*) See *medullary*. (*b*) Bundles of straight or collecting tubules of the kidney contained in the cortex; the pyramids of Ferrein. See *tubule*.—**Obscure rays.** See *obscure* and *spectrum*.—**Ordinary ray.** See *refraction*.—**Principal ray.** See *principal*.—**Ritteric rays.** See *Ritteric*.—**Visual rays.** See *visual*.—**Cathode rays,** a form of radiation generated in a vacuum-tube, in connection with the cathode, or negative pole, when an electric discharge is passed through it.—**X-rays,** or **Röntgen rays,** a form of radiation having characteristic and distinctive properties, discovered by Professor Wilhelm Konrad Röntgen, of Wurzburg (announced by him in December, 1895). He showed that the discharge of a large Ruhmkorff coil through a vacuum-tube produces a form of radiation external to the latter, which has the property of causing various substances to fluoresce; of affecting the ordinary photographic plate like light (though itself invisible); and of penetrating opaque bodies in various degrees, according to their density and relative thickness, platinum, lead, and silver being quite opaque, while aluminium, wood, and paper are quite transparent. He also found that these rays are not refracted by prisms of carbon disulphid, and that uncertain refraction occurs with vulcanized rubber prisms and those made of aluminium; that powdered substances, opaque to white light, are quite as transparent to these rays as solid bodies of equal mass; and that bodies having rough surfaces act like those whose surfaces are polished. These facts forced him to conclude that refraction and regular reflection do not exist, but that such bodies behave to X-rays as muddy media to light. Other conclusions were that these rays pass through all substances at the same speed; that air absorbs a very much smaller part of them than of cathode rays; that they are not deflected by a magnet; that the spot on the wall of the tube which fluoresces most decidedly is to be regarded as the principal point of their radiation; that when the cathode rays are deflected within the tube, the spot is changed, thus producing a new source of radiation; that, therefore, cathode rays and X-rays are not identical; that X rays are rectilinearly propagated; that no interference phenomena of X-rays were found to exist; that the above facts tend to show that they have properties not hitherto known in connection with ultra-violet, visible, and infra-red light; and that therefore, they do not consist of transverse vibrations of the ether, but of longitudinal vibrations. The source of X-rays has been shown to be the surface upon which the cathode rays first strike, whether that surface be the wall of the tube or an object placed within the tube; when this object within the tube is the anode itself, the emanations are most powerful. It has also been found that X-rays have the property, in common with ultra-violet light, of dispersing negative charges on insulated surfaces and the power of positively electrifying such surfaces; and that regular reflection, though weak, may be demonstrated by the use of the photographic plate and long exposure. Hertz had previously shown that cathode rays penetrate opaque bodies, and Lenard that such rays may pass through aluminium forming a part of the wall of the tube and affect the photographic plate, but that their absorption is excessive beyond a few millimeters from the aluminium window.

ray[1] (rā), *v.* [< OF. *raier*, F. *rayer*, mark with lines, streak, stripe, mark out, scratch, = Pr. *raiar* = Sp. *rayar*, form lines or strokes, streak, = Pg. *raiar*, radiate, sparkle, = It. *ragguare*, *razzare*, radiate, also Sp. Pg. *radiar* = It. *radiare*, radiate, sparkle; < L. *radiare*, furnish with spokes or beams, radiate, shine forth, < *radius*, a staff, rod, spoke of a wheel, ray, etc.: see *ray*[1], *n.*, and cf. *radiate*.] **I.** *trans.* 1. To mark with long lines; form rays of or in.

> Unloved, the sun-flower, shining fair,
> *Ray* round with flames her disk of seed.
> *Tennyson*, In Memoriam, cl.

2. To shoot forth or emit; cause to shine out.

> Shines o'er the rest, the pastoral queen, and *rays*
> Her smiles, sweet-beaming, on her shepherd-king.
> *Thomson*, Summer, l. 401.

3†. To stripe.

> I wil yif him a feder bedde
> *Rayed* with golde.
> *Chaucer*, Death of Blanche, l. 252.

II. *intrans.* To shine forth or out as in rays.

> In a molten glory shrined

ray[5] (rā), *n.* [Cf. MHG. *reige*, *reie*, *rei*, G. *reihen*, *reigen*, a kind of dance.] A kind of dance. *Halliwell.* [Prov. Eng.]

ray[6] (rā), *n.* [Origin obscure.] A certain disease of sheep, also called *scab*, *shab*, or *rubbers*.

ray[7]†, *n.* Same as *roy*.

Raya[1], **Rayah** (rā'yä), *n.* [= F. *rayah*, *raïa*, < Ar. *raiya*, pl. *ra'āyā*, people, peasants, subjects, cattle, < *ra'a*, pasture, feed: cf. *rāaya*, flocks, herds. Cf. *ryot*, ult. the same word.] Any subject of the Sultan of Turkey who is not a Mohammedan.

raya[2] (rā'yä), *n.* [E. Ind.] An Indian broad-throat of the family *Eurylæmidæ*, *Psarisomus dalhousiæ*, inhabiting the Himalayas. The term is also one of the several generic designations which this species has received.

Rayah, *n.* See *Raya*[1].

rayat, rayatwari. See *ryot*, *ryotwar*.

rayed (rād), *a.* [< ME. *rayed*, *rayyd*, *rayd*; < *ray*[1] + *-ed*[2].] 1. Having rays or ray-like processes, as a flower-head or an animal; specifically, in *zoöl.*, radiate.—2. Having rays (of this or that kind): as, a many-*rayed* fin; a soft-*rayed* fish.—3†. Striped.

> The sheriffs of London should give yearly *rayed* gowns to the recorder, chamberlain, etc.

Rayed animals. See *Radiata*.

rayer† (rā'ėr), *n.* [< ME. *rayere*, < *raye*, striped cloth: see *ray*[4].] A seller of ray-cloth. *Piers Plowman.*

rayey (rā'i), *a.* [< *ray*[1] + *-ey* = *-y*[1].] Having or consisting of rays.

> The *rayey* fringe of her faire eyes. *Cotton*, Song.

ray-floret (rā'flō'ret), *n.* A ray-flower: used chiefly of *Compositæ*.

ray-flower (rā'flou'ėr), *n.* One of the flowers which collectively form the ray (see *ray*[1], 5 (*b*)); most often, one from the circle of ligulate flowers surrounding a disk of tubular flowers in the heads of many *Compositæ*.

ray-grass (rā'grȧs), *n.* A good forage-grass, *Lolium perenne*. Also *rye-grass*.

rayket, rayle†. See *rake*[2], *rail*.

rayless (rā'les), *a.* [< *ray*[1] + *-less*.] 1. Without rays or radiance; unillumined; lightless; dark; somber; gloomy. *Young*, Night Thoughts, i. 19.—2. In *bot.* and *zoöl.*, having no rays or ray-like parts.

raymet†, *v. i.* A Middle English form of *roam*.

Raymond's blue. See *blue*.

Raynaud's disease. See *disease*.

Raynaud's gangrene. Same as *Raynaud's disease*.

rayne[1]†, **rayne**[2]†. See *rain*[1], *reign*.

ray-oil (rā'oil), *n.* Oil prepared from the livers of batoid fishes or rays.

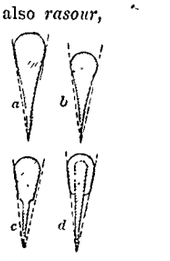
rayon† (rā'on), *n.* [< F. *rayon*, a ray, beam, < *rais*, a ray: see *ray*[1].] A beam or ray. *Spenser*, Visions of Bellay (ed. 1591), ii.

rayonnant (rā'o-nant), *a.* [< F. *rayonnant*, ppr. of *rayonner*, radiate, shine, < *rayon*, a ray: see *rayon*.] Radiating; arranged in the direction of rays issuing from a center. Decoration is often said to be *rayonnant* when, as in the case of a round dish or other circular object, the surface is divided into panels growing larger as they approach the circumference, and bounded by the radii and by arcs of larger and smaller circles.

rayonned (rā'ond), *a.* [< *rayon* + *-ed*[2].] Same as *rayonnant*.

raze[1] (rāz), *v. t.* See *rase*[1].

raze[2]†, *n.* An obsolete form of *race*[4].



raze[3] (rāz), *n.* [Origin obscure.] A swinging fence set up in a watercourse to prevent the passage of cattle. *Halliwell.* [Prov. Eng.]

razed (rāzd), *p. a.* [Pp. of *raze*[1], *v.*] In *her.*, same as *ragged*, 7.

razee (ra-zē'), *n.* [< F. *rasé*, cut down (*vaisseau rasé*, a vessel cut down), pp. of *raser*, shave, rase: see *rase*[1], *raze*[1].] A ship of war cut down to a smaller size by reducing the number of decks.

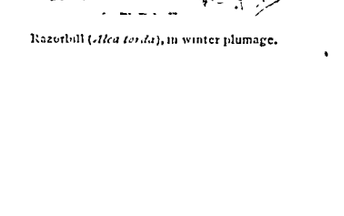
razee (ra-zē'), *v. t.* [< *razee*, *n.*] To cut down or reduce to a lower class, as a ship; hence, to lessen or abridge by cutting out parts: as, to *razee* a book or an article.

razor (rā'zor), *n.* [Early mod. E. also *rasour*, *rasoure*; < ME. *rasour*, *rasoure*, *rasoere*, *rasure*, a razor, < OF. (and F.) *rasoir* = Pr. *razor* = OCat. *rasó* = It. *rasoio*, < ML. *rasorium*, a razor (cf. *rasorius*, razor-fish), < L. *radere*, pp. *rasus*, scrape, shave: see *rase*[1], *raze*[1].] 1. A sharp-edged instrument used for shaving the face or head. The blade is usually made with a thick rounded back, sides hollowed or sloping to a very thin edge, and a tang by which it is pivoted to and swings freely in a two-leafed handle. The tang has a prolongation by the aid of which the razor is firmly grasped and controlled. There are also razors formed on the principle of the carpenters' plane, by the use of which the risk of cutting the skin is avoided. In Eastern countries razors are made with an immovable handle continuous with the blade. Compare *rattler*, 5.

Cross-sections of Razors.

a and *b*, ordinary forms; *c*, section known as "half-rattler"; *d*, backed razor.

2. A tusk: as, the *razors* of a boar. *Johnson.*—**Occam's razor,** the principle that the unnecessary supposition that things of a peculiar kind exist, when the observed facts may be equally well explained on the supposition that no such things exist, is unwarranted (*Entia non sunt multiplicanda præter necessitatem*). So called after William of Occam (died about 1349); but, as a historical fact, Occam does not make much use of this principle, which belongs rather to the contemporary nominalist William Durand de St. Pourçain (died 1332).



razorable† (rā'zor-a-bl), *a.* [< *razor* + *-able*.] Fit to be shaved.

> Till new-born chins
> Be rough and *razorable*.
> *Shak.*, Tempest, ii. 1. 250.

razorback (rā'zor-bak), *n.* 1. A rorqual, finfish, or finner-whale, of the family *Balænopteridæ*.—2. A hog whose back has somewhat the form of a sharp ridge. This formation, accompanied by long legs, is characteristic of breeds of hogs that have long been allowed to run wild in woods and waste places and feed upon mast, wild fruits, etc. The flesh of such swine, particularly that of the hams, is usually of superior quality for the table.

razor-backed (rā'zor-bakt), *a.* 1. Having a sharp back; hog-backed: as, the *razor-backed* buffalo, a fish, *Ictiobus urus*, of the Mississippi valley.—2. Having a long sharp dorsal fin which cuts the water like a razor, as the rorqual.

razorbill (rā'zor-bil), *n.* 1. The razor-billed auk, or tinker, *Alca* or *Utamania torda*, so called from the deep, compressed, and trenchant bill. The bill is feathered for about one half its length, in the rest of its extent being vertically furrowed, and hooked at the

Razorbill (*Alca torda*), in winter plumage.

tip; one of the furrows is white, the bill being otherwise black, like the feet; the mouth is yellow. The plumage is black on the upper parts, the lower parts from the neck in summer, and from the bill in winter, being white; there is a narrow white line from the bill to the eye, and the tips of the secondaries are white. The bird is about 18 inches long, and 27 in extent of wings. It inhabits arctic and northerly regions of both hemispheres, subsists chiefly on fish, and nests on rocky sea-coasts, laying a single egg about 3 by 2 inches, white or whitish, spotted and blotched with different shades of brown. The flesh is eatable.

2. The skimmer or cutwater, *Rhynchops nigra*. See *skimmer* and *Rhynchops*.

razor-billed (rā′zȯr-bild), *a.* Having a bill likened to a razor in any way: specifically noting certain birds.—**Razor-billed auk.** See *razorbill*, 1.—**Razor-billed curassow**, a bird of the genus *Mitua*, as *M. tuberosa* of Guiana.

razorblade (rā′zȯr-blād), *n.* A long, slim oyster. [Connecticut.]

razor-clam (rā′zȯr-klam), *n.* A bivalve mollusk of the family *Solenidæ*, especially of the genera *Ensis*, *Solen*, or *Siliqua;* a razor-fish or razor-shell: so called from its shape. See cut under *Ensis*.

razor-fish (rā′zȯr-fish), *n.* 1. A fish of the family *Labridæ*, *Xyrichthys lineatus*, of the West Indies, occasional on the southern coast of the United States.—2. A related fish, *Xyrichthys novacula*, of the Mediterranean.—3. A razor-clam: so called from the shape of the shell, which resembles a razor. The common razor-fish of Great Britain is *Ensis siliqua*, also called *spout-fish* and *razor-shell*. *Siliqua patula* is a Californian species, used for food.

razor-grass (rā′zȯr-gras), *n.* A West Indian nut-rush, *Scleria scindens*, with formidable cutting leaves.

razor-grinder (rā′zȯr-grīn″dėr), *n.* The nightjar: same as *grinder*, 3.

razor-hone (rā′zȯr-hōn), *n.* A fine hone used for sharpening or setting razors. See *hone*[1].

razor-paper (rā′zȯr-pā″pėr), *n.* Smooth unsized paper coated on one side with a composition of powdered crocus and emery, designed as a substitute for a strop.

razor-paste (rā′zȯr-pāst), *n.* A paste of emery-powder or the like, for spreading on the surface of a razor-strop to give it its sharpening property.

razor-shell (rā′zȯr-shel), *n.* The shell of a razor-fish; a bivalve mollusk of the genera *Ensis*, *Solen*, or *Siliqua:* so called from the shape of the shell, which resembles a razor. Compare *razor-fish*, 3.

razor-stone (rā′zȯr-stōn), *n.* Same as *novaculite*.

razor-strop (rā′zȯr-strop), *n.* An implement for sharpening razors. See *strop*. Also called *razor-strap*.

razure† (rā′zhūr), *n.* [= F. *rasure*, ‹ L. *rasura*, ‹ *radere*, pp. *rasus*, scrape: see *rase*[1], *raze*[1].] See *rasure*.

razzia (rat′si-ä), *n.* [‹ F. *razzia* = Pg. *gazia*, *gaziva*, a raid, ‹ Algerian Ar. *ghazia* (Turk. *ghazya*) (pron. nearly *razia* in Algiers, the initial letter *gh* being represented by the F. *r grasséyé*), a military expedition against infidels, a crusade, a military incursion.] Properly, a military raid intended for the subjection or punishment of hostile or rebellious people by the carrying off of cattle, destruction of crops, etc.; by extension, any plundering or destructive incursion in force. Razzias were formerly common in Arabian countries. They were practised by the Turkish authorities in Algeria and other provinces against tribes or districts which refused to pay taxes; and the word was adopted, and the practice continued for a time, by the French in Algeria after its conquest.

It was probable he should hand the troops over to John Jones for the *razzia* against the Moulvie.

R. D. An abbreviation (*a*) of *Royal Dragoons;* (*b*) of *Rural Dean*.

R. E. An abbreviation (*a*) of *Royal Engineers;* (*b*) of *Royal Exchange*.

re[1] (rā), *n.* [See *gamut*.] In *solmization*, the syllable used for the second tone of the scale. In the scale of C this tone is D—a tone which is therefore sometimes called *re* in France and Italy.

re[2] (rē), *n.* [L., abl. of *res*, thing, case, matter, affair: see *res*[2].] A word used in legal language in the phrase *in re:* as, '*in re* Bardell vs. Pickwick,' in the case of Bardell against Pickwick: often elliptically *re:* as, *re* Bardell vs. Pickwick; *re* Brown.

re-. [ME. *re-* = OF. *re-*, F. *re-*, *ré-* = Sp. Pg. *re-* = It. *re-*, *ri-*, ‹ L. *re-*, before a vowel or *h* generally *red-*, but later also *re-* (the form *red-* also occurring in *red-dere*, render, and, assimilated, in *rel-ligio*, religion, *rel-liquiæ*, relics, *rec-cidere*, fall back, and with a connecting vowel in *redivivus*, living again), an inseparable prefix, back, again, against: see def. The OF. and It. form *re-* often appears as *ra-* by confusion with the true *ra-* (‹ L. *re-* + *ad-*), and the following consonant is often doubled, as in OF. *reppeller*, ‹ L. *repellere*, repel; It. *rappresentare*, ‹ L. *repræsentare*, represent; etc. Words with the prefix *ra-* in OF. usually appear with *re-* in E., except when the accent has receded, as in *rally*[1].] An inseparable prefix of Latin origin (before a vowel usually in the form *red-*), meaning 'back,' 'again.' It occurs in a great number of verbs and derived adjectives and nouns taken from the Latin, and is also common as an English formative. It denotes (*a*) a turning back ('back'), as in *recede*, *recur*, *remit*, *repel*, etc.; (*b*) opposition ('against'), as in *reluctant*, *repugnant*, etc.; (*c*) restoration to a former state ('back,' 'again,' English *un-*[2]), as in *restitution*, *relegate*, *redintegrate* or *reintegrate*, and with some words of non-Latin origin, as in *recall*, *remind*, *renew*, etc.; (*d*) transition to an opposite state, as in *reprobate*, *retract*, *reveal*, etc.; (*e*) repetition of an action ('again'), as in *revise*, *resume*, etc., becoming in this use an extremely common English formative, applicable to any English verb whatever, whether of Latin origin, as in *react*, *reenter*, *recreate*, *readdress*, *reappear*, *reproduce*, *reunite*, etc., or of Anglo-Saxon or other origin, as in *rebind*, *rebuild*, *redye*, *refill*, *refit*, *reheat*, *relight*, *reline*, *reload*, *reset*, *rewrite*, etc. In many words taken from the Latin, either directly or through the Old French, the force of *re-* (*red-*) has been lost, or is not distinctly felt, in English, as in *receive*, *reception*, *recommend*, *recover*[2], *reduce*, *redeem*, *recuperate*, *recreate*[1], *refer*, *rejoice*, *relate*, *religion*, *remain*, *renown*, *repair*[1], *repair*[2], *report*, *request*, *require*, and other words containing a radical element not used in the particular sense concerned, or not used at all, in English. Some of these words, as *recover*[2], *recreate*[1], are distinguished from English formations with the clear prefix *re-*, again, often written distinctively with a hyphen, as in *re-cover*, *re-create*, etc. In many instances the prefix, by shifting of accent and change of sound, or loss of adjacent elements, loses the character of a prefix, as in *rebel*, *a.*, *relic*, *relict*, *remnant*, *rest*[2], *restive*, etc., and in words from Old French in which the prefix *re-* combines with the prefix *a-* in the form *ra-*, not recognized as an English prefix, as in *rally*[1], *rabate*, etc. In some other words also *re-* is reduced to *r-*, as in *ransom* (doublet of *redemption*), *rampart*, *rencounter*, etc. The prefix *re-* is found in many words formed in Old French from non-Latin elements, as in *regret*, *regard*, *reward*, etc. As an English formative *re-* may be prefixed to a primitive verb, adjective, or noun, or to derivatives, indifferently, and such secondary forms as *reestablishment*, *reaction*, etc., may be analyzed either as *re-* + *establishment*, *re-* + *action*, etc., or as *reestablish* + *-ment*, *react* + *-ion*, etc. *Re-* is prefixed to a word beginning with *e*, *re-* is separated by a hyphen, as *re-establish*, *re-estate*, *re-edify*, etc.; or else the second *e* has a dieresis over it: as, *reëstablish*, *reëmbark*, etc. The hyphen is also sometimes used to bring out emphatically the sense of repetition or iteration: as, *sung* and *re-sung*. The dieresis is not used over other vowels than *e* when *re-* is prefixed: thus, *reinforce*, *reunite*, *reabolish*.

reabsorb (rē-ąb-sôrb′), *v. t.* [= F. *réabsorber;* as *re-* + *absorb*.] To draw or take in anew by absorption, imbibition, or swallowing, as something previously ejected, emitted, or put forth.

During the embryo stage of the higher vertebrata temporary organs appear, serve their purpose awhile, and are subsequently *reabsorbed*.
H. Spencer, Social Statics, p. 458.

reabsorption (rē-ąb-sôrp′shọn), *n.* [= F. *réabsorption;* as *re-* + *absorption*.] The act of reabsorbing, or the state of being reabsorbed.

reaccommodate† (rē-ą-kom′ọ̄-dāt), *v. t.* [‹ *re-* + *accommodate*.] To readjust; resettle; bring into renewed order.

King Edward, . . . discovering the Disturbance made by the Change of Place, instantly sends to charge that Part, without giving them Time to *re-accommodate* themselves. *Baker*, Chronicles, p. 121.

reaccuse (rē-ą-kūz′), *v. t.* [‹ *re-* + *accuse*.] To accuse again or afresh; make a renewed accusation against.

Her'ford, . . . who *re-accus'd*
Norfolk for words of treason he had us'd.
Daniel, Civil Wars, i. 60.

reach[1] (rēch), *v.*; pret. and pp. *reached* (formerly *raught*), ppr. *reaching*. [Also dial., with shortened vowel, *retch*, and unassibilated *reck;* ‹ ME. *rechen* (pret. *raughte*, *raghte*, *raght*, *rehte*, *reahte*, pp. *raught*, *raugt*), ‹ AS. *rǣcan*, *rǣccan* (pret. *rǣhte*), reach, get into one's power, = OFries. *reka*, *retsia*, *resza* = MD. *reijcken*, D. *reiken* = MLG. *reken*, LG. *reiken* = OHG. *reihhen*, *reichen*, MHG. G. *reichen*, reach, extend, stretch out. The word has been more or less associated with the group to which belong *rack*[1], *rake*[1], *rax*, *retch*[1], etc., Goth. *rakjan*, etc., stretch, and L. *reg-ere*, *por-rigere*, Gr. *ὀρέγειν*, stretch, but an orig. connection is on phonetic grounds improbable.] **I.** *trans.* 1. To hold or stretch forth; extend outward.

Reach hither thy finger, and behold my hands; and *reach* hither thy hand, and thrust it into my side.
John xx. 27.

He shall flourish,
And, like a mountain cedar, *reach* his branches
To all the plains about him.
Shak., Hen. VIII., v. 5. 53.

To his
She *reached* her hands, and in one bitter kiss
Tasted his tears.
William Morris, Earthly Paradise, II. 307.

2. To deliver by or as if by the outstretched hand; hand out or over; extend out to.

First, Christ took the bread in his hands; secondarily, he gave thanks; thirdly, he broke it; fourthly, he *raught* it them, saying, Take it.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), [p. 241.

The prince he *reacht* Robin Hood a blow.
Robin Hood and the Stranger (Child's Ballads, v. 415).

Reach a chair;
So; now, methinks, I feel a little ease.
Shak., Hen. VIII., iv. 2. 3.

I stand at one end of the room, and *reach* things to her woman. *Steele*, Spectator, No. 137.

3. To make a stretch to; bring into contact by or as if by stretching out the hand; attain to by something held or stretched out: as, to *reach* a book on a shelf; to *reach* an object with a cane.

He slough man and horse whom that he *raught* with his axe that he hellde with bothe hondes.
Merlin (E. E. T. S.), ii. 288.

Wilt thou *reach* stars, because they shine on thee?
Shak., T. G. of V., iii. 1. 156.

4. To take, seize, or move by stretching out the hand, or by other effort.

Than Troiell with tene the tourfer beheld, . . .
Reiches his reynis & his roile [rowel] strykes,
Caires to the kyng with a kant wille.
Destruction of Troy (E. E. T. S.), l. 10215.

The damesell hym thanked, and *raught* hym vp be the honde. *Merlin* (E. E. T. S.), iii. 697.

Lest therefore his now bolder hand
Reach also of the tree of life, and eat,
And live for ever. *Milton*, P. L., xi. 94.

5. To attain to by movement or progress; arrive at, physically or mentally; come or get to: as, to *reach* a port or destination; to *reach* high office or distinction; to *reach* a conclusion by study or by reasoning.

And through the Tyrrhene Sea, by strength of toiling oars,
Raught Italy at last. *Drayton*, Polyolbion, i. 325.

He must have *reached* a very advanced age.
Barham, Ingoldsby Legends, I. 98.

He [Dante] has shown us the way by which that country far beyond the stars may be *reached*.
Lowell, Among my Books, 2d ser., p. 124.

6. To extend to in continuity or scope; stretch or be prolonged so as to extend to, literally or figuratively; attain to contact with or action upon; penetrate to.

There is no mercy in mankind can *reach* me.
Fletcher, Bonduca, iv. 3.

Thy desire . . . leads to no excess
That *reaches* blame, but rather merits praise.
Milton, P. L., iii. 697.

The loss might be repaired again; or, if not, could not however destroy us by *reaching* us in our greatest and highest concern. *South*, Sermons, II. i.

When he addresses himself to battle against the guardian angels, he stands like Teneriffe or Atlas; his stature *reaches* the sky. *Carlyle*.

7. To come or get at; penetrate or obtain access to; extend cognizance, agency, or influence to: as, to *reach* a person through his vanity.

The fewness and fulness of his [George Fox's] words have often struck even strangers with admiration, as they used to *reach* others with consolation.
Penn, Rise and Progress of Quakers, v.

It is difficult indeed in some places to *reach* the sense of the inspired writers. *Bp. Atterbury*, Sermons, II. ix.

He [Atterbury] could be *reached* only by a bill of pains and penalties. *Macaulay*, Francis Atterbury.

8†. To attain to an understanding of; succeed in comprehending.

But how her fawning partner fell I *reach* not,
Unless caught by some springe of his own setting.
Middleton, Women Beware Women, v. 1.

Sir P. I *reach* you not.
Lady P. Right, sir, your policy
May bear it through thus.
B. Jonson, Volpone, iv. 1.

II. *intrans.* 1. To stretch; have extent in course or direction; continue to or toward a term, limit, or conclusion.

By hym that *rauhte* on rode [the cross].
Piers Plowman (C), v. 179.

And he dreamed, and behold a ladder set up on the earth, and the top of it *reached* to heaven.
Gen. xxviii. 12.

Thus far the fable *reaches* of Proteus, and his flock, at liberty and unrestrained.
Bacon, Physical Fables, vii., Expl.

They [consequences] *reach* only to those of their posterity who abet their forefathers' crime, and continue in their infidelity. *Bp. Atterbury*, Sermons, II. v.

There are the wide-*reaching* views of fruitful valleys and of empurpled hill-sides.
D. G. Mitchell, Wet Days at Edgewood, Pliny's Country [Places.

In the distance . . . the mountains *reach* away in faint and fainter shades of purple and brown.
Harper's Weekly, Jan. 19, 1889.

2. To extend in amount or capacity; rise in quantity or number; amount; suffice: with *to* or *unto*.

What may the king's whole battle [army] *reach unto?*
Shak., 1 Hen. IV., iv. 1. 129.

Every one was to pay his part according to his proportion towards y^e purchass, & all other debts, what y^e profite of y^e trade would not *reach too*.
Bradford, Plymouth Plantation, p. 215.

A very exceptional grant was made, two fifteenths and tenths first, and then another sum of the same amount, *reaching*, according to Lord Bacon, *to* £120,000.
Stubbs, Medieval and Modern Hist., p. 360.

3. To make a stretch to or toward something, as with the hand or by exertion; stretch forward or onward; make a straining effort: as, to *reach* out for an apple; to *reach* at or after gain.

Ful semely after hire mete she *raughte*.
Chaucer, Gen. Prol. to C. T., l. 136.

He slytte the sheide as fer as that he *raught*, and the kynge Ban sente hym a stroke with Corsheuse, his goode swerde. *Merlin* (E. E. T. S.), ii. 344.

One may *reach* deep enough, and yet
Find little. *Shak.*, T. of A., iii. 4. 15.

Oft the first that (without right or reason)
Attempt Rebellion and do practice Treason,
And so at length are justly tumbled down
Beneath the foot, that *raught* above the Crown.
Sylvester, tr. of Du Bartas's Weeks, i. 1.

Why was I not contented? Wherefore *reach*
At things which, but for thee, O Latmian!
Had been my dreary death? *Keats*, Endymion, iii.

4. To attain; arrive; get, as to a point, destination, or aim.

Festus, . . . whose ears were unacquainted with such matter, heard him [the apostle Paul], but could not *reach* unto that whereof he spake. *Hooker*, Eccles. Polity, iii. 8.

The wind being very great at S. W., he could *reach* no farther than Cape Ann harbour that night.
Winthrop, Hist. New England, I. 115.

5†. To turn; start forth.

Up he sterte, and on his weye he *raughte*,
Til she agayn hym by the lappe caughte.
Chaucer, Troilus, ii. 447.

6. *Naut.*, to sail with the wind free.

reach[1] (rēch), *n.* [< *reach*[1], *v.*] 1. A continuous stretch or course; an uninterrupted line of extension or continuity: as, a *reach* of level ground; an inland *reach* of the sea; a *reach* of a river (a straight course between bends); a *reach* of a canal (the part between locks, having a uniform level).

And, on the left hand, hell
With long *reach* interposed. *Milton*, P. L., x. 322.

The silver Phea's glittering rills they lost,
And skimm'd along by Elis' sacred coast,
Then cautious through the rocky *reaches* wind,
And, turning sudden, shun the death designed.
Pope, Odyssey, xv.

We walk'd
Beside the river's wooded *reach*.
Tennyson, In Memoriam, lxxi.

2. Limit or scope of stretch or extension; power of reaching by the outstretched hand or any other agency; the act of or capacity for reaching: as, the *reach* of the arm; to be within one's *reach*, or within the *reach* of the law.

All others have a dependent being, and within the *reach* of destruction. *Sir T. Browne*, Urn-burial, v.

Out of the *reach* of danger, he [Junius] has been bold; out of the *reach* of shame, he has been confident.
Johnson, Thoughts on late Trans. in the Falkland Islands.

Poor the *reach*,
The undisguised extent, of mortal sway!
Wordsworth, Canute and Alfred, on the Sea-Shore.

The study of spectra has opened a new world of research, and added some such *reach* to our physics and chemistry as the telescope brought to vision.
C. A. Young, The Sun, p. 67.

Most of the villages of Egypt are situated upon eminences of rubbish, which rise a few feet above the *reach* of the inundation. *E. W. Lane*, Modern Egyptians, I. 24.

3. Effective extent or scope; range of capacity or ability; power of accomplishment; grasp; penetration; comprehension.

Men more audacious and precipitant then of solid and deep *reach*. *Milton*, Reformation in Eng., ii.

Be sure yourself and your own *reach* to know,
How far your genius, taste, and learning go.
Pope, Essay on Criticism, l. 153.

Groves that inspire the Nightingale to trill
And modulate, with subtle *reach* of skill
Elsewhere unmatched, her ever-varying lay.
Wordsworth, Sonnets, iii. 6.

His [Wordsworth's] mind had not that *reach* and elemental movement of Milton's.
Lowell, Among my Books, 2d ser., p. 241.

4. A reaching out for something; forecast in aim or purpose; a scheme of effort for some end.

I have brains
That beat above your *reaches*.
Fletcher, Mad Lover, i. 1.

The Duke of Parma had particular *reaches* and ends of his own underhand to cross the design. *Bacon*.

Others
Think heaven a world too high for our low *reaches*.
Chapman, Cæsar and Pompey, iv. 3.

5. The pole connecting the rear axle to the bolster of a wagon or other vehicle; a coupling-pole. See cut under *hound*, 7.—6. *Naut.*, the distance sailed between tacks: same as *board*, 13 (*c*).—7. An extended point of land; a promontory. [Local, U. S.]—**Head reach**, the distance to windward traversed by a vessel while tacking.

reach[2] (rēch), *v.* A variant of *retch*[2]. [Prov. Eng.]

reachable (rē'cha-bl), *a.* [< *reach*[1] + *-able*.] Capable of being reached; within reach.

reacher (rē'chėr), *n.* 1. One who or that which reaches, or is capable of or serves for reaching.

Hold in your rapier; for, though I have not a long *reacher*, I have a short hitter.
Greene and Lodge, Looking Glass for Lond. and Eng.

He . . . spoke to Jennings, the *reacher* of the records, that he should let him have any record.
Life of A. Wood, p. 205.

2†. An exaggeration; a "stretcher." [Slang.]

I can hardly believe that *reacher*, which another writeth of him, that "with the palms of his hands he could touch his knees, though he stood upright."
Fuller, Worthies, Monmouthshire, II. 435.

reaching-post (rē'ching-pōst), *n.* In *rope-making*, a post fixed in the ground at the lower end of a rope-walk.

reachless (rēch'les), *a.* [< *reach*[1] + *-less*.] Beyond reach; unattainable; lofty.

To raise her silent and inglorious name
Unto a *reachless* pitch of praises light.
Bp. Hall, A Defiance to Envy.

reach-me-down (rēch'mē-doun'), *a.* [< *reach*[1], *v.*, + *me*, indirect object, + *down*[1], *adv.* Cf. *pick-me-up*.] Ready-made. [Colloq., Eng.]

You know in the Palais Royal they hang out the most splendid *reach me down* dressing gowns, waistcoats, and so forth. *Thackeray*, Philip, xxiv

reacquite† (rē-a-kwīt'), *v. t.* [< *re-* + *acquite*.] To pay back; give a return to or for; requite.

You shall assuredly find the gentleman very honest and thankful, and me ready to *re-acquite* your courtesy and favour to him so shewn, in that I possibly may.
G. Harvey, Four Letters, i.

react (rē-akt'), *v.* [< *re-* + *act*, *v.* Cf. F. *réagir*, react.] I. *trans.* To act or perform anew; re-enact: as, to *react* a play.

II. *intrans.* 1. To exert, as a thing acted upon, an opposite action upon the agent.

If fire doth heate water, the water *reacteth* againe . . . upon the fire and cooleth it.
Sir K. Digby, Treatise of Bodies (1644), xvi.

Great minds do indeed *re-act* on the society which has made them what they are; but they only pay with interest what they have received. *Macaulay*, Dryden.

Every opinion *reacts* on him who utters it. It is a thread-ball thrown at a mark, but the other end remains in the thrower's bag. *Emerson*, Compensation.

2. To act, after being acted upon, in a manner directly opposed to the first action, and in increased measure. Thus, when the body has been chilled by a bath, it is said to *react* in becoming warmer than before; and, in like manner, when misfortune stimulates the mind to greater efforts, the mind is said to *react*.
3. To act mutually or reciprocally upon each other, as two or more chemical agents.

reaction (rē-ak'shon), *n.* [= F. *réaction* = Sp. *reaccion* = Pg. *reacção* = It. *reazione*; as *re-* + *action*.] 1. Any action in resistance or response to the influence of another action or power; reflexive action or operation; an opposed impulse or impression.

Of *reaction* in locall motion, that each agent must suffer in acting and act in suffering
Sir K. Digby, Treatise of Bodies (1644), xvi.

Sense being nothing else, as some conceit, but motion, or rather *re-action* of a body pressed upon by another body. *Dr. H. More*, Immortal. of Soul (1662), i. 12.

Attack is the *re-action*; I never think I have hit hard, unless it re-bounds. *Johnson*, in Boswell, an. 1775.

Every trespass produces a *reaction*, partly general and partly special—a *reaction* which is extreme in proportion as the trespass is great. *H. Spencer*, Social Statics, p. 451.

2. In *dynamics*, a force called into being along with another force, being equal and opposite to it. All forces exist in pairs; and it is a fundamental law (Newton's third law of motion) in mechanics that "action and reaction are always equal and contrary," or that the mutual actions of two bodies are always equal and exerted in opposite directions. This law was announced, in the form that the quantity of motion is preserved in all percussion, simultaneously in 1669 by Christian Huygens, John Wallis, and Sir Christopher Wren, but was experimentally proved by Wallis only.
3. Action contrary to a previous influence, generally greater than the first effect; in *politics*, a tendency to revert from a more to a less advanced policy, or the contrary.

The violent *reaction* which had laid the Whig party prostrate was followed by a still more violent *reaction* in the opposite direction. *Macaulay*, Hist. Eng., ii.

4. In *chem.*, the mutual or reciprocal action of chemical agents upon each other.—**Achilles tendon reaction**, the contraction of the calf-muscles evoked by tapping the Achilles tendon.—**Amphigenous, amphoteric, etc., reaction**. See the adjectives.—**Color-reaction**, in *chem.*, a reaction which causes a characteristic development or change of color: used in testing.—**Diazo-reaction**. Same as *Ehrlich's reaction*.—**Ehrlich's reaction**, a reaction in the urine of typhoid and other patients in which it strikes a deep dark red on being treated with a mixture containing sodium nitrite, sulphanilic acid, and hydrochloric acid, and alkalinized with ammonia. Also called *Ehrlich's test*, and *diazo-reaction*.—**Law of action and reaction**. See *action*.—**Paradoxical reaction**. See *paradoxical*.—**Reaction of degeneration**, a modification of the normal reaction of nerve and muscle to electric stimuli, observable in cases where the lesion lies in the motor nerve or its immediate central or peripheral terminations. The complete form presents (*a*) total loss of irritability of the nerve below the lesion; (*b*) on direct stimulation of the muscle, (1) loss of irritability for very brief currents, such as induction-shocks; (2) retention and even increase of irritability for making and breaking of currents of longer duration (this galvanic irritability also becomes lost in the terminal stages of the severest forms); (3) increase of irritability for making currents at the anode as compared with the cathode, so that the anode closing contraction may exceed the cathode closing contraction; (4) a sluggishness of contraction and relaxation.

reactionary (rē-ak'shon-ū-ri), *a.* and *n.* [= F. *réactionnaire*; as *reaction* + *-ary*.] I. *a.* 1. Of or pertaining to reaction in general; consisting of or characterized by reflex or reciprocal action; reactive.

The *reactionary* excitement that gave her a proud self-mastery had not subsided.
George Eliot, Mill on the Floss, vi. 10.

Specifically—2. Of or pertaining to political reaction; favoring reaction: as, *reactionary* principles or movements.

The poverty and suffering of millions of the working classes came in aid of the *reactionary* party and the more egotistical line of policy.
W. R. Greg, Misc. Essays, 1st ser., p. 33.

II. *n.*; pl. *reactionaries* (-riz). A promoter of reaction; specifically, one who attempts to check, undo, or reverse political action.

The *reactionaries* and conservatives of Sweden—and there are many of them in this old country—are afraid that free Norway will lead Sweden into the path of reforms.
Harper's Mag., LXXVIII. 804.

reactionist (rē-ak'shon-ist), *n.* [< *reaction* + *-ist*.] A favorer of reaction; an advocate of old methods or principles; a reactionary.

Those who are not afraid of the nickname of *reactionists* will be slow to condemn her [Austria] for the maintenance of a principle on which she has grown into power.
Stubbs, Medieval and Modern Hist., p. 239.

reaction-period (rē-ak'shon-pē'ri-od), *n.* Same as *reaction-time*.

reaction-time (rē-ak'shon-tīm), *n.* The time between the application of a stimulus and some reaction, as when a signal is rendered on the perception of some sensation. The *reduced reaction-time* is the part of this which is consumed in perception and willing, as distinct from what is consumed in transmission and in the period of muscular latency.

reaction-wheel (rē-ak'shon-hwēl), *n.* See *turbine*.

reactive (rē-ak'tiv), *a.* [= F. *réactif*; as *re-act* + *-ive*.] Pertaining to or causing reaction; acting reflexively or reciprocally; resulting from reflex action.

Ye fish, assume a voice, with praises fill
The hollow rock and loud *reactive* hill.
Sir R. Blackmore, Creation, vii.

Knowledge of Sanscrit . . . will be kept alive by the *reactive* influence of Germany and England.
Maine, Village Communities, p. 25.

This equilibration between new outer forces and *reactive* inner forces, which is thus directly produced in individuals. *H. Spencer*, Prin. of Biol., § 296.

reactively (rē-ak'tiv-li), *adv.* By reaction.

reactiveness (rē-ak'tiv-nes), *n.* The quality of being reactive.

reactivity (rē-ak-tiv'i-ti), *n.* [< *reactive* + *-ity*.] The state of being reactive; the process or course of reaction, as from a diseased condition.

The occurrence of colour, therefore, is more frequently than not concomitant with a high degree of *reactivity*.
Nature, XXXVII. 503.

read[1] (rēd), *v.*; pret. and pp. *read* (red), ppr. *reading*. [Early mod. E. also *reed*, *reede*, *rede*; <

ME. *reden*, earlier *ræden, rathen, rothen* (a weak verb, pret. *redde, radde*, pp. *red, rad, i-rad*), < AS. Some compare Skt. √ *rādh*, be successful, Russ. *radŭ*, glad, happy, ready, Lith. *rodas*, willing, etc. Hence *read*[1], *n.*, *riddle*[1], *aread*, etc. The verb *read* in the already obsolete sense 'counsel, advise,' was much affected by Spenser, and in the early modern and ME. spelling *rede* which he used has likewise been much affected by his archaizing imitators; but there is no historical ground for a difference in spelling. The pret. *read* (red) should be written *red*, as it was formerly; it is exactly parallel with *led*, pret. of *lead*[1], and with *let*, pret. of *let*[1] (inf. formerly *lete*, with long vowel).] **I.** *trans.* 1†. To counsel; advise; recommend.

And she thus brenneth bothe in love and drede,
So that she nyste what was best to *rede*.
Chaucer, Troilus, iv. 670.

And seththe he *radde* religioun the rule for to holde —
"Leste the kyng and his counseil 3or comunes apeire,
And beo stiward in oure stude til 3e be stouwet betere."
Piers Plowman (A), v. 35.

We may *read* constancy and fortitude
To other souls. *B. Jonson*, Poetaster, i. 1.

If there 's a hole in a' your coats,
I *rede* you tent it.
Burns, Captain Grose s Peregrinations.

My Ladye *reads* you swith return.
Scott, L. of L. M., iv. 22.

2. To teach; instil, as a lesson.

Are these the arts,
Robin, you *read* your rude ones of the wood,
To countenance your quarrels and mistakings?

Specifically—(*a*) One who reads for examination or criticism; an examiner of that which is offered or proposed for publication: as, an editorial or a publisher's *reader*. (*b*) One who is employed to read for correction for the press; a proof-reader. (*c*) One who recites before an audience anything written: as, an elocutionary *reader*. Particularly—(*d*) One whose office it is to read before an audience; an officer appointed to read for a particular purpose; a lector; a lecturer. (1) In the early church, the Greek Church, the Roman Catholic Church, and some other churches, a member of one of the minor clerical orders, appointed to read Scripture lections in the church. The order of reader existed as early as the second century. At an early date it was not unusual to admit young boys, even of five or six, to the office of reader, but by the sixth century the age of eighteen was required by law. In the Roman Catholic Church this order is little more than one of the steps to the priesthood. The reader (lector) ranks above a doorkeeper and below an exorcist, and the form of ordination is the delivery to him of the book from which he is to read. In the Greek Church the reader (anagnost) ranks below a subdeacon, and it is his office, as it was in the early church, to read the Epistle, the deacon reading the Gospel. In the Church of England the order fell into abeyance after the Reformation, but lay readers were frequently licensed, especially in churches or chapels without a clergyman. They could not minister the sacraments and other rites of the church, except the burial of the dead and the churching of women, nor pronounce the absolution and benediction. Of late years, however, bishops have regularly admitted candidates to the office of reader by delivery of a copy of the New Testament. In the American Episcopal Church lay readers conduct services in vacant churches or under a rector by his request with license from the bishop for a definite period (a year or less). They cannot give absolution or benediction, administer sacraments, nor use the occasional offices of the church except those for the burial of the dead and visitation of the sick and prisoners, nor deliver sermons of their own composition. (2) One who reads the law in a Jewish synagogue. (3) In the Universities of Oxford and Cambridge, the English Inns of Court, etc., a lecturer, or, where there are two grades of lecturers, a lecturer of the higher grade, the others being called *sublectors* or *lecturers*.

4. A reading-book for schools; a book containing exercises in reading.—**Gentle reader, lay reader**, etc. See the adjectives.

readership (rē′dėr-ship), *n.* [< *reader* + *-ship*.] The office of reader. See *reader*, 3 (*d*) (3).

Lowell, Among my Books, 1st ser., p. 274.

=Syn. 2. *Readiness, Facility, Expertness, Knack*, promptitude, aptness, preparation, preparedness, inclination. The first four words agree in meaning that the person can do a thing with ease and quickness. *Readiness* emphasizes promptitude: as, *readiness* in repartee. *Facility* by derivation emphasizes ease, whether partly natural or wholly acquired. (See *ease*, *n.*) *Expertness* is facility acquired: as, *expertness* with the pen, at figures, in working a sewing-machine; it is primarily physical, and especially manual, but also mental. *Knack* is a familiar word, applying to facility or expertness viewed as a happy and rather surprising possession of skill or faculty.

reading (rē′ding), *n.* [< ME. *redynge, rædinge*, reading, < AS. *rēding*, reading, a reading, a passage or lesson, also rule, government; verbal n. of *rēdan*, counsel, rule, read: see *read*[1].] 1. The act of interpreting; interpretation; exposition, as of a riddle or dream; interpretation of signs, marks, or the like; a rendering or discovery of what is signified by the state or marking of an instrument, by arbitrary signs of any kind, or by the existing condition or action of anything: as, the *readings* of a steam-indicator; a correct *reading* of the sky (as to weather), or of a person's countenance or proceedings.

For instance, if the freezing-point is lowered, we must subtract the amount of fall from each *reading*.
J. Trowbridge, New Physics, p. 187.

Take the *readings* of the two pegs [in adjusting a field level], which will give their true difference of level.
Sci. Amer. Supp., p. 8905.

2. The particular interpretation given to a composition of any kind, an event or a series of events, etc.; also, a rendering in speech, act, or performance; delineation; representation.

You charm me, Mortimer, with your *reading* of my weaknesses. By-the-by, that very word *Reading*, in its critical use, always charms me. An actress's *reading* of a chamber-maid, a dancer's *reading* of a hornpipe, a singer's *reading* of a song, a marine-painter's *reading* of the sea, the kettle-drum's *reading* of an instrumental passage, are phrases ever youthful and delightful.
Dickens, Our Mutual Friend, iii. 10.

For Englishmen in their own tongue to have from such a man [Von Ranke] a *reading* of the most critical period of English history would be a boon of incalculable value.
Stubbs, Medieval and Modern Hist., p. 58.

His *reading* of Bach's Italian Concerto was a scramble, so far as the first and last movements were concerned.
The Academy, June 29, 1889, p. 456.

reading-table (rē′ding-tā′bl), *n.* A table providing support for a heavy book or books, when in use, and frequently space for other books needed for consultation, and the like. There are many patterns, some having a revolving top.

readjourn (rē-a-jėrn′), *v. t.* and *i.* [< F. *réajourner*, readjourn; as *re-* + *adjourn*. Cf. *rejourn*.] To adjourn again.

Parliament assembling again . . . was then *re-adjourned* by the king's special command till Tuesday next.
Sir H. Wotton, Reliquiæ, p. 413.

readjournment (rē-a-jėrn′ment), *n.* [< F. *réajournement*, readjournment; as *readjourn* + *-ment*.] A succeeding adjournment; adjournment anew.

readjust (rē-a-just′), *v. t.* [< *re-* + *adjust*.] 1. To settle again; put in order again, as what had been discomposed.

The beau sheathed his hanger, and *readjusted* his hair.
Fielding.

2. To adjust in a new way; make a different adjustment, arrangement, or settlement of.

The problem these gentlemen had to solve was to *re-adjust* the proportion between their wants and their income. *George Eliot*, Mill on the Floss, ii. 4.

My scheme, your better knowledge broke,
Presently *readjusts* itself, the small
Proportioned largelier, parts and whole named new.
Browning, Ring and Book, II. 221.

readjuster (rē-ą-jus'tėr), *n.* [< *readjust* + *-er*[1].] 1. One who readjusts, or takes part in a readjustment of something.—2. [*cap.*] Specifically, a member of a party in Virginia, formed about 1878, under the leadership of General William Mahone, and originally composed principally of Democrats, for the forcible readjustment of the debt on terms dictated by the State without the consent of the bondholders. The exceptional losses of the State in the civil war made the large debt previously contracted very burdensome; and the amount of its liability was in dispute with the State of West Virginia, which had been set off from Virginia without a decision of this question. The Readjusters elected the State government in 1879, and also United States senators for the terms 1881–7 and 1883–9, in opposition to the Conservative Democrats, or Funders; but the party failed to effect a permanent settlement of the debt, and was merged in the Republican party about 1882.

Further news from Virginia indicates that the Repudiators, or *Readjusters*, as they call themselves, have elected a majority of the General Assembly.
The Nation, Nov. 13, 1879, p. 317.

readjustment (rē-ą-just'ment), *n.* [< *readjust* + *-ment.*] 1. The act of readjusting, or the state of being readjusted.—2. Specifically, in *U. S. politics*, the political schemes of the Readjusters.

readmission (rē-ad-mish'ọn), *n.* [< F. *réadmission* = Sp. *readmision* = Pg. *readmissão*; as *re-* + *admission.*] The act of admitting again; the state of being readmitted; renewed admission.

In an exhausted receiver, animals that seem as they were dead revive upon the *readmission* of fresh air. *Arbuthnot.*

readmit (rē-ad-mit'), *v. t.* [= F. *réadmettre* = Sp. *readmitir* = Pg. *readmittir* = It. *riammettere*, readmit; as *re-* + *admit.*] To admit again.

Whose ear is ever open, and his eye
Gracious to *re-admit* the suppliant.
Milton, S. A, l. 1173.

readmittance (rē-ad-mit'ąns), *n.* [< *re-* + *admittance.*] Permission to enter again; readmission.

Humbly petitioning a *readmittance* into his college.
T. Warton, Sir T. Pope, p. 84. (*Latham.*)

readvance (rē-ąd-vàns'), *v. i.* [< *re-* + *advance*, *v.*] To advance again or afresh.

Which if they miss, they yet should *readvance*
To former height.
B. Jonson, Epigrams, xxxv., To Sir H. Goodyere.

readvertency (rē-ad-vėr'ten-si), *n.* [< *re-* + *advertency.*] The act of adverting to or reviewing again. [Rare.]

Memory he does not make to be a recovery of ideas that were lost, but a *re advertency* or reapplication of mind to ideas that were actually there, though not attended to.
Norris, Reflections on Locke, p. 9.

ready (red'i), *a.* and *n.* [< ME. *redy, redi, rædi, rædiȝ, i-redi*, ready, prepared, prompt, near, < AS. *rædе* (rare and uncertain), usually *gerædе*, ready, swift, prompt, easy, plain (suffix *-e* becoming *-i* by confusion with the common adj. suffix ME. *-i, -y*, > E. *-y*[1]); = OFries. *rede, red* = D. *reed* = MLG. *rēde, reide, rēt, reit*, LG. *rede, reed* = OHG. *bi-reiti*, MHG. *bereite, be-reit*, G. *be-reit*, ready, prepared, = Icel. *g-reiðr* (**ga reithr*), ready (whence ult. Bid my wife make herself *ready* handsomely,
And put on her best apron.
Fletcher (and another), Queen of Corinth, ii. 4.

3. Suitably disposed in mind; mentally prepared; willing; inclined; not reluctant.

The spirit truly is *ready*, but the flesh is weak.
Mark xiv. 38.

A persecutor who inflicts nothing which he is not *ready* to endure deserves some respect.
Macaulay, Hallam's Const. Hist.

4. Prepared by what has gone before; brought to a fit state or condition; not unlikely; immediately liable: with an infinitive.

The blessing of him that was *ready* to perish came upon me. Job xxix. 13.

Our king, being *ready* to leap out of himself for joy of his found daughter, . . . cries, "O, thy mother!"
Shak., W. T., v. 2. 54.

The miserable prisoner is *ready* to famish.
Dekker, Seven Deadly Sins, p. 45.

5. Already prepared or provided; available for present use or requirement; immediately at hand or within reach; opportune: as, a *ready* means of escape; a *ready* way.

And the olde knyght seide that he sholde do sette ther a cheyer, that euer more sholde be *redy* for the knyght in to sitte that sholde be so trewe in loynge whan he were come. *Merlin* (E. E. T. S.), ii. 362.

Go, and *make* thee *ready* straight
In all thy best attire. *B. Jonson*, Volpone, ii. 3.

A man may *make* him *ready* in such clothes
Without a candle.
Middleton (and others), The Widow, iii. 3.

=Syn. *Ready, Easy;* disposed, apt, expert, handy, skilful, clever, smart; expeditious, unhesitating. So many of the meanings of *ready* convey the idea of a movement of mind, and especially a consent of the will, that there is a tendency to use other words where disposition is not included. Hence it is better to say this may *easily* be seen, than this may *readily* be seen. See quotation from Locke under *readily.* *Easy* of approach; *easy* to be done; *ready* to hear. All the senses of *ready*, active or passive, grow out of that of being prepared.

II. *n.* 1. Ready money; cash: usually with the definite article. [Slang.]

Lord Strutt was not flush in *ready*, either to go to law, or clear old debts. *Arbuthnot*, Hist. John Bull. (*Latham.*)

2. The condition of being ready. [Colloq.]—3. The position of a soldier's weapon following the command "Make ready!" or "Ready!" [Colloq.]

[The hunter] beats patiently and noiselessly from the leeward . . . with his rifle at the *ready*.
T. Roosevelt, Hunting Trips, p. 119.

A good ready, a state of being fully ready or prepared; a good condition of readiness. [Colloq.]

ready (red'i), *v. t.*; pret. and pp. *readied*, ppr. *readying.* [< ME. *redien, redyen* (= D. *reeden*, prepare, dress, = MLG. *rēden, reiden* = MHG. *reiten, reiden*; cf. ME. *beredien* = G. *be-reiten* = Sw. *be-reda* = Dan. *be-rede*, prepare, get ready, etc.); < *ready, a.*] 1. To make ready; put into proper condition or order; dispose; arrange; prepare. [Obsolete or archaic.]

Thare-fore what-so-euer thou bee that *redies* the for to lufe Gode, . . . haue in mynde besely for to halde the name of Ihesu in thi mynde.
Hampole, Prose Treatises (E. E. T. S.), p. 3.

And, having *readied* all these costly things,
In a poore pedlers trusse he packs his wares.
Heywood, Troia Britannica (1609). (*Nares.*)

2†. To direct.

For, for the gretnesse of the Erthe and of the See, men may go be a 1000 and a 1000 other weyes, that no man cowde *redye* him perfitely toward the parties that he cam fro, but zif it were be aventure and happ, or be the grace of God. *Mandeville*, Travels, p. 185.

ready-made (red'i-mād), *a.* 1. Previously made and now ready for use; furnished or obtained in a formed state; specifically, in trade, made ready for chance sale, and not made to order for a particular person: as, *ready-made* clothing; *ready-made* opinions or excuses.

When he hears
The tale of horror, to some *ready-made* face
Of hypocritical assent he turns.
Shelley, Queen Mab, iii.

The provision-man had honestly the effect of having got for the day only into the black coat which he had bought *ready-made* for his first wife's funeral.
Howells, Annie Kilburn, xxii.

2. Pertaining to articles prepared beforehand: as, the *ready-made* department of a tailor's or shoemaker's business. [Trade use.]

ready-man (red'i-man), *n.* One of the men sent aloft in a man-of-war to prepare for evolutions with spars or sails.

ready-pole (red'i-pōl), *n.* A bar fixed across a chimney to support the pot-hook. It is now commonly of iron, but was formerly made of wood. *Halliwell.* [Prov. Eng.]

ready-reckoner (red'i-rek'nėr), *n.* A book of tabulated calculations, giving the value of any number of things from the lowest monetary unit upward, as also the interest on any sum of money for any period from a day upward, etc.; a book of tables to facilitate calculations.

I could almost think from the preface (but such deductions are very deceptive) that the earliest of the books which are now called *ready reckoners*, meaning those which have totals at given prices ready cast up, was the following: London 1693. Wm. Leyborn. Panarithmologia; being a mirror for merchants, a brieviate for bankers, a treasure for tradesmen, a mate for mechanics, and a sure guide for purchasers, sellers, or mortgagers of land, leases, annuities, rents, pensions, etc., in present possession or reversion, and a constant concomitant fitted for all men's occasions. *De Morgan.*

The Clerk in Eastcheap cannot spend the day in verifying his *Ready-Reckoner;* he must take it as verified, true and indisputable. *Carlyle.*

reaft, *n.* [Usually in Sc. spelling *reif, ricf;* < ME. *ref, ræf, reaf, reve*, < AS. *rēaf*, spoil, plunder: see *reave.*] Spoil; plunder; robbery.

Meaning to live by *reif* of other mennes goodes, wherein they have no maner of propertie.
Holinshed, Chron. (*Nares.*)

The man that wons yon foreste intill,
He lives by *reif* and felonie!
Sang of the Outlaw Murray (Child's Ballads, VI. 32).

reaffirm (rē-ą-fėrm'), *v. t.* [= F. *réaffirmer;* as *re-* + *affirm.*] To affirm again.

I close with *re-affirming* the truth that I have aimed to impress. *Channing*, Perfect Life, p. 25.

reaffirmance (rē-ą-fėr'mąns), *n.* [< *reaffirm* + *-ance.*] Renewed affirmation; reaffirmation.

A *reaffirmance* after such revocation. *Ayliffe*, Parergon.

reaffirmation (rē-af-ėr-mā'shọn), *n.* [< *reaffirm* + *-ation.*] Renewed affirmation; a repeated affirmation.

The great movement of thought which characterises the nineteenth century is a movement through negation to *reaffirmation*, through destruction to reconstruction.
E. Caird, Hegel, p. 1.

reafforest (rē-a-for'est), *v. t.* [< *re-* + *afforest.*] To convert anew into a forest; renew the forest-growth of; reforest.

The Legislature was obliged to take steps to *reafforest* considerable tracts. *The American*, VII. 229.

reafforestation (rē-a-for-es-tā'shọn), *n.* [< *reafforest* + *-ation.*] A second afforestation; promotion of renewed forest-growth.

Even partial *reafforestation* in Brescia.
The Century, XXXI. 536.

reagency (rē-ā′jen-si), *n.* [< *re-* + *agency.*] Action of or as of a reagent; reflex agency or activity; counter-agency; reaction.

Still, the mind, when acted on, is only excited to self-agency, to manifest what it is in itself, in the way of *re-agency.* *H. B. Smith*, Christian Theology, p. 173.

reagent (rē-ā′jent), *n.* [< *re-* + *agent.* Cf. *re-act.*] 1. One who or that which exerts reflex action or influence; an agency that produces reciprocal effects; a cause or source of counter-results.

These tools have some questionable properties. They are *reagents.* Machinery is aggressive. The weaver becomes a web, the machinist a machine. *Emerson*, Works and Days.

2. In *chem.*, a substance used to effect chemical change in another substance for the purpose of identifying its component parts or of ascertaining its percentage composition. Thus, the infusion of galls is a reagent which indicates iron in solution by a dark-purple precipitate. Barium chlorid is a reagent which separates sulphuric acid from a solution in the insoluble form of barium sulphate which can be weighed, and from the weight of which the actual amount of sulphuric acid can readily be deduced.

3. Anything used for the treatment of a substance under investigation to render its nature or condition more evident. Ordinarily the object is to see what changes are thus produced, but the word is used more loosely, as in *hardening reagents.*—**Nessler's reagent**, a reagent used to detect and determine minute quantities of ammonia, particularly in water. It consists of a strongly alkaline solution of potassium iodide and mercuric chlorid. A few drops added to a few fluidounces of water will cause a slight reddish-yellow tinge if one part of ammonia is present in twenty million parts of water.

reaggravation (rē-ag-ra-vā′shon), *n.* [< *reaggravate* + *-ion.*] In *Rom. Cath. eccles. law*, the last monitory, published after three admonitions and before the excommunication.

reagree (rē-a-grē′), *v.* [< *re-* + *agree.*] I. *intrans.* To agree again; become reconciled.

II.† *trans.* To cause to agree again; reconcile.

And fain to see that glorious holiday
Of union which this discord *reagreed.*
Daniel, Civil Wars, vii. 111.

reakt, *v. i.* An obsolete spelling of *reek*[1].

reaket, *n.* [Perhaps an erroneous form for *wrack* or *wreck*, or an error for *reate*, q. v.: see *wrack*, *wreck*.] A kind of plant. [The word occurs only in the passage quoted, where it is used as a translation of Latin *ulva*, seaweed.]

The bore is yll in Laurente soyle,
That feedes on *reakes* and reedes;
Somtymes frome goodly pleasant vine
A sower tendrell speedes.
Drant, tr. of Horace's Satires, II. 4.

reakst. See *to play rex*, under *rex*.

reaks-player†, *n.* One who plays reaks (rex). *Cotgrave.*

real[1] (rē′al), *a.* and *n.* [< ME. *real, reall*, < OF. *real, reel*, F. *réel* = Pr. Sp. Pg. *real* = It. *reale*, < ML. *realis*, belonging to the thing itself (in the disputes of the Nominalists and Realists), < L. *res*, a thing; perhaps allied to Skt. √ *rā*, give. Hence *realize, realization, realism, realist, reality*, etc.; also, from L. *res*, E. *rebus, republic, republican*, etc.] I. *a.* 1. Actual; genuine; true; authentic; not imaginary, artificial, counterfeit, or factitious: as, *real* lace.

I waked, and found
Before mine eyes all *real*, as the dream
Had lively shadow'd. *Milton*, P. L., viii. 310.

Homer tells us that the blood of the gods is not *real* blood, but only something like it. *Addison*, Spectator, No. 275.

The hatred of unreality was uppermost with Carlyle; the love of what is *real* with Emerson. *O. W. Holmes*, Emerson, iv.

It is probable that the American inventor of the first anæsthetic has done more for the *real* happiness of mankind than all the moral philosophers from Socrates to Mill. *Lecky*, Europ. Morals, I. 91.

The Teutonic words are all of them *real* words, words which we are always wanting. *E. A. Freeman*, Amer. Lects., p. 163.

2. Of genuine character; not pretended or pretending; unassumed or unassuming.

Phœbe's presence made a home about her. . . . She was *real!* *Hawthorne*, Seven Gables, ix.

Real kings hide away their crowns in their wardrobes, and affect a plain and poor exterior. *Emerson*, Works and Days.

3. Specifically, in *philos.*, existing in or pertaining to things, and not words or thought merely; being independent of any person's thought about the subject; possessing characters independently of the attribution of them by any individual mind or any number of minds; not resulting from the mind's action: opposed to *imaginary* or *intentional*. *Real* differs from *actual*, inasmuch as what is only in germ or in posse, in so far as it has a power of developing into a definite actuality, is real, and independent of what we may think about it. Real objects are either external to the mind, when they are independent altogether of our thought, or they are internal, when they depend upon thought, but not upon thought about them.

The term *real* (*realis*), though always importing the existent, is used in various significations and oppositions. . . . 1. As denoting existence, in contrast to the nomenclature of existence—the thing as contradistinguished from its name. Thus we have definitions and divisions *real*, and definitions and divisions nominal or verbal. 2. As expressing the existent as opposed to the non-existent—a something in contrast to a nothing. In this sense the diminutions of existence, to which reality in the following significations is counterposed, are all *real*. 3. As denoting material or external, in contrast to mental, spiritual, or internal, existence. This meaning is improper. . . . 4. As synonymous with *actual*; and this (*a*) as opposed to potential, (*b*) as opposed to possible existence. 5. As denoting absolute or irrespective, in opposition to phænomenal or relative, existence; in other words, as denoting things in themselves and out of relation to all else, in contrast to things in relation to, and as known by, intelligences, like men, who know only under the conditions of plurality and difference. In this sense, which is rarely employed and may be neglected, the *real* is only another term for the unconditioned or absolute—τὸ ὄντως ὄν. 6. As indicating existence considered as a subsistence in nature (ens extra animam, ens naturæ), it stands counter to an existence considered as a representation in thought. In this sense, *reale*, in the language of the older philosophy (Scholastic, Cartesian, Gassendian), as applied to *esse* or *ens*, is opposed to *intentionale, notionale, conceptibile, imaginarium, rationis, cognitionis, in anima, in intellectu, prout cognitum, ideale*, etc.; and corresponds with *a parte rei* as opposed to *a parte intellectus*, with *subjectivum* as opposed to *objectivum*, with *proprium, principale*, and *fundamentale* as opposed to *vicarium*, with *materiale* as opposed to *formale*, and with *formale in scipso* and *entitativum* as opposed to *representativum*, etc. Under this head, in the vacillating language of our more recent philosophy, *real* approximates to, but is hardly convertible with, objective, in contrast to subjective in the signification there prevalent. 7. In close connection with the sixth meaning, *real*, in the last place, denotes an identity or difference founded on the conditions of the existence of a thing in itself, in contrast to an identity or difference founded only on the relation or point of view in which the thing may be regarded by the thinking subject. In this sense it is opposed to logical or rational, the terms being here employed in a peculiar meaning. Thus a thing which really (*re*) or in itself is one and indivisible may logically (*ratione*) by the mind be considered as diverse or plural. *Sir W. Hamilton*, Reid's Works, Note B, § 1, 5, foot-note.

Ideas of substances are *real* when they agree with the existence of things. *Locke*, Human Understanding, II. xxx. 5.

We substitute a *real* for a dramatic person, and judge him accordingly. *Lamb*, Artificial Comedy.

For the first time the ideal social compact was *real*. *Emerson*, Hist. Discourse at Concord.

4†. Sincere; faithful; loyal.

Then the governor told them, if they were *real*, as they professed, he should expect their ready and free concurrence with him in all affairs tending to the public service. *Memoirs of Colonel Hutchinson* (1643). (*Nares.*)

5†. Relating to things, not to persons; not personal.

Many are perfect in men's humours that are not greatly capable of the *real* part of business. *Bacon.*

6. In *law*, pertaining to or having the quality of things fixed or immovable. See *real estate*, etc., below.—**Chattel real.** See *chattel.*—**Covenant real.** See *covenant.*—**Real abstraction.** See *abstraction.*—**Real action**, in *law.* See *action*, 8.—**Real assets.** See *assets*, 1.—**Real attribute**, an attribute known by ordinary observation, generalization, and abstraction, and signified by a term of first intention: opposed to a *notional attribute*, which is signified by a term of second intention.—**Real burden**, in *Scots law*, a burden in money imposed on the subject of a right, as on an estate, in the deed by which the right is constituted, and thus distinguished from a *personal burden*, which is imposed merely on the receiver of the right.—**Real character.** See *character.*—**Real component of a force.** See *component.*—**Real composition.** (*a*) The union of objects having existences distinct from one another. (*b*) In *Eng. eccles. law*, an agreement made between the owner of lands and the parson or vicar, with consent of the ordinary, that such lands shall be discharged from payment of tithes, in consequence of other land or recompense given to the parson in lieu and satisfaction thereof. Also called *composition of tithes.*—**Real concordance.** See *concordance*, 3.—**Real contract.** See *contract.*—**Real convenience†**, the agreement of a thing with itself.—**Real definition**, the definition of a thing—that is to say, of a species—by stating the components of its essence, or its place in natural classification. For the nominalists there could be no real definition. In the proper sense; hence, finding the definitions so called useful, they invented new definitions of the phrase. The real definition, for Leibnitz and Wolf, is the definition from which the possibility of the thing defined follows; for Kant, the definition which sets forth the possibility of the thing from its essential marks; for Mill, the definition of a name with an implied assumption of the existence of the thing.—**Real degradation.** See *degradation*, 1 (*a*).—**Real distinction.** (*a*) A distinction independent of any person's thought. (*b*) A distinction between real objects. The Scotists made subtle and elaborate definitions of this phrase.—**Real diversity, division, ens, essence.** See the nouns.—**Real estate**, in *law*: (*a*) Land, including with it whatever by nature or artificial annexation inheres with it as a part of it or as the means of its enjoyment, as minerals on or in the earth, standing or running water, growing trees, permanent buildings, and fences. In this sense the term refers to those physical objects of ownership which are immovable. (*b*) The ownership of or property in lands, etc.; any legal or equitable interest in lands, etc., except some minor, temporary, or inchoate rights which by the laws of most jurisdictions are deemed to be personal estate. "At common law, any estate in lands, etc., the date of the termination of which is not determined by or ascertainable from or at the date of the act which creates it, is *real estate.*" (*Robinson.*) The line between the two classes of property is differently drawn in detail, according as the object of the law is to define what shall be taxed, or what shall go to the heir in case of intestacy as distinguished from what shall go through the administrator to the next of kin, or what shall come within the rules as to recording titles, or other purposes.—**Real evidence, exchange, focus, fugue.** See the nouns.—**Real horse-power.** Same as *indicated horse-power* (which see, under *horse-power*).—**Real identity**, the non-difference in reality of the extremes of a relation.—**Real immunity** (*eccles.*). See *immunity*, 3.—**Real induction.** See *induction*, 5.—**Real laws**, laws which directly and indirectly regulate property, and the rights of property, without changing the state of the person.—**Real noon.** Same as *apparent noon* (which see, under *apparent*).—**Real partition**, the mental separation of an object into parts which might be physically separated.—**Real poinding, possibility, power, precision, presence, privilege.** See the nouns.—**Real property.** Same as *real estate.*—**Real quality, quantity, relation, representative, restriction, right.** See the nouns.—**Real question**, a question where the attribute in regard to whose presence or absence inquiry is made is a real one.—**Real science or philosophy.** (*a*) A science or philosophy that is caused in the mind by a real thing, as physics, mathematics, metaphysics; a speculative science: opposed to *practical science*, which is caused in the mind by an idea of a thing to be brought about. (*b*) A science which has a determinate reality for its object, and is conversant about existences other than forms of thought: in this sense, mathematics is not a real science.—**Real services.** Same as *predial services* (which see, under *predial*).—**Real things**, in *law*, things substantial and immovable, and the rights and profits annexed to or issuing out of them.—**Real truth**, the agreement of a judgment with its object: opposed to *formal truth*, which consists in the agreement of a reasoning with the principles of logic.—**The real stuff**, the genuine thing; that which is really what is represented or supposed: used especially of liquors. [Colloq.]

In this exhibition there are, of course, a certain number of persons who make believe that they are handing you round tokay—giving you the *real* imperial *stuff*, with the seal of genuine stamped on the cork. *Thackeray*, Men and Pictures.

Real warrandice. See *warrandice.*—**Syn. 1** and **2.** *Real, Actual, Positive*, veritable, substantial, essential. *Real* applies to that which certainly exists, as opposed to that which is imaginary or feigned: as, *real* cause for alarm; a *real* occurrence; a *real* person, and not a ghost or a shadow; *real* sorrow. *Actual* applies to that which is brought to be or to pass, as opposed to that which is possible, probable, conceivable, approximate, estimated, or guessed at. *Actual* has a rather new but natural secondary sense of present. *Positive*, from the idea of a thing's being placed, fixed, or established, is opposed to *uncertain* or *doubtful.*

II. *n.* 1. That which is real; a real existence or object; a reality.

While it is true that correlatives imply each other, it is not true that all correlatives imply *Reals.* . . . The only meaning we can attach to Reality is that every *Real* has a corresponding feeling or group of feelings. *G. H. Lewes*, Probs. of Life and Mind, II. 10.

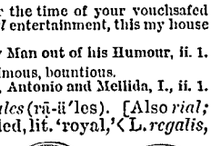
2†. A realist.

Scotists, Thomists, *Reals*, Nominals. *Burton*, Anat. of Mel., p. 677.

The real. (*a*) Reality. (*b*) The real thing; the genuine article. [Colloq.]

A cynic might suggest as the motto of modern life this simple legend,—"Just as good as *the real.*" *C. D. Warner*, Backlog Studies, p. 4.

real[1] (rē′al), *adv.* [< *real*[1], *a.*] Really; truly; very; quite. [Colloq., Eng. and U. S.]



real[2]† (rē′al), *a.* [< ME. *real, riall, rial, ryall, ryell, roial*, royal, regal, < AF. *reial, roial*, OF. *real*, F. *réal* (used only in certain antique locutions), = Sp. Pg. *real* = It. *reale, regale*, < L. *regalis*, regal, kingly, royal: see *royal* and *regal*[1], doublets of *real*[2]. Cf. *leal, loyal, legal*, similarly related.] Royal; regal; royally excellent or splendid.

Thus, *real* as a prince is in his halle,
Leve I this chauntecleer in his pasture.
Chaucer, Nun's Priest's Tale, l. 364.

Sir, I could wish that for the time of your vouchsafed abiding here, and more *real* entertainment, this my house stood on the Muses' hill. *B. Jonson*, Every Man out of his Humour, ii. 1.

Reall, magnanimous, bountious. *Marston*, Antonio and Mellida, I., ii. 1.

real[3] (rā-äl′), *n.*; pl. *reales* (rā-ä′les). [Also *rial*; < Sp. *real*, a coin so called, lit. 'royal,' < L. *regalis*, regal, royal: see *real*[2], *royal, regal*[1].] A subsidiary silver coin and money of account in Spain and Spanish-American countries. The current real of Spain (*real de vellon*) is one quarter of the peseta or franc, and worth about 5 United States cents. The Mexican real, corresponding to the old Spanish *real de plata*, is one eighth of a dollar (Mexican *peso*), and reckoned at 12½ cents. The latter coin, both Spanish and Mexican, circulated largely in the United States down to about 1850,

being called a Spanish or Mexican shilling in New York, a levy (see *levy*[3], 1) in the South, etc.

real[4] (rē′al), *n.* [Cuban, perhaps < Sp. *real*, royal: see *real*[2], *real*[3]. Cf. OF. *real*, a kind of sturgeon.] The big-eyed herring, or saury, *Elops saurus*. [Cuba.]

reales, *n.* Plural of *real*[3].

realgar (rē-al′gär), *n.* [Also *resalgar*, < ME. *resalgar*, *rysalgar*, *rosalgar*; = OF. *realgal*, *reagal*, *riagal*, *realgal*, *risigal*, F. *réalgar* = Sp. *rejalgar* = Pg. *rosalgar* = It. *risigallo* (ML. *risigallum*), < Ar. *rahj al-ghar*, realgar, lit. 'powder of the mine,' mineral powder (so called because derived orig. from silver-mines): *rahj*, *rehj*, dust, powder; *al*, the; *ghār* (*gār*), cavern, mine. Cf. Ar. *rahj asfar*, orpiment.] Arsenic disulphid (As_2S_2), a combination of an equal number of sulphur and arsenic atoms; red sulphuret of arsenic, which is found native in transparent crystals, and also massive. Realgar differs from orpiment in that orpiment is composed of two equivalents of arsenic and three of sulphur, and has a yellow color. Realgar, also called *red arsenic* or *ruby sulphur*, is prepared artificially for use as a pigment and for making white fire, which is a mixture of 2 parts of ruby sulphur and 10 parts of niter.

realisation, realise. See *realization, realize.*

realism (rē′al-izm), *n.* [= F. *réalisme* = Sp. Pg. It. *realismo* = G. *realismus*, < NL. *realismus*; as *real*[1] + *-ism*.] 1. The doctrine of the realist, in any of the senses of that word. See especially *realist*, *n.*, 1.

(1) Extreme *realism* taught that universals were substances or things, existing independently of and separately from particulars. This was the essence of Plato's theory of ideas. . . . (2) Moderate *realism* also taught that universals were substances, but only as dependent upon and inseparable from individuals, in which each inhered; that is, each universal inhered in each of the particulars ranged under it. This was the theory of Aristotle, who held that the τόδε τι or individual thing was the first essence, while universals were only second essences, real in a less complete sense than first essences. He thus reversed the Platonic doctrine, which attributed the fullest reality to universals only, and a merely participative reality to individuals. . . . (3) Extreme nominalism taught that universals had no substantive or objective existence at all, but were merely empty names or words. [See *nominalism*.] (4) Moderate nominalism or conceptualism taught that universals have no substantive existence at all, but yet are more than mere names signifying nothing; and that they exist really, though only subjectively, as concepts in the mind, of which names are the vocal symbols. . . (5) [The medieval schoolmen] Albertus Magnus, Thomas Aquinas, Duns Scotus, and others fused all these views into one, and taught that universals exist in a threefold manner: universalia ante rem, as thoughts in the mind of God; universalia in re, as the essence [quiddity] of things according to Aristotle, and universalia post rem, as concepts in the sense of moderate nominalism. This is to-day the orthodox philosophy of the Catholic Church, as opposed to the prevailingly exclusive conceptualism of the Protestant world. . . . In contrast with all the views above presented, another and sixth view will now be stated. . . (6) Relationism or scientific *realism* teaches that universals, or genera and species, are, first, objective relations of existence among objectively existing things; secondly, subjective concepts of these relations, determined in the mind by the relations themselves; and thirdly, names representative both of the relations and of the concepts, and applicable alike to both. This is the view logically implied in all scientific classifications of natural objects, regarded as objects of real scientific knowledge.
F. L. Abbot, Scientific Theism, Int.

2. In *literature* and *art*, the representation of what is real in fact; the effort to exhibit the literal reality and unvarnished truth of things: treatment of characters, objects, scenes, events, circumstances, etc., according to actual truth or appearance, or to intrinsic probability, without selection or preference over the ugly of what is beautiful or admirable: opposed to *idealism* and *romanticism*. Compare *naturalism*.

I wish the reader particularly to observe, throughout all these works of Tintoret, the distinction of the imaginative verity from falsehood on the one hand, and from *realism* on the other. *Ruskin*, Modern Painters, III. ii 3.

A far fuller measure of the ease and grace and life of the *realism* which Giotto had taught.
D. G. Mitchell, Bound Together, ii.

By *realism* I mean simply the observation of things as they are, the familiarity with their aspect physical and intellectual, and the consequent faculty of reproducing them with approximate fidelity.
Contemporary Rev., L. 241.

Exact realism. See *Herbartian*.—**Hypothetic realism.** See *hypothetic*.—**Natural realism**, the doctrine that in sensation (if not also in volition) we have a direct consciousness of a real object other than ourselves, so that we are as sure of the existence of the outer world as we are of our own, or even of the presence of ideas.

In the act of sensible perception, I am conscious of two things;—of myself as the perceiving subject, and of an external reality . . . as the object perceived . . . I am conscious of knowing each of them, not mediately, in something else, as represented, but immediately in itself, as existing. . . . Each is apprehended equally, and at once, in the same indivisible energy . . .; and . . . each is apprehended out of, and in direct contrast to, the other. . . . The contents of the fact of perception, as given in consciousness, being thus established, what are the consequences to philosophy, according as the truth of its testimony is, or is not, admitted? On the former alternative, the veracity of consciousness, in the fact of perception, being unconditionally acknowledged, we have established at once, without hypothesis or demonstration, the reality of mind and the reality of matter; while no concession is yielded to the sceptic, through which he may subvert philosophy in manifesting its self-contradiction. The one legitimate doctrine, thus possible, may be called *natural realism* or natural dualism. . . . If the testimony of consciousness to our knowledge of an external world existing be rejected with the idealist, but with the realist the existence of that world be affirmed, we have a scheme which—as it by many various hypotheses endeavours on the one hand not to give up the reality of an unknown material universe, and on the other to explain the ideal illusion of its cognition—may be called the doctrine of cosmothetic idealism, hypothetical realism, or hypothetical dualism. This last [system] . . . is the one which . . . has found favour with the immense majority of philosophers.
Sir W. Hamilton, Reid's Works, Note A, § 1, 10.

realist (rē′al-ist), *n.* and *a.* [= F. *réaliste* = Sp. Pg. It. *realista* = G. *realist*, < NL. *realista*; as *real*[1] + *-ist*.] I. *n.* 1. A logician who holds that the essences of natural classes have some mode of being in the real things: in this sense distinguished as a *scholastic realist*: opposed to *nominalist*. As soon as intellectual development had reached the point at which men were capable of conceiving of an essence, they naturally found themselves realists. But reflection about words inclined them to be nominalists. Thus, a controversy sprang up between these sects in the eleventh century (first in the Irish monasteries, and then spread through the more civilized countries of northern Europe), and was practically settled in favor of the realists toward the end of the twelfth century. During the fourteenth century a reaction from the subtleties of Scotus produced a revival of nominalistic views, which were brought into a thoroughgoing doctrine by Occam, his followers being distinguished as *terminists* from other schools of nominalists. At the time when scholasticism came to a rather violent end, owing to the revival of learning, the terminists were in the ascendant, though some of the universities were Scotist. The Cartesians did not profess to be realists; and Leibnitz was a decided nominalist; while the whole weight of the English school (Occam, Hobbes, Locke, Berkeley, Hume, Hartley, Reid, Brown, the Mills, and others) went in the same direction. At the present day philosophy seems to be, and science certainly is, prevailingly realistic. See quotation under *realism*, 1.

2. A philosopher who believes in the real existence of the external world as independent of all thought about it, or, at least, of the thought of any individual or any number of individuals.—3. In *literature* and *art*, a believer in or a practiser of realism; one who represents persons or things as he conceives them to be in real life or in nature; an opponent of idealism or romanticism.

How hard and meagre they seem, the professed and finished *realists* of our own day, ungraced by that spiritual candor which makes half the richness of Ghirlandaio!
H. James, Jr., Trans. Sketches, p. 298.

4. One who advocates technical as opposed to classical education; one who upholds the method of the real-schools. [A German use.]

II. *a.* Of or pertaining to realism; realistic; naturalistic.

realistic (rē-a-lis′tik), *a.* [< *realist* + *-ic*.] 1. Of or pertaining to the realists in philosophy; characteristic of speculative realism.

The *realistic* tendency—the disposition to mistake words for things—is a vice inherent in all ordinary thinking.
J. Fiske, Cosmic Philos., I. 122.

2. Exhibiting or characterized by realism in description or representation; objectively real or literal; lifelike, usually in a bad or depreciatory sense: as, a *realistic* novel or painting; a *realistic* account of a murder.

A bit of *realistic* painting, in the midst of a piece of decorative painting, would offend us, and yet the *realistic* bit would add a certain amount of veracity.
P. G. Hamerton, Graphic Arts, v.

Realistic they are in the nobler sense: that is, they are true to nature without being slavish copies of nature.
C. C. Perkins, Italian Sculpture, p. 91

Realistic dualism. See *dualism*.

realistically (rē-a-lis′ti-kal-i), *adv.* In a realistic manner; in a manner that has regard to the actual appearance of objects or circumstances, or the real facts of existence.

reality[1] (rē-al′i-ti), *n.*; pl. *realities* (-tiz). [= F. *réalité* = Sp. *realidad* = Pg. *realidade* = It. *realità*, < ML. *realita(t-)s*, < *realis*, real: see *real*[1]. Cf. *realty*[1].] 1. The being real; truth as it is in the thing; objective validity; independence of the attributions of individual thought; positively determinate being.

Hee exhorted him to beleeve the *reality* of the sacrament after the consecration.
Foxe, Martyrs, p. 1159, an. 1543.

Reality shall rule, and all shall be as they shall be forever. *Sir T. Browne*, Christ. Mor., iii. 24.

For this, in *reality*, is the port of Acre, where ships lie at anchor. *Pococke*, Description of the East, II. i. 56.

In the English plays alone is to be found the warmth, the mellowness, and the *reality* of painting.
Macaulay, Dryden.

Nothing can have *reality* for us until it enters within the circle of Feeling, either directly through perception, or indirectly through Intuition. Conception is the symbolical representation of such real presentation.
G. H. Lewes, Probs. of Life and Mind, II. 11.

2. That which is real or genuine; something that really is or exists, as opposed to what is imagined or pretended; an essential verity or entity, either in fact or in representation.

Of that skill the more thou know'st,
The more she will acknowledge thee her head,
And to *realities* yield all her shows.
Milton, P. L., viii. 575.

Only shadows are dispensed below,
And Earth has no *reality* but woe.
Cowper, Hope, l. 68.

They who live only for wealth, and the things of this world, follow shadows, neglecting the great *realities* which are eternal on earth and in heaven.
Sumner, Orations, I. 194.

3. In *law*, same as *realty*[1]. [Now rare.]—**Absolute reality.** See *absolute*.—**Empirical reality**, the reality of an object of actual or conditionate experience.

What we insist on is the *empirical reality* of time, that is, its objective validity, with reference to all objects which can ever come before our senses. What we deny is that time has any claim to absolute reality, so that, without taking into account the form of our sensuous condition, it should by itself be a condition or quality inherent in things; for such qualities as belong to things by themselves can never be given to us through the senses.
Kant, Critique of Pure Reason, tr. by Müller.

Objective reality, truth; reference to a real object. This is the sense in which this phrase is used by Kant. At an earlier date it would have meant existence in the mind. With later writers it means nearly the same as *absolute reality*.—**Practical reality**, in the *Kantian philos.*, that force in a postulate of the practical reason by which it becomes the source of the possibility of realizing the summum bonum.

I have, indeed, no intuition which should determine its objective theoretic reality of the moral law, but not the less it has a real application, which is exhibited in concreto in intentions or maxims: that is, it has a *practical reality* which can be specified, and this is sufficient to justify it even with a view to noumena.
Kant, Critique of Practical Reason, tr. by T. K. Abbott, [p. 146.

Reality of laws, a legal phrase for all laws concerning property and things.—**Subjective reality**, real existence in the mind.

Time has *subjective reality* with regard to internal experience; that is, I really have the representation of time, and of my determinations in it.
Kant, Critique of Pure Reason, tr. by Müller, p. 37.

Theoretical reality, in the *Kantian philos.*, validity as a hypothesis.—**Transcendental reality.** Same as *absolute reality*. = Syn. 1 and 2. Verity (see *real*[1]). *Reality* means that a thing certainly is; *truth* applies to the correctness of what is said or believed about the thing, the conformity of such report or belief to reality. The *reality* of a danger; the *actuality* of the arrival of help; the *truth* about the matter.

reality[2], *n.* Same as *realty*[2].

Our *reality* to the emperor. *Fuller.*

realizability (rē-a-lī-za-bil′i-ti), *n.* [< *realizable* + *-ity* (see *-bility*).] Capability of being realized. [Rare.]

realizable (rē′a-lī-za-bl), *a.* [< F. *réalisable*; as *realize* + *-able*.] Capable of being realized.

realization (rē′al-i-zā′shon), *n.* [< OF. *realisation*, F. *réalisation*; as *realize* + *-ation*.] 1. A bringing or coming into real existence or manifestation, as of something conceived or imagined: as, the *realization* of a project.

The *realization* of the rights of humanity in the nation is the fulfillment of righteousness.
E. Mulford, The Nation, vi.

The desire is the direction of a self-conscious subject to the *realisation* of an idea.
T. H. Green, Prolegomena to Ethics, § 151.

2. Perception of the reality or real existence of something; a realizing sense or feeling: as, the *realization* of one's danger.

An intrinsic and awful *realization* of eternal truths.
Islay Burns, Memoir of W. C. Burns, p. 98.

3. The act of realizing upon something; conversion into money or its equivalent; exchange of property for its money value. [Trade use.]—4. The act of converting money into land or real estate. *Imp. Dict.*

Also spelled *realisation*.

realize (rē′al-īz), *v.*; pret. and pp. *realized*, ppr. *realizing*. [< OF. *realiser*, F. *réaliser* = Sp. Pg. *realizar*; as *real*[1] + *-ize*.] I. *trans.* 1. To make or cause to become real; bring into existence or fact: as, to *realize* a project, or a dream of empire.

His [Clive's] dexterity and resolution *realised*, in the course of a few months, more than all the gorgeous visions which had floated before the imagination of Dupleix.
Macaulay, Lord Clive.

All art is the endeavour to *realise* in material forms and colours an idea of beauty latent in the human spirit from the beginning. *Faiths of the World*, p. 6.

Children are, as it were, fresh blocks of marble, in which, if we have any ideal, we have a new chance of *realizing* it after we have failed in ourselves.
J. R. Seeley, Nat. Religion, p. 128.

2. To perceive or comprehend the reality of; make real or distinct to one's self; recognize the real nature or the actual existence of: as, to *realize* the horrors of war; to *realize* one's danger or one's deficiencies.

Intrenched within these many walls, the people of this gay capital cannot *realize* war. *W. Ware*, Zenobia, II. xi.

In order to pity suffering we must *realise* it.
Lecky, Europ. Morals, I. 138.

He [Samuel Adams] wanted the whole world to *realize* that the rule of a republic is a rule of law and order.
J. Fiske, Critical Period of Amer. Hist., iv.

3. To manifest as real or as a reality; exhibit the actual existence or character of; cause to appear real or distinct.

To put these materials to poetical use is required an imagination capable of painting nature, and *realizing* fiction. *Johnson*, Milton.

The child *realizes* to every man his own earliest remembrance, and so supplies a defect in our education, or enables us to live over the unconscious history with a sympathy so tender as to be almost personal experience.
Emerson, Domestic Life.

Correggio appears to have been satisfied with *realising* the tumult of heaven rushing to meet earth, and earth straining upwards to ascend to heaven in violent commotion. *J. A. Symonds*, Italy and Greece, p. 274.

4. To bring or get into actual possession; make one's own; clear as a profit or gain; obtain a return of: as, to *realize* a fortune from speculation.

Send me an account of the number of crowns you *realize*. *Shelley*, To H. Reveley, Oct. 18, 1819.

Pope was the first Englishman who, by the mere sale of his writings, *realised* a sum which enabled him to live in comfort and in perfect independence.
Macaulay, Montgomery's Poems.

Man begins with nothing *realized* (to use the word), and he has to make capital for himself by the exercise of those faculties which are his natural inheritance.
J. H. Newman, Gram. of Assent, ix.

The question of imposing upon what has been termed *realised* income a higher poundage than that for what has been termed precarious income has been frequently raised. *S. Dowell*, Taxes in England, III. 136.

5. To bring into form for actual or ready use; exchange for cash or ready means: as, to *realize* one's stock or securities. [Trade use.]—6. To fetch as a price or return; bring in exchange or as compensation; make a return of: as, how much did the cargo *realize*? his labor *realizes* but little.

A farm he sold *realised* less than was anticipated.
Whyte Melville, White Rose, II. xxvi.

7. To convert into real estate; make real property of. *Imp. Dict.*

II. *intrans.* To obtain ready money or profits by sale of property.

Also spelled *realise*.

realizedness (rē′a-lī-zed-nes), *n.* The state of being realized. [Rare.]

But taking pleasure to be the feeling of the *realizedness* of the will or self, we should doubt if apart from some present function or activity pleasure could exist.
F. H. Bradley, Ethical Studies, p. 119.

realizer (rē′a-lī-zėr), *n.* One who realizes. *Coleridge.*

realizingly (rē′a-lī-zing-li), *adv.* So as to realize. [Rare.]

reallege (rē-a-lej′), *v. t.* [= OF. *realleguer*, F. *réalléguer*; as *re-* + *allege*[1].] To allege again. *Cotgrave.*

reamy (rē′mi), *a.* [< *ream*[1] + *-y*[1].] Creamy; creaming; in a foaming condition; appearing frothy. [Rare.]

rean[1] (rēn), *n.* [< ME. *rene*, a watercourse: see *rine, run*[1].] A watercourse; a gutter; specifically, the furrow between ridges of plowed land to take off the water. *Halliwell.* [Prov. Eng.]

rean[2]†, *n.* and *v.* An old spelling of *rein*[1].

reanimate (rē-an′i-māt), *v.* [< *re-* + *animate.* Cf. F. *réanimer* = Sp. Pg. *reanimar* = It. *rianimare.*] I. *trans.* 1. To revive; resuscitate;

restore to life, as a person dead or apparently dead: as, to *reanimate* a person apparently drowned.

We are our *re-animated* ancestours, and antedate their resurrection. *Glanville*, Vanity of Dogmatizing, xv.

We may suppose that the creative power returns and *reanimates* some among the dead.
Isaac Taylor, Nat. Hist. Enthusiasm, p. 66.

2. To revive when dull or languid; invigorate; infuse new life or courage into: as, to *reanimate* disheartened troops; to *reanimate* drowsy senses or languid spirits.

Variety *reanimates* the attention, which is apt to languish under a continual sameness.
Sir J. Reynolds, Discourses, viii.

II. *intrans.* To revive; become lively again. [Rare.]

"There spoke Miss Beverley!" cried Delvile, *reanimating* at this little apology. *Miss Burney*, Cecilia, ix. 5.

reanimation (rē-an-i-mā′shon), *n.* [< *reanimate* + *-ion*.] The act or operation of reanimating, or reviving from apparent death; the act or operation of giving fresh spirits, courage, or vigor; the state of being reanimated.

Having opened his father's casque, he was rejoiced to see him give symptoms of *reanimation*.
Scott, Anne of Geierstein, xxxvi.

reannex (rē-ạ-neks′), *v. t.* [< *re-* + *annex*.] To annex again; annex what has been separated; reunite.

King Charles was not a little inflamed with an ambition to repurchase and *re-annex* that duchie.
Bacon, Hist. Hen. VII., p. 40.

reannexation (rē-an-ek-sā′shon), *n.* [< *reannex* + *-ation*.] The act of annexing again.

reanoint (rē-ạ-noint′), *v. t.* [< *re-* + *anoint*.] To anoint again or anew.

And Edward, . . .
Proud in his spoils, to London doth repair,
And, *reanointed*, mounts th' imperial chair.
Drayton, Miseries of Queen Margaret.

reanswer (rē-an′sėr), *v. t.* [< *re-* + *answer*.] 1. To answer again; make a renewed reply to.—2†. To answer or satisfy as a return; correspond to; equal; balance.

Bid him therefore consider of his ransome; which must proportion the losses we have borne, . . . which in weight to *re-answer*, his pettiness would bow under.
Shak., Hen. V., iii. 6. 136.

reap (rēp), *v.* [< ME. *repen*, *reopen*, *ripen* (pret. *rap*, *rep*, pl. *repen*, *ropen*, pp. *repen*, *ropen*, later *reaped*), < AS. *rīpan*, a variable verb, being in part strong (pret. pl. *rīpon*), also *geripan* (pret. pl. *geripon*), also with short vowel *ripan*, Anglian *riopan*, *rioppan*, *hrioppan*, *hrippan* (pret. **ræp*, pl. *rēpon*), and in part (and appar. orig.) weak, *rȳpan* (pret. **rȳpte*, not found), reap (cf. *rīp*, *rȳp*, a reaping, harvest): appar. a particular use of *rīpan*, prop. *rȳpan* (pret. pl. *rȳpton*, *rēpton*), plunder, spoil, = OHG. *roufen*, MHG. *roufen*, *roufen*, *rœufen*, G. *raufen*, pluck, pull, etc., = Goth. *raupjan*, pluck. Cf. D. *rapen*, reap, gather.] I. *trans.* 1. To cut with a sickle or other implement or machine; cut down and gather: used specifically of cutting grain: as, to *reap* wheat or rye.

When ye *reap* the harvest of your land, thou shalt not wholly reap the corners of thy field. Lev. xix. 9.

That which they *reapt* on the land was put into storehouses built for that purpose.
Purchas, Pilgrimage, p. 876.

And no Man ever *reapt* his Corn,
Or from the Oven drew his Bread,
Ere Hinds and Bakers yet were born,
That taught them both to sow and knead.
Prior, Alma, i.

2. To cut a crop of grain, or something likened to such a crop, from; clear by or as if by reaping.

His chin new *reap'd*
Show'd like a stubble land at harvest-home.
Shak., 1 Hen. IV., i. 3. 34.

3. Figuratively, to gather in by effort of any kind; obtain as a return or recompense; garner as the fruit of what has been done by one's self or others.

They have sown the wind, and they shall *reap* the whirlwind. Hos. viii. 7.

Of our labours thou shalt *reap* the gain.
Shak., 3 Hen. VI., v. 7. 20.

He cannot justly expect to *reape* aught but dishonour and dispraise. *Milton*, Eikonoklastes, v.

Do thou the deeds I die too young to do,
And *reap* a second glory in thine age!
M. Arnold, Sohrab and Rustum.

II. *intrans.* 1. To perform the act or operation of reaping; cut and gather a harvest.

Yf y *repe*, [I] ouere-reche, other gaf hem red that *repen* To sese to me with here sykel: that ich sew neuere
Piers Plowman (C), vii. 270.

Thou shalt sow, but thou shalt not *reap*. Micah vi. 15.

I would the globe from end to end
Might sow and *reap* in peace.
Tennyson, Epilogue.

2. Figuratively, to gather the fruit of labor or works; receive a return for what has been done.

For wel I wot that ye han herbeforne
Of makynge [poetry] *ropen*, and lad awey the corne.
Chaucer, Good Women, l. 74.

They that sow in tears shall *reap* in joy. Ps. cxxvi. 5.

reap† (rēp), *n.* [Early mod. E. also *repe*; < ME. *reepe*, *rep*, *rip*, < AS. *rīp*, *rȳp*, a reaping, a crop, harvest (also in comp., as *rīp-man*, harvester, *rip-tima*, harvest), also a sheaf of grain, etc., < *rīpan*, *rȳpan*, reap: see *reap*, *v.*] A sheaf of grain. [Prov. Eng.]

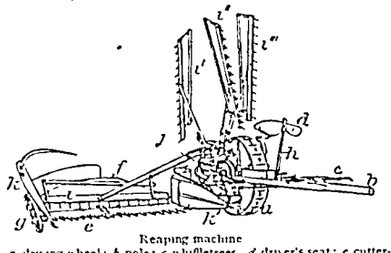
As mych as oone *reepe*.
Towneley Mysteries, p. 13. (*Halliwell.*)

reaper (rē′pėr), *n.* [< ME. *repare*, *ripere*, < AS. *rīpere*, a reaper, < *rīpan*, reap: see *reap*, *v.*] 1. One who reaps; one who cuts grain with a sickle or other implement or machine; hence, one who gathers in the fruits of his own or others' labor or work.

When brown August o'er the land
Call'd forth the *reapers'* busy band.
Scott, Rokeby, vi. 35.

In the vast field of criticism on which we are entering, innumerable *reapers* have already put their sickles.
Macaulay.

Only *reapers*, reaping early
In among the bearded barley,
Hear a song that echoes cheerly.
Tennyson, Lady of Shalott, i.



2. A machine for cutting grain; a reaping-machine.—**The reaper**, an ancient sophism, to the following effect: If you are to reap, it is not true that perhaps you will reap and perhaps not, but you will certainly reap. On the other hand, if you are not to reap, it is not true that perhaps you will reap and perhaps not, but you will certainly not. Thus you will either necessarily reap, or necessarily not reap, and the statement that there is a "perhaps" is false.

reap-hook (rēp′hůk), *n.* Same as *reaping-hook*. *Halliwell.* [Prov. Eng.]

reaping-hook (rē′ping-hůk), *n.* A curved blade with a short handle for reaping; a sickle; specifically, a sickle without the notched edge which formerly distinguished that implement.

The reapers in Palestine and Syria still make use of the *reaping-hook* in cutting down their crops: and "fill their hand" with the corn, and those who bind up the sheaves their "bosom."—Ps. cxxix. 7; Ruth ii. 5. *Kitto.*

reaping-machine (rē′ping-ma-shēn′), *n.* A harvesting-machine for grain-crops; a mechanical reaper drawn over a field of standing grain by horses. The reaping-machine is a modified mowing machine or mower, both mower and reaper being harvesters; the two machines are identical in their

Reaping-machine

a, driving-wheel; *b*, pole; *c*, whiffletrees; *d*, driver's seat; *e*, cutter-bar, arranged at front edge of platform *f* and carried by the latter; *g*, supporting wheel for outside extremity of the platform; *h*, tilting-lever, by which the front edge of the platform may be depressed for cutting grain that is lodged; *i*, *i'*, *i''*, *i'''*, rakes; *j*, cam-mechanism for operating rakes; *k*, outside divider, which separates the standing grain; *k'*, inside divider, which separates the cut grain on the ground from that on the platform. The grain as cut falls on the platform, and is formed into gavels by the rakes *i*, *i'*, etc., which move from the front to the rear of the platform after reaching the position shown at *i*.

mechanism for cutting down the standing grain, of which mechanism the essential feature is the reciprocating knife moving within the fingers of a finger-bar. The reaper is distinguished from the mower by the addition of a reel for bending the grain down upon the knives, and by a platform, a raking mechanism, a discharging mechanism or dropper (by which the gavels or sheaves are thrown out of the machine), and a binding mechanism; of these devices any or all may be present in one machine. Reaping-machines are often distinguished according to their attachments: thus, a *dropper* is a reaping-machine that automatically throws out the cut grain at intervals; a *self-raker* or a *self-binder*, sometimes called a *harvester and binder*, is one with a raking or a binding attachment. The discharging mechanism or dropper is a device for causing the platform upon which the grain falls when cut to throw off its load. The raking attachment consists of a series of rakes moving over the platform to gather the grain into gavels and sweep it off upon the ground. The binding attachment consists essentially of an endless-belt elevator for lifting the cut grain, and a pair of curved arms for gathering and compressing it into a bundle and holding it while the binding mechanism proper draws wire or twine around it, twists the wire or loops and knots the twine, cuts the bundle from the wire or twine, and discharges the bound sheaf.

reapman† (rēp′man), *n.* [< ME. *repman*, < AS. **rīpman* (Anglian *hrīpeman*), a harvestman, < *rīp*, harvest, + *man*, man.] A reaper; a harvestman.

Oon daywerk of a goode *repman* may gete
V strik, a febbler for III may swete.
Palladius, Husbondrie (E. E. T. S.), p. 158.

reapparel (rē-ạ-par′el), *v. t.* [< *re-* + *apparel*, *v.* Cf. *reparel*.] To apparel or clothe again or anew.

Then [at the resurrection] we shall all be invested, *re-apparelled*, in our own bodies.
Donne, Devotions, Expostulation, xiv.

reapparition (rē-ap-ạ-rish′ọn), *n.* [< *re-* + *apparition*.] A renewed apparition; a coming again; reappearance. [Rare.]

There would be presented the phenomena of colonies, *reapparitions*, and other faunal dislocations in the vertical and horizontal distribution of fossil remains.
Winchell, World-Life, p. 281.

reappear (rē-ạ-pēr′), *v. i.* [= It. *riapparire*; as *re-* + *appear*. Cf. OF. *rapparoitre*, F. *réapparaître*, reappear.] To appear again or anew; return to sight or apprehension; be seen again, in either the same or a different example.

The law of harmonic sounds *reappears* in the harmonic colors. *Emerson*, Nature, v.

Energy . . . only vanishes to *reappear* under some other form. *W. L. Carpenter*, Energy in Nature, p. 12.

The river that *reappears* at Ombla is an old friend.
E. A. Freeman, Venice, p. 238.

reappearance (rē-ạ-pēr′ạns), *n.* [< *reappear* + *-ance*.] A new appearance; another coming into view or apprehension: as, the *reappearance* of Encke's comet.

reapplication (rē-ap-li-kā′shon), *n.* [< *re-* + *application*.] The act of applying again, or the state of being reapplied.

A readvertency or *reapplication* of mind to ideas that are actually there.
Norris, Reflections on Locke, p. 9. (*Latham.*)

reapply (rē-ạ-plī′), *v. t.* and *i.* [< *re-* + *apply*.] To apply again.

reappoint (rē-ạ-point′), *v. t.* [< *re-* + *appoint*.] To appoint again.

reappointment (rē-ạ-point′ment), *n.* [< *reappoint* + *-ment*.] A renewed appointment.

reapportion (rē-ạ-pōr′shọn), *v. t.* [< *re-* + *apportion*.] To apportion again; make a new apportionment.

reapportionment (rē-ạ-pōr′shọn-ment), *n.* [< *reapportion* + *-ment*.] A renewed apportionment; a new proportional distribution or arrangement: as (in the United States), the *reapportionment* of members of Congress or of Congressional districts under a new census.

reapproach (rē-ạ-prōch′), *v.* [< *re-* + *approach*.] I. *intrans.* To come near again.

II. *trans.* To bring near together again.

We were able to produce a lovely purple, which we can destroy or recompose at pleasure, by severing and *re-approaching* the edges of the two irises.
Boyle, Works, I. 738.

reap-silver† (rēp′sil′vėr), *n.* [ME. *repsilver*; < *reap*, *n.*, + *silver*.] Money paid by feudal serfs or tenants to their lord as a commutation for their services in reaping his crops.

rear[1] (rēr), *v.* [Early mod. E. also *recr*, *rere*, also dial. *rare*; < ME. *reren*, < AS. *rǣran* (= Icel. *reisa* = Goth. *raisjan*), cause to rise, lift up, establish, rouse, elevate, etc.; causative of *risan* (pret. *rās*), rise: see *rise*[1], and cf. *raise*[1], which is from the Icel. form (*reisa*) of the same verb. The change of the orig. medial *s* to *r* occurs also in *were* (pl. of *was*), *car*[1], *iron*, *lorn*, etc.] I. *trans.* 1. To raise, lift, or hoist by or as if by main strength; bring to or place in an elevated position; set or hold up; elevate; bear aloft.

reardorset, *n.* [< ME. *rereders*: see *reredos*.] **1.** An open fireplace against the rear wall of a room, without a chimney, the smoke rising and escaping through the louver.

In their [the old men's] yoong dales there were not aboue two or three [chimneys], if so manie, in most vplandish townes of the realme (the religious houses, manour places of their lords, alwales excepted, and peraduenture some great personages), but eeh one made his fire against a *rereborse* in the hall, where he dined and dressed his meat.
Harrison, Descrip. of Eng., ii. 12. (*Holinshed*.)

Also, you shall inquire of all armorers and other artificers using to work in mettal, which have or use any *reardorses*, or any other places dangerous or perillous for fire.
Calthrop's Reports (1670). (*Nares*.)

2. A piece of armor for the back.

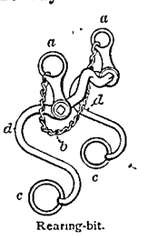
Ane hole brest-plate, with a *rere-dors*
Behynde shet, or elles on the syde.
Clariodes, MS. (*Halliwell*.)

rear-eggt, *n.* An underdone egg. See *rear*[2], *a.*

rearer (rēr'ėr), *n.* **1.** One who rears or raises; one who brings up.

Pholoë, . . . the *rearer* of the steed.
Lewis, tr. of Statius's Thebaid, x.

2. A rearing horse, ass, or mule; an animal that has a habit of rearing.—**3.** In *coal-mining*, a seam of coal having an inclination of more than thirty degrees.



rear-guard (rēr'gärd), *n.* [Early mod. E. *rereguarde*, for **areregarde*, < OF. **ariere-garde*, *arriere-garde*, F. *arrièregarde*, rear-guard; as *rear*[3] + *guard*, *n.* Cf. *rearward*.] Part of an army detached during a march for the protection of the rear, especially in retreating when the attacks of a pursuing enemy are feared.

We can nat se aboute vs, nor haue knoledge of your *reregarde* nor vowarde.
Berners, tr. of Froissart's Chron., II. cxiii.

reargue (rē-är'gū), *v. t.* [< *re-* + *argue*.] To argue over again.

reargument (rē-är'gū-ment), *n.* [< *re-* + *argument*.] A renewed argumentation, as of a case in court; a new arguing or pleading upon the same matter.

rearhorse (rēr'hôrs), *n.* A gressorial and raptorial orthopterous insect of the family *Mantidæ*; a praying-mantis, camel-insect, or devil's coach-horse: so called from the way in which it rears upon its hind legs.

Rearing-bit.

The common rearhorse of the United States is *Phasmomantis carolina*. See *Empusa*, and cut under *mantis*.

rearing-bit (rēr'ing-bit), *n.* A bit intended to prevent a horse from lifting his head when rearing. In the accompanying cut, *a*, *a* are rings for check-straps, to which also the chain *b* is attached, in use passing under the horse's lower jaw; *c*, *c* are rings for attachment of curb-reins. The side-pieces, *d*, *d* act as levers when the reins are pulled, and force open the horse's jaw, the curved part of the bit pressing forward and downward upon the tongue of the animal, thus causing him pain when he attempts to rear.

rearing-box (rēr'ing-boks), *n.* In *fish-culture*, a fish-breeder.

rearly (rēr'li), *adv.* [< *rear*[5] + *-ly*[2].] Early. [Prov. Eng.]

Jailer's Brother. I'll bring it to-morrow.
Jailer's Daughter. Do, very *rearly*, I must be abroad else, To call the maids.
Fletcher (*and another*), Two Noble Kinsmen, iv. 1.

rearmost (rēr'mōst), *a. superl.* [< *rear*[3] + *-most*.] Furthest in the rear; last of all.

The rest pursue their course before the wind,
These of the *rear-most* only left behind.
Rowe, tr. of Lucan's Pharsalia, iii.

rearmouse, *n.* See *reremouse*.

rearrange (rē-a-rānj'), *v. t.* [< *re-* + *arrange*.] To arrange anew; make a different arrangement of.

rearrangement (rē-a-rānj'ment), *n.* [< *rearrange* + *-ment*.] A new or different arrangement.

rear-roastedt (rēr'rōs'ted), *a.* Partly roasted. Compare *rear*[2].

There we complaine of one *reare-roasted* chick,
Here meat worse cookt nere makes us sick.
Sir J. Harington, Epigrams, iv. 6. (*Nares*.)

reart (rērt), *v. t.* [A corruption of *reet*, a dial. var. of *right*, *v.*] To right or mend. *Halliwell*. [Local, Eng.]

rearward[1]† (rēr'wârd), *n.* [Early mod. E. *rereward*; < ME. *rerewarde*, short for *arere-warde*, < OF. *arere-warde*, < *arere*, back, + *ward*, *garde*, ward, guard: see *arrear*[2] and *ward*. Cf. doublet *rear-guard*.] **1.** A rear-guard; a body or force guarding the rear.

The standard of the camp of the children of Dan set forward, which was the *rereward* [*rearward*, R. V.] of all the camps. Num. x. 25.

The God of Israel will be your *rereward* [*rearward*, R. V.]. Isa. lii. 12.

Because . . . it was bootlesse for them [the Turks] to assaile the forefront of our battell, . . . they determined to set vpon our *rereward*. *Hakluyt's Voyages*, II. 20.

Hence—**2.** Any company or body of persons bringing up the rear; the rear.

He . . . speaks to the tune of a country lady, that comes over in the *rearward* or train of a fashion.
B. Jonson, Cynthia's Revels, iv. 1.

rearward[2] (rēr'wȧrd), *adv.* [< *rear*[3] + *-ward*.] At or to the rear; toward the hinder part; backward from anything.

Rearward extended the curtain of mountains, back to the Wolkenburg. *Longfellow*, Hyperion, i. 1.

rearward[2] (rēr'wȧrd), *a.* and *n.* [< *rearward*[2], *adv.*] **I.** *a.* Situated at or toward the rear; being or coming last.

II. *n.* Place or position at the rear; the part that comes last; rear; end; conclusion; wind-up.

'A came ever in the *rearward* of the fashion.
Shak., 2 Hen. IV., iii. 2. 339.

rearwardly (rēr'wärd-li), *adv.* In a rearward direction; toward the rear; rearward. [Objectionable.]

Having a handle . . . extending *rearwardly* beyond the suction tube. *The Engineer*, LXV. 374.

reascend (rē-a-send'), *v. i.* and *t.* [< *re-* + *ascend.*] To ascend, mount, or climb again.

Taught by the heavenly Muse to venture down
The dark descent, and up to *reascend*.
Milton, P. L., iii. 20.

He mounts aloft and *reascends* the skies. *Addison.*

reascension (rē-a-sen'shon), *n.* [< *re-* + *ascension.*] The act of reascending; a remounting.

reascent (rē-a-sent'), *n.* [< *re-* + *ascent.*] A rise of ground following a descent.

Hence the declivity is sharp and short,
And such the *reascent*. *Cowper*, Task, i. 327.

reason[1] (rē'zn), *n.* [< ME. *reson, resun, resoun, raisoun, reisun*, < OF. *reson, resoun, reison, reasoun, reason, raison, raisoun, raisun*, F. *raison*, F. dial. *roison* = Pr. *razo, raxio* = Cat. *raho* = Sp. *razon* = Pg. *razão* = It. *ragione*, < L. *ratio*(*n*-), reckoning, list, register, sum, affair, relation, regard, course, method, etc., also the faculty of reckoning, or of mental action, reason, etc., < *reri*, pp. *ratus*, think: see *rate*[2]. *Reason*[1] is a doublet of *ratio* and *ration*.] **1.** An idea acting as a cause to create or confirm a belief, or to induce a voluntary action; a judgment or belief going to determine a given belief or line of conduct. A premise producing a conclusion is said to be the *reason* of that conclusion; a perceived fact or reflection leading to a certain line of conduct is said to be a *reason* for that conduct; a cognition giving rise to an emotion or other state of mind is said to be a *reason* of or for that state of mind

And be ready always to give an answer to every man that asketh you a *reason* of the hope that is in you.
1 Pet. iii 15.

Give you a *reason* on compulsion! If *reasons* were as plentiful as blackberries, I would give no man a *reason* upon compulsion. *Shak.*, 1 Hen. IV., ii. 4. 264.

2. A fact, known or supposed, from which another fact follows logically, as in consequence of some known law of nature or the general course of things; an explanation.

No sooner sighed but they asked one another the *reason;* no sooner knew the *reason* but they sought the remedy.
Shak., As you Like it, v. 2. 39.

Not even the tenderest heart, and next our own,
Knows half the *reasons* why we smile or sigh.
Keble, Christian Year, 24th Sunday after Trinity.

3. An intellectual faculty, or such faculties collectively. (*a*) The intellectual faculties collectively. (*b*) That kind and degree of intelligence which distinguishes man from the brutes.

And at the end of the days I Nebuchadnezzar lifted up mine eyes unto heaven, and mine understanding returned unto me, and I blessed the most High. . . . At the same time my *reason* returned unto me. Dan. iv. 36.

O judgement! thou art fled to brutish beasts,
And men have lost their *reason*.
Shak., J. C., iii. 2. 110.

For smiles from *reason* flow,
To brute denied. *Milton*, P. L., ix. 239.

(*c*) The logical faculties generally, including all that is subservient to distinguishing truth and falsehood except sense, imagination, and memory on the one hand, and the faculty of intuitively perceiving first principles, and other lofty faculties, on the other.

The knowledge which respecteth the Faculties of the Mind of man is of two kinds: the one respecting his Understanding and *Reason*, and the other his Will, Appetite, and Affection; whereof the former produceth Position or Decree, the later Action or Execution. . . . The end of Logic is to teach a form of argument to secure *reason* and not to entrap it; the end of Morality is to procure the affections to obey *reason*, and not to invade it; the end of Rhetoric is to fill the imagination to second *reason*, and not to oppress it. *Bacon*, Advancement of Learning, ii.

But God left free the will; for what obeys
Reason is free, and *reason* he made right,
But bid her well be ware, and still erect;
Lest by some fair-appearing good surprised,
She dictate false, and misinform the will
To do what God expressly hath forbid.
Milton, P. L., ix. 352.

We may in *reason* discover these four degrees: the first and highest is the discovering and finding out of proofs; the second the regular and methodical disposition of them, and laying them in a clear and fit order, to make their connection and force be plainly and easily perceived; the third is the perceiving of their connection; and the fourth is a making a right conclusion.
Locke, Human Understanding, iv. 17, § 3.

(*d*) The faculty of drawing conclusions or inferences, or of reasoning.

When she rates things, and moves from ground to ground,
The name of *reason* she obtains by this;
But when by *reason* she the truth hath found,
And standeth fix'd, she understanding is.
Sir J. Davies, Immortal of Soul, § 25.

The Latins called accounts of money rationes, and accounting ratiocinatio; and that which we in books of accounts call items they call nomina, that is, names; and thence it seems to proceed that they extended the word ratio to the faculty of reckoning in all other things. The Greeks have but one word, λόγος, for both speech and *reason;* not that they thought there was no speech without *reason*, but no reasoning without speech. . . . Out of all which we may define, that is to say determine, what that is which is meant by this word *reason*, when we reckon it amongst the faculties of the mind. For *reason*, in this sense, is nothing but reckoning.
Hobbes, Leviathan, i. 4.

(*e*) The faculty by which we attain the knowledge of first principles; a faculty for apprehending the unconditioned.

Some moral and philosophical truths there are so evident in themselves that it would be easier to imagine half mankind run mad, and joined precisely in the same species of folly, than to admit anything as truth which should be advanced against such natural knowledge, fundamental *reason*, and common sense. *Shaftesbury.*

Reason is the faculty which supplies the principles of knowledge a priori.
Kant, Critique of Pure Reason, tr. by Muller, p. 11.

4. Intelligence considered as having universal validity or a catholic character, so that it is not something that belongs to any person, but is something partaken of, a sort of light in which every mind must perceive.—**5.** That which recommends itself to enlightened intelligence; some inward intimation for which great respect is felt and which is supposed to be common to the mass of mankind; reasonable measure; moderation; right; what mature and cool reflection, taking into account the highest considerations, pronounces for, as opposed to the prompting of passion.

You shall find me reasonable; if it be so, I shall do that that is *reason*. *Shak.*, M. W. of W., i. 1. 218.

Reason is the life of the law; nay, the common law itself is nothing else but *reason*. *Sir E. Coke*, Institutes.

To subdue
By force who *reason* for their law refuse,
Right *reason* for their law, and for their King
Messiah, who by right of merit reigns.
Milton, P. L., vi. 41.

Many are of opinion that the most probable way of bringing France to *reason* would be by the making an attempt upon the Spanish West Indies.
Addison, Present State of the War.

6. A reasonable thing; a rational thing to do; an idea or a statement conformable to common sense.

And telle he moste his tale as was *resoun*,
By forward and by composicioun,
As ye han herd.
Chaucer, Prol. to Knight's Tale (ed. Morris), l. 847.

It is not *reason* that we should leave the word of God and serve tables. Acts vi. 2.

Men cannot retire when they would, neither will they when it were *reason*. *Bacon*, Great Place.

7. The exercise of reason; reasoning; right reasoning; argumentation; discussion.

Your *reasons* at dinner have been sharp and sententious.
Shak., L. L. L., v. 1. 2.

I follow'd her; she what was honour knew,
And with obsequious majesty approved
My pleaded *reason*. *Milton*, P. L., viii. 510.

8. The intelligible essence of a thing or species; the quiddity.

That other opinion, that asserts that the abstract and universal rationes, *reasons*, of things, as distinct from phantasms, are nothing else but mere names without any signification, is so ridiculously false that it deserves no confutation at all.
Cudworth, Eternal and Immutable Morality, iv. 1.

9. In *logic*, the premise or premises of an argument, especially the minor premise.

A premiss placed after its conclusion is called the *Reason* of it, and is introduced by one of those conjunctions which are called causal: viz., "since," "because," &c.
Whately, Logic, I § 2.

By reason†. (*a*) For the reason that; because.

'Tis not unusual in the Assembly to revoke their Votes, *by reason* they make so much hast.
Selden, Table-Talk, p. 108.

(*b*) By right or justice; properly; justly.

And, as my body and my beste ougte to be my liegis,
So rithfully *be reson* my rede shulde also.
Richard the Redeless, Prol.

By reason of, on account of; for the cause of.

And *by reson of* gentill fader ought come gentill issue.
Merlin (E. E. T. S.), iii. 660.

The days of our years are threescore years and ten; and if *by reason of* strength they be fourscore years, yet is their strength labour and sorrow. Ps. xc. 10.

Mr. Bradford and Mr. Collier of Plimouth came to Boston, having appointed a meeting here the week before, but *by reason of* foul weather were driven back.
Winthrop, Hist. New England, I. 166.

The Parliament is adjourned to Oxford, *by reason of* the Sickness which increaseth exceedingly.
Howell, Letters, I. iv. 20.

I cannot go so fast as I would, *by reason of* this burden that is on my back. *Bunyan*, Pilgrim's Progress, p. 89.

We elected a president, as many of the ancients did their kings, *by reason of* his height.
Addison, Spectator, No. 108.

Discourse of reason, the operation or faculty of reasoning, or the conscious and voluntary use of beliefs already had to determine others.

O God! a beast, that wants *discourse of reason*,
Would have mourn'd longer. *Shak.*, Hamlet, i. 2. 150.

Discursive reason, reason in the sense 3 (*d*); the dianoetic faculty, or faculty of drawing conclusions and inferences. Compare *intuitive reason*, below.

Whence the soul
Reason receives, and *reason* is her being,
Discursive or *intuitive;* discourse
Is oftest yours, the latter most is ours,
Differing but in degree, of kind the same.
Milton, P. L., v. 487.

Diversity of reason†. See *diversity.*—**Ens of reason.** See *ens.*—**False reason**, an inconclusive reason.—**Feast of reason.** (*a*) Delightful intellectual discourse.

There St. John mingles with my friendly bowl
The *feast of reason* and the flow of soul.
Pope, Imit. of Horace, II. i. 128.

(*b*) [*caps.*] In *French hist.*, an act of worship of human reason, represented by a woman as the goddess of Reason, performed on November 10th, 1793, in the cathedral of Notre Dame, and also in other churches (renamed temples of Reason) in France on that and succeeding days. The worship of Reason was designed to take the place of the suppressed Christian worship; recognition of the Supreme Being was restored through the influence of Robespierre.—**Generative reason.** See *generative.*—**In reason.** (*a*) In the view or estimation of reason; reasonably; justly; properly.

His unjust unkindness, that *in* all *reason* should have quenched her love. *Shak.*, M. for M., iii. 1. 250.

The Oath which binds him to performance of his ought *in reason* to contain the summ of what his chief trust and Office is. *Milton*, Eikonoklastes, vi.

(*b*) Agreeable to reason; reasonable; just; proper: as, I will do anything *in reason.*—**Intuitive reason**, reason in the sense 3 (*e*); the noetic faculty, or sense of primal truth. See quotation under *discursive reason.*—**Logical reason**, discursive reason.—**Objective reason.** See *objective.*—**Out of reason**, without or beyond reason; devoid of cause or warrant.

If we desyre no redresse of dedis before,
We may boldly vs byld with bostis *out of Reason*.
Destruction of Troy (E. E. T. S.), l. 2222.

Practical reason. See *practical.*—**Principle of sufficient reason**, the proposition that nothing happens without a good and sufficient reason why it should be as it is and not otherwise. This doctrine denies, first, that anything happens by chance or spontaneity, and, second, that anything happens by irrational and brute force. It is inextricably bound up with the principle of the identity of indiscernibles. It requires that there should be a general reason why the constants of nature should have the precise values they have. It is in conflict with every form of nominalism, teaching that general reasons are not only real, but that they exclusively govern phenomena; and it appears to lead logically to an idealism of a Platonic type. It is not the mere statement that everything has a cause, but that those causes act according to general and rational principles, without any element of blind compulsion. The principle was first enunciated by Leibnitz in 1710, and has met with extraordinary favor, the more so as it has often been misunderstood.—**Pure reason**, reason strictly a priori; reason quite independent of experience. See *pure*, 8.

Reason is *pure* if in reasoning we admit only definitions and propositions known a priori.
Baumeister, Philosophia Definitiva (trans.), 2d ed., 1738, [§ 823.

Pure reason is that faculty which supplies the principles of knowing anything entirely a priori.
Kant, Critique of Pure Reason, tr. by Muller, p. 11.

Ratiocinant reason. (*a*) A reason or cause as it exists in the mind: opposed to *ratiocinate reason.*

I have not asked this question without cause causing, and *reason* truly very *ratiocinant.*
Urquhart, Rabelais, III. vi. (*Davies.*)

(*b*) The human understanding; the discursive reason.—**Ratiocinate reason**, a reason as an element of the quiddity of things, according to the Aristotelian conception: opposed to *ratiocinant reason.*—**Reason of state**, a political motive for a public act which cannot be accounted for publicly; a concealed ground of action by a government or a public officer in some matter concerning the state's welfare or safety, or the maintenance of a policy.—**Relation of reason.** See *relation.*—**Right reason**, reason in sense 5, above.—**Rime nor reason.** See *rime*[1].—**Speculative reason**, reason employed about supersensuous things.—**Subjective reason**, reason which is determined by the subject or agent.—**Sufficient reason.** See *principle of sufficient reason*, above.—**Theoretical reason**, reason as productive of cognition.—**There is no reason but**, there is no reason why not; it is inevitable; it cannot be helped.

There is no reason but I shall be blind.
Shak., T. G. of V., ii. 4. 212.

To do one reason†. (*a*) To do what is desired, or what one desires; act so as to give satisfaction.

Lord Titus, by your leave, this maid is mine.
. . . [I am] resolved withal
To do myself this *reason* and this right.
Shak., Tit. And., i. 1. 279.

Strike home, and *do me reason* in thy heart. *Dryden.*

(*b*) See *do*[1].—**To have reason**, to have reason or right on one's side; be in the right. [A Gallicism.]

Mr. Mechlin *has reason.* *Foote*, Commissary, iii. 1.

To hear reason, to yield to reasoning or argument; accept a reason or reasons adduced; act according to advice.

Con. You should *hear reason.*
D. John. . . . What blessing brings it?
Con. If not a present remedy, at least a patient sufferance. *Shak.*, Much Ado, i. 3. 6.

To stand to reason. See *stand.*—**Syn. 1.** *Inducement*, etc. (see *motive*), account, object, purpose, design.

reason[1] (rē'zn), *v.* [< ME. *resonen*, < OF. *raisoner, raisonner, raisnier*, reason, argue, discourse,

speak, F. *raisonner*, reason, argue, reply, = Pr. *razonar*, *rasonar* = Cat. *rahonar* = Sp. *razonar* = Pg. *razoar* = It. *ragionare*, reason, < ML. *rationare*, reason, argue, discourse, speak, calculate, < L. *ratio*(*n*-), reason, calculation: see *reason*[1], *n.* Cf. *areason*.] **I.** *intrans.* **1.** To exercise the faculty of reason; make rational deductions; think or choose rationally; use intelligent discrimination.

> He [the serpent] hath eaten and lives,
> And knows, and speaks, and *reasons*, and discerns,
> Irrational till then. *Milton*, P. L., ix. 765.

We only *reason* in so far as we note the resemblances among objects and events.
J. Sully, Outlines of Psychol., p. 415.

2. To practise reasoning in regard to something; make deductions from premises; engage in discussion; argue, or hold arguments.

> Let us dispute again,
> And *reason* of divine Astrology
> *Marlowe*, Doctor Faustus, ii. 2.

Come now, and let us *reason* together, saith the Lord. Isa. i. 18.

3†. To hold account; make a reckoning; reckon.

> Since the affairs of men rest still incertain,
> Let 's *reason* with the worst that may befall.
> *Shak.*, J. C., v 1. 97.

4. To hold discourse; talk; parley.

They *reasoned* among themselves, saying, This is the heir: come, let us kill him. Luke xx. 14.

> But *reason* with the fellow,
> Before you punish him. *Shak.*, Cor., iv. 6. 51.

II. *trans.* **1.** To reason about; consider or discuss argumentatively; argue; debate.

Why *reason* ye these things in your hearts? Mark ii 8.

Condescends, even, to *reason* this point. *Brougham.*

2. To give reasons for; support by argument; make a plea for: often with *out*: as, to *reason out* a proposition or a claim.

> This boy, that cannot tell what he would have,
> But kneels and holds up hands for fellowship,
> Does *reason* our petition with more strength
> Than thou hast to deny 't. *Shak.*, Cor., v. 3. 176.

3. To persuade by reasoning or argument.

Men that will not be *reasoned* into their senses may yet be laughed or drolled into them. *Sir R. L'Estrange.*

4†. To hold argument with; engage in speech or discussion; talk with; interrogate.

reason[2]†, *n.* An obsolete spelling of *raisin*[1]. In the following passage it is apparently applied to some other fruit than the grape.

> A medlar and a hartichoke,
> A crab and a small *reason*.
> *Cotgrave*, Wits Interpreter (1671), p. 219. (*Nares*)

reasonable (rē′zn-a-bl), *a.* [< ME. *resonable*, *resunable*, *resuabyl*, *resnable*, *renable*, *runnable*, < OF. *resonable*, *raisonnable*, *regnable*, *resnable*, *rationable*, F. *raisonnable* = Pr. *razonable* = Cat. *rahonable* = Sp. *razonable* = Pg. *razoavel* = It. *razionabile*, < L. *rationabilis*, reasonable, < *ratio*(*n*-), reason, calculation: see *reason*[1] and *-able*.] **1.** Having the faculty of reason; endowed with reason; rational, as opposed to *brute*.

If he have wit enough to keep himself warm, let him bear it for a difference between himself and his horse, for it 's all the wealth that he hath left, to be known a *reasonable* creature. *Shak.*, Much Ado, i. 1 71

2. Characterized by the use of reason; amenable to reason or sound sense; not senseless, foolish, or extravagant in thought or action.

> Hir maners might no man amend;
> Of tong she was trew and *renable*,
> And of hir semblant soft and stabile.
> *Vicaire and Gawaine* (Ritson's Metr. Rom., I. 10), l. 208.
> [(*Piers Plowman*, Notes, p. 17.)

The adjective *reasonable* . . . denotes a character in which reason (taking it in its largest acceptation) possesses a decided ascendant over the temper and passions; and implies no particular propensity to a display of the discursive power, if indeed it does not exclude the idea of such a propensity. *D. Stewart*, Human Mind, ii. 10, note.

3. Conformable to or required by reason; due to or resulting from good judgment; rationally sound, sensible, natural, etc.

> Ther doth no wyghte nothing so *resonable*
> That nys harme in her [jealousy's] ymagynynge.
> *Chaucer*, Complaint of Venus, l. 35.

I beseech you . . . present your bodies a living sacrifice, holy, acceptable unto God, which is your *reasonable* service. Rom. xii. 1.

A law may be *reasonable* in itself, though a man does not allow it. *Swift.*

The terrors of the child are quite *reasonable*, and add to his loveliness. *Emerson*, Courage.

4. Not exceeding the bounds of reason or common sense; moderate; tolerable.

I will marry her upon any *reasonable* demands.
Shak., M. W. of W., i. 1. 233.

5. Moderate in amount or price; not high or dear: as, *reasonable* charges or prices; *reasonable* goods.—**6.** In *law*, befitting a person of reason or sound sense; such as a prudent man would exercise or act upon in his own affairs: as, *reasonable* care; *reasonable* diligence; *reasonable* cause.—**7**†. Calculable; computable; hence, detailed; itemized.

> And rekene byfore reson a *resonable* acounte,
> What one hath, what another hath, and what hy hadde bothe. *Piers Plowman* (C), xiv. 35.

8†. Talkative; ready in conversation.

> Lo! how goodly spak this knight . . .
> I . . . gan me aqueynte
> With him, and fond him so tretable,
> Right wonder skilful and *resonable*.
> *Chaucer*, Death of Blanche, l 534.

Proof beyond a reasonable doubt, such proof as will produce an abiding conviction to a moral certainty, so that a prudent man would feel safe to act upon that conviction in matters of the highest concern to his personal interests.—**Reasonable aid**, a euphemistic expression for *aid*[1], 3, corresponding to the term *benevolence* as used for forced loans or gifts.—**Reasonable alms**. See *alms*.—**Reasonable doubt**, in *law*, doubt for which a pertinent reason can be assigned; that state of a case which, after the entire comparison and consideration of the evidence, leaves the minds of jurors in that condition that they cannot say they feel an abiding conviction, to a moral certainty, of the truth of the charge. *Shaw, C. J.*—**Reasonable dower**. See *dower*[2], 2.=**Syn.** *Rational*, *Reasonable*. See *rational*.

reasonable† (rē′zn-a-bl), *adv.* [< *reasonable*, *a.*] Reasonably.

I have a *reasonable* good ear in music. Let 's have the tongs and the bones. *Shak.*, M. N. D., iv. 1. 31.

The Library of the Sorbonne is a very long and large Gallery, *reasonable* well stored with Books.
Lister, Journey to Paris, p. 128.

reasonableness (rē′zn-a-bl-nes), *n.* The character of being reasonable; conformity to or compliance with the requirements of reason; agreeableness to rational ideas or principles.

The method of inwardness and the secret of self renouncement, working in and through this element of mildness, produced the total impression of his [Jesus's] "epieikeia," or sweet *reasonableness*.
M. Arnold, Literature and Dogma, vii. § 5.

reasonably (rē′zn-a-bli), *adv.* [ME. *resonably*, *renably*; < *reasonable* + *-ly*[2].] **1.** In a reasonable manner; agreeably to reason; with good sense or judgment.

> And spoke as *renably* and faire and wel
> As to the Phitonissa did Samuel.
> *Chaucer*, Friar's Tale, l 211.

The abuse of the judicial functions that were properly and *reasonably* assumed by the House was scandalous and notorious. *Lecky*, Eng. in 18th Cent., iii.

2. Within the bounds of reason; with good reason or cause; justly; properly.

> Whate'er Lord Harry Percy then had said . . .
> May *reasonably* die. *Shak.*, 1 Hen. IV., i. 3. 74.

It might seem that an egg which has succeeded in being fresh has done all that can *reasonably* be expected of it.
H. James, Jr., Little Tour, p. 218.

3. To a reasonable extent; in a moderately good degree; fairly; tolerably.

> Verely she was heled, and left her stiltes thore,
> And on her fete wente home *resonably* well.
> *Joseph of Arimathie* (E. E. T. S.), p. 47.

As a general rule, Providence seldom vouchsafes to mortals any more than just that degree of encouragement which suffices to keep them at a *reasonably* full exertion of their powers. *Hawthorne*, Seven Gables, iii.

reasoned (rē′znd), *p. a.* Characterized by or based upon reasoning; following a logical or rational method; carefully argued or studied.

reasoner (rē′zn-ėr), *n.* [< *reason*[1] + *-er*[1]. Cf. F. *raisonneur* = Pr. *razonador* = Sp. *razonador* = Pg. *raciocinador* = It. *ragionatore*, < ML. *rationator*, a reasoner, < *rationare*, reason: see *reason*[1], *v.*] One who reasons or argues, or exercises his reasoning powers; one who considers a subject argumentatively.

They are very bad *reasoners*, and vehemently given to opposition. *Swift*, Gulliver's Travels, iii. 2.

reasonfully† (rē′zn-fůl-i), *adv.* [ME., < *reason*[1] + *-ful* + *-ly*[2].] With full reason; most reasonably.

So then *reasonfulli* maye we sey that mercy both right and lawe passeth. *Testament of Love*, iii.

reasoning (rē′zn-ing), *n.* [Verbal n. of *reason*[1], *v.*] **1.** The use of the faculty of reason; discriminative thought or discussion in regard to a subject; rational consideration.—**2.** A presentation of reasons or arguments; an argumentative statement or expression; a formal discussion.

Hear now my *reasoning*, and hearken. Job xiii. 6.

3†. Discussion; conversation; discourse.

Then there arose a *reasoning* among them, which of them should be greatest. Luke ix. 46.

Chain of reasoning. See *chain*.—**Deductive, diagrammatic, dilemmatic, Fermatian reasoning.** See the adjectives.=**Syn.** *Reasoning*, *Argumentation*. *Reasoning* is much broader than *argumentation*. The latter is confined to one side of the question, or, in another sense, supposes a proposition, supported by arguments on the affirmative side and attacked by arguments on the negative. *Reasoning* may be upon one side of a proposition, and is then the same as *argumentation*; but it may also be the method by which one reaches a belief, and thus a way of putting together the results of investigation: as, the *reasoning* in Euclid, or in Butler's Analogy; the *reasoning* by which a thief justifies himself in stealing.

A piece of *reasoning* is like a suspended chain, in which link is joined to link by logical dependence.
J. F. Clarke, Self-Culture, p. 158.

A poem does not admit *argumentation*, though it does admit development of thought. *Coleridge*, Table-Talk.

reasonless (rē′zn-les), *a.* [< *reason*[1] + *-less*.] **1.** Lacking the faculty of reason; irrational, as an animal. [Rare.]

The *reasonless* creatures [the two kine] also do the will of their maker.
Bp. Hall, Contemplations (ed. Tegg, 1836), II. 144.

2. Deficient in reason or judgment; lacking in good sense; unreasoning. [Archaic.]

When any of them [animals] dieth, it is . . . buried in a holy place, the *reasonlesse* men howling and knocking their breasts in the exequies of these unreasonable beasts.
Purchas, Pilgrimage, p. 574.

3. Not marked or justified by reason; senseless; causeless; unwarranted.

> This proffer is absurd and *reasonless*.
> *Shak.*, 1 Hen. VI., v. 4. 137.

reason-piece (rē′zn-pēs), *n.* [A corruption of *raising-piece*.] In *building*, a timber lying under the ends of beams in the side of a house; a wall-plate.

> Let me fore-warn'd each sign, each system learn,
> That I my people's danger may discern,
> Ere 'tis too late wish'd health to *reassure*.
> *Churchill*, Gotham, iii.

But let me often to these solitudes
Retire, and in thy presence *reassure*
My feeble virtue. *Bryant*, Forest Hymn.

2. To give renewed assurance to; free from doubt or apprehension; restore to confidence.

They rose with fear, and left the unfinished feast,
Till dauntless Pallas *re-assured* the rest.
Dryden, Æneid, viii. 146.

3. Same as *reinsure*.

reassurer (rē-a-shör'ėr), *n.* One who reassures, or assures or insures anew.

reassuringly (rē-a-shör'ing-li), *adv.* In a reassuring manner; so as to reassure.

E. also *rebecke;* < ME. *rebecke, rebekke, rebekc,* < OF. *rebec, rebekc,* F. *rebec* = Pg. *rabeca* = It. *ribeca, ribecca* (ML. *rebeca, rebecca*); also with diff. terminations, (*b*) F. dial. *rebay* = Pr. *rabey;* (*c*) Sp. *rabel* = Pg. *rabil, arrabil;* (*d*) ME. *rebibe, ribibe, rubibe, ribible,* < OF. *rebebe, rebeshe, reberbe,* It. *ribeba, ribebla,* < Ar. *rabāba* = Hind. *rabāb, rubāb,* Pers. *rabāb, rubāb,* a rebec, a fiddle with one or two strings.] 1. A musical instrument, the earliest known form of the viol class. It had a pear-shaped body, which was solid above, terminating in a slender neck and a carved head, and hollow below, with sound-holes and a sound-post. The number of strings was usually three, but was sometimes only one or two. They were tuned in fifths, and sounded by a bow. The tone was harsh and loud. The rebec is known to have been in use in Europe as early as the eighth century. Its origin is disputed, but is usually attributed to the Moors of Spain. It was the precursor of the true viol in all its forms, and continued in vulgar use long after the latter was artistically established.

When the merry bells ring round,
And the jocund *rebecks* sound
To many a youth, and many a maid.
Milton, L'Allegro, l. 94.

2†. An old woman: so called in contempt. Compare *ribibe*, 2.

rebus (rē′bus), *n.* [< OF. *rebus*, F. *rebus*, a rebus; derived, according to Ménage, from satirical pieces which the clerics of Picardy composed at the annual carnival, and which, as they referred to current topics, follies, etc., were entitled *de rebus quæ geruntur*, 'of things which are going on'; otherwise explained as words represented 'by things'; < L. *rebus*, abl. pl. of *res*, a thing, an object: see *real*[1].] 1. A puzzle or riddle consisting of words or phrases represented by figures or pictures of objects whose names resemble in sound those words or phrases or the syllables of which they are composed; an enigmatical representation of words by means of figures or pictures suggestive of them.—2. In *her.*: (*a*) A bearing or

succession of bearings which make up the name or a word expressing the profession or office of the bearer. The origin of many bearings in early heraldry is such an allusion; and on the other hand many proper names have been derived from the bearings, these having been granted originally to persons having a name or territorial designation which a descendant, perhaps of a younger branch, abandoned for the allusive surname suggested by the bearing: thus, in the case of the name *Tremain*, and the bearing of three human hands, either the bearing or the name may have originated the other. Also called *allusive arms*.

Rebus of Bishop Oldham ("owldom"), Exeter Cathedral

Excellent have been the conceipt[s] of some citizens, who, wanting armes, have coined themselves certaine devices as neere as may be alluding to their names, which we call *rebus*.

H. Peacham, The Gentleman's Exercise (1634), p. 155. [(*Skeat.*)

E. *rebutte*; < OF. *rebouter*, repulse, drive back, reject, F. *rebouter*, also *rebuter* = Pr. *rebotar* = It. *ributtare*, repulse, reject; as *re-* + *butt*[2].] I. *trans.* 1†. To repel by force; rebuff; drive back.

He . . . rusht upon him with outragious pryde;
Who him rencountring fierce, as hauke in flight,
Perforce *rebutted* backe. *Spenser*, F. Q., I. xi. 53.

Philosophy lets her light descend and enter wherever there is a passage for it; she takes advantage of the smallest crevice, but the rays are *rebutted* by the smallest obstruction.
Landor, Imaginary Conversations (Epicurus, Leontion, and Ternissa).

2. To thrust back or away, as by denial; refuse assent to; repel; reject.

The compliment my friend *rebutted* as best he could, but the proposition he accepted at once.
Poe, Tales, I. 218.

3. To repel by evidence or argument; bring counter-arguments against; refute, or strive to refute: much used in legal procedure.

Some of them he has objected to; others he has not attempted to *rebut*; and of others he has said nothing.
D. Webster, Speech, Senate, June 27, 1834.

4†. To withdraw: used reflexively.

Themselves . . .
Doe backe *rebutte*, and ech to other yealdeth land.
Spenser, F. Q., I. ii. 15.

II. *intrans.* 1. In *law*, to make an answer, as to a plaintiff's surrejoinder. Compare *surrebut*.

The plaintiff may answer the rejoinder by a sur-rejoinder; upon which the defendant may *rebut*.
Blackstone, Com., III. xx.

2. In *curling*, to make a random stroke with great force, in the hope of gaining some advantage in the striking and displacement of the stones about the tee.

rebuttable (rē-but'a-bl), *a.* [< *rebut* + *-able*.] That may be rebutted.

rebuttal (rē-but'al), *n.* [< *rebut* + *-al*.] 1. The act of rebutting; refutation; confutation; contradiction.

There is generally preserved an amazing consistency in the delusion, in spite of the incessant *rebuttals* of sensation. *Warren*, Diary of a Physician, xiv.

2. In *law*, that part of a trial in which the plaintiff endeavors to meet the defendant's evidence by counter-evidence.

rebutter[1] (rē-but'ėr), *n.* [< *rebut* + *-er*[1].] One who rebuts or refutes. [Rare.]

rebutter[2] (rē-but'ėr), *n.* [< OF. *rebouter*, inf. used as noun: see *rebut*.] An act of rebutting; specifically, in *law*, an answer, such as a defendant makes to a plaintiff's surrejoinder. Compare *surrebutter*.

recadency (rē-kā'den-si), *n.* [< *re-* + *cadency*. Cf. L. *recidere*, fall back: see *recidivous*.] The act of falling back or descending again; relapse. [Rare.]

Defection is apt to render many sincere progressions in the first fervor suspected of unsoundness and *recadency*.
W. Montague, Devoute Essays, Address to the Court.

recalcitrance (rē-kal'si-trans), *n.* [< *recalcitran(t)* + *-ce*.] Refusal of submission; obstinate noncompliance or nonconformity; refractoriness.

recalcitrant (rē-kal'si-trant), *a.* [= F. *récalcitrant* = It. *ricalcitrante*, < L. *recalcitran(t-)s*, < *recalcitrare*, kick back: see *recalcitrate*.] Refusing to submit; exhibiting repugnance or opposition; not submissive or compliant; refractory.

recalcitrate (rē-kal'si-trāt), *v.*; pret. and pp. *recalcitrated*, ppr. *recalcitrating*. [< L. *recalcitratus*, pp. of *recalcitrare* (> OF. *recalcitrer*, F. *récalcitrer* = Sp. Pg. *recalcitrar* = It. *ricalcitrare*), kick back, deny access, < *re-*, back, + *calcitrare*, kick.] I. *intrans.* To show repugnance or resistance to something; refuse submission or compliance; be refractory.

Wherefore *recalcitrate* against that will
From which the end can never be cut off?
Longfellow, tr. of Dante's Inferno, ix. 94.

II. *trans.* To kick against; show repugnance or opposition to. [Rare.]

The more heartily did one disdain his disdain, and *recalcitrate* his tricks. *De Quincey*.

recalcitration (rē-kal-si-trā'shon), *n.* [< *recalcitrate* + *-ion*.] The act of recalcitrating; opposition; repugnance.

Inwardly chuckling that these symptoms of *recalcitration* had not taken place until the fair malecontent was, as he mentally termed it, under his thumb, Archibald coolly replied, "That the hills were none of his making."
Scott, Heart of Mid-Lothian, xii.

recalesce (rē-ka-les'), *v. i.*; pret. and pp. *recalesced*, ppr. *recalescing*. [< L. *re-*, again, + *calescere*, grow hot, inceptive of *calere*, be hot: see *calid*.] To show renewed calescence; resume a state of glowing heat.

recalescence (rē-ka-les'ens), *n.* [< *recalesce* + *-ence*.] Renewed calescence; reglow; specifically, in *physics*, a phenomenon exhibited by iron as it cools gradually from a white heat (point of high incandescence): at certain temperatures, as at 1,000°, the cooling seems to be arrested, and the iron glows more brilliantly for a short time. It has also been found that certain other properties of the metal, magnetic and electrical, undergo a sudden change at these points of recalescence.

recall (rē-kâl'), *v. t.* [< *re-* + *call*[1].] 1. To call back from a distance; summon or cause to return or to be returned; bring back by a call, summons, or demand: as, to *recall* an ambassador or a ship; we cannot *recall* our lost youth.

If Henry were *recall'd* to life again,
These news would cause him once more yield the ghost.
Shak., 1 Hen. VI., i. 1. 66.

At the expiration of six years he was suddenly *recalled* to his native country by the death of his father.
Prescott, Ferd. and Isa., ii. 5.

2. To call back to mind or perception; renew the memory or experience of; bring again, as something formerly experienced.

How soon
Would highth *recall* high thoughts!

I *recall* it, not see it;
Could vision be clearer?
Lowell, Fountain of Youth.

3. To revoke; take back, as something given or parted with; countermand; abrogate; cancel: as, to *recall* a decree or an order; to *recall* an edition of a book.

Passed sentence may not be *recall'd*.
Shak., C. of E., i. 1. 148.

The doore of grace turnes upon smooth hinges wide opening to send out; but soon shutting to *recall* the precious offers of mercy to a nation.
Milton, Church-Government, i. 7.

The Gods themselves cannot *recall* their gifts.
Tennyson, Tithonus.

=Syn. 3. *Recant*, *Abjure*, etc. (see *renounce*); *Repeal*, *Rescind*, etc. (see *abolish*).

recall (rē-kâl'), *n.* [< *recall*, *v.*] 1. A calling back; a summons to return; a demand for reappearance, as of a performer after he has left the stage (usually indicated by long-continued applause): as, the *recall* of an ambassador; the *recall* of an actor.—2. A calling back to mind; the act of summoning up the memory of something; a bringing back from the past.

The *recall*, resuscitation, or reproduction of ideas already formed takes place according to fixed laws, and not at random. *Mind*, XII. 161.

3. Revocation; countermand; retraction; abrogation.

Those indulgent laws
Will not be now vouchsafed; other decrees
Against thee are gone forth without *recall*.
Milton, P. L., v. 885.

'Tis done, and, since 'tis done, 'tis past *recall*.
Dryden, Spanish Friar, iii. 3.

4. A musical call played on a drum, bugle, or trumpet to summon back soldiers to the ranks or to camp.—5. A signal-flag used to recall a boat to a ship.

Delegates *recallable* at pleasure. *Madison*.

The glow of a gorgeous sunset continues to be *recallable* long after faintly coloured scenes of the same date have been forgotten. *H. Spencer*, Prin. of Psychol., § 99.

recallment, recalment (rē-kâl'ment), *n.* [< *recall* + *-ment*.] The act of recalling, or the state of being recalled. [Rare.]

I followed after,
And asked, as a grace, what it all meant?
If she wished not the rash deed's *recallment*?
Browning, The Glove.

recant (rē-kant'), *v.* [< OF. *recanter*, *rechanter*, sing again, = Pr. *rechantar* = Pg. *recantar* = It. *ricantare*, sing again, < L. *recantare*, sing back, reëcho, also sing again, repeat in singing, recant, recall, revoke, charm back or away, < *re-*, back, + *cantare*, sing: see *chant* and *cant*[2].] I. *trans.* 1†. To sing over again; utter repeatedly in song.

They were wont ever after in their wedding songs to *recant* and resound this name—Thalassius.
Holland, tr. of Plutarch, p. 704.

2. To unsay; contradict or withdraw formally (something which one had previously asserted); renounce; disavow; retract: as, to *recant* one's opinion or profession of faith.

Which duke . . . did *recant* his former life.
Fabyan, Chron. (ed. Ellis), II. 712, an. 1553.

We haue another manner of speech much like to the repentant, but doth not as the same *recant* or vnsay a word that hath bene said before.
Puttenham, Arte of Eng. Poesie, p. 189.

He shall do this, or else I do *recant*
The pardon that I late pronounced here.
Shak., M. of V., iv. 1. 391.

=Syn. 2. *Abjure*, *Forswear*, etc. See *renounce*.

II. *intrans.* To revoke a declaration or proposition; unsay what has been said; renounce or disavow an opinion or a dogma formerly maintained; especially, to announce formally one's abandonment of a religious belief.

And many, for offering to maintain these Ceremonies, were either punish'd or forced to *recant*.
Baker, Chronicles, p. 304.

It is against all precedent to burn
One who *recants*; they mean to pardon me.
Tennyson, Queen Mary, iv. 2.

recantation (rē-kan-tā'shon), *n.* [= Sp. *recantacion* = Pg. *recantação* = It. *ricantazione*; < L. as if **recantatio(n-)*, < *recantare*, recant: see *recant*.] The act of recanting; retraction; especially, solemn renunciation or abjuration of a doctrine or religious system previously maintained, with acknowledgment that it is erroneous.

Your lord and master did well to make his *recantation*.
Shak., All's Well, ii. 3. 195.

Cranmer, it is decided by the Council
That you to-day should read your *recantation*
Before the people in St. Mary's Church.
Tennyson, Queen Mary, iv. 2.

recanter (rē-kan'tėr), *n.* One who recants.

The public body, which doth seldom
Play the *recanter*. *Shak.*, T. of A., v. 1. 149.

recapacitate (rē-ka-pas'i-tāt), *v. t.* [< *re-* + *capacitate*.] To qualify again; confer capacity on again. *Bp. Atterbury*, To Bp. Trelawney.

recapitulate (rē-ka-pit'ū-lāt), *v.* [< LL. *recapitulatus*, pp. of *recapitulare* (> It. *ricapitolare* = Sp. Pg. Pr. *recapitular* = F. *récapituler*), go over the main points of a thing again, < L. *re-*, again, + *capitulum*, a head, main part, chapter (> ML. *capitulare*, capitulate): see *capitulate*.] I. *trans.* To repeat, as the principal things mentioned in a preceding discourse, argument, or essay; give a summary of the principal facts, points, or arguments of; mention or relate in brief.

When they met, Temple began by *recapitulating* what had passed at their last interview.
Macaulay, Sir William Temple.

=Syn. *Recapitulate*, *Repeat*, *Recite*, *Rehearse*, *Reiterate*. *Recapitulate* is a precise word, applying to the formal or exact naming of points that have been with some exactness named before: as, it is often well, after an extended argument, to *recapitulate* the heads. In this it differs from *repeat*, *recite*, *rehearse*, which are freer in their use. To *reiterate* is to say a thing a second time or oftener.

II. *intrans.* To repeat in brief what has already been said.

recapitulation (rē-ka-pit-ū-lā'shon), *n.* [< OF. *recapitulacion*, *recapitulation*, F. *récapitulation* = Sp. *recapitulacion* = Pg. *recapitulação* = It. *ricapitulazione*, < LL. *recapitulatio(n-)* (techni-

cal as trans. of Gr. ἀνακεφαλαίωσις, < L. *recapitulare*, recapitulate: see *recapitulate*.] 1. The act or process of recapitulating.

D. Fer. Were e'er two friends engag'd in an adventure So intricate as we, and so capricious?
D. Jul. Sure never in this world; methinks it merits A special *recapitulation*. *Digby*, Elvira, iii.

2. In *rhet.*, a summary or concise statement or enumeration of the principal points or facts in a preceding discourse, argument, or essay. Also *anacephalæosis*, *enumeration*. See *epanodos*.

Such earnest and hastie heaping vp of speaches be made by way of *recapitulation*, which commonly is in the end of euery long tale and Oration, because the speaker seemes to make a collection of all the former materiall points, to binde them as it were in a bundle and lay them forth to enforce the cause. *Puttenham*, Arte of Eng. Poesie, p. 198.

recapitulative (rē-ka-piṭ′ū-lā-tiv), *a.* [< *recapitulate* + *-ive*.] Of or pertaining to recapitulation; resulting from or characterized by recapitulation; giving a summary of the chief parts or points.

It has been shown that these [rudimentary structures] are the last *recapitulative* remnant of an independent series of structures developed outside the spore in the fern. *Nature*, XLI. 316.

recapitulator (rē-ka-piṭ′ū-lā-tor), *n.* [< *recapitulate* + *-or*[1].] One who recapitulates.

recapitulatory (rē-ka-piṭ′ū-lā-tō-ri), *a.* [< *recapitulate* + *-ory*.] Of the nature of or containing recapitulation.

This law is comprehensive and *recapitulatory* (as it were) of the rest concerning our neighbour, prescribing universal justice toward him. *Barrow*, Expos. of the Decalogue.

reception (rē-kap′shọn), *n.* [< *re-* + *caption*.] The act of retaking; reprisal; in *law*, the retaking, without force or violence, of one's own goods, chattels, wife, or children from one who has taken them and wrongfully detains them. Also called *reprisal*.—**Writ of reception**, a writ to recover property taken by a second distress pending a replevin for a former distress for the same rent or service.

recaptor (rē-kap′tor), *n.* [< *re-* + *captor*.] One who recaptures; one who takes a prize which had been previously taken.

recapture (rē-kap′tūr), *n.* [< *re-* + *capture*, *n.*] 1. The act of retaking; particularly, the retaking of a prize or goods from a captor.—2. That which is recaptured; a prize retaken.

recapture (rē-kap′tūr), *v. t.* [< *re-* + *capture*, *v.*] To capture back or again; retake, particularly a prize which had been previously taken.

recarburization (rē-kär″bū-ri-zā′shọn), *n.* [< *recarburize* + *-ation*.] The adding of carbon to take the place of that removed.

recarburize (rē-kär′bū-rīz), *v. t.* [< *re-* + *carburize*.] To restore to (a metal) the carbon previously removed, especially in any metallurgical operation connected with the manufacture of iron or steel.

recarnify (rē-kär′ni-fī), *v. t.* [< *re-* + *carnify*.] To convert again into flesh.

Looking upon them [a herd of kine] quietly grazing up and down, I fell to consider that the Flesh which is daily dish'd upon our Tables is but concocted Grass, which is *recarnified* in our Stomachs and transmuted to another Flesh. *Howell*, Letters, ii. 50.

recarriage (rē-kar′āj), *n.* [< *re-* + *carriage*.] A carrying back or again; repeated carriage.

Another thing there is in our markets worthie to be looked vnto, and that is the *recariage* of graine from the same into lofts and sollars.

recarry (rē-kar′i), *v. t.* [< *re-* + *carry*.] To carry back, as in returning; carry again or in a reversed direction.

When the Turks besieged Malta or Rhodes, . . . pigeons are then related to carry and *recarry* letters.
I. Walton, Complete Angler, i. 1.

recast (rē-kâst′), *v. t.* [< *re-* + *cast*[1].] 1. To throw again.

In the midst of their running race they would cast and *recast* themselves from one to another horse.
Florio, tr. of Montaigne, p. 155.

2. To cast or found again: as, to *recast* cannon.—3. To cast or form anew; remodel; remold: as, to *recast* a poem.

Your men of close application, though taking their terms from the common language, find themselves under a necessity of *recasting* them in a mould of their own.
A. Tucker, Light of Nature, I. i. 6.

Not painlessly doth God *recast*
And mould anew the nation.
Whittier, "Ein Feste Burg ist unser Gott."

4†. To cover anew with plaster: said of an old wall or building.—5. To compute anew; recalculate: as, to *recast* an account.

recast (rē-kâst′), *n.* [< *recast*, *v.*] A fresh molding, arrangement, or modification, as of a work of art, a writing, etc.

The world *receded* from her rising view,
When heaven approach'd as earthly things withdrew.
Crabbe, Works, IV. 186.

2. To withdraw an affirmation, a belief, a demand, or the like; turn back or aside.

It is plain that the more you *recede* from your grounds, the weaker do you conclude.
Bacon, Advancement of Learning, ii. 369.

3. To have a backward inclination, slope, or tendency: as, a *receding* coast-line; a *receding* chin.—**Syn. 1.** To retire, retrograde, give way. See *retreat*[1].

recede[2] (rē-sēd′), *v. t.* [< *re-* + *cede*.] To cede back; grant or yield to a former possessor: as, to *recede* conquered territory.

recedence (rē-sē′dens), *n.* [< *recede*[1] + *-ence*.] Same as *recession*[1]. [Rare.]

The beaded brown kelp deepens to bronze in . . . the wet, rich, pulpy *recedence* of the ebb.
Harper's Mag., LXXII. 94.

receipt (rē-sēt′), *n.* [Formerly also *receit* (the *p* being inserted in imitation of the L. original, and the proper spelling being *receit*, like *conceit*, *deceit*); (*a*) < ME. *receit*, *receyt*, *receite*, receipt, recipe, < AF. *receite*, OF. *recete*, *recepte*, *reçoite*, F. *recette* = Pr. *recepta* = Sp. *receta* = Pg. *receita* = It. *ricetta*, f., receipt, recipe, < ML. *recepta*, f., receipt, recipe, money received, a treasury, a right of pasture, lit. (sc. *res*, a thing) 'a thing received,' fem. of L. *receptus*, pp. of *recipere*, receive; (*b*) in defs. 5 and 6, also *reset* (see *reset*[1]), < ME. *recet*, *reset*, *resset*, *rescet*, *resate*, < OF. *recet*, *receit*, *recept*, *reset*, *reçoit*, *rechet*, *rechiet*, etc., = Sp. *recepto* = It. *ricetto*, m., a retreat, refuge, abode, asylum (see *recheat*), < L. *receptus*, m., a receiving, place of retreat, refuge, < *recipere*, pp. *receptus*, receive: see *receive*. Cf. *reset*[1] and *recheat*, doublets of *receipt*; cf. also *recept*.] 1. A thing received; that which is received by transfer; the amount or quantity of what is received from other hands: as, the *receipts* of cotton at a port.

Three parts of that *receipt* I had for Calais
Disbursed I duly to his highness' soldiers.
Shak., Rich. II., i. 1. 126.

He wintered for the second time in Dublin; where his own pieces, and Macklin's "Love-a-la-Mode," brought great *receipts* to Crow-Street theatre.
W. Cooke, Memoirs of S. Foote, I. 51.

2. The act or state of receiving by transfer or transmission; a taking of that which is delivered or passed over; a getting or obtaining: as, the *receipt* of money or of a letter; he is in the *receipt* of a good income.

Christ in us is that *receipt* of the same medicine whereby we are every one particularly cured.
Hooker, Eccles. Polity, v. 55.

Villain, thou did'st deny the gold's *receipt*.
Shak., C. of E., iii. 2. 17.

3. A written acknowledgment of having received something specified, with date, source, signature, and such other particulars as the case requires. A receipt may be for something received as a trust or a purchase, or for money or other valuable thing taken either in part or in full payment of a debt. At common law a mere unsealed receipt, though expressed to be in full for a debt, does not by its own force operate to discharge the debt if the payment in fact be of a part only. A receipt is not deemed a contract within the rule that a written contract cannot be varied by oral evidence.

4. A formula or prescription for the making of something, or the production of some effect; a statement of that which is to be taken or done for some purpose: distinguished from *recipe* by the common restriction of that word to medical or related uses: as, a *receipt* for a pudding; a *receipt* for gaining popularity.

Come, sir, the sight of Golde
Is the most sweet *receit* for melancholy,
And will reuiue your spirits.
Heywood, Woman Killed with Kindness (Works, ed. Pearson, 1874, II. 107).

We have the *receipt* of fern-seed, we walk invisible.
Shak., 1 Hen. IV., ii. 1. 96.

No *Receipt* can Human-kind relieve,
Doom'd to decrepit Age without Reprieve.
Congreve, tr. of Ovid's Art of Love.

5†. Reception; admittance; a granting of entrance or admission.

He wayted hym aboute, & wylde hit hym thogt,
& sege no syngne of *resette*.
Sir Gawayne and the Green Knight (E. E. T. S.), l. 2164.

Ther [in heaven] entreȝ non to take *reset*,
That bereȝ any spot.
Alliterative Poems (ed. Morris), i. 1066.

Come, cave, become my grave; come, death, and lend *Receipt* to me within thy bosom dark.
Sir P. Sidney, Arcadia, iii.

6†. A place for the reception of persons or things; a place where anything is received or taken in; a station or a receptacle for lodgment.

Men han made a litylle *Receyt*, besyde a Pylere of that Chirche, for to reseeyve the Offrynges of Pilgrymes.
Mandeville, Travels, p. 112.

Go forth, tary we not behynd,
Vnto som *receit* nye the wodes lynde,
Wher we mow thys tym receyued to be.
Rom. of Partenay (E. E. T. S.), l. 159.

He saw Levi . . . sitting at the *receipt* of custom [place of toll, R. V.]. Mark ii. 14.

Memory, the warder of the brain,
Shall be a fume, and the *receipt* of reason
A limbeck only. *Shak.*, Macbeth, i. 7. 66.

7†. Power of receiving or taking in; extent of accommodation; fitness for holding or containing.

The foresaid ships were of an huge and incredible capacitie and *receipt*. *Hakluyt's Voyages*, I. 593.

In things of great *receipt* with ease we prove
Among a number one is reckon'd none.
Shak., Sonnets, cxxxvi.

Such be the capacity and *receipt* of the mind of man.
Bacon, Advancement of Learning, i. 9.

Accountable receipt. See *accountable*.—**Syn.** *Recipe*, etc. See *reception*.

receipt (rē-sēt′), *v. t.* [Also in technical legal use *reset* (see *reset*[1]); < ME. *recetten*, *reseten*; from the noun: see *receipt*, *n.*] 1†. To receive; harbor.

And ȝe hit make, and that me greves,
A den to *reset* inne theves.
Cursor Mundi, MS. Coll. Trin. Cantab., f. 91. (*Halliwell.*)

My lorde hym *receitted* in hys castell
For the dewkys dethe oton.
MS. Cantab., Ff. ii. 38, f. 220. (*Halliwell.*)

2. To give a receipt for; acknowledge in writing the payment of: as, to *receipt* a bill (usually by writing upon the bill "Received payment" and the creditor's signature).

receiptor (rē-sē′tor), *n.* [< *receipt* + *-or*[1].] One who gives a receipt; specifically, in *law*, a person to whom property is bailed by an officer, who has attached it upon mesne process, to answer to the exigency of the writ and satisfy the judgment, the obligation of the receiptor being to have it forthcoming on demand. *Wharton.*

receit†, *n.* A former spelling of *receipt* (and of the ultimately identical *recheat*).

receivability (rē-sē-va-bil′i-ti), *n.* [< *receivable* + *-ity* (see *-bility*).] The quality of being receivable. *Imp. Dict.*

receivable (rē-sē′va-bl), *a.* [< F. *recevable* (cf. Pg. *recebivel* = It. *ricevevole*), receivable; as *receive* + *-able*.] 1. Capable of being received; fit for reception or acceptance.—2. Awaiting receipt of payment; that is to be paid: as, bills *receivable*. See *bill payable*, *bill receivable*, under *bill*[3].

receivableness (rē-sē′va-bl-nes), *n.* The character of being receivable; capability of being received.

receive (rē-sēv′), *v.*; pret. and pp. *received*, ppr. *receiving*. [Early mod. E. also *receeve*, *receave*; < ME. *receiven*, *receyven*, *reseyven*, *resseyven*, *receyven*, *resayven*, *resaven*, < OF. *recever*, *recevoir*, *reçoivre*, F. *recevoir* = Pr. *recebre* = Sp. *recibir* = Pg. *receber* = It. *ricevere*, receive, < L. *recipere*, pp. *receptus*, take back, get back, regain, recover, take to oneself, admit, accept, receive, take in, assume, allow, etc., < *re-*, back, + *capere*, take: see *capacious*. Cf. *conceive*, *deceive*, *perceive*. Hence ult. (from the L. verb) *receipt*, *receptacle*, *recipe*, etc.] **I.** *trans.* 1. To take from a source or agency of transmission; get

by transfer: as, to *receive* money or a letter; to *receive* gifts.

They build Gray Friars, that will not be seen to *receive* bribes themselves, but have others to *receive* for them.
Latimer, 5th Sermon bef. Edw. VI., 1549.

Son remember that thou in thy lifetime *receivedst* thy good things, and likewise Lazarus evil things.
Luke xvi. 25.

2. To take or get from a primary source: as, to *receive* favors or a good education; to *receive* an impression, a wound, or a shock.

Receive not thy nose court-odour from me?
Shak., W. T., iv. 4. 757.

The Idea of solidity we *receive* by our touch. *Locke*

No Norman or Breton ever saw a Mussulman, except to give and receive blows on some Syrian field of battle.
Macaulay, Von Ranke's Hist. Popes.

3. To take notice of on coming or appearing: greet the advent of; salute or treat upon approach: as, to *receive* an actor with applause: to *receive* news joyfully.

To Westmynstur the kyng be water did glide,
Worshypfully *resayvid* with procession in frett.
Resayvid with reverence, his dewte not denye.
MS. Bibl. Reg. 17 D. xv. (*Halliwell.*)

My father was *received* with open arms by all his old friends. *Lady Holland*, Sydney Smith, vi.

4. To take or consider favorably; admit as credible, worthy, acceptable, etc.; give admission or recognition to: as, to *receive* a person into one's friendship; a *received* authority.

What he hath seen and heard, that he testifieth; and no man *receiveth* his testimony. John iii. 32.

He is a Gentleman so *receiv'd*, so courted, and so trusted.
Steele, Tender Husband, i 1.

Every person who should now leave *received* opinions . . . might be regarded as a chimerical projector.
Goldsmith, The Bee, No. 4.

5. To admit for intercourse or entertainment; grant audience or welcome to; give a friendly reception to: as, to *receive* an ambassador or guests.

The quen with hire companie com him a-3ens,
& *resseyued* as reali as swiche rinkes ouȝt.
William of Palerne (E. E. T. S.), l. 3939.

It was so fre that Men *resceyved* there alle manere of Fugityfes of other places for here evyl Dedis.
Mandeville, Travels, p. 66.

They kindled a fire, and *received* us every one, because of the present rain, and because of the cold. Acts xxviii. 2.

6. To take in or on; give entrance to; hold; contain; have capacity for: as, a box to *receive* contributions.

The brasen altar that was before the Lord was too little to *receive* the burnt offerings. 1 Ki. viii. 64.

This cave, fashion'd
By provident Nature in this solid rock
To be a den for beasts, alone *receives* me.
Beau. and Fl., Knight of Malta, iv. 1.

†7. To perceive; comprehend; take into the mind.

To be *received* plain, I'll speak more gross.
Shak., M. for M., ii. 4. 82.

8. In *law*: (*a*) To take by transfer in a criminal manner; accept the custody or possession of from a known thief: as, to *receive* stolen goods.

You must restore all stoln goods you *receiv'd*.
Fletcher (*and another*), Love's Cure, v. 3.

(*b*) To admit as pertinent; take into consideration; permit the reception of: as, the court refused to *receive* the evidence, and ordered it to be stricken out.—**To receive the canvas†.** See *canvas*.—**To receive the coif.** See *coif*.—**Syn. 1** and **2.** *Receive, Take, Accept.* These words are in the order of strength in regard to the willingness with which the thing in question is received, etc., but none of them is warm. One may *receive* a letter, a challenge to a duel, a remittance, detriment, or a wound; the word thus may be wholly neuter. One may *take* cold, but, more often, *take* that which he might refuse, as a present, a bribe, offense, a pinch of snuff, or an orange. One may *accept* one's fate, but even then the word means a mental consent, a movement of mind; more often it means to receive with some willingness, as to *accept* a proposition, an invitation, or an offer. An offer, etc., may be *received* and not *accepted*.

II. *intrans.* 1. To be a receiver or recipient: come into custody or possession of something by transfer.

Every one shall *receive* of thy words. Deut. xxxiii. 3.
Freely ye have *received*, freely give. Mat. x. 8.

2. To give, or take part in holding, a reception; greet and entertain visitors, especially at certain fixed times.

As this name was called the person presented advanced, bowed first to the prince and then separately to the two members of the royal family who were *receiving* with him.
T. C. Crawford, English Life, p. 38.

received (rē-sēvd'), *a.* In *entom.*, projecting between other parts.—**Received scutellum**, a scutellum which lies between the bases of the elytra, as in most beetles.

receivedness (rē-sē'ved-nes), *n.* The state of being received; general allowance or belief.

Others will, upon account of the *receivedness* of this opinion, think it rather worth to be examined, than acquiesced in. *Boyle.*

receiver (rē-sē'vėr), *n.* [Early mod. E. also *receyver, receaver;* < ME. *resaver, receyvour,* < OF. *recevour, receveur*, F. *receveur,* < *recevoir*, receive: see *receive*.] 1. One who or that which receives, in any general sense; a recipient; a receptacle; a taker or container of anything transmitted: as, a *receiver* of taxes; a *receiver* for odds and ends.

We are *receivers* through grace and mercy, authors through merit and desert we are not, of our own salvation *Hooker*, Eccles. Polity, v., App. 1.

But in this thankless World the Givers
Are envy'd ev'n by the *Receivers*.
Cowley, Pindaric Odes, i. 11.

This invention covers a combined grass *receiver* and dumper to catch and carry the grass while the lawn mower is being operated. *Sci. Amer.*, N. S., LXII. 364.

2. An officer appointed to receive public money; a treasurer; specifically, a person appointed by a court of equity or other judicial tribunal to take, pending litigation, the custody and management or disposal of property in controversy, or to receive the rents and profits of land or the produce of other property.—3. One who, for purposes of profit or concealment, takes stolen goods from a thief, knowing them to be stolen, thus making himself a party to the crime.

Were there noe *receavers*, there would be noe theeves.
Spenser, State of Ireland.

4. In *chem.*: (*a*) A vessel for receiving and containing the product of distillation. (*b*) A vessel for receiving and containing gases.—5. The glass vessel placed on the plate of an air-pump, in order to be exhausted of air: so named because it is the recipient of those things on which experiments are made. See *air-pump*.—6. The receiving magnet of an electric telegraph, the receiving apparatus of a telephone, or the like.—**Exhausted receiver.** See *exhaust*.—**Florentine receiver.** See *Florentine*.—**Knitting-needle receiver**, an apparatus consisting of a magnetizing coil with a knitting-needle in its axis, used by Reis as a telephonic receiver. The action of this receiver depends on Page's discovery that an iron bar gives a sharp click when magnetized; the rapid succession of clicks in the receiver, corresponding to the successive make-and-breaks of the Reis transmitter, reproduces the sound.—**Mail-bag receiver and discharger.** See *mail-catcher*.—**Receiver and manager.** See *manager*, 4.—**Receiver of the fines**, formerly, in England, an officer who received the money of all such as compounded with the crown on original writs sued out of Chancery.—**Receiver's certificates**, evidences of debt, issued by a receiver of property in litigation, for the discharge of obligations incurred in the management of it, to be redeemed out of its proceeds when finally disposed of or restored to its owners. Such certificates may be authorized by the proper court, and made a lien upon the property, when the expenses connected with it cannot be otherwise met without detriment.—**Receivers of wreck**, officers appointed by the British Board of Trade for the preservation of wreck, etc., for the benefit of the shipping interests. They were formerly called *receivers of droits of admiralty*.

receiver-general (rē-sē'vėr-jen'e-ral), *n.* In some countries or states, an officer who receives the public revenues in general or in a particular territory: in some of the United States, an additional title of the State treasurer.

receivership (rē-sē'vėr-ship), *n.* [< *receiver* + *-ship*.] The office of a receiver of public money, or of money or other property in litigation; the collection and care of funds awaiting final distribution by legal process.

receiving (rē-sē'ving), *n.* [< ME. *receyving;* verbal n. of *receive*, *v.*] The act of one who receives, in any sense of that verb.—**Receiving apparatus or instrument**, in *teleg.*, any appliance used at a telegraph-station, by the action of which the signals transmitted from another station are rendered perceptible to any of the senses of the receiving operator.—**Receiving tubes of the kidney**, the straight tubules of the kidney.

receiving-house (rē-sē'ving-hous), *n.* A house where letters or parcels are received for transmission; a place of deposit for things to be forwarded; a depot. [Great Britain.]

receiving-magnet (rē-sē'ving-mag″net), *n.* See *magnet*.

receiving-office (rē-sē'ving-of″is), *n.* In Great Britain, a branch post-office where letters, parcels, etc., may be posted, but from which no delivery is made to persons addressed.

receiving-ship (rē-sē'ving-ship), *n.* A ship stationed permanently in a harbor to receive recruits for the navy until they can be transferred to a cruising ship.

recency (rē'sen-si), *n.* [< ML. *recentia*, < L. *recen(t-)s*, new, fresh: see *recent*.] The state or quality of being recent; recentness; newness; lateness; freshness.

So also a scirrhus in its *recency*, whilst it is in its augment, requireth milder applications than the confirmed or inveterate one. *Wiseman*, Surgery, i. 19.

An impression of *recency* is given which some minds are clearly unable to shake off.
Maine, Early Law and Custom, p. 198.

recense (rē-sens'), *v. t.*; pret. and pp. *recensed*, ppr. *recensing*. [< OF. *recenser*, number, count, peruse, muster, review, F. *recenser*, number, take the census of. = Pr. *recensar* = Pg. *recensear*, examine, survey, < L. *recensere*, recount, examine closely, review, muster, revise, etc., < *re-*, again, + *censere*, think, deem, judge: see *census*.] To review; revise. [Rare.]

Sixtus and Clemens, at a vast expence, had an assembly of learned divines to *recense* and adjust the Latin Vulgate.
Bentley.

recension (rē-sen'shon), *n.* [< F. *recension*, < L. *recensio(n-)*, an enumeration, reviewing, recension, < *recensere*, review: see *recense*.] 1. Review; examination; enumeration. [Obsolete or rare.]

In this *recension* of monthly flowers, it is to be understood for the whole period that any flower continues, from its first appearing to its final withering.
Evelyn, Calendarium Hortense, January.

2. A critical or methodical revision, as of the text of a book or document; alteration of a text according to some authority, standard, or principle; a reëditing or systematic revisal.

He who . . . spends nine years in the elaboration and *recension* of his book . . . will find that he comes too late.
G. P. Marsh, Lects. on Eng. Lang., xxi.

3. A text established by critical or systematic revision; an edited version.

The genuine ballad-book thus published was so successful that in less than ten years three editions or *recensions* of it appeared. *Ticknor*, Span. Lit., I. 115.

Using the ancient versions in this way, we can recover a *recension* (or *recensions*) differing more or less widely from that represented by the traditional Hebrew text.
Contemporary Rev., L. 595.

4. A critical examination, as of a book; a review; a critique.

He was . . . bitterly convinced that his old acquaintance Carp had been the writer of that depreciatory *recension* which was kept locked in a small drawer of Mr. Casaubon's desk, and also in a small dark closet of his verbal memory. *George Eliot*, Middlemarch, xxix.

recensionist (rē-sen'shon-ist), *n.* [< *recension* + *-ist*.] One who reviews or revises, as the text of an ancient author; an editor.

recent (rē'sent), *a.* [< OF. *recent*, F. *récent* = Pr. *recent* = Sp. *reciente* = Pg. It. *recente*, < L. *recen(t-)s*, fresh, new; (*a*) in one view, < *re-* + *-cen(t-)s*, supposed to be allied to W. *cynt*, first, earliest, Skt. *kaniyāns*, smaller, *kanistha*, smallest (cf. Russ. *po-chinatĭ*, begin): (*b*) in another view, orig. ppr. from a root **rec* = Zend √ *raç*, come (cf. *recens a victoria*, 'just coming from a victory': *Rhodo recentes Romam venerunt*, 'they came to Rome just from Rhodes,' etc.: see def. 5).] 1. Of or pertaining to time just before the present; not long past in occurrence or existence; lately happening or being; newly appearing, done, or made: as, *recent* events; *recent* importations; *recent* memories; *recent* news; a *recent* speech.—2. Of modern date, absolutely or relatively; not of primitive or remote origin; belonging to or occurring in times not far removed.—3. Still fresh in quality or existence; not old or degenerate; unchanged by time: said of things liable to rapid change, as newly gathered plants or specimens in natural history.

The odour [of essential oils] is seldom as pleasant as that of the *recent* plant. *Ure*, Dict., III. 456.

4. In *geol.*, of or pertaining to the epoch regarded as the present from a geological point of view. Strata so called contain few, if any, fossils belonging to extinct species. The alluvial formations in the valleys are generally of recent formation, as well as most of the superficial detrital material. The deposits which belong to the Post-tertiary, or which are more recent than the Tertiary, are with difficulty classified, except for purposes of local geology. In glaciated regions, the traces of the former presence of ice adds variety to the phenomena, and complexity to the classification, of the various forms of detrital material The existence of very ancient remains and works of man is a further element of interest in the geology of the recent formations.

5. Lately come; not long removed or separated. [Poetical and rare.]

Shall I not think that, with disorder'd charms,
All heav'n beholds me *recent* from thy arms?
Pope, Iliad, xiv. 382.

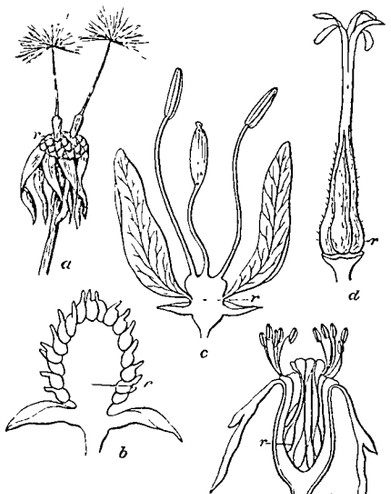
Amphitryon *recent* from the nether sphere.
Lewis, tr. of Statius's Thebaid, viii.

= Syn. 1. *Late*, *Fresh*, etc. See *new*.

recently (rē'sent-li), *adv.* At a recent time; newly; lately; freshly; not long since: as, advices *recently* received; a town *recently* built or repaired; an isle *recently* discovered.

recentness (rē'sent-nes), *n.* The state or quality of being recent; newness; freshness; recency; lateness of origin or occurrence: as, the *recentness* of alluvial land; the *recentness* of news or of events.

recept (rē'sept), *n.* [< L. *receptum*, neut. of *receptus*, pp. of *recipere*, receive: see *receive*. Cf. *receipt*.] That which is received; especially, something taken into the mind from an external source; an idea derived from observation. [Recent.]



The bridge between *recept* and concept is equally impassable as that between percept and concept.
Athenæum, No. 3193, p. 12.

receptacle (rē-sep'tā-kl, formerly also res'ep-tā-kl), *n.* [< OF. *receptacle*, F. *réceptacle* = Pr. *receptacle* = Sp. *receptáculo* = Pg. *receptaculo* = It. *ricettacolo*, *recettaculo*, < L. *receptaculum*, a receptacle, place to receive or store things in, < *recipere*, pp. *receptus*, receive, hold, contain: see *receive*.] 1. That which receives or holds anything for rest or deposit; a storing-place; a repository; a container; any space, open or closed, that serves for reception and keeping.

As in a vault, an ancient *receptacle*,
Where, for these many hundred years, the bones
Of all my buried ancestors are pack'd.
Shak., R. and J., iv. 3. 39.

Least his neighbor's countrey might be an harborugh or *receptacle* of his foes and aduersaries.
Hall, Edw. III., an. 10.

2. In *bot.*: (*a*) In a single flower, the more or less enlarged and peculiarly developed apex of the peduncle or pedicel, upon which all the organs of the flower are directly or indirectly

Various Forms of Receptacle (*r*).

a, Dandelion (*Taraxacum officinale*); *b*, *Fragaria elatior* (longitudinal section); *c*, *Cleome integrifolia* (longitudinal section); *d*, *Geranium maculatum*; *e*, *Rosa rubiginosa* (longitudinal section).

borne: the Linnæan and usual name: same as the more specific and proper *torus* of De Candolle and the *thalamus* of Tournefort. The receptacle varies in size and texture. In form it may be convex or conical (as most often), elongated, as in *Magnolia*, or concave, as in the rose; it may develop into a *stipe*, *gynobase*, *disk*, *carpophore*, or *hypanthium* (see these words), or it may greatly enlarge in fruit, as in the strawberry. As belonging to a single flower, sometimes termed *proper receptacle*. (*b*) In an inflorescence, the axis or rachis of a head or other short dense cluster; most often, the expanded disk-like summit of the peduncle in *Compositæ* (dandelion, etc.), on which are borne the florets of the head, surrounded by an involucre of bracts; a clinanthium. In contrast with the above, sometimes called *common receptacle*. (*c*) In an ovary, same as *placenta*, 4. (*d*) Among cryptogams — (1) In the vascular class, the placenta. (2) In *Marchantiaceæ*, one of the umbrella-like branches of the thallus, upon which the reproductive organs are borne. (3) In *Fucaceæ*, a part of the thallus in which conceptacles (see *conceptacle*) are congregated. They are either terminal portions of branches or parts sustained above water by air-bladders. (4) In *Fungi*, sometimes same as *stroma*; in *Ascomycetes*, same as *pycnidium*, 1 (also the stalk of a discocarp); in *Phalloideæ*, the inner part of the sporophore, supporting the gleba. (5) In lichens, the cup containing the soredia. The term has some other analogous applications.—3. In *zoöl.* and *anat.*, a part or an organ which receives and contains or detains a secretion; a receptaculum: as, the gall-bladder is the *receptacle* of the bile.

receptaculite (rē-sep-tak'ū-līt), *n.* [< NL. *Receptaculites*.] A fossil of the genus *Receptaculites*.

Receptaculites (rē-sep-tak-ū-lī'tēz), *n.* [NL. (Defrance, 1827), < L. *receptaculum*, a receptacle (see *receptacle*), + *-ites* (see *-ite*²).] The typical genus of *Receptaculitidæ*.

Receptaculitidæ (rē-sep-tak-ū-lit'i-dē), *n. pl.* [NL., < *Receptaculites* + *-idæ*.] A family of fossil organisms, typified by the genus *Receptaculites*, of a very doubtful nature. They have been referred by many to the silicious sponges; but the skeleton was originally calcareous, and the silicious examples are the result of fossilization. They are of a spherical or pyriform shape, with a central closed cavity and an upper and lower pole, and the wall is composed of pillar-like spicules at right angles to the surface and expanded at their outer ends into rhomboidal summit-plates forming a mosaic-like outer layer. The species lived in the seas of the Silurian and Devonian epochs. Also called *Receptaculidæ*.

receptaculum (rē-sep-tak'ū-lum), *n.*; pl. *receptacula* (-lä). [L.: see *receptacle*.] In *zoöl.*, *anat.*, and *bot.*, a receptacle; a reservoir of fluid; a saccular or vesicular organ to receive and retain a fluid.—**Receptaculum chyli**, a dilatation of the thoracic duct, situated upon the body of the first or second lumbar vertebra, into which the lymphatics of the lower extremities and the lacteals of the intestine discharge. Also called *receptaculum Pecqueti*, *cistern* or *reservoir of Pecquet*, *lacteal sac*.—**Receptaculum ganglii petrosi**, a depression in the lower border of the petrous portion of the temporal bone, for the lodgment of the petrous ganglion.—**Receptaculum Pecqueti**. Same as *receptaculum chyli*.—**Receptaculum seminis**, in *zool.*, a spermatheca in the female; any kind of seminal vesicle which may receive semen from the male and store it up. See cut under *Nematoidea*.

receptary† (res'ep-tū-ri), *a.* and *n.* [= OF. *receptaire* = Sp. *recetario* = It. *ricettario*, a book of prescriptions or receipts, < ML. **receptarius*, adj. (as a noun *receptarius*, m., a receiver, collector), < *recepta*, a receipt, prescription: see *receipt*.] I. *a.* Commonly received or accepted but not proved; uncertain. [Rare.]

Baptista Porta, in whose works, although there be contained many excellent things, and verified upon his own experience, yet are there many also *receptary* and such as will not endure the test. *Sir T. Browne*, Vulg. Err., i. 8.

II. *n.* 1. A collection of receipts.

Receptaire [F.], a *receptary:* a note of physical receits.
Cotgrave.

Glanville, Vanity of Dogmatizing, xvi.

2†. Something that may be received or believed in. *Imp. Dict.*

receptible (rē-sep'ti-bl), *a.* [< OF. *receptible* = Pg. *receptivel* = It. *recettibile*, < LL. *receptibilis*, that may be acquired again, recoverable, < L. *recipere*, pp. *receptus*, acquire, recover, receive: see *receive*.] Capable of or suited for being received; receivable. *Imp. Dict.*

reception (rē-sep'shon), *n.* [< ME. *reception* (in astrology), < OF. *reception*, F. *réception* = Pr. *receptio* = Sp. *recepcion* = Pg. *recepção* = It. *ricezione*, *recezione*, < L. *receptio*(*n*-), a receiving, reception, < *recipere*, pp. *receptus*, receive: see *receive*.] 1. The act of receiving by transfer or delivery; a taking into custody or possession of something tendered or presented; an instance of receipt: as, the *reception* of an invitation; a taking into place, position, or association; admission to entrance or insertion; a taking or letting in: as, a groove or socket for the *reception* of a handle; the *reception* of food in the stomach; *reception* of a person into society.—2. Admission into the mind; a taking into cognizance or consideration; a granting of credence; acceptance: as, the *reception* of a doctrine.

God never intended to compel, but only to persuade, us into a *reception* of divine truth.
Bp. Atterbury, Sermons, II. viii.

3. A receiving into audience, intercourse, or entertainment; treatment of a person on approach or presentation; greeting or welcome, as of a visitor: as, a cordial *reception*.—4. An occasion of ceremonious or complimentary greeting; an assemblage of persons to be individually received or greeted by an entertainer or by a guest selected for special attention: as, to give weekly *receptions*.

He assembled all his train,
Pretending so commanded, to consult
About the great *reception* of their King,
Thither to come. *Milton*, P. L., v. 769.

5†. A retaking; recapture; recovery.

He was right glad of the French King's *reception* of those Townes from Maximilian. *Bacon*, Hist. Hen. VII., p. 44.

6†. Power or capacity of receiving; receptivity; susceptivity.

That were to extend
His sentence beyond dust and nature's law,
By which all causes else, according still
To the *reception* of their matter, act,
Not to the extent of their own sphere.
Milton, P. L., x. 807.

7. In *astrol.*, the interchange of the dignities of two planets, owing to each being in the other's house or exaltation.=Syn. 1 and 3. *Reception*, *Receipt*, *Recipe*. *Reception* is used of a person or a thing: as, he got a very gracious *reception*; *receipt* of a thing: as, the *reception* or, better, the *receipt* of news or a letter; *recipe*, in medicine or, latterly, in cooking. We say a *receipt* or *recipe* for making a cake, a *receipt* for money paid.

reception-room (rē-sep'shon-röm), *n.* A room for the reception of visitors.

receptive (rē-sep'tiv), *a.* [< OF. *receptif* = Sp. Pg. *receptivo* = It. *ricettivo*, *recettivo* = G. *receptiv*, < NL. **receptivus*, < L. *recipere*, pp. *receptus*, receive: see *receive*.] Having the quality of or capacity for receiving, admitting, or taking in; able to hold or contain.

The soul being in this sort, as it is active, perfected by love of that infinite good, shall, as it is *receptive*, be also perfected with those supernatural passions of joy, peace, and delight. *Hooker*, Eccles. Polity, i. 11.

To acquire knowledge is to receive an object within the sphere of our consciousness. The acquisitive faculty may therefore, also, be called a *receptive* faculty.
Sir W. Hamilton, Metaph., xxi.

I am somehow *receptive* of the great soul. . . . More and more the surges of everlasting nature enter into me.
Emerson, Essays, 1st ser., p. 269.

The outer layer of rods and cones (bacillary) is undoubtedly the true *receptive* layer. *Le Conte*, Sight, p. 58.

Receptive power. See *power*¹.—**Receptive spot**, in *bot.*, the hyaline spot in an oösphere at which the male gamete enters. *Goebel.*

receptiveness (rē-sep'tiv-nes), *n.* Power or readiness to receive; receptivity.

Many of her opinions . . . seemed too decided under every alteration to have been arrived at otherwise than by a wifely *receptiveness*. *George Eliot*, Daniel Deronda, iii.

receptivity (rē-sep-tiv'i-ti), *n.* [= F. *réceptivité* = G. *receptivität*, < NL. **receptivita*(*t*-)*s*, < **receptivus*, receptive: see *receptive*.] The state or property of being receptive; ability to receive or take in; specifically, a natural passive power of the mind.

We call sensibility the *receptivity* of the soul, or its power of receiving representations whenever it is in any wise affected. *Kant*, Critique of Pure Reason, tr. by Müller, p. 51.

Objectivity, with subjectivity, causativity, plasticity, *receptivity*, and several other kindred terms, have come into vogue, during the two last generations, through the influence of German philosophy and æsthetics.
F. Hall, Mod. Eng., p. 308.

In our social system, so marked by the dovetailing of classes, the quality of *receptivity* for these influences . . . is raised to its maximum. *Gladstone*, Gleanings, I. 46.

receptory† (rē-sep'tō-ri), *n.* [< LL. *receptorius*, fit for receiving (neut. *receptorium*, a place of shelter), < L. *recipere*, pp. *receptus*, receive: see *receive*.] A receptacle. *Holland.*

duced by a generatrix; an electric motor. See *generatrix*.

receptual (rē-sep'tū-al), *a.* [< L. *receptus* (*recepti-*), a receiving (see *receipt*, *recept*), + *-al*.] Relating or pertaining to that which is received or taken in; consisting or of the character of a recept or recepts. [Recent.]

> The difference between a mind capable of however limited a degree of conceptual ideation and one having only *receptual* ideation is usually agreed to be the possession of language by the first, and its absence in the other.
> *Science*, XV. 90.

receptually (rē-sep'tū-al-i), *adv.* In a receptual manner; by receiving or taking in. [Recent.]

> There is then the denotative stage, in which the child uses names *receptually* by mere association.
> *Science*, XV. 90.

recercelé (rē-ser-se-lā'), *a.* [OF., also *recercellé*, pp. of *recerceler*, *recerceller*, curl up, curve, also hoop, encircle, < *re-*, back, + *cerceler*, hoop, encircle, < *cercel*, *cercean*, hoop, ring, < L. *circellus*, dim. of *circus*, a ring: see *circus*.] In *her.*: (*a*) Curved at the ends more decidedly than in other forms, such as moline: noting a cross each end of which is divided into two points rolled backward into a spiral. (*b*) Same as *moline*.

recercelled (rē-sėr'seld), *a.* In *her.*, same as *recercelé*.

recess (rē-ses'), *n.* [< OF. *reces*, *recez*, a departure, retreat, recess (as of a school), setting (of a star), repose, = Sp. *receso* = Pg. It. *recesso*, recess, retreat, < L. *recessus*, a going back, retreat, departure, also a retired place, corner, retreat, etc., < *recedere*, pp. *recessus*, recede, retreat, etc.: see *recede*[1].] 1. The act of receding, or going back or away; withdrawal; retirement; recession. [Obsolete or archaic.]

> Men . . . have made too untimely a departure and too remote a *recess* from particulars.
> *Bacon*, Advancement of Learning, ii. 164.

> Every day of sin, and every criminal act, is a degree of *recess* from the possibilities of heaven.
> *Jer. Taylor*, Works (ed. 1835), I. 182.

> Pliny hath an odd and remarkable passage concerning the death of men and animals upon the *recess* or ebb of the sea. *Sir T. Browne*, To a Friend.

> The access of frost in the autumn, and its *recess* in the spring, do not seem to depend merely on the degree of cold. *Jefferson*, Notes on Virginia (1787), p. 132.

2†. A state of being withdrawn or retired; seclusion; privacy.

> In these are faire parks or gardens call'd villas, being onely places of *recesse* and pleasure, at some distance from the streetes, yet within the walls.
> *Evelyn*, Diary, May 6, 1645.

> Good verse *recess* and solitude requires. *Dryden*.

3. A time of withdrawal or retirement; an interval of release from occupation; specifically, a period of relief from attendance, as of a school, a jury, a legislative body, or other assembly; a temporary dismissal.

> Before the Revolution the sessions of Parliament were short and the *recesses* long. *Macaulay*, Sir William Temple.

> It was *recess* as I passed by, and forty or fifty boys were creating such a hubbub in the school-yard.
> *The Century*, XXVIII. 12.

4. A place of retirement or seclusion; a remote or secret spot or situation; a nook; hence, a hidden or abstruse part of anything: as, the *recesses* of a forest; the *recesses* of philosophy.

> Departure from this happy place, our sweet
> *Recess*. *Milton*, P. L., xi. 304.

> I went to Dorking to see Mr. Charles Howard's amphitheatre, garden, or solitary *recess*, environed by a hill.
> *Evelyn*, Diary, Aug. 1, 1655.

> Every man who pretends to be a scholar or a gentleman should . . . acquaint himself with a superficial scheme of all the sciences, . . . yet there is no necessity for every man of learning to enter into their difficulties and deep *recesses*. *Watts*, Improvement of Mind, I. xx. § 10.

> The pair
> Frequent the still *recesses* of the realm
> Of Hela, and hold converse undisturb'd.
> *M. Arnold*, Balder Dead.

5. A receding space or inward indentation or depression in a line of continuity; a niche, alcove, or the like: as, a *recess* in a room for a window or a bed; a *recess* in a wall or the side of a hill. See cut under *ambry*.

> A bed which stood in a deep *recess*. *Irving*. (*Webster*.)

> Inside the great portal at Koyunjik was a hall, 180 ft. in length by 42 in width, with a *recess* at each end, through which access was obtained to two courtyards, one on the right and one on the left. *J. Fergusson*, Hist. Arch., I. 178.

6. A treaty, law, decree, or contract embodying the results of a negotiation; especially, a decree or law promulgated by the Diet of the old German empire, or by that of the Hanseatic League.—7. In *bot.*, a sinus of a lobed leaf.—8. In *anat.* and *zoöl.*, a receding or hollowed-out part; a depression or sinus; a recessus.—**Contrariety of access and recess.** Same as *contrariety of motion* (which see, under *contrariety*).—**Lateral recess.** See *recessus lateralis ventriculi quarti*, under *recessus*.—**Peritoneal recesses.** Same as *peritoneal fossæ* (which see, under *peritoneal*).=Syn. 3. *Prorogation*, *Dissolution*, etc. (see *adjournment*), intermission, respite.—4. Retreat, nook, corner.

recess (rē-ses'), *v.* [< *recess*, *n.*] I. *trans.* 1. To make a recess in; form with a space sunk beyond the general surface: as, to *recess* a wall.

> Cutters for boring bars should be, if intended to be of standard size, *recessed* to fit the bar.
> *J. Rose*, Pract. Machinist, p. 218.

2. To place in a recess; form as a recess; make a recess of or for; hence, to conceal in or as if in a recess.

> Behind the screen of his prodigious elbow you will be comfortably *recessed* from curious impertinents.
> *Miss Edgeworth*, Manœuvring, xiv.

> The inscription is engraved on a *recessed* tablet, cut in the wall of the tunnel a few yards from its lower end.
> *Isaac Taylor*, The Alphabet, I. 233.

> The head of Zeus on these interesting coins is of the leonine type, with deeply *recessed* eye.
> *B. V. Head*, Historia Numorum, p. 88.

Recessed arch. See *arch*[1].

II. *intrans.* To take a recess; adjourn or separate for a short time: as, the convention *recessed* till the afternoon. [Colloq.]

recession[1] (rē-sesh'on), *n.* [< F. *récession*, going back, withdrawing, < L. *recessio(n-)*, a going back, receding, < *recedere*, recede: see *recede*[1] and *recess*.] 1. The act of receding or going back; withdrawal; retirement, as from a position reached or from a demand made.

> Our wandering thoughts in prayer are but the neglects of meditation, and *recessions* from that duty.
> *Jer. Taylor*, Works (ed. 1835), I. 73.

2. The state of being put back; a position relatively withdrawn.

> But the error is, of course, more fatal when much of the building is also concealed, as in the well-known case of the *recession* of the dome of St. Peter's. *Ruskin*.

recession[2] (rē-sesh'on), *n.* [< *re-* + *cession*.] A cession or granting back; retrocession: as, the *recession* of conquered territory to its former sovereign.

> We believe a large sentiment in California would support a bill for the *recession* [of the Yosemite Park] to the United States. *The Century*, XXXIX. 475.

recessional (rē-sesh'on-al), *a.* and *n.* [< *recession*[1] + *-al*.] I. *a.* Pertaining to or connected with recession, or a receding movement, as that of the choir or congregation at the close of a service: as, a *recessional* hymn.

II. *n.* A hymn sung while the clergy and choir are leaving a church at the end of a service of public worship.

recessive (rē-ses'iv), *a.* [< *recess* + *-ive*.] Tending to recede; receding; going back: used especially of accent regarded as transferred or moved backward from the end toward the beginning of a word. In Greek grammar the accent is said to be *recessive* when it stands as far back from the end of the word as the laws of Greek accentuation permit—that is, on the antepenult if the ultimate is short, or on the penult if the ultimate is long.

recessively (rē-ses'iv-li), *adv.* In a recessive or retrograde manner; with a backward movement or course.

> As she [Greece] passes *recessively* from the grand Attic period to the Spartan, the Theban, the Macedonian, and the Asiatic. *Edinburgh Rev.*, CLXIV. 494.

recessus (rē-ses'us), *n.*; pl. *recessus*. [L.: see *recess*.] In *anat.* and *zoöl.*, a recess.—**Recessus chiasmatis.** Same as *recessus opticus*.—**Recessus infrapinealis**, a small cleft extending from the third ventricle into the conarium. Also called *ventriculus conarii*.—**Recessus infundibuli**, the funnel-shaped cavity at the bottom of the third ventricle; the cavity of the infundibulum.—**Recessus labyrinthi.** Same as *ductus endolymphaticus* (which see, under *ductus*).—**Recessus lateralis ventriculi quarti**, the lateral recess of the fourth ventricle, containing the lateral choroid plexus.—**Recessus opticus**, a V-shaped recess of the floor of the third ventricle, in front of the infundibulum, bounded anteriorly by the lamina terminalis, posteriorly by the optic chiasm. Also called *recessus chiasmatis*. *Mihalcovics*.—**Recessus præpontilis**, a name given by Wilder in 1881 to the median pit formed by the overhanging of the front border of the pons Varolii.

Rechabite (rek'a-bit), *n.* [= F. *Réchabite*; < *Rechab*, father of Jonadab, who founded the sect, + *-ite*[2].] 1. A member of a Jewish family and sect descended from Rechab, which, in obedience to the command of Jonadab, refused to drink wine, build or live in houses, sow seed, or plant or own vineyards. Jer. xxxv. 6, 7. Hence—2. A total abstainer from strong drink.

> A *Rechabite* poor Will must live,
> And drink of Adam's Ale.
> *Prior*, Wandering Pilgrim.

3. A member of a society composed of total abstainers from intoxicating drinks, called the Independent Order of Rechabites.

Rechabitism (rek'a-bī-tizm), *n.* [< *Rechabite* + *-ism*.] 1. The practice of the ancient Rechabites in respect to abstinence from strong drink.

> The praises of *Rechabitism* afford just as good an opportunity for the exhibition of sportive fancy and a lively humor as lyrical panegyrics on the most exquisite vintage of France or the Rhine.
> *R. J. Hinton*, Eng. Radical Leaders, p. 220.

2. The principles and practice of the Independent Order of Rechabites.

> The advantages which *Rechabitism* offered above other friendly societies.
> *Rechabite Mag.*, July, 1886, p. 175. (*Encyc. Dict.*)

rechant† (rē-chant'), *v. t.* and *i.* [< *re-* + *chant*. Cf. *recant*.] To chant in alternation; sing antiphonally.

> Hark, hark the cheerfull and *re-chaunting* cries
> Of old and young singing this ioyfull Dittie.
> *Sylvester*, tr. of Du Bartas's Weeks, ii., The Handy-Crafts.

rechase (rē-chās'), *v. t.* [< ME. *rechasen*, < OF. (and F.) *rechasser*, drive back, < *re-*, back, + *chasser*, drive: see *chase*[1].] 1. To chase or drive back or away, as to a forest or covert; turn back by driving or chasing: as, to *rechase* sheep by driving them from one pasture to another. *Halliwell*. [Obsolete or prov. Eng.]

> Withynne a while the herte y-founde ys,
> I-hallowed, and *rechased* faste
> Longe time. *Chaucer*, Death of Blanche, l. 379.

> Then these assail; then those *re-chase* again;
> Till stay'd with new-made hills of bodies slain.
> *Daniel*, Civil Wars, iv. 47.

2. To call back (hounds) from a wrong scent.

rechase†, *n.* [< *rechase*, *v.*] A call (in hunting).

> Seven score raches at his *rechase*.
> *Squyr of Lowe Degré*, l. 772. (*Halliwell*.)

rechate†, *n.* and *v.* Same as *recheat*.

réchauffé (rā-shō-fā'), *n.* [F., pp. of *réchauffer*, dial. *récaufer*, *recofer*, warm up, warm over, < *re-*, again, + *échauffer*, warm, < L. *excalfacere*, warm: see *excalfaction*, and cf. *eschaufe*, *chafe*.] A warmed-up dish; hence, a new concoction of old materials; a literary rehash.

> We suffer old plots willingly in novels, and endure without murmur *réchauffés* of the most ancient stock of fiction.
> *Saturday Rev.*

rechet†, *v.* An old spelling of *reach*[1].

recheat† (rē-chēt'), *n.* [Early mod. E. also *rechate*, *receit*; < OF. *recet*, *receit*, etc., also *rechet*, *rechiet*, a retreat, refuge: see *receipt*.] In *hunting*, a melody which the huntsman winds on the horn to call back the dogs from a wrong course, or to call them off at the close of the hunt; a recall on the horn.

> In hunting I had as leeve stand at the *receit* as at the loosing. *Lyly*, Euphues. (*Nares*.)

> That I will have a *recheat* winded in my forehead, or hang my bugle in an invisible baldrick, all women shall pardon me. *Shak.*, Much Ado, i. 1. 242.

recheat† (rē-chēt'), *v. i.* [Early mod. E. also *rechate*; < ME. *rechaten*, < OF. *recceter*, *recheter*, *rechaiter*, receive, give refuge, refl. take refuge, retreat, < *recet*, *rechet*, etc., recheat: see *recheat*, *n.*] In *hunting*, to play the recheat; call back the hounds by the tones of the recheat on the horn.

> Iuntes hyged hem theder, with hornez ful mony
> Ay *rechatande* aryst til thay the renk sesen.
> *Sir Gawayne and the Green Knight* (E. E. T. S.), l 1911.

> *Rechating* with his horn, which then the hunter chears,
> Whilst still the lusty stag his high-palm'd head up-bears.
> *Drayton*, Polyolbion, xiii. 127.

recherché (rė-sher'shā), *a.* [F., pp. of *rechercher*, seek again: see *research*.] Much sought after; hence, out of the common; rare; dainty.

> We thought it a more savoury meat than any of the *recherché* culinary curiosities of the lamented Soyer.
> *Capt. M. Thomson*, Story of Cawnpore, v.

rechristen (rē-kris'n), *v. t.* [< *re-* + *christen*.] To christen or name again; fix a new name upon.

> Abbeys which have since been . . . *rechristened* with still homelier names.
> *Trevelyan*, Early Hist. Chas Jas. Fox, p. 47.

> The faculties . . . are in part *rechristened*, and also rearranged. *Nature*, XXXIX. 244.

recidivate† (rē-sid'i-vāt), *v. i.* [< ML. *recidivatus*, pp. of *recidivare* (> F. *récidiver*), fall back, relapse, < L. *recidivus*, falling back, etc. (cf. *recidivatus*, a restoration): see *recidivous*.] To fall back, relapse, or backslide; return to an abandoned course of conduct.

> To *recidivate*, and to go against her own act.
> *Bp. Andrewes*, Opuscula, Speech, p. 79 (1629). (*Latham*.)

recidivation† (rē-sid-i-vā'shon), *n.* [< OF. *recidivation*, F. *récidivation*, < ML. *recidivatio(n-)*,

falling back, < *recidivare*, fall back: see *recidivate*.] A falling back; relapse; return to an abandoned course; backsliding.

Recidivation is so much more dangerous than our first sickness, as our natural strength is then the more feebled, and unable to endure means of restoring.
Rev. T. Adams, Works, I. 447.

recidivist (rē-sid'i-vist), *n.* [< F. *récidiviste*, < *récidive*, a repetition of a fault or crime, < L. *recidivus*, falling back: see *recidivous*.] In *French law*, a relapsed criminal; one who falls back into the same criminal course for which he has already been condemned.

The French Cabinet offered a pledge that no *recidivists* should be sent to the islands.
Appleton's Ann. Cyc., 1886, p. 60.

recidivous† (rē-sid'i-vus), *a.* [= OF. *recidif* = It. *recidivo*, < L. *recidivus*, falling back, returning, recurring, < *recidere*, *reccidere*, fall back, < *re-*, back, + *cadere*, fall: see *cadent*.] Liable to backslide to a former state. *Imp. Dict.*

recipe (res'i-pē), *v. t.* [L., impv. of *recipere*, take: see *receive*.] Take: a Latin imperative used (commonly abbreviated R. or ℞) at the beginning of physicians' prescriptions, as formerly and in part still written in Latin.

recipe (res'i-pē), *n.* [= OF. *recipe*, F. *récipé* = Sp. *récipe* = Pg. It. *recipe*, a recipe, < L. *recipe*, take, used as the first word in a prescription, and hence taken as a name for it: see *recipe*, *v.*] 1. A formula for the compounding of a remedy, with directions for its use, written by a physician: a medical prescription.

He deals all
With spirits, he; he will not hear a word
Of Galen or his tedious *recipes*.
B Jonson, Alchemist, ii. 1.

2. A prescribed formula in general, but especially one having some relation or resemblance to a medical prescription; a receipt.

There was a greatness of mind in Paracelsus, who, having furnished a *recipe* to make a fairy, had the delicacy to refrain from its formation.
I. D'Israeli, Curios. of Lit., IV. 186.

The one grand *recipe* remains for you — the be-all and the end-all of your strange existence upon earth. Move on!
Dickens, Bleak House, xix.

=Syn. *Receipt*, etc. See *reception*.

recipiangle (rē-sip'i-ang-gl), *n.* [< F. *recipiangle*, irreg. < L. *recipere*, receive, + *angulus*, angle: see *receive*, and *angle*³, *n.*] In *engin.*, an instrument formerly used for measuring angles, especially in fortification. *Buchanan.*

recipience (rē-sip'i-ens), *n.* [< *recipien(t)* + *-ce*.] A receiving; the act of or capacity for receiving; receptivity. [Rare.] *Imp. Dict.*

recipiency (rē-sip'i-en-si), *n.* [As *recipience* (see *-cy*).] Same as *recipience*.

We struggle — fain to enlarge
Our bounded physical *recipiency*,
Increase our power, supply fresh oil to life.
Browning, Cleon.

recipient (rē-sip'i-ent), *a.* and *n.* [= F. *recipient*, a receiver, water-clock, = Sp. Pg. It. *recipiente*, receiving, a receiver, < L. *recipien(t-)s*, ppr. of *recipere*, receive: see *receive*.] I. *a.* Receiving; receptive; acting or serving as a receiver; capable of receiving or taking in.

The step from painting on a ground of stanniferous enamel to a similar surface on a metallic *recipient* body is an easy and obvious one. *Cat. Soulages Coll*, p. 99.

Recipient cavity, in *entom.*, a cavity in which an organ or part is received at the will of the insect; specifically, a cavity of the mesosternum which corresponds to a spine of the prosternum, the spine and cavity forming in the *Elateridæ* a springing-organ. See *spring*.

II. *n.* 1. A receiver or taker; especially, one who receives or accepts something given or communicated; a taker of that which is offered or bestowed: as, *recipients* of charity or of public education; the *recipients* of the eucharist.

Whatever is received is received according to the capacity of the *recipient*
Cudworth, Intellectual System, p. 725.

Something should have been inserted to signify that, when the *recipient* is fitly qualified and duly disposed, there is a salutary life-giving virtue annexed to the sacrament. *Waterland*, Works, V. 123.

The first *recipients* of the Revelation.
J. H. Newman, Development of Christian Doctrine, ii. § 1.

2. That which receives; formerly, the receiver in an apparatus or instrument.

The form of sound words, dissolved by chymical preparation, ceases to be nutritive, and, after all the labours of the alembeck, leaves in the *recipient* a fretting corrosive. *Decay of Christian Piety.*

recipiomotor (rē-sip'i-ō-mō″tor), *a.* [Irreg. < L. *recipere*, receive, + *motor*, mover.] Receiving a motor impulse or stimulus; afferent, as a nerve, in an ordinary sense: correlated with *liberomotor* and *dirigomotor*. See *motor*.

Each afferent nerve is a *recipio-motor* agent.
H. Spencer, Prin. of Psychol., § 18.

reciprocal (rē-sip'rō-kal), *a.* and *n.* [< NL. as if **reciprocalis*, < L. *reciprocus*, returning, alternating, reciprocal (> It. Pg. *reciproco* = Sp. *recíproco* = OF. *reciproque*, > obs. E. *reciprock*); perhaps lit. 'moving backward and forward,' < **recus* (< *re-*, back, + adj. formative *-cus*: see *-ic*) + *procus* (< *pro*, forward, + adj. formative *-cus*). Cf. *reciprocous*, *reciprock*.] I. *a.* 1. Moving backward and forward; alternating; reciprocating.

The stream of Jordan, south of their going over, was not supplied with any *reciprocal* or refluous tide out of the Dead Sea.
Fuller, Pisgah Sight, II. i. 17. (*Davies*, under *refluous*.)

Obedient to the moon, he spent his date
In course *reciprocal*, and had his fate
Link'd to the mutual flowing of the seas.
Milton, Second Epitaph on Hobson the Carrier.

2. Mutually exchanged or exchangeable; concerning or given or owed by each (of two or more) with regard to the other or others: as, *reciprocal* aid; *reciprocal* rights, duties, or obligations; *reciprocal* love or admiration.

Let our *reciprocal* vows be remembered.
Shak., Lear, iv. 6. 267.

The Liturgy or service . . . consisteth of the *reciprocal* acts between God and man.
Bacon, Advancement of Learning, ii. 378.

I take your gentle offer, and withal
Yield love again for love *reciprocal*.
Beau. and Fl., Knight of Burning Pestle, i. 2.

The king assured me of a *reciprocal* affection to the king my master, and of my particular welcome to his court.
Lord Herbert of Cherbury, Life (ed. Howells), p. 129.

The liberty of the enemy's fishermen in war has been protected by many French ordinances, and the English observed a *reciprocal* indulgence.
Woolsey, Introd. to Inter. Law, § 170.

There is much the same relation of *reciprocal* dependence between judgment and reasoning as between conception and judgment.
J. Sully, Outlines of Psychol., p. 414.

3. Having an interchangeable character or relation; mutually equivalent or correspondent; concordant; agreeing.

Knowledge and power are *reciprocal*.
Bacon, Physical Fables, x., Expl., note.

Sometimes a universal affirming may be converted saving the quantity, to wit when consisting of *reciprocal* terms: as, every man is a rational animal, and therefore every rational animal is a man.
Burgersdicius, tr. by a Gentleman, i. 32.

He [the king] must guide the vast and complicated machine of government, to the *reciprocal* advantage of all his dominions. *A. Hamilton*, Works, II. 56.

Thence came her friends of either sex, and all
With whom she lived on terms *reciprocal*.
Crabbe, Works, V. 51.

Reciprocal consecution. See *consecution*. — **Reciprocal cross**, a reciprocal hybrid.

A *reciprocal cross* is a double cross between two species or varieties, one form being used in one case as the father and in the other case as the mother.
W. K. Brooks, Law of Heredity, p. 126.

Reciprocal determinant, diagrams, equation. See *determinant*, *diagram*, etc. — **Reciprocal ellipsoid of expansion.** See *ellipsoid*. — **Reciprocal figures** in *geom.*, two figures of the same kind (triangles, parallelograms, prisms, pyramids, etc.) so related that two sides of the one form the extremes of an analogy of which the means are the two corresponding sides of the other. — **Reciprocal functions, hybrids, matrix.** See *function*, etc. — **Reciprocal polars**, two curves such that the polar of any point on either (with respect to a fixed conic) is a tangent of the other. — **Reciprocal pronoun**, a pronoun expressing mutual or reciprocal relation, such as Greek ἀλλήλους (of each other, of one another). — **Reciprocal proportion.** See *proportion*. — **Reciprocal quantities**, in *math.*, those quantities which, multiplied together, produce unity. — **Reciprocal ratio.** See *ratio*. — **Reciprocal screws**, a pair of screws so related that a wrench about one produces no twist about the other. Given any five screws, a screw reciprocal to them all can be found. — **Reciprocal terms**, in *logic*, those terms that have the same signification, and consequently are convertible and may be used for each other. = Syn. *Reciprocal*, *Mutual*. There is a theoretical difference between these words, although it often is not important. That is *mutual* which is a common act on the part of both persons at the same time. *Mutual* is not properly applicable to physical acts or material things, as blows or gifts. *Reciprocal* means that one follows another, being caused by it, with emphasis upon that which is viewed as caused: as, *reciprocal* love or hate. See remarks under *mutual* as to the propriety of using *mutual* for *common*.

II. *n.* 1. That which is reciprocal to another thing.

No more
Ye must be made your own *reciprocals*
To your loved city and fair severals
Of wives and houses.
Chapman, tr. of Homer's Hymn to Apollo.

Love is ever rewarded either with the *reciprocal*, or with an inward or secret contempt. *Bacon*, Love (ed. 1887).

2. In *math.*, the quotient resulting from the division of unity by the quantity of which the quotient is said to be the reciprocal. Thus, the reciprocal of 4 is ¼, and conversely the reciprocal of ¼ is 4; the reciprocal of 2 is ½, and that of $a + x$ is $1/(a + x)$. A fraction made by inverting the terms of another fraction is called the reciprocal of that other fraction: thus, ⅔ is the reciprocal of ⅔. — **Polar reciprocals.** Same as *reciprocal polars*. See I.

reciprocality (rē-sip-rō-kal'i-ti), *n.* [< *reciprocal* + *-ity*.] The state or character of being reciprocal.

An acknowledged *reciprocality* in love sanctifies every little freedom. *Richardson*, Clarissa Harlowe, II. i.

reciprocally (rē-sip'rō-kal-i), *adv.* 1. In a reciprocal manner; with reciprocating action or effect; alternatingly; interchangeably; correspondingly.

The Aristotelians . . . believe water and air to be *reciprocally* transmutable. *Boyle*, Works, II. 342.

Virtue and sentiment *reciprocally* assist each other.
Goldsmith, Cultivation of Taste.

Faults in the life breed errors in the brain,
And these *reciprocally* those again.
Cowper, Progress of Error, l. 505.

2. In a reciprocal ratio or proportion; inversely. Thus, in bodies of the same weight the density is reciprocally as the magnitude — that is, the greater the magnitude the less in the same proportion the density, and the less the magnitude the greater in the same proportion the density. In geometry two magnitudes are said to be reciprocally proportional to two others when one of the first pair is to one of the second as the remaining one of the second is to the remaining one of the first.

reciprocalness (rē-sip'rō-kal-nes), *n.* The state or character of being reciprocal.

reciprocant (rē-sip'rō-kant), *n.* [< L. *reciprocan(t-)s*, ppr. of *reciprocare*, move back and forth: see *reciprocate*.] 1. The contravariant expressing the condition of tangency between the primitive quantic and an adjoint linear form. — 2. A differential invariant; a function of partial differential coefficients of n variables connected by a single relation, this function being such that, if the variables are interchanged in cyclical order, it remains unchanged except for multiplication by some nth root of unity into some power of the same root of the continued product of the first differential coefficients of one of the variables relatively to all the others. For an example, see *Schwarzian*, *n.* — **Absolute reciprocant**, one whose extrinsic factor reduces to unity, so that the interchange of variables produces no change except multiplication by a root of unity. — **Binary reciprocant**, one having two variables. — **Characteristic of a reciprocant**, the root of unity with which it becomes multiplied on interchange of the variables. — **Character of a reciprocant**, its kind with respect to its characteristic. — **Circular reciprocant**, a reciprocant which, equated to zero, gives the equation of a locus which is its own inverse with respect to every point. — **Degree of a reciprocant**, the number of factors (differential coefficients) in that term which has the greatest number. Thus, if that term is $(D_x y)^a\,(D_x^2 y)^b\,(D_x^3 y)^c$, the degree is $a + b + c$. — **Even reciprocant**, one whose characteristic is 1. — **Extent of a reciprocant**, the weight of the most advanced letter which it contains. — **Homogeneous reciprocant**, a reciprocant all the terms of which are of the same degree in the differential coefficients. — **Homographic binary reciprocant**, one which remains unaltered when x and y are changed respectively into $(Lx + M)/(x + N)$ and $(Py + Q)/(y + R)$, where the capitals are constants. — **Integrable reciprocant**, a reciprocant which, equated to zero, gives an equation which can be integrated. — **Isobaric reciprocant**, a reciprocant having the sum of the orders of the differential coefficients the same in all the terms. — **Odd reciprocant**, one whose characteristic is not 1. — **Orthogonal reciprocant**, one which remains unchanged by an orthogonal transformation of the variables. — **Type of a reciprocant**, the combination of its character, weight, degree, and extent. — **Weight of a reciprocant**, the sum of the orders, each diminished by two, of the factors (differential coefficients) of the term having the greatest weight. Thus, if that term is $(D_x y)^a\,(D_x^2 y)^b\,(D_x^3 y)^c\,(D_x^4 y)^d$, the weight is $= a + c + 2d$.

reciprocantive (rē-sip'rō-kan-tiv), *a.* [< *reciprocant* + *-ive*.] Pertaining to a reciprocant.

reciprocate (rē-sip'rō-kāt), *v.*; pret. and pp. *reciprocated*, ppr. *reciprocating*. [< L. *reciprocatus*, pp. of *reciprocare*, move back and forth, reverse (> It. *reciprocare* = Sp. Pg. *reciprocar* = F. *réciproquer*, reciprocate, interchange). < *reciprocus*, reciprocal: see *reciprocal*.] I. *trans.* 1. To cause to move back and forth; give an alternating motion to.

The sleeve is *reciprocated* from a rock shaft journaled in the lower aligning ends of the main frame.
Sci. Amer., N. S., LXII. 75.

2. To give and return mutually; yield or perform each to each; interchange: as, to *reciprocate* favors.

For 'tis a union that bespeaks
Reciprocated duties.
Cowper, Friendship, l. 48.

At night men crowd the close little caffè, where they *reciprocate* smoke, respiration, and animal heat.
Howells, Venetian Life, iii.

3. To give or do in response; yield a return of; requite correspondingly.

It must happen, no doubt, that frank and generous women will excite love they do not *reciprocate*.
Margaret Fuller, Woman in 19th Cent., p. 140.

II. *intrans.* 1. To move backward and forward; have an alternating movement; act interchangeably; alternate.

One brawny smith the puffing bellows plies,
And draws and blows *reciprocating* air.
Dryden, tr. of Virgil's Georgics, iv. 249.

2. To act in return or response; do something equivalent or accordant: as, I did him many favors, but he did not *reciprocate*. [Colloq.]—**Reciprocating engine**, a form of engine in which the piston and piston-rod move back and forth in a straight line, absolutely or relatively to the cylinder, as in oscillating-cylinder engines: in contradistinction to *rotatory engine*. See *rotatory*.—**Reciprocating force**. See *force*1.—**Reciprocating motion**, in *mach.*, a contrivance frequently employed in the transmission of power from one part of a machine to another. A rigid bar is suspended upon a center or axis, and the parts situated on each side of the axis take alternately the positions of those on the other. See cut under *pitman*.—**Reciprocating propeller**, a propeller having a paddle which has a limited stroke and returns in the same path.—**Reciprocating proposition**. See *proposition*.

reciprocation (rē-sip-rō-kā′shon), *n.* [< F. *réciprocation* = Sp. *reciprocacion* = Pg. *reciprocação* = It. *reciprocazione*, < L. *reciprocatio(n-)*, a going back upon itself, a returning by the same way, a retrogression, alternation, reflux, ebb, < *reciprocare*, pp. *reciprocatus*, move back and forth: see *reciprocate*.] 1. A going back and forth; alternation of movement.

When the bent spring is freed, when the raised weight falls, a converse series of motions must be effected, and this . . . would lead to a mere *reciprocation* [of force].
W. R. Grove, Corr. of Forces, p. 24.

2. The act of reciprocating; interchange of acts; a mutual giving and returning: as, the *reciprocation* of kindnesses.

We do therefore lie, in respect of each other, under a *reciprocation* of benefits.
Scott, Heart of Mid-Lothian, Prol.

3. In *logic*, the relation of two propositions each the converse of the other.—**Polar reciprocation**, in *geom.*, the process of forming the polar reciprocal of a figure.

reciprocative (rē-sip′rō-kā-tiv), *a.* [< *reciprocate* + *-ive*.] Of a reciprocating character; giving and taking reciprocally.

Our four-handed cousins apparently credit their biped kinsmen with *reciprocative* tendencies.
Pop. Sci. Mo., XXXIV. 111.

reciprocatory (rē-sip′rō-kā-tō-ri), *a.* [< *reciprocate* + *-ory*.] Going backward and forward: alternating in direction or in action: reciprocating: opposed to *rotatory*.

Impart a *reciprocatory* motion to the carriage.
C. T. Davis, Leather, p. 457.

A rotatory movement could be combined with the *reciprocatory* one. *Dredge's Electric Illumination*, I. 388.

reciprocity (res-i-pros′i-ti), *n.* [< F. *réciprocité* = Sp. *reciprocidad* = Pg. *reciprocidade* = It. *reciprocità*, < ML. **reciprocita(t-)s*, < L. *reciprocus*, reciprocal: see *reciprocal*.] 1. Reciprocal action or relation; free interchange; mutual responsiveness in act or effect: as, *reciprocity* of benefits or of feeling; *reciprocity* of influence.

By the Convention of 1815 a *reciprocity* of intercourse was established between us and Great Britain.
D. Webster, Speech, Jan. 24, 1832.

2. Equality of commercial privileges between the subjects of different governments in each other's ports, with respect to shipping or merchandise, to the extent established by treaty.

On the Continent, after the fourteenth century, a system of *reciprocity* was frequently established between the several towns, as for instance in 1365 at Tournay.
English Gilds (E. E. T. S.), p. cxxix.

The *reciprocity* stipulations in our previous treaties were thought to operate disadvantageously to American navigation in the case of the Hanse towns, especially in regard to tobacco. *E. Schuyler*, Amer. Diplomacy, p. 432.

Another illustration may be found in the history of *reciprocity* with Canada.
G. F. Edmunds, Harper's Mag., LXXVI. 328.

3. In the *Kantian philos.*, mutual action and reaction in the strict mechanical sense.

Reciprocity, which, as a pure conception, is but the relation of parts or species in a generic whole, becomes . . . invariable coexistence, or coexistence according to a universal rule. *E. Caird*, Philos. of Kant, p. 412.

Glance once again at *reciprocity* and causality. The one is a necessary to and fro; the other only a necessary fro.
J. H. Stirling, Mind, X. 65.

4. In *geom.*, the mutual relationship between points and straight lines in a plane, or points and planes in space, etc.: duality.—**Hermite's law of reciprocity** [named from the French mathematician Charles *Hermite*, born 1822], the proposition that the number of invariants of the *n*th order in the coefficients possessed by a binary quantic of the *p*th degree is equal to the number of invariants of the order *p* in the coefficients possessed by a quantic of the *n*th degree.—**Law of reciprocity of prime numbers**. See *law*1.—**Plane birational reciprocity**, a one to one correspondence between the elements of a field of points and those of a field of rays.—**Quadratic reciprocity**. See *quadratic*.—**Reciprocity treaty**, a treaty granting equal privileges of commercial intercourse in certain specified particulars to the people of the countries concerned. The reciprocity treaty between Great Britain and the United States, existing from 1854 to 1866, provided for freedom of trade in certain commodities, chiefly raw or half-manufactured products, between the latter country and the Canadian provinces. It was abrogated on previous notice given under its terms by the United States. The United States government formed a similar treaty with that of Hawaii in 1876. =Syn. 1. Exchange, interchange, reciprocation.

reciprockt, *a.* [Also *reciproque*; < OF. *reciproque*, F. *réciproque* = Pr. *reciproc* = Sp. *recíproco* = Pg. It. *reciproco*, < L. *reciprocus*, reciprocal: see *reciprocous* and *reciprocal*.] Reciprocal.

'Twixt whom and them there is this *reciprock* commerce.
B. Jonson, Cynthia's Revels, v. 2.

reciprocornous (rē-sip-rō-kôr′nus), *a.* [< L. *reciprocicornis*, having horns curved backward, < *reciprocus*, turning back the same way (see *reciprocal*), + *cornu*, a horn: see *corn*2 and *horn*.] Having horns turned backward and then forward, as a ram. This form is characteristic of the sheep tribe, though not peculiar to it. See *arietiform*, and cuts under *bighorn*, *argali*, *aoudad*, and *Ovis*.

reciprocoust (rē-sip′rō-kus), *a.* [< L. *reciprocus*, turning back the same way: see *reciprocal*.] Reciprocal.

For the removing of which imparity, the cardinal acquainted Taylor "That he had devised to make the band *reciprocous* and egal."
Strype, Memorials, Hen. VIII., I. i. 5.

reciproquet, *a.* See *reciprock*.

recision (rē-sizh′ọn), *n.* [< OF. *recision*, F. *récision* = Sp. *recision* = Pg. *recisão* = It. *recisione*, < L. *recisio(n-)*, a cutting off, retrenchment, diminution, < *recidere*, pp. *recisus*, cut off, < *re-*, back, again, + *cædere*, cut.] 1. The act of cutting off. *Cotgrave*.—2. Specifically, in *surg.*, same as *resection*.

recital (rē-sī′tal), *n.* [< *recite* + *-al*.] 1. The reciting or repeating of something previously prepared; especially, an elocutionary recitation; the rhetorical delivery before an audience of a composition committed to memory: as, the *recital* of a poem; a dramatic *recital*.—2. A telling over; a narration; a relation of particulars about anything, either orally or in writing: as, the *recital* of evidence.

Some men . . . give us in *recitals* of disease
A doctor's trouble, but without the fees.
Cowper, Conversation, l. 313.

He poured out a *recital* of the whole misadventure.
Howells, Undiscovered Country, p. 154.

3. That which is recited; a story; a narrative: as, a harrowing *recital*.—4. In *law*: (*a*) That part of a deed which rehearses the circumstances inducing or leading to its execution. (*b*) Any incidental statement of fact in a deed or contract: as, a *recital* is evidence of the fact recited, as against the party making it.—5. A musical performance or concert, vocal or instrumental, especially one given by a single performer, or a concert consisting of selections from the works of some one composer: as, a Wagner *recital*; a piano *recital*. =Syn. 2 and 3. *Relation*, *Narrative*, etc. (see *account*), repetition, speech, discourse.

recitation (res-i-tā′shọn), *n.* [< OF. *recitation*, F. *récitation* = Sp. *recitacion* = Pg. *recitação* = It. *recitazione*, < L. *recitatio(n-)*, a reading aloud of judicial decrees or literary works, < *recitare*, pp. *recitatus*, read aloud, recite: see *recite*.] 1. The act of reciting or repeating what has been committed to memory; the oral delivery of a composition without the text, especially as a public exercise or performance.—2. The rehearsal by a pupil or student of a lesson or exercise to a teacher or other person; a meeting of a class for the purpose of being orally examined in a lesson.—3. In *music*: (*a*) Same as *recitative*. (*b*) Same as *reciting-note*.—**Mystic recitation**. See *mystic*.

recitationist (res-i-tā′shọn-ist), *n.* [< *recitation* + *-ist*.] One who practises recitation; a public reciter of his own or others' compositions.

The youth who has heard this Last of the *recitationists* deliver one of his poems will recall in future years the fire and spirit of a veteran whose heart was in his work.
Stedman, Poets of America, viii. § 3.

recitation-room (res-i-tā′shọn-rōm), *n.* A room for college or school recitations.

recitative (res″i-ta-tēv′), *a.* and *n.* [< F. *récitatif*, n., < It. *recitativo*, n., a recitative in music; as *recite* + *-ative*.] I. *a.* In *music*, in the style of a recitative; as if spoken.

II. *n.* In *music*: (*a*) A form or style of song resembling declamation—that is, in which regularity of rhythmic, melodic, and harmonic structure is reduced to the minimum. It is a union of song and speech, with the emphasis sometimes on one element and sometimes on the other, but with a careful avoidance of technical "form" in the musical sense. The division into phrases is properly governed by rhetorical reasons only. The strictly tonal and metrical qualities of a balanced melody are usually but meagerly represented. The sequence of harmonies and of tonalities is often entirely unrestricted. An unaccompanied recitative (*recitativo secco*) has only a few detached instrumental chords, or a *basso continuo*, to suggest or sketch the harmonic basis of the melody. Accompaniments of this sort have been given at different periods to different instruments, such as the harpsichord, the violoncello, or the string orchestra alone. An accompanied recitative (*recitativo stromentato*) has a continuous instrumental background, which occasionally becomes highly descriptive or dramatic, and may be assigned to a full orchestra. This variety of recitative passes over insensibly into the *arioso* and the *aria parlante*. The recitative was invented, in the latter part of the sixteenth century, in the course of an attempt by certain Florentine musicians to recover the dramatic declamation of the ancient Greeks. Its recognition as a legitimate style of composition opened the way for the development of the dramatic forms of the opera and the oratorio, in both of which it has always retained a prominent place. Its value in such extended forms is due to its adaptability to descriptive, explanatory, and epic matter generally, as well as to strictly dramatic utterance of every kind. It has been customary to introduce lyric arias by recitatives; but in the operatic works of the present century the formal distinction between recitative and aria has been more or less abandoned as arbitrary. The *melos* of Wagner is an intermediate form, capable of extension in either direction. Also *recitation*.

What they call *Recitative* in Musick is only a more tuneable Speaking; it is a kind of Prose in Musick.
Congreve, Semele, Arg.

Ballads, in the seventeenth century, had become the delight of the whole Spanish people. . . . The blind beggar gathered alms by chanting them, and the puppet-showman gave them in *recitative* to explain his exhibition.
Ticknor, Span. Lit., III. 77.

(*b*) A section, passage, or movement in the style described above.

recitatively (res″i-ta-tēv′li), *adv.* In the manner of recitative.

recitativo (rā-chē-tä-tō′vọ̄), *n.* [It., a recitative in music: see *recitative*.] Recitative.

She tripp'd and laugh'd, too pretty much to stand; . . .
Then thus in quaint *recitativo* spoke.
Pope, Dunciad, iv. 52.

recite (rē-sīt′), *v.*; pret. and pp. *recited*, ppr. *reciting*. [< OF. *reciter*, F. *réciter* = Pr. Sp. Pg. *recitar* = It. *recitare*, < L. *recitare*, read aloud, recite, repeat from memory, < *re-*, again, + *citare*, cite: see *cite*1.] I. *trans.* 1. To repeat or say over, as something previously prepared or committed to memory; rehearse the words of; deliver orally: as, to *recite* the Litany; to *recite* a poem.

All the parties concerned were then called together; and the fedtah, or prayer of peace, used in long and dangerous journies, was solemnly *recited* and assented to by them all.
Bruce, Source of the Nile, II. 504.

2. In *music*, to deliver in recitative.

The dialogue [in the first operas] was neither sung in measure, nor declaimed without Music, but *recited* in simple musical tones. *Burney*, Hist. Music, IV. 18.

3. To relate the facts or particulars of; give an account or statement of; tell: as, to *recite* one's adventures or one's wrongs.

Till that, as comes by course, I doe *recite*
What fortune to the Briton Prince did lite,
Pursuing that proud Knight.
Spenser, F. Q., VI. vi. 17.

Lest the world should task you to *recite*
What merit lived in me. *Shak.*, Sonnets, lxxii.

"I make," cries Charley, *reciting* the shield, "three merions on a field or, with an carl's coronet."
Thackeray, Virginians, xxxii.

4. To repeat or tell over in writing; set down the words or particulars of; rehearse; cite; quote.

Which booke (de Ratione Studii et de Liberis Educandis) is oft *recited*, and much praysed, in the fragmentes of Nonius, even for authoritie sake.
Ascham, The Scholemaster, ii.

Lucianus, the merry Greeke, *reciteth* a great number of them [prophecies], deuised by a coosening companion, one Alexander. *Puttenham*, Arte of Eng. Poesie, p. 218.

The thoughts of gods let Granville's verse *recite*.
Pope, Windsor Forest, l. 425.

To recite one's beads. See *to bid beads*, under *bead*. =Syn. 3. *Cite*, *Adduce*, etc. (see *quote*); *Rehearse*, *Reiterate*, etc. (see *recapitulate*); enumerate, detail.

II. *intrans.* To make a recitation or rehearsal; rehearse or say over what has been learned: as, to *recite* in public or in a class.

They *recite* without book.
E. W. Lane, Modern Egyptians, II. 126.

recitet (rē-sīt′), *n.* [< *recite*, *v.*] Recital.

All former *recites* or observations of long-liv'd races.
Sir W. Temple, Health.

reciter (rē-sī'tėr), *n.* [< OF. *reciteur, recitateur*, F. *récitateur* = It. *recitatore*, < L. *recitator*, a reciter, < *recitare*, recite: see *recite*.] One who recites or rehearses; a narrator or declaimer, especially of what has been previously written or told.

Narrative songs were committed to memory, and delivered down from one *reciter* to another.
Bp. Percy, On Anc. Metrical Romances, § 1. (*Latham.*)

reciting-note (rē-sī'ting-nōt), *n.* In *chanting*, a note or tone on which several or many syllables are recited in monotone. In Gregorian music this tone is regularly the dominant of the mode, but in Anglican chants it may be any tone. Usually every chant contains two, or a double chant four, reciting-notes.

reck (rek), *v.*; pret. and pp. *recked* (formerly *raught*). [Formerly also *reak*, sometimes misspelled *wreak*; < ME. *recken, rekken*, assibilated *recchen*, later forms, with shortened vowel, of *reken*, assibilated *rechen* (pret. *roughte, rouhte, rogte, roghte, rohte*), < AS. *rēcan, rēccan* (pret. *rōhte*), care, reck, = OS. *rōkian* = MLG. *rōken, rūken*, LG. *roken, ruken, rochen* = OHG. *ruohhjan, ruochan, ruochen*, MHG. *ruochen* (also, in comp., OHG. *geruochan*, MHG. *geruochen*, G. *geruhen*) = Icel. *rækja*, reck, regard, etc. (cf. Dan. *rögte*, care, tend, etc.); cf. AS. **rōc* (not recorded) = OHG. *ruoh, ruah*, MHG. *ruoch*, care, heed; perhaps akin to Gr. *ἀλέγειν* (for **ἀρέγειν*), have care, heed, reck.] **I.** *intrans.* 1. To take heed; have a care; mind; heed; care: usually in a negative clause, often followed by *of*.

And whether thei had good ansuere or euell, thei *raught* neuer. *Book of the Knight of La Tour Landry*, p. 2.

Sith that he myghte do her no companye,
He ne *roghte* not a myte for to dye.
Chaucer, Complaint of Mars, l. 126.

He *recketh* not, be so he wynne,
Of that another man shall lese.
Gower, Conf. Amant., ii.

I *reck* not though I end my life to-day.
Shak., T. and C., v. 6. 26.

Of God, or hell, or worse,
He *reck'd* not. *Milton*, P. L., ii. 50.

Light *recking of* his cause, but battling for their own.
Scott, Vision of Don Roderick, The Vision, st. 45.

2†. To think.

Forthe ther ys oon, y *reke*,
That can well Frensche speke.
MS. Cantab. Ff. ii. 38, f. 115. (*Halliwell.*)

II. *trans.* To take heed of; care for; regard; consider; be concerned about. [Obsolete or poetical.]

This son of mine, not *recking* danger, . . . came hither to do this kind office, to my unspeakable grief.
Sir P. Sidney.

An' may you better *reck* the rede
Than ever did th' adviser!
Burns, Epistle to a Young Friend.

It recks (impersonal), it concerns.

Of night, or loneliness, *it recks* me not.
Milton, Comus, l. 404.

reckent†, *v.* An obsolete (the more correct) form of *reckon*.

reckless (rek'les), *a.* [Formerly also assibilated *rechless, retchless*, and misspelled *wreckless, wretchless*; < ME. *rekles, reckeles, rekkeles*, assibilated *recheles, reccheles, rechlesse*, < AS. *rēccelēas, rēccelēas*, careless, reckless, thoughtless, heedless, etc., = D. *rokeloos*, reckless, rash, = MLG. *rokelōs, rocelos* = OHG. *ruahchalōs*, MHG. *ruochelos*, G. *ruchlos*, careless, untroubled, wicked, notorious; < **rōc* or **rēcc* (not recorded) = OHG. *ruoh*, MHG. *ruoch*, care (see *reck*, *v.*), + *-lēas* = E. *-less*.] 1†. Not recking; careless; heedless; inattentive: in a mild sense.

A monk, whan he is *reccheles*,
Is likned to a fissch that is waterles—
This is to seyn, a monk out of his cloystre.
Chaucer, Gen. Prol. to C. T., l. 179.

First when thu spekist be not *rekles*,
Kepe feete and fingeris and handes still in pese.
Babees Book (E. E. T. S.), p. 26.

2. Not recking of consequences; desperately heedless, as from folly, passion, or perversity; impetuously or rashly adventurous.

I am one, my liege,
Whom the vile blows and buffets of the world
Have so incensed that I am *reckless* what
I do to spite the world. *Shak.*, Macbeth, iii. 1. 110.

Unhappily, James, instead of becoming a mediator, became the fiercest and most *reckless* of partisans.
Macaulay, Hist. Eng., vi.

=Syn. 2. *Enterprising, Rash*, etc. (see *adventurous*), incautious, unwary, unconcerned, indifferent, thoughtless. See list under *rash*[1].

recklessly (rek'les-li), *adv.* [< ME. *reklesly, rekkelesly*, < AS. **rēccelēaslīce, rēccelēaslīce*, < *rēcelēas*, reckless: see *reckless* and *-ly*[2].] In a reckless manner; with rash or desperate heedlessness.

recklessness (rek'les-nes), *n.* [Formerly also assibilated *rechlessness, retchlessness*; < ME. *reklesnes, rechelesnesse, recchelesnes*, < AS. *rēccelēasnes*, < *rēcelēas*, reckless: see *reckless* and *-ness*.] The state or quality of being reckless or heedless; perverse or desperate rashness.

reckling (rek'ling), *n.* and *a.* [Also *ruckling*; prob. < Icel. *reklingr*, an outcast, < *reka*, drive, toss, drift, etc. (= *wreak*), + *-lingr* = E. *-ling*[1]. Cf. *wretchcock*, the smallest of a brood of fowls.] **I.** *n.* 1. The smallest and weakest one in a litter, as of puppies, kittens, or pigs; the runt. Hence—2. A helpless babe.

There lay the *reckling*, one
But one hour old! What said the happy sire?
Tennyson, Merlin and Vivien.

II. *a.* Small; puny; stunted.

A mother dotes upon the *reckling* child
More than the strong.
Sir H. Taylor, Ph. van Artevelde, II., v. 3.

reckmaster† (rek'màs″tėr), *n.* [Irreg. < *reck(on)* + *master*.] A professional computer and accountant. [Rare.]

The common logist, *reckmaster*, or arithmetician.
Dr. John Dee, Preface to Euclid (1570).

reckon (rek'n), *v.* [Early mod. E. *recken*; < ME. *reckenen, rekenen, reknen*, count, account, reckon, esteem, etc., < AS. **recenian*, found only in the once-occurring comp. *ge-recenian*, explain, = OFries. *rekenia, reknia* = D. *rekenen* = MLG. The former spelling *recken* is historically the proper one, the termination *-on*, as with *beckon*, being prop. *-en*: see *-en*[1].] **I.** *trans.* 1. To count, or count up; compute; calculate; tell over by items or one by one: often with *up*.

No man vpon molde schuld now deuise
Men richlier a-raid to *rekene* alle thinges.
William of Palerne (E. E. T. S.), l. 1934.

I have not art to *reckon* my groans.
Shak., Hamlet, ii. 2. 121.

If we *reckon up* only those days which God hath accepted of our lives, a life of good years will hardly be a span long.
Sir T. Browne, To a Friend.

To *reckon* right it is required, (1.) That the mind distinguish carefully two ideas which are different one from another only by the addition or subtraction of one unit. (2.) That it retain in memory the names or marks of the several combinations from an unit to that number.
Locke, Human Understanding, II. xvi. 7.

2. To take into account; include in an account or category; set to one's account; impute; charge or credit.

Faith was *reckoned* to Abraham for righteousness.
Rom. iv. 9.

Also these Yles of Ynde, which beth evene azenst us, beth noght *reckned* in the Climates; for thei ben azenst us that ben in the lowe Contree.
Mandeville, Travels, p. 186.

Was any man's lust or intemperance ever *reckoned* among the Titles of his honour? *Stillingfleet*, Sermons, I. ii.

Among the costs of production have to be *reckoned* taxes, general and local. *H. Spencer*, Man vs. State, p. 23.

Here, as *recluse* as the Turkish Spy at Paris, I am almost unknown to every body.
Goldsmith, To Rev. Thomas Contarine.

II. *n.* 1. A person who withdraws from the world to spend his days in seclusion and meditation; specifically, a member of a religious community who is voluntarily immured for life in a single cell. The life of a monastic recluse was a privilege accorded only to those of exceptional virtue, and only by express permission of the abbot, chapter, and bishop. In earlier monasticism, the recluse was immured in a cell, sometimes underground, and usually within the precincts of the monastery. He was to have no other apparel than that which he wore at the time of his incarceration. The doorway to the cell was walled up, and only a sufficient aperture was left for the conveyance of provisions, but so contrived as not to allow the recluse to see or be seen. Later monasticism greatly modified this rigor.

2†. A place of seclusion; a retired or quiet situation; a hermitage, convent, or the like.

It is certain that the church of Christ is the pillar of truth, or sacred *recluse* and peculiar asylum of Religion.
J. Wise, The Churches' Quarrel Espoused.

The lives of such saints had, at the time of their yearly memorials, solemn *recognition* in the church of God.
Hooker.

This Byzantine synod assumed the rank and powers of the seventh general council; yet even this title was a *recognition* of the six preceding assemblies.
Gibbon, Decline and Fall, xlix.

On the 4th he was received in procession at Westminster, seized the crown and sceptre of the Confessor, and was proclaimed king by the name of Edward IV. . . . From the 4th of March the legal *recognition* of Edward's royal character begins, and the years of his reign date.
Stubbs, Const. Hist., § 355.

That a man's right to the produce of his brain is equally valid with his right to the produce of his hands is a fact which has yet obtained but a very imperfect *recognition*.
H. Spencer, Social Statics, p. 155.

3. Cognizance; notice taken; acceptance.

The interesting fact about Apollonius is the extensive *recognition* which he obtained, and the ease with which his pretensions found acceptance in the existing condition of the popular mind. *Froude*, Sketches, p. 103.

4. In *Scots law*, the recovery of lands by the proprietor when they fall to him by the fault of the vassal; or, generally, any return of the feu to the superior, by whatever ground of eviction.=**Syn. 1.** See *recognize*[1].

recognition[2] (rē-kog-nish′ọn), *n.* A repeated cognition.

recognitive (rē-kog′ni-tiv), *a.* [< L. *recognitus*, pp. of *recognoscere*, recognize, + *-ive*. Cf. *cognitive*.] Recognizing; recognitory.

recognitor† (rē-kog′ni-tọr), *n.* [< AF. *recognitor*, < ML. *recognitor*, < L. *recognitus*, pp. of *recognoscere*, recognize: see *recognize*[1].] In *law*, one of a jury impaneled on an assize: so called because they acknowledge a dissoizin by their verdict. The recognitor was a witness rather than a juror in the modern sense.

The inquests by *Recognitors* which we hear of from the time of the Conqueror onwards—the sworn men by whose oaths Domesday was drawn up—come much more nearly [than compurgators] to our notion of Jurors, but still they are not the thing itself.
E. A. Freeman, Norman Conquest, V. 303.

recognitory (rē-kog′ni-tọ-ri), *a.* [< L. *recognitus*, pp. of *recognoscere*, recognize, + *-ory*[1].] Pertaining to or connected with recognition.

A pun and its *recognitory* laugh must be co-instantaneous. *Lamb*, Distant Correspondents.

recognizability (rek-ọg-nī-zạ-bil′i-ti), *n.* [< *recognizable* + *-ity* (see *-bility*).] The state of being recognizable; capacity for being recognized.

recognizable (rek′ọg-nī-zạ-bl or rē-kog′ni-zạ-bl), *a.* [< *recognize*[1] + *-able*. Cf. OF. *reconnoissable*, F. *reconnaissable*.] Capable of being recognized, known, or acknowledged. Also spelled *recognisable*.

recognizably (rek′ọg-nī-zạ-bli or rē-kog′ni-zạ-bli), *adv.* So as to be recognized.

recognizance (rē-kog′ni-zạns or rē-kon′i-zạns), *n.* [< ME. *recognisance*, *reconyssaunce*, < OF. *recognoissance*, *reconnoisance*, *reconoisance*, *reconnuissance*, *reconisance*, etc., F. *reconnaissance* (> E. *reconnaissance*) = Pr. *reconaissensa*, *regonoyssensa* = Pg. *reconhecença* = It. *riconoscenza*, < ML. *recognoscentia*, a recognizing, acknowledgment, an obligation binding one over to do some particular act, < L. *recognoscen(t-)s*, ppr. of *recognoscere*, recognize: see *recognize*[1]. Cf. *cognizance*.] 1. The act of recognizing; acknowledgment of a person or thing; avowal; recognition.

The great bell that heaves
With solemn sound—and thousand others more,
That distance of *recognizance* bereaves,
Make pleasing music and not wild uproar.
Keats, Sonnet, "How many Bards."

2. Mark or badge of recognition; token.

She did gratify his amorous works
With that *recognizance* and pledge of love
Which I first gave her [a handkerchief].
Shak., Othello, v. 2. 214.

3. In *law*: (*a*) An obligation of record entered into before some court of record or magistrate duly authorized, conditioned to do some particular act, as to appear at court, to keep the peace, or pay a debt.

He was bounden in a *reconyssaunce*
To paye twenty thousand sheeld anon.
Chaucer, Shipman's Tale, l. 330.

This fellow might be in 's time a great buyer of land, with his statutes, his *recognizances*, his fines, his double vouchers, his recoveries. *Shak.*, Hamlet, v. 1. 113.

(*b*†) The verdict of a jury impaneled upon assize.—**To enter into recognizances.** See *enter*[1].

recognizant (rē-kog′ni-zạnt or rē-kon′i-zạnt), *a.* [< OF. *recognoissant*, ppr. of *recognoïstre*, etc., recognize: see *recognize*[1].] Recognizing; perceiving.

The laird did his best to help him; but he seemed nowise *recognizant*.
George MacDonald, Warlock o' Glenwarlock, xv.

recognization (rē-kog-ni-zā′shọn), *n.* [< *recognize*[1] + *-ation*.] The act of recognizing.

recognize[1] (rek′ọg-nīz), *v.*; pret. and pp. *recognized*, ppr. *recognizing*. [With accom. term. *-ize* (as if from *recognizance*), after OF. *recognoistre*, F. *reconnaître* (> E. *reconnoiter*) = Pr. *recognoscer*, *reconoscer* = Sp. *reconocer* = Pg. *reconhecer* = It. *riconoscere*, < L. *recognoscere*, know again, recall to mind, recognize, examine, certify, < *re-*, again, + *cognoscere*, know: see *cognition*. Cf. *cognize*.] **I.** *trans.* 1. To know (the object) again; recall or recover the knowledge of; perceive the identity of with something formerly known or in the mind.

Then first he *recognis'd* the ethereal guest;
Wonder and joy alternate fire his breast.
Fenton, in Pope's Odyssey, i. 415.

To *recognize* an object is to identify it with some object previously seen. *J. Sully*, Outlines of Psychol., p. 226.

2. To avow or admit a knowledge of, with approval or sanction; acknowledge or accept formally: as, to *recognize* one as ambassador; to *recognize* a government as an independent sovereignty or as a belligerent.

He brought several of them . . . to *recognize* their sense of their undue procedure used by them unto him.
Bp. Fell, Life of Hammond. (*Latham.*)

Only that State can live in which injury to the least member is *recognized* as damage to the whole.
Emerson, Address, Soldiers' Monument, Concord.

Holland, immediately after the surrender of Yorktown, had *recognised* the independence of America, which had as yet only been *recognised* by France.
Lecky, Eng. in 18th Cent., xv.

3. To indicate one's acquaintance with (a person) by a salute: as, to pass one without *recognizing* him.—4. To indicate appreciation of: as, to *recognize* merit.—5. To review; reëxamine; take cognizance of anew.

However their causes speed in your tribunals, Christ will *recognize* them at a greater. *South.*

6. To acknowledge; admit or confess as an obligation or duty.

It is more to the purpose to urge that those who have so powerful an engine [as the press] in their hands should *recognize* their responsibility in the use of it.
H. N. Oxenham, Short Studies, p. 87.

=**Syn. 2-4.** *Recognize*, *Acknowledge*. The essential difference between these words lies in the difference between letting in to one's own knowledge (*recognize*) and letting out to other people's knowledge (*acknowledge*). Hence the opposite of *recognize* is *disown* or some kindred word; that of *acknowledge* is *conceal* or *deny*. To *recognize* an obligation and to *acknowledge* an obligation differ precisely in this way. The preacher may be able to make a man *recognize*, even if he cannot make him *acknowledge*, his need of moral improvement. See *acknowledge*.

II. *intrans.* In *law*, to enter an obligation of record before a proper tribunal: as, A. B. *recognized* in the sum of twenty dollars.

Also spelled *recognise*.

Or like an overcharged gun, *recoil*.
Shak., 2 Hen. VI., iii. 2. 331.

Revenge, at first though sweet,
Bitter ere long, back on itself *recoils*.
Milton, P. L., ix. 172.

4†. To fall off; degenerate.

Be revenged;
Or she that bore you was no queen, and you
Recoil from your great stock.
Shak., Cymbeline, i. 6. 128.

II.† *trans.* To drive back.

Mariners and merchants with much toyle
Labour'd in vaine to have secur'd their prize, . . .
But neither toyle nor travell might her backe *recoyle*.
Spenser, F. Q., II. xii. 19.

A fleet of above thirty vessels, all carrying cannon, was in about three months little less than created, though a few of the largest were *reconstructions*, having been first framed and sent over from Great Britain.
Belsham, Hist. Great Britain, an. 1777.

Reconstruction Acts, two acts of Congress, of which the first, entitled "an act to provide for the more efficient government of the rebel States," was passed over the President's veto on March 2d, 1867; and the second, a supplementary act, was passed later in the same month. These acts embodied the congressional plan of reconstruction, providing that every State should remain under military government until certain acts should be performed. The principal conditions were that each State should hold a convention and frame a constitution; that this constitution must be ratified by popular vote and approved by Congress; that the new State legislature must ratify the Fourteenth Amendment to the United States Constitution; and that when the requisite number of States had ratified this amendment, any State which had fulfilled all requirements should be readmitted to the Union, and entitled to congressional representation. By 1870 all the seceding States were readmitted, but they were not all represented in Congress until 1871.

reconstructionary (rē-kọn-struk'shọn-ā-ri), *a.* [< *reconstruction* + *-ary*.] Of or pertaining to reconstruction, especially to reconstruction in the southern United States: as, "*reconstructionary* influence," *Congregationalist*, June 17, 1886. [Rare.]

of which dips into a vessel of ink, and the other moves back and forth at right angles to a strip of paper which is regularly moved by clockwork. The electrification of the ink causes it to be projected from the end of the tube in minute drops, so that the movements of the coil are recorded on the slip of paper in very fine dots very near one another. The principal advantage of this instrument is that only a very feeble current is required to give a permanent record of the signals.

recordership (rē-kôr'dėr-ship), *n.* [< *recorder* + *-ship*.] The office of recorder; also, the period during which a person holds this office.

record-office (rek'ord-of"is), *n.* A place where public records are kept and may be consulted.

They seem to have been so entirely occupied with the defence of the French directory, so very eager in finding *recriminatory* precedents to justify every act of its intolerable insolence. *Burke*, A Regicide Peace, iii.

recrossed (rē-krôst'), *a.* In *her.*: (*a*) Having the ends crossed. (*b*) Same as *crossed* when noting a crosslet: thus, a cross crosslet *recrossed* is the same as a cross crosslet crossed.

recrucify (rē-krō'si-fī), *v. t.* [< *re-* + *crucify*.] To crucify again.

By it [wilful sin] we do, as the Apostle teaches, *recrucify* the Son of God, and again expose Him to open shame. *Barrow*, Works, VI. 79.

recrudency (rē-krō'den-si), *n.* [As *recrud(esce)* + *-ency*.] Same as *recrudescence*.

recrudesce (rē-krō-des'), *v. i.*; pret. and pp. *recrudesced*, ppr. *recrudescing*. [= Pg. *recrudescer*, < L. *recrudescere*, become raw again, < *re-*, back, again, + *crudescere*, grow harsh, < *crudus*, raw: see *crude*.] 1. To become raw or exacerbated again.—2. To revive; become alive again; be renewed.

Ideas which have made no part of the waking life are apt to *recrudesce* in the sleep-waking state. *Mind*, IX. 118.

recrudescence (rē-krō-des'ens), *n.* [< F. *recrudescence* = Sp. Pg. *recrudescencia*; as *recrudescen(t)* + *-ce*.] 1. The state of being recrudescent, or becoming raw or exacerbated again. Hence—2. A reopening; renewal; a coming into existence anew; a fresh outbreak.

The king required some regulations should be made for obviating the *recrudescence* of those ignoramus abuses for the future that had been so scandalous before. *Roger North*, Examen, p. 632. (*Davies.*)

That *recrudescence* of military organization which followed the Conquest. *H. Spencer*, Prin. of Sociol., § 525.

3. In *med.*, increased activity of a disease or morbid process after partial recovery.

A kind of *recrudescence* [of scarlet fever], but without the reappearance of the rash, would seem possible up to the eighth week. *Quain*, Med. Dict., p. 1392.

4. In *bot.*, the production of a fresh shoot from the top of a ripened spike.

recrudescency (rē-krō-des'en-si), *n.* [As *recrudescence* (see *-cy*).] Same as *recrudescence*. *Browning*, Ring and Book, I. 578.

recrudescent (rē-krō-des'ent), *a.* [= Pg. *recrudescente*, < L. *recrudescen(t-)s*, ppr. of *recrudescere*, break out afresh, become raw again, < *re-*, again, + *crudescere*, become raw.] 1. Growing raw, sore, or painful again.—2. Coming into existence or renewed vigor again.

recruit (rē-krōt'), *v.* [Formerly also *recrute*; = D. *recruteren* = G. *recrutiren* = Dan. *rekrutere* = Sw. *rekrytera*, < OF. *recruter*, levy, prop. *reclutter*, mend. = Pg. *recrutar*, *reclutar*, levy, = Sp. *reclutar*, complete, supply, also recruit, = It. *reclutare*, complete, levy, < ML. *reclutare* (after Rom.), recruit, orig. mend, patch, < L. *re-* + Teut. (AS.) *clūt* (> OF. *clut*), clout, lit. 'rag,' 'piece': see *clout*[1]. The orig. sense was forgotten, and confusion ensued with OF. *recreue*, *recrue*, a supply, spare stores, etc., *recrue*, a levy of troops, prop. an addition, supply, fem. of *recreu*, F. *recru*, pp. of *recroître*, *recroistre*, grow again, < L. *re-*, again, + *crescere*, grow, increase: see *crease*[2], *increase*, etc. Cf. *accrue*, *recrew*, *crue*[1].] I. *trans.* 1. To repair by fresh supplies; supply lack or deficiency in.

Her cheeks glow the brighter, *recruiting* their colour. *Granville*, Phyllis Drinking.

2. To restore the wasted vigor of; renew the health, spirits, or strength of; refresh: as, to *recruit* one's health.

And so I began the world anew; and, by the blessing of God, was again pretty well *recruited* before I left this town. *R. Knox* (Arber's Eng. Garner, I. 385).

I sat down and talked with the family while our guide *recruited* himself with a large dish of thick sour milk. *B. Taylor*, Northern Travel, p. 419.

3. To supply with new men; specifically, to supply with new men for any deficiency of troops; make up by enlistment: as, to *recruit* an army.

His [Amurath's] forces, . . . though daily *recruited* by the new supplies which came to them, yet mouldred away. *North*, tr. of Theuet's Lives.

The Frank population of Cyprus . . . was either constantly diminishing or *recruited* by arrivals from the West. *Stubbs*, Medieval and Modern Hist., p. 168.

4. To provision; take supplies on board of, as a vessel: as in the phrase *to recruit ship.* = Syn. Reinforce, replenish.

II. *intrans.* 1. To gain new supplies of anything lost or wasted; gain flesh, health, spirits, etc.

My master, said I, honest Thomas . . . is come to Bath to *recruit*. Yes, sir, I said to *recruit*—and whether for men, money, or constitution, you know, sir, is nothing to him, nor any one else. *Sheridan*, The Rivals, ii. 1.

2. To gain new supplies of men for any object; specifically, to raise new soldiers.

When a student in Holland he there met Carstairs, on a mission into that country to *recruit* for persons qualified to fill the chairs in the several universities of Scotland. *Sir W. Hamilton.*

3. To enter port for supplies, as a vessel.

recruit (rē-krōt'), *n.* [= D. *recruut* = G. *recrut* = Dan. *rekrut* = Sw. *rekryt*, < OF. *recreute* = Sp. *recluta* = Pg. *recruta* = It. *recluta*, recruit; from the verb, confused in OF. with *recreue*, a supply, *recrue*, a levy of troops.] 1. A fresh supply of anything wasted or used, as of provisions and supplies on shipboard, etc.

Carrying also plentiful *recruits* of provisions. *Beverley*, Virginia, i. ¶ 9.

A *Recruit* of new People. *Howell*, Letters, I. i. 38.

The state is to have *recruits* to its strength, and remedies to its distempers. *Burke.*

2. A soldier or sailor newly enlisted to supply the deficiency of an army or a navy; one who has newly filled a vacancy in any body or class of persons.

The powers of Troy
With fresh *recruits* their youthful chief sustain.
Dryden.

3. A substitute for something wanting. [Rare.]

Whatever Nature has in worth deny'd,
She gives in large *recruits* of needful pride.
Pope, Essay on Criticism, l. 206.

Port of recruit (*naut.*), a recruiting-station.

recruital (rē-krō'tal), *n.* [< *recruit* + *-al*.] A renewed supply of anything lost or exhausted, especially of strength or vigor, bodily or mental. [Rare.]

Shortly after this communion Mr. Chalmers sought relief and *recruital* in an excursion to Fifeshire. *W. Hanna*, Chalmers, II. 65.

recruiter (rē-krō'tėr), *n.* One who recruits.

recruithood (rē-krōt'hụd), *n.* [< *recruit* + *-hood*.] The condition of a recruit; the state or the period of being a recruit. [Rare.]

Old soldiers who read this will remember their green *recruithood* and smile assent. *The Century*, XXIX. 108.

recruiting-ground (rē-krō'ting-ground), *n.* A place or region where recruits are or may be obtained.

The murderers of Cæsar had turned the provinces which they governed into one vast *recruiting-ground* for a last decisive struggle. *W. W. Capes*, The Early Empire, Int.

recruiting-party (rē-krō'ting-pär'ti), *n.* A number of soldiers, in charge of an officer or a non-commissioned officer, who are detached from their regiment or post for the purpose of enlisting recruits.

recruiting-sergeant (rē-krō'ting-sär'jent), *n.* A sergeant deputed to enlist recruits.

recruitment (rē-krōt'ment), *n.* [< F. *recrutement* = Sp. *reclutamiento* = Pg. *recrutamento*, the act of recruiting; as *recruit* + *-ment*.] The act or business of recruiting; the act of raising new supplies of men for an army or a navy.

The theoretical *recruitment* is partly voluntary and partly by lot for the militia. *Fortnightly Rev.*, N. S., XLIII. 40.

Rec. Sec. An abbreviation of *Recording Secretary*.

recti, *a.* [ME., < L. *rectus*, straight, direct, right: see *right*.] Direct; immediate.

Thus ys mede and mercede as two manere relacions, *Rect* and Indyrect. *Piers Plowman* (C), iv. 336.

rect. An abbreviation of (*a*) in pharmacy, (*rectificatus*) *rectified*; (*b*) *rector*.

recta, *n.* Plural of *rectum*.

rectal (rek'tal), *a.* [< *rectum* + *-al*.] Pertaining to or connected with the rectum or straight gut: as, *rectal* parts or organs; *rectal* disease, operation, instrument; *rectal* action, evacuation.—**Rectal alimentation**, the administration of enemeta containing food specially prepared for absorption by the mucous membrane of the large intestine.—**Rectal anæsthesia**, the administration of ether or other anesthetics by the rectum.—**Rectal chemise**. See *chemise*.—**Rectal crises**, paroxysms of pain in the rectum, often with tenesmus, and sensations as of a foreign body, met with in cases of locomotor ataxia.—**Rectal diaphragm**, the sheet of muscles closing the rectal outlet of the pelvis, consisting of the sphincter ani externus superficially, and a deeper layer composed of the levator ani and coccygeus.—**Rectal fissure**, a very painful crack-like opening in the mucous membrane of the lower part of the rectum.—**Rectal glands**. See *gland*.

rectalgia (rek-tal'ji-ą), *n.* [NL., < *rectum*, rectum, + Gr. ἄλγος, pain.] Neuralgia of the rectum: same as *proctalgia*.

rectangle (rek'tang-gl), *a.* and *n.* [< OF. (and F.) *rectangle* = Sp. *rectángulo* = Pg. *rectangulo* = It. *rettangolo*, rectangular, a rectangle, < LL. *rectiangulum*, having a right angle, < *rectus*, right, + *angulus*, an angle: see *right* and *angle*[3].] I.† *a.* Rectangular; right-angled.

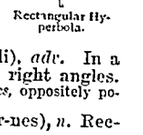
If all Athens should decree that . . . in *rectangle* triangles the square which is made of the side that subtendeth the right angle is equal to the squares which are made of the sides containing the right angle, . . . geometricians . . . would not receive satisfaction without demonstration thereof. *Sir T. Browne*, Vulg. Err., i. 7.

II. *n.* 1. A quadrilateral plane figure having all its angles right angles and its opposite sides consequently equal. When the adjacent sides are equal, it is a square. The area of a rectangle is equal to the product of two adjacent sides; thus, if its sides measure 6 feet and 4 feet, its area is 24 square feet.

Rectangle.

2. The product of two lengths. Thus, especially in old books, "the *rectangle* under two lines" is spoken of, meaning substantially the product of their lengths.

3†. A right angle.



Th' acute, and the *rect-Angles* too,
Stride not so wide as obtuse Angles doo.
Sylvester, tr. of Du Bartas's Weeks, ii., The Columnes.

rectangled (rek'tang-gld), *a.* [< *rectangle* + *-ed*[2].] 1. Having a right angle or right angles; right-angled.—2. In *her.*, forming a right angle, or broken twice, forming two right angles: said of a heraldic line and also of a division of the field so bounded by it: as, a chief *rectangled*.—**Fesse rectangled**. See *fesse*.

Argent, a Chief Rectangled gules.

rectangular (rek-tang'gū-lär), *a.* [= F. *rectangulaire* = Sp. Pg. *rectangular*, < L. *rectangulus*, rectangled: see *rectangle*.] Right-angled; having an angle or angles of ninety degrees.—**Rectangular coördinates**, in *analytical geom.* See *coördinate*.—**Rectangular hyperbola**, a hyperbola whose asymptotes are at right angles to one another.—**Rectangular map-projection**. See *projection*.—**Rectangular solid**, in *geom.*, a solid whose axis is perpendicular to its base.

Rectangular Hyperbola.

rectangularity (rek-tang-gū-lar'i-ti), *n.* [< F. *rectangularité*; as *rectangular* + *-ity*.] The quality or state of being rectangular or right-angled; rectangularness.

rectangularly (rek-tang'gū-lär-li), *adv.* In a rectangular manner; with or at right angles.—**Rectangularly polarized**, in *optics*, oppositely polarized.

rectangularness (rek-tang'gū-lär-nes), *n.* Rectangularity. *Imp. Dict.*

rectascension (rek-ta-sen'shon), *n.* [< L. *rectus*, right, + *ascensio(n-)*, ascension.] In *astron.*, right ascension.

recti, *n.* Plural of *rectus*.

rectiCruræus (rek"ti-krō-rē'us), *n.*; pl. *rectiCruræi* (-ī). [NL., < L. *rectus*, straight, + *crus* (*crur-*), leg: see *crureus*.] The straight muscle of the front of the thigh; the rectus femoris. *Coues.*

rectifiable (rek'ti-fī-ą-bl), *a.* [< F. *rectifiable* = Sp. *rectificable* = Pg. *rectificavel*; as *rectify* + *-able*.] 1. Capable of being rectified, corrected, or set right: as, a *rectifiable* mistake.—2. In *geom.*, said of a curve admitting the construction of a straight line equal in length to any definite part of the curve.

rectification (rek"ti-fi-kā'shon), *n.* [< OF. (and F.) *rectification* = Pr. *rectificatio* = Sp. *rectificacion* = Pg. *rectificação* = It. *rettificazione*, < ML. *rectificatio(n-)*, < *rectificare*, rectify: see *rectify*.] The act or operation of rectifying. (*a*) The act of correcting, amending, or setting right that which is wrong or erroneous: as, the *rectification* of errors, mistakes, or abuses.

The proper *rectification* of the expression would be to insert the adverb as. *H. Blair*, Rhetoric, xxii.

(*b*) The process of refining a substance by repeated or fractional distillation: it is in this way freed from other substances which are either more or less volatile than

itself, or from non-volatile matters: as, the *rectification* of spirits. The concentration of sulphuric acid in platinum or glass vessels is sometimes (improperly) called *rectification*.

The process of *rectification* is generally done by redistilling, and filtering through alternate layers of woolen blankets, sand, and granulated bone or maple charcoal.
Pop. Sci. Mo., XXIX. 80.

(c) In *geom.*, the determination of a straight line whose length is equal to a given portion of a curve; the finding a formula for the length of the arc of a given curve.—**Rectification of a globe**, in *astron.* and *geog.*, the adjustment of it preparatory to the solution of a proposed problem.

rectified (rek'ti-fīd), *p. a.* [Pp. of *rectify*.] 1. Made right; corrected.

Let us therefore to thyself all the way, pay thyself, and [the] equanimities of thyself, all the way, which is only done right to the soul and in the testimony of a *rectified* conscience.
Donne, Sermons, ix.

2. In *hort.*, developed in a desired direction, as when plain tulips are propagated till they sport into variegated forms.

Some of the progeny "break," that is, produce flowers with the variegation which is so much prized. The flower is then said to be "*rectified*." *Encyc. Brit.*, XII. 279.

rectifier (rek'ti-fī-ėr), *n.* [< *rectify* + *-er*[1].] One who or that which rectifies. (*a*) One who corrects or amends.

Last friend he was to reformation, . . .
Next *rectifier* of wry law.
S. Butler, Hudibras, I. ii. 132.

(*b*) One who refines a substance by repeated distillation or by filtering or any other method, specifically, one who rectifies liquors. (*c*) In the distillation of alcoholic liquors: (1) A vessel or receptacle in which a second distillation is carried on, to condense the liquor and increase its alcoholic strength, or to flavor it by exposing the flavoring substance to the vaporized spirit. (2) A cylindrical vessel continuous with a primary still, in which repeated distillations occur till the alcohol reaches the desired strength. Also called *rectifying column*, and simply *column*. (*d*) An instrument formerly used for indicating the errors of the compass. *Pilkington.*

rectify (rek'ti-fī), *v. t.*; pret. and pp. *rectified*, ppr. *rectifying*. [Early mod. E. *rectifie*, *rectifye*; < OF. (and F.) *rectifier* = Pr. Sp. Pg. *rectificar* = It. *rettificare*, < ML. *rectificare*, make right, rectify, < L. *rectus*, straight (= E. *right*), + *-ficare*, < *facere*, make.] 1. To make right or straight; correct when wrong, erroneous, or false; amend: as, to *rectify* errors, mistakes, or abuses; sometimes applied to persons.

I meant to *rectify* my conscience.
Shak., Hen. VIII., II. 4. 203.

I onlie strive
To *rectifie* abuses which deprive
The Gospell of his propagation
And plentifull encrease.
Times' Whistle (E. E. T. S.), p. 16.

To *rectifie* a common wealth with debauched people is impossible.
Capt. John Smith, Works, II. 106.

When an authentic watch is shown,
Each man winds up and *rectifies* his own.
Suckling, Aglaura, Epil.

This morning I received from him the following letter, which, after having *rectified* some little orthographical mistakes, I shall make a present of to the public.
Addison, Husbands and Wives.

Specifically—2. In *distilling:* (*a*) To remove impurities from (an alcoholic distillate) and raise to a required proof or strength by repeated distillation. As flavoring materials are often added during rectification in the manufacture of gin, cordials, fortified brandy, etc., the term *rectify* has been extended to the performance of these processes. Hence—(*b*) To bring (a spirit) by repeated distillation to the strength required, and at the same time to impart to it the desired flavor. See *rectifier*. —3. In *chemical manuf.* and in *phar.*: (*a*) To separate impurities from (a crystalline body) by dissolving and recrystallizing it, sometimes repeatedly, and sometimes also with intermediate washing of the crystals. (*b*) To raise (a liquid) to a prescribed strength by extraction of some part of its liquid components. Distillation under ordinary atmospheric pressure or in a vacuum, and absorption of water by substances having strong affinity for water, as caustic lime, calcium chlorid, etc., when such substances do not affect the chemical constitution of the substances under treatment, are common processes employed in rectification. (*c*) To remove impurities from (solutions) by filtering them through substances absorbent of dissolved impurities, but non-absorbent of, and chemically inactive upon, the substance to be purified. Of such materials bone-black is a typical example, especially in sugar-refining. (*d*) To purify by one or more resublimations.—4. In *math.*, to determine the length of (a curve, or a part of a curve) included between two limits.—5. In the use of the globes, to place (a globe) in such a position that the solution of a given problem may be effected with it.—**Rectifying developable**, or **rectifying developable surface of a non-plane curve**, a developable surface such that, when it is unrolled into a plane with the curve to which it belongs, the latter is unrolled into a right line: it is perpendicular to the normal and the osculating planes.—**Rectifying edge**, the cuspidal edge of the rectifying developable.—**Rectifying line**, the line common to two consecutive rectifying planes.—**Rectifying plane**, a plane tangent to the rectifying surface.—**To rectify alcoholic liquors.** See def. 2.—**To rectify a sun-dial.** See the quotation.

To rectify the dial (using the old expression, which means to prepare the dial for an observation).
Encyc. Brit., VII. 161.

To rectify the course of a vessel, in *nav.*, to determine its true course from indications of the ship's compass, by correcting the errors of the compass due to magnetic variations and local attractions.—**To rectify the globe**, in *astron.* and *geog.*, to bring the sun's place in the ecliptic on a globe to the brass meridian, or otherwise to adjust it in order to prepare it for the solution of any proposed problem.=Syn. 1. *Improve, Better*, etc. (see *amend*), redress, adjust, regulate.

Rectigradæ (rek-tig'rā-dē), *n. pl.* [NL.: see *rectigrade*.] A group of spiders; the rectigrade spiders. Also *Rectigrada*, *Rectigrades*.

rectigrade (rek'ti-grād), *a.* [< L. *rectus*, straight, + *gradi*, step: see *grade*[1].] Walking straight forward, as a spider; pertaining to the *Rectigradæ:* correlated with *laterigrade*, *saltigrade*, etc.

rectilineal (rek-ti-lin'ē-al), *a.* [Cf. It. *rettilineo* = OF. (and F.) *rectiligne*; < ML. **rectilineus*, having a straight line, < L. *rectus*, straight, right, + *linea*, a line: see *right* and *line*[2], *n.*] Same as *rectilinear*.

rectilineally (rek-ti-lin'ē-al-i), *adv.* Same as *rectilinearly*.

rectilinear (rek-ti-lin'ē-ėr), *a.* [< L. *rectilineus*, rectilineal (see *rectilineal*), + *-ar*[3].] Straight-lined; bounded by straight lines; consisting of a straight line or of straight lines; straight: as, a *rectilinear* figure or course. Also *rectilineal*.

Whenever a ray of light is by any obstacle turned out of its *rectilinear* way, it will never return to the same *rectilinear* way, unless perhaps by very great accident.
Newton, Opticks.

Rectilinear lens, motion, etc. See the nouns.—**Rectilinear muscle.** See *muscle*[1], 2.

rectilinearity (rek-ti-lin-ē-ar'i-ti), *n.* [< *rectilinear* + *-ity*.] The state of being rectilinear. *Coleridge.*

rectilinearly (rek-ti-lin'ē-ėr-li), *adv.* In a rectilinear manner or direction; in a right line.

rectilinearness (rek-ti-lin'ē-ėr-nes), *n.* The quality or condition of being rectilinear. *W. R. Greg*, Misc. Essays, 2d ser., p. 230.

rectilineous† (rek-ti-lin'ē-us), *a.* [= OF. (and F.) *rectiligne* = Sp. *rectilineo* = Pg. *rectilineo* = It. *rettilineo*, < ML. **rectilineus*: see *rectilineal*.] Rectilinear. *Ray*, Works of Creation, i.

rectinerved (rek'ti-nėrvd), *a.* [< L. *rectus*, straight, + *nervus*, nerve, + *-ed*[2].] In *bot.*, having nerves running straight from their origin to the apex or to the margin: said mostly of parallel-nerved leaves.

rection (rek'shon), *n.* [< L. *rectio(n-)*, a leading, guiding, government, direction, < *regere*, pp. *rectus*, rule, govern: see *regent*.] In *gram.*, the influence or power of a word in consequence of which another word in the sentence must have a certain form, in regard to number, case, person, mode, or the like; government.

rectipetality (rek'ti-pe-tal'i-ti), *n.* [< L. *rectus*, straight, + *petere*, seek (see *petition*), + *-al* + *-ity*.] In *bot.*, the inherent tendency of stems to grow in a right line, as indicated by Voechting's experiments with the clinostat. Even parts grown crooked incline to straighten when freed from deflecting influences. This general tendency is modified, however, by an irregularity called *heterauxesis* (which see).

rectirostral (rek-ti-ros'tral), *a.* [Cf. F. *rectirostre*; < L. *rectus*, straight, + *rostrum*, beak, + *-al*.] Having a straight bill or beak, as a bird.

rectischiac (rek-tis'ki-ak), *a.* [< NL. *rectum* + *ischium* + *-ac*.] Same as *ischiorectal*.

rectiserial (rek-ti-sē'ri-al), *a.* [< L. *rectus*, straight, + *series*, a row: see *serial*.] 1. Disposed in a right line; rectilinear or straight, as a row or series of parts.—2. In *bot.*, disposed in one or more straight ranks: specifically used by Bravais, in contrast with *curviserial* (which see), to describe those forms of phyllotaxy in which a second leaf soon stands exactly over any given leaf, and thus all fall into right lines.

rectitic (rek-tit'ik), *a.* [< *rectitis* + *-ic*.] Pertaining to or affected with rectitis.

rectitis (rek-tī'tis), *n.* [NL., < *rectum* + *-itis*.] Inflammation of the rectum.

rectitude (rek'ti-tūd), *n.* [< OF. *rectitude*, *rettitude*, F. *rectitude* = Pr. *rectetut* = Cat. *rectitut* = Sp. *rectitud* = Pg. *rectitude* = It. *rettitudine*, < L. *rectitudo (-in-)*, straightness, uprightness, < *rectus*, straight, = E. *right:* see *right*.] 1. Straightness: as, the *rectitude* of a line. *Johnson.*

Young pines, bent by . . . snowfalls or other accident, in seeking to recover their *rectitude*, describe every graceful form of curve or spiral. *A. B. Alcott*, Tablets, p. 12.

2. Rightness of principle or practice; uprightness of mind; exact conformity to truth, or to the rules prescribed for moral conduct by either divine or human laws; integrity; honesty; justice.

Of the *rectitude* and sincerity of their life and doctrine to judge rightly, wee must judge by that which was to be their rule. *Milton*, Reformation in Eng., i.

Provided they "keep o' the windy side of the law," the great majority are but little restrained by regard for strict *rectitude*. *H. Spencer*, Social Statics, p. 465.

3. Correctness; freedom from error, as of conduct.

Perfectly conscious of the *rectitude* of her own appearance, [she] attributed all this mirth to the oddity of mine. *Goldsmith*, The Bee, No. 2.

=Syn. 2. *Integrity, Uprightness*, etc. (see *honesty*), principle, equity.

recto (rek'tō), *n.* [L. < L. *recto*, abl. of *rectum*, right: see *right*, *n.* 2. For *recto folio*, 'the right page,' opposed to *verso folio*, 'the opposite page': L. *recto*, abl. of *rectus*, right; *folio*, abl. of *folium*, a leaf, sheet: see *folio*.] 1. In *law*, a writ of right, now abolished.—2. In *printing*, the right-hand page of an open book: opposed to the left-hand, *reverso* or *verso*. In books as commonly printed, the odd folios, pages 1, 3, 5, 7, etc., are the rectos; the even folios, pages 2, 4, 6, 8, etc., the reversos.

Junius had seen books of this kind printed by Coster (the beginnings of his labours) on the *rectos* of the leaves only, not on both sides. *Encyc. Brit.*, XXIII. 689.

recto-. In composition, rectal; of the rectum.

rectocele (rek'tō-sēl), *n.* [< NL. *rectum*, rectum, + Gr. *κήλη*, tumor.] Prolapse of the rectovaginal wall through the vagina. Compare *proctocele*.

rectogenital (rek-tō-jen'i-tal), *a.* [< NL. *rectum*, rectum, + L. *genitalis*, genital.] Of or pertaining at once to the rectum and to the genitalia: as, the *rectogenital* chamber.

rector (rek'tor), *n.* [= OF. *retteur*, *recteur*, F. *recteur* = Pr. Sp. *rector* = Pg. *rector*, *reitor* = It. *rettore*, < L. *rector*, a ruler, director, rector, < *regere*, pp. *rectus*, rule: see *regent*.] 1. A ruler or governor. [Rare.]

The *rector* of the vniuersitie called to counsell all the doctors regentes that were that tyme at Tholose.
Hall, Hen. VIII., an. 22.

Reason (which in right should be
The special *rector* of all harmony).
B. Jonson, Poetaster, v. 1.

Who shall be the *rectors* of our daily rioting?
Milton, Areopagitica (ed. Hales), p. 24.

2. In the *Ch. of Eng.*, a clergyman who has the charge of a parish and full possession of all the rights and privileges attached thereto. He differs from the *vicar* in that the latter is entitled only to a certain proportion of the ecclesiastical income specially set apart to the vicarage. The latter, again, differs from the *curate* (in the narrower or popular sense of that word), who is subject to the incumbent, whether rector or vicar, and the amount of whose salary is determined not by the law, but by the patron of the benefice, or by the incumbent employing him. Abbreviated *Rect.*

The bishops that are spoken of in the time of the primitive Church, all such as parsons or *rectors* of parishes are with us. *Hooker*, Eccles. Polity, vii. 13.

3. In the United States, a clergyman in charge of a parish in the Protestant Episcopal Church. —4. In the *Rom. Cath. Ch.*, an ecclesiastic in charge of a congregation, a college, or a religious house; specifically, the superior of a Jesuit seminary or college.

5. The chief elective officer of some universities, as in France and Scotland. In Scotland *rector* is also the title of the head master of an academy or important public school; in England, of the heads of Exeter and Lincoln colleges, Oxford. In the United States it is a title assumed by the principals of some private schools: as, the *rectors* of St. John's and St. Paul's. In Germany *rector* is the title of the head of a higher school; the chief officer of a university is styled *rector magnificus* or, when the prince of the country is the titular head, *rector magnificentissimus*.

The *rector* . . . in the first instance was head of the faculty of arts. . . . It was not until the middle of the 14th century that the *rector* became the head of the collective university [of Paris]. *Encyc. Brit.*, XXIII. 835.

6. The presiding officer or chairman of certain gilds and associations.

Many artists . . . as *rectors* represented the greater and lesser art guilds in the city government [of Siena].
C. C. Perkins, Italian Sculpture, p. 51.

Lay rector, in the *Ch. of Eng.*, a layman who receives and possesses the rectorial tithes of a benefice. *Lee*, Glossary. —**Missionary rector**, in the *Rom. Cath. Ch.*, a priest

appointed by the bishop to certain parishes in England, in the United States to the charge of any parish.—Rector of a Board of Trustees, the presiding officer.

Thackeray, Vanity Fair, xlviii.

Also *rectrix*.

rectorial (rek-tō'ri-al), *a.* [< *rector* + *-ial*.] Of or pertaining to a rector or a rectory.—**Rectorial tithes**, tithes payable to the rector, ordinarily those of corn, hay, and wood. Also *great tithes*.

The tithes of many things, as wood in particular, are in some parishes *rectorial*, and in some vicarial *tithes*.
Blackstone, Com., I. xi.

rectorship (rek'tor-ship), *n.* [< *rector* + *-ship*.] 1. The office or rank of a rector.—2†. Rule; direction; guidance.

Why, had your bodies
No heart among you? or had you tongues to cry
Against the *rectorship* of judgement?
Shak., Cor., ii. 3. 213.

rectory (rek'tor-i), *n.*; pl. *rectories* (-iz). [< OF. *rectorie* = Sp. *rectoria* = Pg. *reitoria* = It. *rettoria*, < ML. *rectoria*, the office or rank of a rector, < L. *rector*, a rector: see *rector*.] 1. A parish church, parsonage, or spiritual living, with all its rights, tithes, and glebes.—2. A rector's mansion or parsonage-house.

The *Rectory* was on the other side of the river, close to the church, of which it was the fitting companion.
George Eliot, Felix Holt, xxiii.

rectoscope (rek'tō-skōp), *n.* [< NL. *rectum*, rectum, + Gr. *σκοπεῖν*, view.] A speculum used for rectal examination.

rectostenosis (rek″tō-stē-nō'sis), *n.* [NL., < *rectum* (see *rectum*) + Gr. *στένωσις*, stricture: see *stenosis*.] Stricture of the rectum.

rectotomy (rek-tot'ō-mi), *n.* [< NL. *rectum*, rectum, + Gr. *-τομία*, < *τέμνειν*, *ταμεῖν*, cut.] The operation for dividing a rectal stricture.

recto-urethral (rek″tō-ū-rē'thral), *a.* Pertaining to the rectum and to the urethra: as, the *recto-urethral* space (a vertical triangular interval between the membranous urethra above and the rectum below, with the apex at the prostate gland).—**Recto-urethral fistula**, a fistula connecting the rectum and the urethra.

recto-uterine (rek-tō-ū'te-rin), *a.* Of or belonging to the rectum and the uterus.—**Recto-uterine folds** or **ligaments**, semilunar folds of peritoneum passing one on each side from the rectum to the posterior upper surface of the uterus, forming the lateral walls of the rectovaginal pouch.—**Recto-uterine fossa**, the space between the uterus and the rectum above the borders of the recto-uterine folds.—**Recto-uterine pouch**. See *pouch*.

rectovaginal (rek-tō-vaj'i-nal), *a.* Of or belonging to the rectum and the vagina.—**Rectovaginal fistula**, a fistulous opening between the rectum and the vagina.—**Rectovaginal hernia**. Same as *rectocele*.—**Rectovaginal pouch**. See *pouch*.—**Rectovaginal septum**, the tissues separating the rectum and the vagina.

rectovesical (rek-tō-ves'i-kal), *a.* [< NL. *rectum* + E. *vesical*.] Of or belonging to the rectum and the bladder.—**Rectovesical fascia**. See *fascia*.—**Rectovesical folds**, the posterior false ligaments of the bladder, lunate folds of peritoneum between the bladder and the rectum in the male. Also called *semilunar folds of Douglass*.—**Rectovesical fossa**, the pouch of peritoneum lying between the bladder and the rectum.—**Rectovesical pouch**. See *pouch*.

rectress, *n.* See *rectoress*.

rectrices, *n.* Plural of *rectrix*.

rectricial (rek-trish'al), *a.* [< NL. *rectrix* (*rectric-*), a tail-feather (see *rectrix*), + *-ial*.] Of or pertaining to rectrices.

rectrix (rek'triks), *n.*; pl. *rectrices* (rek-trī'sēz). [< L. *rectrix*, directress, governess, mistress, fem. of *rector*, ruler, governor: see *rector*.] 1. Same as *rectoress*.

A late queen *rectrix* prudently commanded.
Sir T. Herbert, Travels in Africa. (*Latham*.)

2. In *ornith.*, a tail-feather; one of the long or large quill-feathers of a bird's tail: so called from its use in directing or steering the course of a bird in flight, like a rudder. The rectrices are comparable to the similar large flight-feathers of the wing, called *remiges*. In the *Saururæ*, or Jurassic birds with long lizard-like bony tail, the rectrices are biserially or distichously arranged in a row on each side of the caudal vertebræ. In all modern birds they are set together in a fan-like manner upon the pygostyle. (See *Eurhipidura*.) In a few birds they are rudimentary, as in grebes. The most frequent number by far is twelve, which prevails (with few anomalous exceptions) throughout the great order *Passeres*, and also in very many other birds of different orders. In many picarian birds the number is ten; in a very few eight. In various waterbirds the rectrices run up to higher numbers, twenty-four being probably the maximum. There is normally always an even number, these feathers being paired. In size, shape, and texture they are endlessly varied, giving rise to all the different shapes a bird's tail presents.

rectum (rek'tum), *n.*; pl. *recta* (-tā). [= F. *rectum* = Sp. Pg. *recto* = It. *retto*, < NL. *rectum*, abbr. of L. *rectum intestinum*, the straight intestine: *rectum*, neut. of *rectus*, straight: see *right*.] In *anat.* and *zoöl.*, a terminal section of the intestine, ending in the anus: so called from its comparatively straight course in man; the lower bowel: more fully called *intestinum rectum*. In man the rectum is the continuation of the sigmoid flexure of the colon, beginning about opposite the promontory of the sacrum, a little to the left side, and running through the pelvis to the anus. It is supported by a proper duplication of peritoneum, the mesorectum, and other fasciæ. Its structure includes well-developed longitudinal and circular muscular fibers, the latter being aggregated into a stout internal sphincter muscle near the lower end. In animals whose colon has no special sigmoid flexure there is no distinction of a rectum from the rest of the large intestine; and the term applies only to any given or taken terminal section of the bowel, of whatever character. In mammals above monotremes the rectum is entirely shut off from the urogenital organs, ending in a distinct anus; but in most animals it ends in a cloaca common to the digestive and urogenital systems. The rectum receives the refuse of digestion, and retains the feces until voided. See cuts under *intestine*, *peritoneum*, *Pulmonata*, *Pycnogonida*, *Appendicularia*, and *Blattidæ*.—**Columns of the rectum**. See *column*.

rectus (rek'tus), *n.*; pl. *recti* (-tī). [NL., abbr. of L. *rectus musculus*, straight muscle: *rectus*, straight: see *right*.] In *anat.*, one of several muscles so called from the straightness of their course, either in their own axis or in the axis of the body or part where they lie.—**Recti capitis**, five pairs of small muscles, the anticus major and minor, posticus major and minor, and the lateralis, all arising from the lower part of the occipital bone and inserted into the transverse processes of the upper cervical vertebræ.—**Rectus abdominis externus**. Same as *pyramidalis(a)*.—**Rectus abdominis internus**, the straight muscle of the abdomen, in the middle line in front, mostly inclosed in an aponeurotic sheath formed by the tendons of other abdominal muscles, usually intersected by several transverse tendons, and extending from the pubis to the sternum, in some animals to the top of the sternum.—**Rectus femoris**, the anterior part of the quadriceps extensor. It is a fusiform, bipennate muscle, arising by two heads from the ilium, and inserted into the base of the patella. See cut under *muscle*1.—**Rectus lateralis**, the lateral straight muscle of the head, arising from the transverse process of the axis, and inserted into the jugular process of the occipital.—**Rectus medialis oculi**. Same as *rectus oculi internus*.—**Rectus oculi externus, inferior, internus, superior**, the external, inferior, internal, superior straight muscle of the eyeball, turning the ball outward, downward, inward, or upward. See cut under *eyeball*.—**Rectus sternalis**, in man, an occasional slip lying lengthwise upon the sternum, representing the prolongation upward of the rectus abdominis externus, as is normal in many animals.—**Rectus thoracis**, in man, an occasional slip, similar to the last, but lying deep-seated, supposed to represent the continuation upward of the rectus abdominis internus.

recubant (rek'ū-bant), *a.* [< L. *recuban(t-)s*, ppr. of *recubare*, lie back: see *recubation*.] Lying down; reclining; recumbent.

recubation (rek-ū-bā'shon), *n.* [< L. *recubare*, pp. *recubatus*, lie upon the back, lie back, recline: see *recumbent*.] The act of lying down or reclining. [Rare.]

The French and Italian translations, expressing neither position of session or *recubation*, do only say that he placed himself at the table. *Sir T. Browne*, Vulg. Err., v. 6.

recueil (rē-kėy'), *n.* [F., a collection: see *recull*2.] A collection of writings.

reculet, *v.* and *n.* An obsolete form of *recoil*1.

recumbt (rē-kum'), *v. i.* [< L. *recumbere*, lie back, recline: see *recumbent*.] To recline; lean; repose.

The king makes an overture of pardon and favour unto you, upon condition that any one of you will *recumbe*, rest, lean upon, or roll himself upon the person of his son.
Barrow, Works, II. iv.

recumbence (rē-kum'bens), *n.* [< *recumben(t)* + *-ce*.] Same as *recumbency*.

A *recumbence* or reliance upon Christ for justification and salvation. *Lord North*, Light to Paradise, p. 54.

recumbency (rē-kum'ben-si), *n.* [As *recumbence* (see *-cy*).] 1. The state of being recumbent; the posture of reclining, leaning, or lying.

But relaxation of the languid frame,
By soft *recumbency* of outstretched limbs,
Was bliss reserved for happier days.
Cowper, Task, i. 82.

2. Rest; repose; idleness.

When the mind has been once habituated to this lazy *recumbency* and satisfaction, . . . it is in danger to rest satisfied there. *Locke*.

3. The act of reposing or resting in confidence.

There are yet others [Christians] who hope to be saved by a bare act of *recumbency* on the merits of Christ.
Bp. Atterbury, Sermons, II. xiv.

recumbent (rē-kum'bent), *a.* [< L. *recumben(t-)s*, ppr. of *recumbere*, lie back, recline, < *re-*, back, + *cubare*, lie: see *cumbent*.] 1. Leaning; reclining.

The Roman *recumbent* . . . posture in eating was introduced after the first Punic war.
Arbuthnot, Ancient Coins, p. 134.

2. Reposing; inactive; idle; listless.

What smooth emollients in theology
Recumbent virtue's downy doctors preach!
Young, Night Thoughts, iv. 644.

3. In *zoöl.* and *bot.*, noting a part that leans or reposes upon anything.—**Recumbent hairs**, in *entom.*, hairs that lie partly against the surface, but are not pressed close to it.

recumbently (rē-kum'bent-li), *adv.* In a recumbent manner or posture.

recuperability (rē-kū″pe-ra-bil'i-ti), *n.* [< *recuperable* + *-ity* (see *-bility*).] Ability to recuperate; power of recuperation. [Rare.]

A state of almost physiological *recuperability*.
Alien. and Neurol., VII. 463.

recuperable (rē-kū'pe-ra-bl), *a.* [< ME. *recuperable*, < OF. *recuperable* = Sp. *recuperable* = Pg. *recuperavel*, < ML. **recuperabilis*, < L. *recuperare*, recover, recuperate: see *recuperate*, *recover*2. Cf. *recoverable*.] Recoverable; that may be regained.

And hard it is to ravysshe a treasour
Which of nature is not *recuperable*.
Lydgate, The Tragedies.

Therfore, if thou yet by counsaile arte *recuperable*,
Flee thou from idlenesse and alway be stable.
Sir T. Elyot, The Governour, i. 13.

recuperate (rē-kū'pe-rāt), *v.*; pret. and pp. *recuperated*, ppr. *recuperating*. [< L. *recuperatus*, pp. of *recuperare*, *reciperare* (> It. *recuperare* = Sp. Pg. *recuperar* = F. *récupérer*), get again, regain, recover, revive, restore, ML. also intr., revive, convalesce, recover: see *recover*2, the older form in E.] I. *trans.* 1. To recover; regain: as, to *recuperate* one's health or spirits.—2. To recoup. [Rare.]

More commonly he [the agent] paid a fixed sum to the clergyman, and *recuperated* himself by a grinding tyranny of the tenants. *Lecky*, Eng. in 18th Cent., xvi.

Greene, James the Fourth, ii.

recurelesslyt (rē-kūr'les-li), *adv.* So as not to be cured.

Recurelesly wounded with his own weapons.
Greene, Groats-worth of Wit (Works, ed. Dyce, Int., p. xxvi.).

recurrence (rē-kur'ens), *n.* [= F. *recurrence*; as *recurren(t)* + *-ce*.] 1. The act of recurring, or the state of being recurrent; return.

Atavism, which is the name given to the *recurrence* of ancestral traits, is proved by many and varied facts. *H. Spencer*, Prin. of Biol., § 83.

2. Resort; the having recourse.

In the use of this, as of every kind of alleviation, I shall insensibly go on from a rare to a frequent *recurrence* to the dangerous preparations. *Jer. Taylor.*

recurrency (rē-kur'en-si), *n.* [As *recurrence* (see *-cy*).] Same as *recurrence*. *Bailey.*

recurrent (rē-kur'ent), *a.* and *n.* [< OF. *recurrent*, F. *récurrent* = Pg. *recurrente* = It. *ricorrente*, < L. *recurren(t-)s*, ppr. of *recurrere*, run back, return, recur: see *recur*.] I. *a.* 1. Recurring; returning from time to time; reappearing; repeated: as, *recurrent* pains of a disease. *Prof. Blackie.*

The music would swell out again, like chimes borne onward by a *recurrent* breeze.
George Eliot, Mill on the Floss, v. 1.

Nature, with all her changes, is secure in certain noble *recurrent* types. *Stedman*, Vict. Poets, p. 150.

2. In *crystal.*, noting a crystal which exhibits an oscillatory combination of two sets of planes. See *oscillatory*.—3. In *anat.*, turned back in its course, and running in a direction the opposite of its former one: specifically noting the inferior laryngeal branch of the pneumogastric. See the following phrases.—4. In *entom.*, turning back toward the base: as, a *recurrent* process.—**Posterior interosseous recurrent artery**, a branch of the posterior interosseous artery which gives off branches in the region of the olecranon which anastomose with the superior profunda, posterior ulnar recurrent, and radial recurrent arteries.—**Radial recurrent artery.** See *radial*.—**Recurrent arteries of the deep palmar arch**, branches which pass from the upper side of the palmar arch and anastomose with branches of the anterior carpal arch.—**Recurrent branch of the ophthalmic nerve**, a small branch arising near the Gasserian ganglion, and running backward across the fourth nerve to be distributed in the tentorium.—**Recurrent fever.** See *fever*[1].—**Recurrent fibroid tumor.** Same as *small spindle-cell sarcoma*. See *sarcoma*.—**Recurrent laryngeal.** See *laryngeal*.—**Recurrent mania.** Same as *periodical mania*.—**Recurrent nerve.** Same as *meningeal nerve* (which see, under *nerve*).—**Recurrent nerve of the inferior maxillary**, a branch from the inferior maxillary as it passes through the foramen ovale, which passes back into the skull through the foramen spinosum, giving rise to two branches, one going to the great wing of the sphenoid, the other to the mastoid cells.—**Recurrent nerve of the superior maxillary**, a branch given off from the superior maxillary near its origin, which passes to the dura mater and middle meningeal artery.—**Recurrent nervure** of an insect's wing. (*a*) A branch which is more or less turned toward the base of the wing, in a direction contrary to the nervure from which it arises. Many of these recurrent nervures are distinguished. (*b*) A vein of the wing which, after running toward the apex, is bent or curved back toward the base, as in many *Coleoptera*.—**Recurrent pulse.** See *pulse*[1].—**Recurrent radial artery**, an artery which arises from the radial artery near its origin, and anastomoses with the anterior terminal branch of the superior profunda.—**Recurrent sensibility**, the sensibility manifested by the anterior root of a spinal nerve. This is due to fibers derived from the posterior root.—**Recurrent tibial arteries.** (*a*) The *posterior*, arising near the perforation of the interosseous membrane, and anastomosing with the lower articular popliteal arteries. (*b*) The *anterior*, a larger branch, arising just behind the perforation of the interosseous membrane, and anastomosing with the lower articular popliteal arteries.—**Recurrent ulnar arteries.** (*a*) The *anterior*, arising from the upper part of the ulnar, and joining the anastomotic branch of the brachial. (*b*) The *posterior*, arising a little lower than the anterior (though they often have a common origin), and communicating with the inferior profunda, the anastomotic, and posterior interosseous recurrent.

II. *n.* Any recurrent nerve or artery.

recurrently (rē-kur'ent-li), *adv.* In a recurrent manner; with recurrence.

For a long time I had under observation a middle-aged man who, throughout his life, has *recurrently* been tormented by this parasite.
B. W. Richardson, Preventive Medicine, p. 563.

recurring (rē-kėr'ing), *p. a.* Returning again.—**Recurring continued fraction.** See *continued fraction*, under *continued*.—**Recurring decimal.** See *decimal*.—**Recurring series**, in *alg.*, a series in which the coefficients of the successive powers of x are formed from a certain number of the preceding coefficients according to some invariable law. Thus, $a + bx + (a + b)x^2 + (a + 2b)x^3 + (2a + 3b)x^4 + (3a + 5b)x^5 + \ldots$ is a recurring series.—**Recurring utterances**, a form of aphasia in which the patient can repeat only the word last uttered when taken ill.

recursant (rē-kėr'sant), *a.* [< L. *recursan(t-)s*, ppr. of *recursare*, run or hasten back, come back, return, recur, freq. of *recurrere*, run back, recur: see *recur*.] In *her.*, turned in a way contrary to the usual position, or with the back displayed instead of the front. Thus, an eagle *recursant* shows the back of the bird with the wings crossed.—**Displayed recursant.** See *displayed*.

recursion (rē-kėr'shon), *n.* [< L. *recursio(n-)*, a running back, return, < *recurrere*, pp. *recursus*, run back, return: see *recur*.] Return. [Rare.]

When the receiver was full of air, the included pendulum continued its *recursions* about fifteen minutes. *Boyle*, Works, I. 61.

recurvant (rē-kėr'vant), *a.* [< L. *recurvan(t-)s*, ppr. of *recurvare*, bend or curve backward, turn back: see *recurve*.] In *her.*, of a serpent, coiled up, with the head projecting from the folds; bowed-embowed.

recurvate (rē-kėr'vāt), *v. t.* [< L. *recurvatus*, pp. of *recurvare*, bend backward, curve back: see *recurve*.] Same as *recurve*. *Imp. Dict.*

recurvate (rē-kėr'vāt), *a.* [< L. *recurvatus*, pp.: see *recurvate*, *v.*] In *bot.* and *zoöl.*, recurved.

recurvation (rē-kėr-vā'shon), *n.* [< *recurvate* + *-ion*.] The act or process of recurving; the state of being curved up or back: opposed to *decurvation*: as, the *recurvation* of a bird's bill. Also *recurvature*, *recurvity*.

By a serpentine and trumpet *recurvation*, it [the windpipe] ascendeth again into the neck.
Sir T. Browne, Vulg. Err., iii. 27.

recurvature (rē-kėr'vū-tūr), *n.* [< *recurvate* + *-ure*.] Same as *recurvation*.

recurve (rē-kėrv'), *v.* [= OF. *recorber*, *recurber*, *recourber*, F. *recourber* = Pr. Pg. *recurvar*, < L. *recurvare*, bend or curve backward, turn up or back, < *re-*, back, + *curvare*, curve: see *curve*, *v.*] I. *trans.* To curve back; turn backward. Also *recurvate*.

II. *intrans.* To be recurved.

recurved (rē-kėrvd'), *p. a.* 1. In *bot.*, curved back or downward: as, a *recurved* leaf, petal, etc.—2. In *zoöl.*, bent upward: the opposite of *decurved*: as, the *recurved* beak of the avoset.

recurviroster (rē-kėr-vi-ros'tėr), *n.* [< NL. *recurvirostrus*, < L. *recurvus*, bent or curved back, crooked (see *recurvous*), + *rostrum*, beak, bill: see *rostrum*.] A bird of the genus *Recurvirostra*; an avoset.

Recurvirostra (rē-kėr-vi-ros'trā), *n.* [NL., fem. of *recurvirostrus*: see *recurviroster*.] A genus of precocial limicoline grallatorial birds, type of the family *Recurvirostridæ*, having a long and very slender depressed and recurved bill, extremely long slender legs, and four toes, the three front ones of which are webbed; the avosets. The body is depressed, and the under parts are clothed with thick plumage like a duck's, so that the birds swim with ease by means of their webbed feet. See *avoset*. Also called *Avocetta*.

recurvirostral (rē-kėr-vi-ros'tral), *a.* [As *recurviroster* + *-al*.] Having a recurved bill, as an avoset; belonging to the genus *Recurvirostra*; pertaining to a recurviroster.

Recurvirostridæ (rē-kėr-vi-ros'tri-dē), *n. pl.* [NL., < *Recurvirostra* + *-idæ*.] A family of wading birds with long and slender bill and legs, typified by the genus *Recurvirostra*, and divided into the *Recurvirostrinæ* and *Himantopodinæ*; the avosets and stilts.

Recurvirostrinæ (rē-kėr″vi-ros-trī'nē), *n. pl.* [NL., < *Recurvirostra* + *-inæ*.] A subfamily of *Recurvirostridæ*, having the characters of the genus *Recurvirostra*, as distinguished from those of *Himantopus*, and including only the avosets.

recurvity (rē-kėr'vi-ti), *n.* [< L. *recurvus*, bent back (see *recurvous*), + *-ity*.] Same as *recurvation*. *Bailey.*

recurvo-patent (rē-kėr'vō-pat″ent), *a* [< L. *recurvus*, bent back, + *patent(t-)s*, open, spreading: see *patent*[1].] In *bot.*, bent back and spreading.

recurvous (rē-kėr'vus), *a.* [= Pg. *recurvo* = It. *ricurvo*, < L. *recurvus*, bent or curved back, < *re-*, back, + *curvus*, curve: see *curve*.] Bent backward.

recusance (rek'ū-zans), *n.* [< *recusan(t)* + *-ce*.] Same as *recusancy*.

The parliament now passed laws prohibiting Catholic worship, and imposing a fine of one shilling, payable each Sunday, for *recusance*.
W. S. Gregg, Irish Hist. for Eng. Readers, p. 54.

recusancy (rek′ū-zan-si), *n.* [As *recusance* (see *-cy*).] 1. Obstinate refusal or opposition.

It is not a *recusancy*, for I would come; but it is an excommunication, I must not.
Donne, Devotions, III., Expostulation.

If any one, or two, or ten, or twenty members of congress should manifest symptoms of *recusancy*, . . . the weird sisters of ambitious hearts shall play before their eyes images of foreign missions, and departments, and benches of justice. *R. Choate*, Addresses, p. 339.

2. The state of being a recusant.

The papists made no scruple of coming to our churches; *recusancy* was not then so much as a chrisom, not an embryo. *Jer. Taylor*, Works (ed. 1835), II. 98.

There is also an inferior species of *recusancy* (refusing to make the declaration against popery enjoined by statute 30 Car. II. st. 2, when tendered by the proper magistrate). *Blackstone*, Com., IV. iv.

We shall see that mere *recusancy* was first made punishable, later on in the reign, by the Second Act for Uniformity of Edward.
R. W. Dixon, Hist. Church of Eng., xv., note.

3. The tenets of the recusants, or adherence to those tenets.

The penalties of *recusancy* were particularly hard upon women, who . . . adhered longer to the old religion than the other sex. *Hallam*, Const. Hist., vii., note.

recusant (rek′ū-zant or rē-kū′zant), *a.* and *n.* [< OF. *recusant*, F. *récusant* = Sp. Pg. *recusante* = It. *ricusante*, < L. *recusan(t-)s*, ppr. of *recusare*, reject, object: see *recuse*.] I. *a.* Obstinate in refusal; specifically, in *Eng. hist.*, refusing to attend divine service in Anglican churches, or to acknowledge the ecclesiastical supremacy of the crown.

No *recusant* lord might have a vote in passing that act.
Clarendon.

II. *n.* 1. One obstinate in refusing; one who will not conform to general opinion or practice.

The last rebellious *recusants* among the family of nations *De Quincey.*

He that would not take the oath should be executed, though unarmed; and the *recusants* were shot on the roads, . . . or as they stood in prayer.
Bancroft, Hist. U. S., II. 411.

2. Specifically, in *Eng. hist.*, one who refused to attend divine worship in Anglican churches, or to acknowledge the ecclesiastical supremacy of the crown. Heavy penalties were inflicted on such persons, but they pressed far more lightly on the simple recusant or nonconformist than on the Roman Catholic recusant, the chief object being to secure national unity and loyalty to the crown, in opposition to papal excommunications, which declared British subjects absolved from their allegiance (as in 1570), and to plots against the government. The name *recusant*, though legally applied to both Protestants and Roman Catholics, was in general given especially to the latter.

As well those restrained . . . as generally all the papists in this kingdom, not any of them did refuse to come to our church, and yield their formal obedience to the laws established. And thus they all continued, not any one refusing to come to our churches, during the first ten years of her Majesty's [Queen Elizabeth's] government. And in the beginning of the eleventh year of her reign, Cornwallis, Bedingfield, and Silyarde were the first *recusants* they absolutely refusing to come to our churches. And until they in that sort began, the name of *recusant* was never heard of amongst us.
Sir Edward Coke (in 1607), in Blunt, Annotated Book of [Common Prayer, p. 24.

recusation (rek-ū-zā′shon), *n.* [< OF. *recusation*, F. *récusation* = Pr. *recusation* = Sp. *recusacion* = Pg. *recusação* = It. *ricusazione*, < L. *recusatio(n-)*, a declining, refusal, objection, protest, also nausea, rejection, < *recusare*, pp. *recusatus*, object, decline, reject: see *recuse*.] In *law*, the interposition of an objection or challenge for cause to a judge or arbitrator, or to an expert appointed by a court; also, the objection or challenge so presented.

He [Bonner], to deface his Authority (as he thought), did also then exhibit in writing a *Recusation* of the Secretaries Judgment against him.
Foxe, Martyrs, II. 35, an. 1549.

recusative (rē-kū′zā-tiv), *a.* [< *recuse* + *-ative*.] Tending or prone to recuse or refuse; refusing; denying; negative. [Rare.]

The act of the will produces material and permanent events; it is acquisitive and effective, or *recusative* and destructive, otherwise than it is in any other faculties.
Jer. Taylor, Rule of Conscience, IV. i. 1.

recuse (rē-kūz′), *v. t.*; pret. and pp. *recused*, ppr. *recusing*. [< OF. *recuser*, F. *récuser* = Pr. Sp. Pg. *recusar* = It. *ricusare*, < L. *recusare*, object, decline, reject, refuse, protest against, plead in defense, < *re-*, back, + *causa*, a cause: see *cause*. Cf. *accuse*.] To refuse; reject; specifically, in *law*, to reject or challenge (a judge or juror) as disqualified to act.

Yet she [the queen] nevertheless persisting in her former wilfulness and in her Appeal, which also by the said Judges was likewise *recused*, incontinently departed out of the Court. *Bp. Burnet*, Records, I. ii., No. 28.

A judge may proceed notwithstanding my appeal, unless I *recuse* him as a suspected judge. *Ayliffe*, Parergon.

recussion (rē-kush′on), *n.* [< L. *recutere*, pp. *recussus*, strike back, beat back, etc., < *re-*, back, + *quatere*, strike, shake: see *quash*[1]. Cf. *concussion*, *discussion*, *percussion*.] The act of beating back. *Bailey.*

red[1] (red), *a.* and *n.* [< ME. *red*, *reed*, *rede*, earlier *read*, *rood*, < AS. *rēad* = OS. *rōd* = OFries. *rād* = D. *rood* = MLG. *rōt*, LG. *rod* = OHG. The long vowel remains, however, in the surnames *Read*, *Reade*, *Reed*, *Reid*, which represent old forms of the adj., and the existence of which as surnames explains the almost total absence of the expected surname *Red*, parallel to *Black*, *Brown*, *White*, etc. As a noun, cf. ME. *rede*, redness, = OHG. *rōti*, G. *röthe*, redness, red; from the adj.] I. *a.* 1. Of a bright, warm color resembling that of blood or of the highest part of the primary rainbow. See II.

Dropes *rede* as ripe cherrees,
That fro his flesshe gan lave.
Holy Rood (E. E. T. S.), p. 217.

The ladye blushed scarlette *redde*,
And fette a gentill sighe.
Sir Cauline (Child's Ballads, III. 181).

Your colour, I warrant you, is as *red* as any rose.
Shak., 2 Hen. IV., ii. 4. 28.

2. Ultra-radical; revolutionary; violent: from the use of a red flag as a revolutionary emblem: as, a *red* republican.

Ev'n tho' thrice again
The *red* fool-fury of the Seine
Should pile her barricades with dead.
Tennyson, In Memoriam, cxxvii.

The Social Democratic Federation has degenerated into a *red* Anarchist organization. *The Nation*, XLVII. 450.

Black-breasted red game. See *game*[1].—**Neither flesh, fowl, nor good red herring**, nondescript; lacking distinctive character; neither one thing nor another: same as *neither hay nor grass*.—**Order of the Red Eagle.** See *eagle*.—**Red adder.** Same as *copperhead*, 1. *Bartlett.*—**Red admiral.** See *admiral*, 5.—**Red algæ**, red or purplish seaweeds constituting the class *Florideæ*. Also known as the *Rhodosporeæ* and *Rhodospermeæ*. See *Rhodosporeæ* and *Algæ*.—**Red ant**, a small ant of a red color, as Pharaoh's ant and some similar species. See cut under *Monomorium*.—**Red antimony.** Same as *kermesite*.—**Red arsenic.** Same as *realgar*.—**Red ash, band-fish, bark, bay.** See the nouns.—**Red bat**, the common New York bat, *Lasiurus* or *Atalapha noveboracensis*, a small reddish bat of wide distribution in North America, and one of the most abundant in eastern parts of the United States. It is rather larger than the brown bat, *Vespertilio subulatus*, and easily recognized by its coloration and the densely furry interfemoral membrane.—**Red bead-vine.** See *Rhynchosia*.—**Red bear-cat**, the panda or wah. See cut under *panda*.—**Red beds**, a conspicuous formation in the Rocky Mountains; a series of deep-red, sandy, gypsiferous strata lying upon the Carboniferous, and generally considered to be of Triassic age. They are often eroded into fantastic and picturesque forms.—**Red beech, beefwood, birch, bird's-eye.** See the nouns.—**Red body**, in *ichth.*, an aggregation of capillaries forming a gland-like body.

These tufts of radiating capillaries are much localized at various places, as in Docidæ; or the tufts are so aggregated as to form gland-like *red bodies*, the capillaries reuniting into larger vessels, which again ramify freely round the border of the *red body*.

II. *n.* 1. A color more or less resembling that of blood or the lower end of the spectrum. *Red* is one of the most general color-names, and embraces colors ranging in hue from rose aniline to scarlet iodide of mercury and red lead. A red yellower than vermilion is called *scarlet;* one much more purple is called *crimson*. A very dark red, if pure or crimson, is called *maroon;* if brownish, *chestnut* or *chocolate*. A pale red—that is, one of low chroma and high luminosity—is called a pink, ranging from rose-pink, or pale crimson, to salmon-pink, or pale scarlet.

2. A red pigment. The most useful reds for painting are carmine, obtained from the cochineal-insect; the lakes and madders, of vegetable origin; vermilion, chrome-red, Indian red, and burnt sienna.

3. An object of a red color, as wine, gold, etc.

> Now kepe yow fro the whyte and fro the *rede*,
> And namely fro the whyte wyn of Lepe,
> That is to selle in Fish strete or in Chepe.
> *Chaucer*, Pardoner's Tale, l. 100.

> No pint of white or *red*
> Had ever half the power to turn
> This wheel within my head.
> *Tennyson*, Will Waterproof.

4. Specifically, a red cent. See under I. [Slang, U. S.]—5. A red republican (which see, under *republican*).—6. *pl.* The catamenial discharges; menses.—**Adrianople red.** Same as *Turkey red.*—**Alizarin red,** in *leather-manuf.*, a pale flesh-color produced by rubbing the cleansed and trodden skins with a solution of alizarin or extract of madder in weak soda-lye, and rinsing in water. *C. T. Davis*, Leather, p. 735.—**Aniline red.** Same as *fuchsin.*—**Anisol red,** a coal-tar color of the oxy-azo group, formerly used in dyeing silk and wool, but not now a commercial product.—**Antimony red,** a sulphid of antimony suggested as a pigment, but not permanent; used for coloring rubber and the heads of friction-matches.—**Aurora red,** a light red, like that of the spinel ruby.—**Barwood red.** See *barwood.*—**Bengal red,** a coal-tar color used in dyeing. It produces brilliant reds similar to those of eosin, but more blue in tone. It is the alkali salt of tetraiodotrichloro-fluorescein. Also called *rose bengale.*—**Bristol red,** a dye for stuffs, in favor in the sixteenth century.

> Her kyrtel *Brystow red.*
> *Skelton*, Elynour Rummyng, l. 70.

Brown red. Same as *red ocher* (which see, under *ocher*).—**Cadmium red,** an artists' pigment composed of the cadmium sulphid. It is more orange in hue than vermilion, but is very brilliant and permanent.—**Chica or chico red.** See *chico*, 1.—**Cobalt red,** a phosphate of cobalt sometimes used as an artists' color. It is durable, but poor in hue.—**Congo red,** a coal-tar color used in dyeing. It may be applied to cotton and wool, producing a bright scarlet fast to soap, but not to light or acids. It is a sodium salt of a tetrazo dye from benzidine.—**Corallin red,** a coal-tar color used in dyeing, produced by treating aurin with ammonia at a high temperature. It is used by calico- and woolen-printers, but is quite fugitive. See *coralline*, 3.—**English red.** Same as *Venetian red.*—**Fast red,** a coal-tar color used in dyeing a garnet-red on woolen. It is of complex composition, and belongs to the azo-group. Also known in commerce as *rocellin, orseillin, rubidin,* and *rauracienne.*—**French red,** a coal-tar color used in dyeing, being a mixture of claret-red and naphthol orange.—**Indian red,** an important pigment used by artists and house-painters. Originally it was a natural earth rich in oxid of iron, brought from India. It is now prepared artificially by heating iron sulphate in a reverberatory furnace. The sulphuric acid is driven off, and the iron is immediately oxidized to the red oxid. The color varies from a purple to a light-yellowish red, according to the temperature at which the process is conducted. It is a color of much body, and is very permanent. Also called *Indian ocher.*—**Jewelers' red.** See *jeweler.*—**Light red,** a light yellowish-red oxid of iron prepared similarly to Indian red. It is also sometimes made by calcining Oxford ocher. It is used as an artists' pigment.—**Madder-red.** See *madder*[1].—**Magdala red,** a coal-tar color used to produce bright pinks on silk. It is the hydrochlorid of the base rosa-naphthylamine.—**Mars red,** a pigment used by artists. It is somewhat similar in composition and color to Indian red.—**Mock Turkey red.** See *barwood.*—**Naphthalene red.** See *naphthalene.*—**New red.** See *fuchsin.*—**Paris red.** Same as *manucin.*—**Peony red.** Same as *corallin red.*—**Persian red.** Same as the normal form of *Indian red.*—**Phenetol red.** Same as *coccinin.*—**Piccolpasso red,** a name given to the deep red of the Italian majolica, obtained by the use of silicate of alumina, in which there is much oxid of iron, and applied upon the yellow enamel already fired: so called from *Piccolpasso*, a sixteenth-century writer on Italian potteries.—**Pompadour red.** See *rose pompadour,* under *rose*[2].—**Pompeian red.** See *Pompeian.*—**Prussian red.** Same as *Venetian red.*—**Saturnine red.** Same as *red lead* (which see, under *lead*[2]).—**Spanish red.** Same as *Venetian red.*—**Turkey red,** an intense scarlet red produced on fabrics by dyeing with the color-giving principles of the madder-root. This has been almost entirely superseded by exactly the same color produced on fabrics by means of artificial alizarin. See *alizarin.* Also called *Adrianople red.*—**Turkey-red oil,** an oil with which cloth is treated in dyeing the color called Turkey red. It is prepared by mixing castor-oil with dilute sulphuric acid; the acid is then washed away with a solution of common salt, and the fatty acids saponified with ammonia. The oil consists chiefly of ammonium sulpho-ricinoleate. Compare *Gallipoli oil,* under *oil.*—**Venetian red,** an important pigment used by artists and house-painters. Formerly it was a natural earth simulating Indian red. It is now made by calcining a mixture of lime and iron sulphate, the resulting product being a mixture of calcium sulphate and oxid of iron in nearly equal proportions. It is somewhat darker than brick-red in color, and is very permanent. (See also *chrome-red, claret-red.*)

redd2, *n.* See *red*5.

red-dace (red′dās), *n.* A common fish of the eastern United States, *Notropis megalops,* formerly named *Leuciscus cornutus.* Also called *redfin* and *rough-head.*

reddet. A Middle English preterit of *read*1.

redden (red′n), *v.* [< *red*1 + *-en*1. Cf. Icel. *roðna* = Dan. *rödme,* redden.] I. *intrans.* 1. To become red; grow red.

> For me the balm shall bleed, and amber flow,
> The coral *redden,* and the ruby glow.
> *Pope,* Windsor Forest, l. 394.

Hence—2. To blush; become flushed.

> Sir Roderick, who to meet them came,
> *Redden'd* at sight of Malcolm Graeme.
> *Scott,* L. of the L., ii. 27.

II. *trans.* 1. To make red.

> And this was what had *redden'd* her cheek
> When I bow'd to her on the moor.
> *Tennyson,* Maud, xix. 6.

2. To cure (herrings). *Halliwell.* [Prov. Eng.]

reddendo (re-den′dō), *n.* [So called from the first word of the clause in the Latin form, *reddendo inde annuatim,* etc.: L. *reddendo,* abl. of *reddendum,* neut. gerundive of *reddere,* render, return, give up or back: see *render*2.] In *Scots law,* a clause indispensable to an original charter, and usually inserted in charters by progress. It specifies the feu-duty and other services which have been stipulated to be paid or performed by the vassal to his superior.

reddendum (re-den′dum), *n.* [So called from the first word in the Latin form of the deed or clause (see def.): L. *reddendum,* neut. gerundive of *reddere,* return, render, give up or back: see *render*2.] In *law,* a reservation in a deed whereby the grantor creates or reserves some new thing to himself, out of what he had granted before. (*Broom and Hadley.*) Thus, the clause in a lease which specifies the rent or other service to be rendered to the lessor is termed the *reddendum,* or *reddendum clause.*

redder (red′ėr), *n.* [< *red*3 + *-er*1.] One who settles or puts in order; especially, one who endeavors to settle a quarrel. [Scotch.]

> "But, father," said Jenny, "if they come to lounder ilk ither as they did last time, suldna I cry on you?" "At no hand, Jenny; the *redder* gets aye the warst lick in the fray." *Scott,* Old Mortality, iv.

reddidit (red′i-dit). [L. *reddidit,* 3d pers. sing. pret. ind. of *reddere,* give up, render: see *render*2.] In *law,* a term used in cases where a man delivers himself in discharge of his bail.

redding1 (red′ing), *n.* [< ME. *redynge;* verbal n. of *red*1, *v.*] 1. Reddle. [Prov. Eng.]

> She [Ireland] is . . . reduc'd . . . to a perfect obedience, . . . partly by voluntary *reddition* and desire of protection, and partly by conquest.
> *Howell,* Vocall Forrest, p. 32.

2. Explanation; rendering.

> When they used [to carry branches] in procession about their altars, they used to pray "Lord, save us; Lord, prosper us"; which hath occasioned the *reddition* of "Hoschiannah" to be, amongst some, that prayer which they repeated at the carrying of the "Hoschiannah," as if itself did signify "Lord, save us."
> *Jer. Taylor,* Works (ed. 1835), I. 288.

3. In *law,* a judicial acknowledgment that the thing in demand belongs to the demandant, and not to the adversary. [Rare.]

redditive (red′i-tiv), *a.* [< L. *redditivus,* of or belonging to the apodosis (in gram.), consequential (cf. *redditio,* the apodosis of a clause), < *reddere,* pp. *redditus,* give back: see *reddition.*] Conveying a reply; answering: as, *redditive* words.

> For this sad sequel is, if not a relative, yet a *redditive* demonstration of their misery; for after the infection of sin follows that infliction of punishment.
> *Rev. T. Adams,* Works, I. 261.

reddle (red′l), *n.* [Also *raddle;* var. of *ruddle*1, q. v.] An earthy variety of hematite iron ore. It is fine-grained, and sufficiently compact to be cut into strips, which are used for various purposes, as for marking sheep and drawing on board. This material is found in several localities in England, and much more rarely in the United States, where it is generally called *red chalk.*

> *Reddle* spreads its lively hues over everything it lights on, and stamps unmistakably, as with the mark of Cain, any person who has handled it for half an hour.
> *T. Hardy,* Return of the Native, i. 9.

reddleman (red'l-man), *n.*; pl. *reddlemen* (-men). [< *reddle* + *-man*.] A dealer in reddle or red chalk, usually a sort of peddler. Also *raddleman*, *ruddleman*.

Raddleman then is a *Reddleman*, a trade (and that a poor one) only in this county [Rutland], whence men bring on their backs a pack of red stones, or ochre, which they sell to the neighbouring countries for the marking of sheep *Fuller*, Worthies, Rutlandshire, III. 38.

Reddlemen of the old school are now but seldom seen. Since the introduction of railways Wessex farmers have managed to do without these somewhat spectral visitants, and the bright pigment so largely used by shepherds in preparing sheep for the fair is obtained by other routes.
T. Hardy, Return of the Native, i. 9.

reddock (red'ok), *n.* Same as *ruddock*. [Prov. Eng.]

redemption (rē-demp'shon), *n.* [< ME. *redemption*, < OF. *redemption*, *redemptiun*, F. *rédemption* = Pr. *redempcio* = Sp. *redencion* = Pg. *redempção* = It. *redenzione*, < L. *redemptio*(*n*-), a buying back or off, a releasing, ransoming, redemption, < *redimere*, buy back, redeem: see *redeem*. Cf. *ransom*, a reduced form of the same word.] The act of redeeming, or the state of being redeemed; ransom; repurchase; deliverance; release: as, the *redemption* of prisoners of war, of captured goods, etc.

But peaceful measures were also employed to procure the *redemption* of slaves; and money sometimes accomplished what was vainly attempted by the sword.
Sumner, Orations, I. 232.

Such a sacrifice
Alone the fates can deem a fitting price
For thy *redemption*.
William Morris, Earthly Paradise, I. 318.

Specifically—(*a*) In *law*, the recovering or disencumbering of property by one who had a right to it subject to the encumbrance or defeasible conveyance, as where a debtor by paying his debt gets back a pledge or a mortgaged estate; also, the right of redeeming and reentering. (*b*) In *com.*, payment to the holders by the issuer of notes, bills, or other evidences of debt. (*c*) In *theol.*, deliverance from sin and its consequences by the obedience and sacrifice of Christ the Redeemer. The word *redemption* presupposes that man is in a state of bondage to the powers of evil—either spiritual powers external to himself, or evil passions and propensities within himself, or both—and that he can be delivered from them only by the sacrifice and suffering of another. This suffering is regarded as the price or ransom paid to redeem the captive. Thus, redemption is substantially equivalent to salvation, but involves the idea of a new and additional right over man acquired by God; and the doctrine of redemption includes the doctrines of atonement, justification, regeneration, and sanctification.

The Mounte of Caluery, where our Sauyour Criste was crucyfyed and suffred dethe for our *redempcion*.
Sir R. Guylforde, Pylgrymage, p. 26.

Plantagenet,
Which held thee dearly as his soul's *redemption*.
Shak., 3 Hen. VI., ii. 1. 102.

By sin man was principally bound to God, as relates to punishment, because he had principally sinned against God; but he was bound to the devil as a tormentor, to whom he was justly delivered by God's permission; but the price of *redemption* was to be paid to the principal, not to the intervening agent, and therefore Christ exhibited His death as the price of our *redemption* to God the Father for our reconciliation, and not to the devil.
Durandus, in Owen's Dogmatic Theology, p. 279.

Brethren of the Redemption of Captives. See *brother*. — **Covenant of redemption,** in *New Eng. theol.* See *covenant*. — **Equity of redemption.** See *equity*.

redemptionary (rē-demp'shon-ā-ri), *n.*; pl. *redemptionaries* (-riz). [< *redemption* + *-ary*.] One who is or may be redeemed or set at liberty by paying a compensation; one who is or may be released from a bond or obligation by fulfilling the stipulated terms or conditions.

None other then such as haue aduentured in the first voyage, or shall become aduenturers in this supply at any time hereafter, are to be admitted in the seid society, but as *redemptionaries*, which will be very chargeable.
Hakluyt's Voyages, III. 176.

redemptioner† (rē-demp'shon-ėr), *n.* [< *redemption* + *-er*[1].] One who redeemed himself or purchased his release from debt or obligation to the master of a ship by his services, or one whose services were sold to pay the expenses of his passage to America.

Sometimes they [indented servants] were called *redemptioners*, because, by their agreement with the master of the vessel, they could redeem themselves from his power by paying their passage. *Jefferson*, Correspondence, I. 405.

Poor wretch! . . . he had to find out what the life of a *Redemptioner* really was, by bitter experience.
J. Ashton, Social Life in Reign of Queen Anne, II. 247.

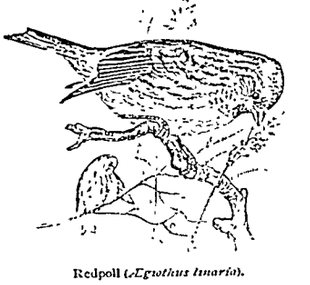
Destruction of Troy (E. E. T. S.), l. 1805.

But trewely no fors of thi *reddour*
To hym that over hymself hath the maystrye.
Chaucer, Fortune, l. 14.

redout[1]†, *v.* See *redoubt*[1].

redout[2], **redoubt**[2] (rē-dout'), *n.* [The form *redoubt* is erroneous, due to confusion with *redoubt*[1] and *redoubtable*; prop. *redout* (= D. G. *redoute* = Sw. *redutt* = Dan. *redute*), formerly also *reduit* (and, after L., *reduct*); < OF. *reduit*, m., *reduite*, f., F. *réduit*, also (fem. It.) *redotte* = Sp. *reducto* = Pg. *reducto, reduto* = It. *ridotto*, a retreat, refuge, redout, < ML. *reductus* (> E. *reduct*), a retreat, refuge, redout, < L. *reducere*, bring back: see *reduce*.] In *fort.*, a general name for nearly every class of works wholly inclosed and undefended by reëntering or flanking angles. The word is, however, most generally used for a small inclosed work of various form—polygonal, square, triangular, or even circular—serving mainly as a temporary field-work. The name is also given to a central or retired work constructed within another, to serve as a place of retreat for the defenders: in this sense generally *redoubt*. Redouts are usually provided with parapet, ditch, scarps, banquette, etc., as in regular fortification. They are especially useful in fortifying the tops of hills, in commanding passes, or in feeling the way through a hostile or wooded country.—**Demilune redout**, a redout placed within the demilune.=Syn. See *fortification*.



redout[3] (rē-dout'), *a.* [< OF. *reduit*, < L. *reductus*, brought back, pp. of *reducere*, bring back: see *reduce*. Cf. *redout*[2], *n.*] In *her.*, bent in many angles: noting a cross with hooked extremities, in the form of the fylfot or swastika.

redoutable, *a.* See *redoubtable*.

redowa (red'ō-ä), *n.* [< F. *redowa*, < Bohem. *rejdowák, rejdowachka*, the dance so called, < *rejdowati*, turn, turn around, bustle about.] 1. A Bohemian dance, which has two forms—the *rejdowák*, resembling the waltz or the mazurka, and the *rejdowachka*, resembling the polka.—2. Music for such a dance or in its rhythm, which is properly triple and quick, but in another form is duple, and readily assimilated to that of the polka.

red-paidle, *n.* The lumpsucker. [Scotch.]

redpoll (red'pōl), *n.* [Also *redpole*: so called from the red color on the head; < *red*[1] + *poll*[1].] 1. A small fringilline bird of the genus *Ægiothus* (or *Acanthis*), the male of which has a crimson poll, a rosy-red breast, and the plumage streaked with flaxen and dusky brown and white. The bill is small, conic-acute, with a nasal ruff; the wings are pointed; the tail is emarginate. Several species inhabit the arctic and north temperate regions of Europe, Asia, and America. The common redpoll is *Æ. linaria*; the mealy redpoll is *Æ. canescens*; the American mealy redpoll is *Æ. exilipes*.

Redpoll (*Ægiothus linaria*).

2. The red-polled warbler, or palm-warbler, of North America, *Dendræca palmarum*, having a chestnut-red poll: more fully called *yellow red-poll*. See *palm-warbler*.

red-polled (red'pōld), *a.* Having a red poll, or the top of the head red.

redraft (rē-drâft'), *v. t.* [< *re-* + *draft*.] To draft or draw anew.

redraft (rē-drâft'), *n.* [< *redraft*, *v.*] 1. A second draft or copy.—2. A new bill of exchange which the holder of a protested bill draws on the drawer or indorsers, by which he reimburses to himself the amount of the protested bill with costs and charges.

redraw (rē-drâ'), *v.* [< *re-* + *draw*.] I. *trans.* To draw again; make a second draft or copy of.

II. *intrans.* In *com.*, to draw a new bill of exchange to meet another bill of the same amount, on the part of the holder of a protested bill, on the drawer or indorser.

redress[1] (rē-dres'), *v.* [< ME. *redressen*, < OF. *redresser*, *redreçer*, *redrecier*, *redresser*, F. *redresser*, set up again, straighten, < *re-*, again, + *dresser*, direct, dress: see *dress*.] I. *trans.* 1†. To set up or upright; make erect; reërect.

Right as floures, thorgh the cold of nyghte
Yclosed, stoupen on her stalkes lowe,
Redressen hem agein the sonne brighte.
Chaucer, Troilus, ii. 969.

2. To set right again; restore; amend; mend.

Redresse me, mooder, and me chastise;
For certeynly my Faderes chastisinge,
That dar I nought abiden in no wise.
Chaucer, A. B. C., l. 129.

As broken glass no cement can *redress*,
So beauty blemish'd once 's for ever lost.
Shak., Pass. Pilgrim, l. 178.

In yonder spring of roses intermix'd
With myrtle, find what to *redress* till noon.
Milton, P. L., ix. 219.

3. To put right, as a wrong; remedy; repair, relieve against, as an injury: as, to *redress* injuries: to *redress* grievances. See *redress*[1], *n.*, 2.

And *redresse* vs the domage that he don has,
By Paris his proude son, in our prise londis.
Destruction of Troy (E. E. T. S.), l. 4017.

Ori-ouns or preyers is for to seyn a pitous wyl of herte that *redresseth* it in God and expresseth it by word outward to remoeven harmes. *Chaucer*, Parson's Tale.

The state of this unconstant world . . . bringeth forth daily such new evils as must of necessity by new remedies be *redrest*. *Hooker*, Eccles. Polity, vi. 2.

Their duty
And ready service shall *redress* their needs,
Not prating what they would be.
Fletcher, Valentinian, ii. 3.

He who best knows how to keep his necessities private is the most likely person to have them *redressed*.
Goldsmith, The Bee, No. 3.

4. To relieve of anything unjust or oppressive; bestow relief upon; compensate; make amends to.

Redres mans sowle from alle mysery,
That he may enter the eternal glorye.
Political Poems, etc. (ed. Furnivall), p. 82.

Will Gaul or Muscovite *redress* ye?
Byron, Childe Harold, ii. 76.

II.† *intrans.* To rise again; reërect one's self.

Yet like the valiant Palme they did sustaine
Their peisant weight, *redressing* vp againe.
Hudson, tr. of Du Bartas's Judith, ii.

redress[1] (rē-dres'), *n.* [< OF. *redresse*, *redresce*, *redrece*, redress; from the verb: see *redress*[1], *v.*] 1†. A setting right again; a putting into proper order; amendment; reformation.

The *redresse* of boistrous & sturdie courages by perswasion. *Puttenham*, Arte of Eng. Poesie, p. 19.

The father, with sharpe rebukes sesoned with louing lookes, causeth a *redresse* and amendment in his childe.
Lyly, Euphues, Anat. of Wit, p. 150.

For us the more necessary is a speedy *redress* of ourselves. *Hooker*.

2. Deliverance from wrong, injury, or oppression; removal of grievances or oppressive burdens; undoing of wrong; reparation; indemnification. In its most general sense *redress* includes whatever relief can be afforded against injustice, whether by putting an end to it, by compensation in damages, by punishing the wrong-doer, or otherwise.

Is not the sword the most violent *redress* that may be used for any evill? *Spenser*, State of Ireland.

Be factious for *redress* of all these griefs.
Shak., J. C., i. 3. 118.

Fair majesty, the refuge and *redress*
Of those whom fate pursues and wants oppress.
Dryden, Æneid, i. 838.

Think not
But that there is *redress* where there is wrong,
Se we are bold enough to seize it.
Shelley, The Cenci, iii. 1.

Ring in *redress* to all mankind.
Tennyson, In Memoriam, cvi.

To every one o' my grievances law gave
Redress. *Browning*, Ring and Book, I. 237.

=Syn. 2. Relief, amends, compensation.

redress[2] (rē-dres'), *v. t.* [< *re-* + *dress*.] To dress again, in any sense: as, to *redress* furniture or leather; to *redress* a wound.

redressal (rē-dres'al), *n.* [< *redress*[1] + *-al*.] The act of redressing. *Imp. Dict.*

redresser (rē-dres'ėr), *n.* One who gives redress.

redressive (rē-dres'iv), *a.* [< *redress*[1] + *-ive*.] Affording redress; giving relief. [Rare.]

Can I forget the generous band
Who, touch'd with human woe, *redressive* search'd
Into the horrors of the gloomy jail?
Thomson, Winter, l. 360.

redressless (rē-dres'les), *a.* [< *redress*[1] + *-less*.] Without redress or amendment; without relief.

redressment (rē-dres'ment), *n.* [< OF. *redrecement*, *redressement*, F. *redressement*; as *redress* + *-ment*.] Redress; the act of redressing.

red-ribbon (red'rib″on), *n.* The band-fish.

redrive (rē-drīv'), *v. t.* [< *re-* + *drive*.] To drive back; drive again. *Southey*.

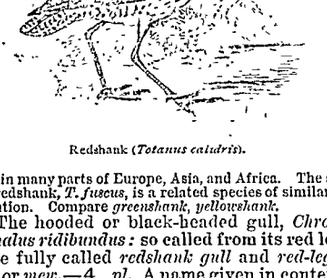
red-roan (red'rōn), *a.* See *roan*[1].

red-robin (red'rob″in), *n.* The red-rust, *Puccinia graminis*. [Eng.]

redroot (red'röt), *n.* 1. An American shrub, *Ceanothus Americanus*, the New Jersey tea. The stems are from 1 to 3 feet high from a dark-red root, the leaves ovate or oblong-ovate, the small white flowers gathered in rather pretty dense clusters at the ends of leafy shoots. The name is more or less extended to other members of the genus.

2. A herbaceous plant, *Lachnanthes tinctoria*, of the *Hæmodoraceæ*, or bloodwort family. It grows in wet sandy places in the eastern United States near the coast. It has a simple stem with sword-shaped leaves mostly from near the base, and woolly flowers, yellow within, crowded in a dense compound cyme. The root is red, and has been used in dyeing. Upon authority adduced by Darwin ("Origin of Species," ch. i.), the root of this plant is fatally poisonous to white pigs which eat it, but not to black; the statement, however, requires confirmation. Also *paintroot*.

3. The alkanet, *Alkanna tinctoria*.—4. One of the pigweeds, *Amarantus retroflexus*. [U. S.]



redruthite (red'röth-īt), *n.* [< *Redruth*, in Cornwall, England, + *-ite*[2].] Copper-glance: same as *chalcocite*.

redsear (red'sēr), *v. i.* [< *red* + *sear* (?).] To break or crack when too hot, as iron under the hammer: a word used by workmen. Also *redshare*.

red-seed (red'sēd), *n.* Small crustaceans, as ostracodes, copepods, etc., which float on the surface of the sea, and upon which mackerel, menhaden, etc., feed. Some red-seed is said to injure the fish.

red-shafted (red'shâf″ted), *a.* Having red shafts of the wing- and tail-feathers: specifically applied to *Colaptes mexicanus*, the red-shafted woodpecker or Mexican flicker, related to the common flicker or yellow-shafted woodpecker. It abounds in western North America.

redshank (red'shangk), *n.* [< *red*[1] + *shank*.] 1. The fieldfare, *Turdus pilaris*. [Local, Eng.]—2. A wading bird of the family *Scolopacidæ* and genus *Totanus*, having red shanks. The common redshank is *T. calidris*, about 11 inches long, common in many parts of Europe, Asia, and Africa. The spotted redshank, *T. fuscus*, is a related species of similar distribution. Compare *greenshank*, *yellowshank*.

Redshank (*Totanus calidris*).

3. The hooded or black-headed gull, *Chroicocephalus ridibundus*: so called from its red legs: more fully called *redshank gull* and *red-legged gull* or *mew*.—4. *pl.* A name given in contempt to Scottish Highlanders, and formerly to native Irish, in allusion to their dress leaving the legs exposed.

Mamertinus . . . dooth note the *Redshanks* and the Irish (which are properlie the Scots) to be the onlie enimies of our nation.
Harrison, Descrip. of Britain, p. 6 (Holinshed's Chron., I.).

And when the *Redshanks* on the borders by
Incursions made, and rang'd in battell stood
To beare his charge, from field he made them flie,
Where fishie Moine [in Galway] did blush with crimson blood. *Mir. for Mags.* (England's Eliza, st. 105).

They lay upon the ground covered with skins, as the *red-shanks* do on heather. *Burton*, Anat. of Mel., p. 527.

Though all the Scottish hinds would not bear to be compared with those of the rich counties of South Britain, they would stand very well in competition with the peasants of France, Italy, and Savoy, not to mention the mountaineers of Wales, and the *red-shanks* of Ireland.
Smollett, Humphrey Clinker, ii. 41. (*Davies.*)

redshanks (red'shangks), *n.* 1. Same as *herb-robert*.—2. See *Polygonum*.

redshare (red'shār), *v. i.* A variant of *redsear*.

red-short (red'shôrt), *a.* Noting iron or steel when it is of such a character that it is brittle at a red heat.

The former substance [sulphur] rendering the steel more or less brittle when hot (*red-short* or hot-short).
Encyc. Brit., XIII. 283.

red-shortness (red'shôrt″nes), *n.* In *metal.*, the quality or state of being red-short.

Red-shortness is often the result of the presence of an undue proportion of sulphur in the metal.
W. H. Greenwood, Steel and Iron, p. 19.

The cold-shortness or *red-shortness* of iron or steel is due principally to an admixture of oxide of iron.
Sci. Amer., N. S., LX. 408.

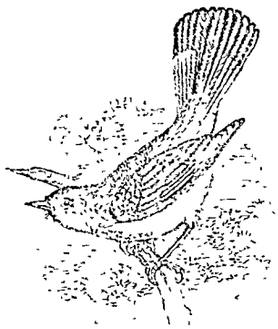
red-shouldered (red'shōl″dėrd), *a.* Having the "shoulder"—that is, the carpal angle or bend of the wing—red, as a bird. The red-shouldered blackbird is *Agelæus gubernator*, common in western North America, where it replaces to some extent the common red-winged blackbird, from which it differs in having the scarlet patch on the wing not bordered with buff. The red-shouldered buzzard is *Buteo lineatus*, one of the commonest of the large hawks of the United States, having the lesser wing-coverts reddish when adult.—**Red-shouldered falcon**†, the adult red-shouldered buzzard.

red-sided (red'sī″ded), *a.* Having red on the sides: specifically noting the red-winged thrush, *Turdus iliacus*.

redsides (red'sīdz), *n.* A small cyprinoid fish, *Notropis* or *Lythrurus ardens*, common in the streams of the southern United States. Also called *redfin*.

redskin (red'skin), *n.* A Red Indian; a North American Indian.

The Virginia frontiersmen were angry with the Pennsylvania traders for selling rifles and powder to the *redskins*. *The Atlantic*, LXIV. 819.



red-spider (red'spī″dėr), *n.* A small red mite or acarine, *Tetranychus telarius*, formerly called *Acarus telarius*, now placed in the family *Tetranychidæ*: found in conservatories.

red-staff (red'staf), *n.* A millers' straight-edge, used in dressing millstones. The true edge, reddened by ocher, is gently rubbed on the stone, and the projecting points are thus detected, even when the irregularity of surface is very minute.

redstart (red'stärt), *n.* [< *red*[1] + *start*[2].] One of several entirely different birds which have the tail more or less red. (*a*) A small sylviine bird, *Ruticilla phœnicura*, of Europe, Asia, and Africa, related to the redbreast and bluethroat. Also *fretail*, *redtail*, etc. A similar species, *R. titys* or *titthys* is known as the *black redstart*. (*b*) In the United States, a fly-catching warbler, *Setophaga ruticilla*, of the family *Sylvicolidæ* or *Mniotiltidæ*. The male is lustrous blue-black, with white belly and vent, the sides of the breast, the lining of the wings, and much of the extent of the wing- and tail-feathers fiery orange or flame-color, the bill and feet black. The female is mostly plain olivaceous, with the parts which are orange in the male clear pale yellow. The length is 5¼ inches, the extent 7¾. This beautiful bird abounds in woodland in eastern North America; it is migratory and insectivorous, has a singular song, builds

a neat nest in the fork of a branch, and lays four or five eggs, which are white, speckled with shades of reddish brown.—**Blue-throated redstart.** Same as *bluethroat*.

redstreak (red'strēk), *n.* 1. A sort of apple, so called from the color of the skin.

The *redstreak*, of all cyder fruit, hath obtained the preference. *Mortimer*, Husbandry.

2. Cider pressed from redstreak apples.

Herefordshire *redstreak* made of rotten apples at the Three Cranes, true Brunswick Mum brew'd at S. Katherines. *Character of a Coffee-house* (1673), p. 3. (*Halliwell.*)

redtail (red'tāl), *n.* and *a.* I. *n.* 1. Same as *redstart* (*a*).—2. The red-tailed buzzard, *Buteo borealis*, one of the commonest and largest hawks of North America, when adult having the upper side of the tail bright chestnut-red. The plumage otherwise is very variable, not only with age, but also according to geographical distribution, there being several varieties or local races in western parts of the continent. It is commonly known as *hen-hawk* or *chicken-hawk*, and the young, without the red tail, is the *white-breasted hawk*. The male is from 19 to 22 inches long, and 48 inches or more in spread of wing; the female is 21 to 24 inches long, and spreads 56 inches. See cut under *Buteo*.

II. *a.* Having a red tail.

red-tape (red'tāp'), *a.* [< *red tape*: see *tape*.] Pertaining to or characterized by official routine or formality. See *red tape*, under *tape*.

Exposures by the press and criticisms in Parliament leave no one in ignorance of the vices of *red-tape* routine. *H. Spencer*, Man vs. State, p. 55.

We working men, when we do come out of the furnace, come out not tinsel and papier maché, like those fops of *red tape* statesmen, but steel and granite. *Kingsley*, Alton Locke, iv. (*Davies.*)

red-taped (red'tāpt'), *a.* [< *red tape* + *-ed*².] Same as *red-tape*. *Nature*, XLII. 106.

red-tapery (red'tā'pē-ri), *n.* [< *red tape* + *-ry*.] Same as *red-tapism*.

red-tapism (red'tā'pizm), *n.* [< *red tape* + *-ism*.] Strict observance of official formalities; a system of vexatious or tedious official routine.

He at once showed . . . how little he had of the official element which is best described as *red-tapeism*. *T. W. Reid*, Cabinet Portraits, p. 52.

He loudly denounces the Tchinovnik spirit — or, as we should say, *red-tapeism* in all its forms. *D. M. Wallace*, Russia, p. 261.

red-tapist (red'tā'pist), *n.* [< *red tape* + *-ist*.] 1. A clerk in a public office. *Quarterly Rev.*—2. One who adheres strictly to forms and routine in official or other business.

You seem a smart young fellow, but you must throw over that stiff *red tapist* of yours, and go with Public Opinion and Myself *Bulwer*, My Novel, x. 20. (*Davies.*)

In no country is the *red tapist* so out of place as here. Every calling is filled with bold, keen, subtle witted men, fertile in expedients and devices, who are perpetually inventing new ways of buying cheaply, underselling, or attracting custom. *W. Mathews*, Getting on in the World, p. 90.

red-thighed (red'thīd), *a.* Having or characterized by red thighs.—**Red-thighed locust.** See *locust*.

red-throated (red'thrō'ted), *a.* Having a patch of red on the throat: as, the *red-throated* diver, *Colymbus* or *Urinator septentrionalis*.

red-thrush (red'thrush), *n.* The redwing, *Turdus iliacus*.

red-tipped (red'tipt), *a.* Having the wings tipped with red: as, the *red-tipped* clearwing, a British moth, *Scsia formicæformis*.

redtop (red'top), *n.* A kind of bent-grass, *Agrostis vulgaris* (*A. alba*, var. *vulgaris*). The species is common throughout the northern parts of the Old World, and is thoroughly naturalized in America. It is marked to the eye by its large light panicle of minute spikelets on delicate branches, which is of a reddish hue. Other varieties, called *florin*, *white bent*, etc., have a whitish top and a longer ligule. Redtop, at least in the United States, is a highly valued pasture-grass, and is also sown for hay. It forms a fine turf, and is suitable for lawns. Also called *fine bent*, *finetop-grass*, and *herd's-grass*. [U. S.]—**False redtop**, the fowl meadow-grass, *Poa serotina*, which has somewhat the aspect of redtop.—**Northern or mountain redtop**, *Agrostis exarata*, a species found from Wisconsin to the Pacific, allied to the common redtop, and giving promise of similar service in its own range.—**Tall redtop**, a tall reddish wiry grass, *Triodia cuprea*, found in the United States.

red-tubs (red'tubz), *n.* The sapphirine gurnard, *Trigla hirundo*. [Local, Eng.]

redub† (rē-dub'), *v. t.* [Early mod. E. also *re-doub*; < OF. *redouber*, *redauber* (also *radauber*, *radouber*, F. *radouber*), repair, mend, fit, < *re-*, again, + *douber* (*adouber*), mend, repair, etc.: see *dub*¹.] To repair or make reparation for; make amends for; requite.

Whiche domage . . . neither with treasure ne with powar can be *redoubed*. *Sir T. Elyot*, The Governour, ii. 14.

I doubte not by Goddes grace so honestly to *redubbe* all thynges that have been amys. *Ellis*, Literary Letters, p. 4.

O Gods, *redubbe* them vengeaunce iust. *Phaer*, Æneid, vi.

Whether they [monks] will conform themselves gladly, for the *redubbing* of their former trespasses, to go to other houses of their coat, where they shall be well received. *State Papers*, I. 540, in R. W. Dixon's Hist. Church of [Eng., vii., note.

redubber† (rē-dub'ėr), *n.* [Also *redubbor*; < OF. **redoubeur*, *radoubeur*, one who mends or repairs a ship, < *redouber*, *radouber*, mend: see *redub*.] One who bought stolen cloth and so altered it in color or fashion that it could not be recognized.

reduce (rē-dūs'), *v. t.*; pret. and pp. *reduced*, ppr. *reducing*. [< ME. *reducen*, < OF. *reducier*, vernacularly *reduire*, F. *réduire* = Pr. *reduzir*, *reduire* = Cat. *reduir* = Sp. *reducir* = Pg. *reduzir* = It. *ridurre*, < L. *reducere*, lead or bring back, draw back, restore, replace, bring to a certain condition, reduce, < *re-*, back, + *ducere*, lead, bring: see *duct*. Therupon he *reduced* to their memorie the battailes they had fought. *J. Bremde*, tr. of Quintus Curtius, iv.

Abate the edge of traitors, gracious Lord,
That would *reduce* these bloody days again.
Shak., Rich. III., v. 5. 36.

A good man will go a little out of his road to *reduce* the wandring traveller; but if he will not return, it will be an unreasonable compliance to go along with him to the end of his wandring. *Jer. Taylor*, Rule of Conscience, II. iii. 19.

Mr. Cotton . . . did spend most of his time, both publicly and privately, to discover . . . errors, and to *reduce* such as were gone astray. *Winthrop*, Hist. New England, I. 304.

And 'cause I see the truth of his affliction,
Which may be your's, or mine, or any body's,
Whose passions are neglected, I will try
My best skill to *reduce* him.
Shirley, Hyde Park, v. 1.

It were but right
And equal to *reduce* me to my dust.
Milton, P. L., x. 748.

2. In *surg.*, to restore to its proper place, or so that the parts concerned are brought back to their normal topographical relations: as, to *reduce* a dislocation, fracture, or hernia.—3. To bring to any specified state, condition, or form: as, to *reduce* civil affairs to order; to *reduce* a man to poverty or despair; to *reduce* glass to powder; to *reduce* a theory to practice; to *reduce* a Latin phrase to English.

Being inspired with the holy spirite of God, they (the 72 Interpreters chosen by Eleazar out of each tribe) *reduced* out of Hebrue into Greeke all the partes of the olde Testament. *Guevara*, Letters (tr. by Hellowes, 1577), p. 380.

Doe you then blame and finde faulte with soe good an Acte in that good pope as the *reducing* of such a greate people to Christianitye? *Spenser*, State of Ireland.

He had beene a peace-maker to *reduce* such and such, which were at oddes, to amitie. *Purchas*, Pilgrimage, p. 453.

Reduc'd to practice, his beloved rule
Would only prove him a consummate fool.
Cowper, Conversation, l. 139.

Holland was *reduced* to such a condition that peace was her first necessity. *Lecky*, Eng. in 18th Cent., p. 463.

4. In *metal.* and *chem.*, to bring into the metallic form; separate, as a metal, from the oxygen or other mineralizer with which it may be combined, or change from a higher to a lower degree of oxidation: as, to *reduce* the ores of silver or copper.—5†. To atone for; repair; redress.

Till they *reduce* the wrongs done to my father.
Marlowe.

6. To bring down; diminish in length, breadth, thickness, size, quantity, value, or the like: as, to *reduce* expenses; to *reduce* the quantity of meat in diet; to *reduce* the price of goods; to *reduce* the strength of spirit; to *reduce* a figure or design (to make a smaller copy of it without changing the form or proportion).

He likes your house, your housemaid, and your pay;
Reduce his wages, or get rid of her,
Tom quits you. *Cowper*, Truth, l. 211.

7. To bring to an inferior condition; weaken; impoverish; lower; degrade; impair in fortune, dignity, or strength: as, the family were in *reduced* circumstances; the patient was much *reduced* by hemorrhage.

Yet lo! in me what authors have to brag on!
Reduced at last to hiss in my own dragon.
Pope, Dunciad, iii. 286.

The Chamber encroached upon the sovereign, thwarted him, *reduced* him to a cypher, imprisoned him, and slew him. *W. R. Greg*, Misc. Essays, 2d ser., p. 93.

I dare say he was some poor musicianer, or singer, or a *reduced* gentleman, perhaps, for he always came after dusk, or else on bad, dark days. *Mayhew*, London Labour and London Poor, I. 231.

8. To subdue, as by force of arms: bring into subjection; render submissive: as, to *reduce* mutineers to submission; Spain, Gaul, and Britain were *reduced* by the Roman arms.

Charles marched northward at the head of a force sufficient, as it seemed, to *reduce* the Covenanters to submission. *Macaulay*, Nugent's Hampden.

Montpensier was now closely besieged, till at length, *reduced* by famine, he was compelled to capitulate. *Prescott*, Ferd. and Isa., ii. 2.

The fortresses garrisoned by the French in Spain were *reduced*; but at what a prodigious expenditure of life was this effected! *Encyc. Brit.*, IX. 457.

9. To bring into a class, order, genus, or species; bring within certain limits of definition or description.

I think it [analogy between words and reason] very worthy to be *reduced* into a science by itself. *Bacon*, Advancement of Learning, ii. 236.
